PREFACE

By the Constitution of the Commonwealth of Australia, the Parliament of the Commonwealth is empowered, subject to the Constitution, 'to make laws for the peace, order, and good government of the Commonwealth, with respect to . . . Census and statistics.' In the exercise of the power so conferred, a Census and Statistics Act was passed in 1905, and in the year following the Commonwealth Bureau of Census and Statistics was created. The first Official Year Book was published early in 1908. The publication here presented is the fifty-fourth Official Year Book issued under the authority of the Commonwealth Government.

The special index (preceding the general index) provided at the end of the volume, together with certain references given in the various chapters, will assist in tracing in previous issues special articles and other more or less important miscellaneous matter which, in order to conserve space, have been omitted or abbreviated in the present volume. Where, in the general index, more than one reference to a subject is given, the chief reference (or references) has been specially indicated wherever possible.

Among new or revised material included the following items may be especially mentioned.

Chapter 7. Population. Inclusion of 1966 population census material, in particular a new table Urban Centres: Number and Population, by Size, States and Territories (pages 127-8) and characteristics of the population (pages 135-49), together with graphs.

Chapter 9. Housing and Building. Inclusion of 1966 population census material on dwellings, together with graphs (pages 219-30).

Chapter 11. Overseas Transactions. Expanded tables of exports and imports, by country of consignment or origin, and by divisions of the Australian Export and Import Commodity Classifications (pages 350-69).

Chapter 12. Transport, Communication and Travel. Revision and amplification of paragraphs on Commonwealth navigation and shipping legislation (pages 389-91); inclusion of new tables on overseas shipping cargo loaded and discharged, according to major trade areas and types of service (liner or tramp, etc.) (pages 402-5); revision of section Railways (pages 412-23).

Chapter 15. Education, Cultural Activities, and Research. Inclusion of new matter and tables on teachers colleges (pages 524-5), and on expenditure on education (pages 551-3 and 554-5).

Chapter 16. Public Justice. Re-insertion of paragraphs on children's courts, revised (pages 591-3); inclusion of new comprehensive table on numbers in police force staffs (pages 611-12).

Chapter 18. Private Finance. Insertion of a revised and expanded section on Finance Companies (pages 677-87).

Chapter 22. Water Conservation and Irrigation. Inclusion of former article on *Droughts in Australia* by J. C. Foley, revised and brought up-to-date by the Director of the Commonwealth Bureau of Meteorology (pages 991-6).

Chapter 25. Mineral Industry. Addition of a section on overseas participation in the Australian mining industry (pages 1059-61), and expansion of the section on mineral exploration (pages 1062-4).

Chapter 26. Manufacturing Industry. Addition of a section on indexes of factory production (pages 1098-9).

Chapter 29. The Territories of Australia. Inclusion of a section on the weather and climate of Papua and New Guinea, prepared by the Director of the Commonwealth Bureau of Meteorology (pages 1190-6).

Statistical Summary (pages 1259-71). This has been expanded, both in subject-matter and in the range of years covered, running back in single years to 1942 or 1941-42.

A large density map of Australia is inserted loose inside the back cover. It shows urban and rural densities of the various States and Territories against a background of rainfall distribution.

The usual series of graphs has been revised and extended.

The material in the Year Book has been carefully checked throughout, but I shall be grateful to those who will be kind enough to point out defects or make suggestions.

The statistics contained in the majority of the chapters of this volume relate to the years ended June or December 1967. More detailed statistics on subjects dealt with in the Year Book are available in the various annual reports published by this Bureau, and more recent statistics are contained in the *Digest of Current Economic Statistics* (monthly), the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics*, and in other publications issued monthly, quarterly,

half-yearly, or yearly. These publications are listed in Statistical publications of Australia (*see* Chapter 30, Miscellaneous), and the last pages of this volume contain a list of current and recent printed publications available for purchase, showing issue numbers, dates, and prices.

This issue of the Year Book is published for the first time in International size B5, resulting in a slight increase in page dimensions; and the opportunity has been taken to increase the size of type generally used from 7 on 8 point Times Roman to 8 on 9 point Times Roman, and to make some other changes in presentation.

A State Year Book is published by the Deputy Commonwealth Statistician of each State. These publications contain greater statistical detail and additional supplementary material concerning the individual States which cannot be accommodated in the Commonwealth Year Book. The Deputy Commonwealth Statisticians of all States also issue Pocket Year Books and a number of printed and mimeographed publications dealing with their respective States. These publications are listed on pages 1163-5 of the 1962 issue of the Year Book, and, together with publications of the Central Bureau, in *Publications of the Commonwealth Bureau of Census and Statistics* issued annually by this Bureau.

My thanks are tendered to the Deputy Commonwealth Statisticians of the several States, who have collected and compiled the data on which a great part of the information given in the Year Book is based. Thanks are also tendered to the responsible officers of the various Commonwealth and State Departments and to others who have kindly, and often at considerable trouble, supplied information, and to the Government Printer and his staff for their services in printing this Year Book and in assisting and advising throughout its preparation.

K. M. ARCHER
Commonwealth Statistician

Commonwealth Bureau of Census and Statistics,
Canberra, A.C.T. 2600. August 1968

CONTENTS

	PAGE
CHAPTER 1. DISCOVERY, COLONISATION AND FEDERATION OF AUSTRALIA	1
Early knowledge and discovery of Australia (1); The annexation of Australia (2); The creation of the several Colonies (3); The establishment of the Commonwealth of Australia (4); The Constitution of the Commonwealth (6); The External Territories of Australia (22).	
<i>Plate—1, Map of Australia (frontispiece)</i>	
CHAPTER 2. PHYSICAL GEOGRAPHY AND CLIMATE	25
General description of Australia (25); Weather and climate of Australia—precipitation (28), temperature (33), humidity, evaporation (35), sunshine and cloud (36), wind (36), storms and tropical cyclones (37), climatological tables (38), weather of 1967 (49).	
<i>Plates—2-4, Rainfall; 5-8, Temperatures; 9, Frost free period; 10, Evaporation; 11-12, Hours of sunshine; 13-14, Wind roses; 15, Thunderdays (between pages 32 and 33—maps).</i>	
CHAPTER 3. GENERAL GOVERNMENT	51
Parliamentary government (51); The Sovereign (51); The Governor-General (51); Governors (53); Ministries (54); Parliaments and elections (59, 66); Commonwealth referendums (65); Commonwealth legislation (68); Cost of parliamentary government (73).	
CHAPTER 4. DEFENCE	75
Department of Defence (75); Naval defence (79); Military defence (81); Air defence (83); Department of Supply (85).	
CHAPTER 5. REPATRIATION	91
War pensions (91); Service pensions (98); Medical treatment for ex-servicemen and dependants of ex-servicemen (101); General Repatriation benefits and miscellaneous (103); The Services Canteens Trust Fund (105).	
CHAPTER 6. INTERNATIONAL RELATIONS	107
Relations with Commonwealth and other countries (107); The Colombo Plan (108); Participation in the United Nations (110); Diplomatic representation (111); Overseas trade representation (114); Commonwealth Migration Offices (115).	
CHAPTER 7. POPULATION	117
Population statistics (117); The census (119); Population recorded at censuses (120); Growth and distribution (121); Mean population (130); Elements of increase (130); Density (133); Sex distribution (134); Age distribution (134); General characteristics (135); The Aboriginal population (150); Overseas arrivals and departures (150); Assisted migration (159); Regulation of immigration (164); Passports, citizenship and naturalisation (166); Population of External Territories (171); International population statistics (171).	
<i>Plates—16, Population of Australia (118); 17, Urban and rural population (124); 18, Population, by age group (136); 19, Population, by marital status (138); 20, Population, by birthplace (141); 21, Overseas born population, by period of residence (142); 22, Population, by nationality (145); 23, Population, by religious denomination (148); 24, Overseas arrivals and departures (152).</i>	
CHAPTER 8. VITAL STATISTICS.	175
Provisions for registration and compilation of statistics (175); Marriages (176); Fertility and reproduction—births and confinements (181), fertility (184), masculinity of births (188), ex-nuptiality (189), multiple births (190), characteristics of parents (190), still-births (194); Mortality—deaths (195), rates (196), life tables (198), ages at death (201), infant mortality (202), causes of death (207); Vital statistics of External Territories (217); International vital statistics (217).	
<i>Plates—25, Births, deaths and marriages (177); 26, Rates of births, deaths and natural increase (183); 27, Age-specific birth rates (186); 28, Age-specific death rates (203); 29, Infant mortality rates (205).</i>	

CHAPTER 9. HOUSING AND BUILDING**219**

Census dwellings (219); Building (230); Government activities in the housing field (242); Advances to home purchasers (252).

Plates—30, Occupied dwellings (220); 31, Occupied private dwellings, by class (223); 32, Occupied private dwellings, by nature of occupancy (227); 33, New houses (235); 34, New flats (238).

CHAPTER 10. LABOUR, WAGES AND PRICES**261**

Retail prices and price indexes (261); Consumer Price Index (262); Tabular statements (263); International comparisons (267); Wholesale prices and price indexes (268); Export prices and price indexes (272); Arbitration and Wages Boards Acts and associated legislation (276); Incidence of industrial awards, determinations and agreements (279); Rates of wage and hours of work (279); Average weekly earnings (287); Surveys of wage rates, earnings and hours (288); Determination of wage rates (305); Annual leave (311); Long service leave (313); Industrial disputes (315); Labour organisations (321).

Plate—35, Industrial disputes (316).

CHAPTER 11. OVERSEAS TRANSACTIONS

Overseas trade, constitutional provisions and legislation (327); Government authorities (331); Trade agreements (331); Trade services (335); Export Payments Insurance Corporation (335); Collection and presentation of trade statistics (336); Total overseas trade (339); Exports of principal articles of Australian produce (342); Classified summary of overseas trade (342); Exports, by industrial group (344); Imports of merchandise, by economic class (345); Trade of Australia and other countries (346); Direction of overseas trade (346); Trade with the United Kingdom (371); Trade with eastern countries (372); Trade at customs ports (373); Ships' and aircraft stores (374); Movement of bullion and specie (374); Import clearances, and net customs duties collected (375); Trade in calendar years (376); Excise (376); Overseas investment by private investors (377); Balance of payments—explanatory notes (383), tables (385), international reserves (388); Indexes of value of imports and exports at constant prices (388).

Plates—36, Overseas trade (340); 37, Values of imports and exports: proportions by country (349).

CHAPTER 12. TRANSPORT, COMMUNICATION AND TRAVEL**389**

The Australian Transport Advisory Council and its standing committees (389); Control of shipping (389); System of record (393); Overseas shipping (394); Interstate shipping (395); Shipping at principal ports (398); Shipping cargo (399); World shipping tonnage (406); Vessels registered (406); Shipping freight rates (407); Shipping casualties (411); Government railways (412); Private railways (415); Government operations (415), rolling stock (416), traffic (417), finance (421), employment, salaries and wages (423), accidents (423), fuel used (423); Tramway, trolley-bus, omnibus, and ferry services (423); Motor vehicles on register (425); Registrations of new motor vehicles (426); Licences (427); Road traffic accidents (427); Roads (430); Civil aviation (431), international activity (433), pilots, aerodromes, facilities, registrations, accidents (435–7); Postmaster-General's Department, facilities, employees, finances (437–40); Postal services (441); Internal telecommunication services (443); Overseas telecommunication services (445); Radiocommunication stations authorised (447); Broadcasting services (447); Television services (449); Broadcast listeners' and television viewers' licences (450); Travel—overseas movement (451), tourist organisation (460).

Plates—38, Overseas and interstate shipping cargo (401); 39, Government railways, route-mileage and traffic (414); 40, Overseas visitors arriving—short-term (453); 41, Residents departing—short-term (454).

CHAPTER 13. WELFARE SERVICES**461**

Expenditure (461); Commonwealth social services—benefits provided (464), age and invalid pensions (464), sheltered employment allowance (467), child endowment (467), Commonwealth Rehabilitation Service (470), funeral benefits (471), maternity allowances (472), unemployment, sickness and special benefits (473), widows' pensions (475), reciprocal agreements with other countries (476), assistance to homes for aged and disabled persons (477); Non-government welfare organisations (478).

CHAPTER 14. PUBLIC HEALTH**481**

State public health legislation and administration (481); Supervision and care of infant life (481); Medical and dental inspection of school children (482); Cremations (485); National health benefits (485); Commonwealth organisations concerned with health (492); Control of infectious and contagious diseases (494); Commonwealth grants to organisations associated with public health (498); Public hospitals and nursing homes (499); Mental health services (501); Private hospitals and nursing homes (504); Repatriation hospitals (505); Hansenite hospitals (505).

CHAPTER 15. EDUCATION, CULTURAL ACTIVITIES, AND RESEARCH 507

Education in Australian schools (507); Numbers of schools, teachers and pupils (510); Other aspects of school education (518); Pre-school education (521); Technical education (521); Teacher education (524); Government expenditure on schools and technical education (527); Non-government schools' finance (529); Universities (529), staff (531), students (532), degrees conferred, etc. (536), finance (538); Other advanced level institutions (545); Commonwealth activities in education (548); Commonwealth expenditure on education (551); Adult education (553); Overseas students (553); Organisations associated with education (553); Expenditure on education (554); Commonwealth libraries (556); State libraries (558); University libraries (561); Children's libraries and school libraries (564); Archives (565); Museums and art galleries (567); Botanical and zoological gardens (571); Book publishing (572); Film production and censorship (575); Arts Council of Australia (577); Australian Elizabethan Theatre Trust (578); Australian Council of National Trusts (578); Historic Memorials Committee (579); Commonwealth Art Advisory Board (579); Research in industry (579); Commonwealth Scientific and Industrial Research Organization (580); Mount Stromlo and Siding Spring Observatories (582); Australian Atomic Energy Commission (582); Scientific societies (584).

Plates—42, School pupils, by age group (515); 43, University students enrolled: courses (533); 44, University degrees conferred (539).

CHAPTER 16. PUBLIC JUSTICE 587

The Australian legal system (587); Lower (magistrates') courts (589); Higher (judges') courts (595); Serious crime (595); Civil cases (601); Transactions of the High Court (601); Divorce (602); Bankruptcy (608); Police (610); Prisons (612); Patents, trademarks and designs (613); Copyright (614); Cost of administration of law and order (614).

CHAPTER 17. NATIONAL ACCOUNTS 617

Description of National Accounts (617); National Accounts and tables (621); Description of items in National Accounts (629).

Plate—45, Articulation of Australian National Accounts (618).

CHAPTER 18. PRIVATE FINANCE 633

Currency (633); Australian coinage (633); Australian note issue (635); Rates of exchange (637); Volume of money (638); Banking (638); Reserve Bank of Australia (641); Commonwealth Development Bank of Australia (644); Cheque-paying banks (645); Savings banks (668); Finance companies (677); Life insurance (688); Fire, marine and general insurance (702); Export Payments Insurance Corporation (704); Instalment credit for retail sales (704); New capital raisings by companies in Australia (708); Unit trusts, land trusts and mutual funds (710); Pastoral finance companies (712); Rural debt (714); Short-term money market (714); Friendly societies (716); Building societies (716); Co-operative societies (718); Lotteries (719); Betting (720); Pension and superannuation schemes (720); Probates and letters of administration (725).

Plates—46, Banking (654); 47, Major trading banks: classification of advances within Australia (659); 48, Major trading banks: classification of deposits within Australia (661); 49, Major trading banks: classification of overdraft limits (665); 50, Life insurance (690).

CHAPTER 19. PUBLIC FINANCE 727

Financial provisions of the Constitution (727); Commonwealth Public Account (727); All Commonwealth funds—receipts and expenditure (729), expenditure by function (729), main components of expenditure (734), receipts (747); Commonwealth Consolidated Revenue Fund—expenditure (754), receipts (760); Commonwealth trust funds (761); Commonwealth Loan Fund (761); State finance (763); State Consolidated Revenue Fund—expenditure (764), receipts (766); State receipts—taxation (769), business undertakings (771), other (773); State surplus revenue (774); State Loan Funds (774); Advances to settlers (777); Commonwealth and State finance (780); Government securities on issue (781); Commonwealth loan raisings (789); National Debt Sinking Fund (794); Taxes on income—system (798), assessable income (798), concessional deductions (799), exemptions (800), rates, individuals (800), taxes on specified incomes (801), company income taxes (803), income tax assessments (804), yield of income taxes (806).

Plates—51, All Commonwealth funds, receipts and expenditure (730); 52, State consolidated revenue funds, receipts and expenditure (767).

CHAPTER 20. LOCAL GOVERNMENT 809

Local government authorities (809); Semi-governmental authorities (809); Local government—areas, population, dwellings, valuations, etc. (811); finances (812); Local and semi-governmental authorities' debt (816); Roads and bridges (818); Water supply, sewerage and drainage (828); Harbour boards and trusts (841); Fire brigades (847).

CHAPTER 21. RURAL INDUSTRY 849

Disposal of crown lands (849); Closer settlement and war service settlement (851); Alienation and occupation of crown lands (852); Number and area of rural holdings (852); Employment on rural holdings (853); Farm machinery on rural holdings (855); The soils of Australia (857); Soil improvement and conservation (857); Agricultural production—progress, assistance and control (859); distribution, production and value of crops (861), wheat (867), other cereal crops (880), fodder crops (889), industrial crops (892), vegetables (902), fruit (906), vineyards (902); Pastoral production—livestock numbers (913), value of production (913), indexes of quantum and price (915), sheep (916), cattle (917), horses (920), wool (920), meat (931), other pastoral products (937); The dairying industry (938); The poultry industry (951); The bee-farming industry (954); Value of dairy, poultry and bee production and indexes of price and quantum of farm production (956).

Plates—53, Area of crops (862); 54, Wheat for grain (873); 55, Livestock (914); 56, Sheep numbers and wool production (924); 57, Production of meat (934); 58, Milk production and utilisation (943).

CHAPTER 22. WATER CONSERVATION AND IRRIGATION 959

Water resources and their utilisation (959); National and interstate aspects (963); International aspects (967); New South Wales (968); Victoria (972); Queensland (976); South Australia (980); Western Australia (983); Tasmania (985); Northern Territory (987); Papua and New Guinea (989); Droughts (991); History of drought in Australia (994); Periods of drought (995); Conclusions (996).

Plate—59, Decile ranges of annual rainfall (map) (facing 993).

CHAPTER 23. FORESTRY 997

Source of statistics (997); Forestry in Australia (997); Employment in forestry (1004); Forest production (1005); Timber and timber products (1007); Overseas trade in forest products, etc. (1009)

CHAPTER 24. FISHERIES 1011

Fisheries resources and their commercial exploitation (1011); History of the development of Australian fisheries (1012); Fisheries administration and research (1013); Collection and presentation of fisheries statistics (1014); Boats and equipment used in fisheries (1015); Employment in fisheries (1016); Production, processing and domestic marketing of fisheries products (1017); Consumption of edible fisheries products (1024); Overseas trade in fisheries products (1025).

Plate—60, Production of fish, etc. (1018).

CHAPTER 25. MINERAL INDUSTRY 1027

Geology (1027); Mineral resources (1028); Administration (1031); Government assistance (1036); Research (1041); International relations (1042); Mining and quarrying (1044); Overseas participation (1059); Mineral exploration (1062); Petroleum exploration (1064); Mineral processing and treatment (1066); Overseas trade (1067); Review of recent developments (1070).

Plates—61, Mineral industry, principal localities (map) (facing 1040); 62, Mine production of principal metals (1056); 63, Iron ore loading facilities, Tasmania (photographs) (facing 1056); 64, Open-cut coal mine, Queensland (photographs) (facing 1057); 65, Mine production of principal metals and coal (1057).

CHAPTER 26. MANUFACTURING INDUSTRY 1073

Introduction (1073), standardisation (1073), definitions (1074); Classification (1076); Factory developments since 1901 (1077); Number of factories (1078); Number of persons employed (1080); Employment in factories (1081); Distribution of sexes in factories (1086); Children employed (1088); Power equipment (1089); Salaries and wages, materials used, output, production (1092); Indexes of factory production (1098); Value of land, buildings, plant and machinery (1100); Principal factory products (1103); Individual industries (1109).

Plate—66, Factories: number, employment, and value of production, by class of industry (1079).

CHAPTER 27. ELECTRIC POWER GENERATION AND DISTRIBUTION 1131

Snowy Mountains Hydro-electric Scheme (1132); New South Wales (1136); Victoria (1139); Queensland (1141); South Australia (1143); Western Australia (1143); Tasmania (1144); Statistical summary (1146); Commonwealth Territories (1146).

Plates—67–8, Snowy Mountains Scheme (map and sections) (1133–4).

CHAPTER 28. EMPLOYMENT AND UNEMPLOYMENT 1149

Population censuses (1149); The population survey (1162); Surveys of multiple jobholding (1162); Surveys of leavers from schools, etc. (1164); Wage and salary earners in employment (1166); Commonwealth Employment Service (1172).

REPUBLIC OF NAURU 1174**CHAPTER 29. THE TERRITORIES OF AUSTRALIA 1175**

The Northern Territory—General description (1175), population (1176), production (1176), trade, transport and communication (1180), education (1181), Aboriginal welfare (1182), finance (1182); The Australian Capital Territory—General description (1183), National Capital Development Commission (1184), works and services (1184), production (1185), transport and communication (1186), social (1187), finance (1187); Norfolk Island (1188); Papua and New Guinea—General description (1190), weather and climate (1191), population (1197), administration (1198), judiciary (1198), agriculture, etc. (1199), indigenous labour (1203), housing (1204), secondary industries (1204), finance (1205); Papua—General description (1206), population (1206), land tenure (1206), production (1207), trade, transport and communication (1208), education and health (1209), finance (1210); New Guinea—General description (1212), population (1212), land tenure (1212), production (1213), trade, transport and communication (1214), education and health (1216), finance (1216); Heard and McDonald Islands (1217); Australian Antarctic Territory (1218); Cocos (Keeling) Islands (1218); Christmas Island (1219).

Plate—69, Territory of Papua and New Guinea, rainfall (map) (facing 1216).

CHAPTER 30. MISCELLANEOUS 1221

Valuation of Australian production (1221); Indexes of farm production (1224); Consumption of foodstuffs and beverages (1226); Retail trade (1231); Interstate trade (1233); Statistical organisation in Australia (1233); Statistical and other official publications of Australia (1235).

CHRONOLOGICAL TABLE, 1955 TO 1968 1249**DIARY OF PRINCIPAL ECONOMIC EVENTS, 1967-68 1253****STATISTICAL SUMMARY, 1901-02 TO 1967-68 1259****APPENDIX 1273**

Commonwealth and State Ministries (1273); Commonwealth Government Departments (1276); Determination of wage rates, etc. (1278); Commonwealth Budget, 1968-69 (1278).

**LIST OF SPECIAL ARTICLES AND MISCELLANEOUS MATTER
CONTAINED IN PREVIOUS ISSUES 1279****GENERAL INDEX 1285****PRINTED PUBLICATIONS ISSUED BY THE CENTRAL OFFICE OF THE
COMMONWEALTH BUREAU OF CENSUS AND STATISTICS 1307****POPULATION DENSITY MAP OF AUSTRALIA (inside back cover)**

SYMBOLS AND OTHER FORMS OF USAGE IN THIS YEAR BOOK

The following *symbols*, where shown in tables, mean:

- n.a. —not available
- .. —nil or less than half the final digit shown, or not applicable
- p —preliminary—figure or series subject to revision
- r —figure or series revised since previous issue
- n.e.i.—not elsewhere included
- n.e.c.—not elsewhere classified
- n.s. —not stated
- m.—males; f.—females; p.—persons

A blank space in a column of figures means that the figure concerned is not yet available.

The following *abbreviations* are used for the titles of the Australian States and Territories and the Commonwealth of Australia: N.S.W. (New South Wales), Vic. (Victoria), Qld (Queensland), S.A. (South Australia), W.A. (Western Australia), Tas. (Tasmania), N.T. (Northern Territory), A.C.T. (Australian Capital Territory), T.P.N.G. (Territory of Papua and New Guinea), Aust. (Australia), Cwlth (Commonwealth).

In general, the *statistics in this volume relate to the States and Territories of the Commonwealth of Australia*, i.e. they exclude particulars of the External Territories of Australia, which, however, are specifically dealt with in Chapter 29, The Territories of Australia. A few series elsewhere include particulars of the Territory of Papua and New Guinea because of the nature of the subject-matter—these series are indicated.

Yearly periods shown as e.g. 1967 refer to the year ended 31 December 1967; those shown as e.g. 1966–67 refer to the year ended 30 June 1967. Other yearly periods are specifically indicated. The range of years shown in table headings, e.g. 1901 to 1966–67, indicates the period covered, but does not necessarily imply that each intervening year is included.

Values are shown in Australian dollars (\$) or \$A) or cents (c) unless another currency is specified.

Any *discrepancies between totals and sums of components* in tables are due to rounding.

Population and vital statistics have been revised in this issue of the Year Book *to include particulars of Aborigines* (see pages 117 and 175), and rates based on these statistics have been revised accordingly. This has caused considerable variation in the rates shown for the Northern Territory compared with those shown in previous issues.

Unless otherwise indicated, the *British system of weights and measures* is used. The weights and measures used in recording production, etc. of different commodities are as follows:

Bushel (bus)	.	.	=	approximately 2,218 cubic inches
Gallon (gal)	.	.	=	Imperial gallon of approximately 277 cubic inches
Pound (lb)	.	.	=	pound avoirdupois
Cental	.	.	=	100 pounds
Hundredweight (cwt)	.	.	=	112 pounds
Ton	.	.	=	Long ton of 2,240 pounds
Short ton	.	.	=	2,000 pounds
Bale (of wool)	.	.	=	approximately 300 pounds

Cereals, fruit and certain other products are generally recorded in bushels. While the weight of a bushel varies according to the nature of the product, it is also subject to considerable variation for individual products on account of such things as variety and method of packing. However, average bushel equivalent weights, as set out below, may be used for the conversion of each of these products to pounds weight avoirdupois.

BUSHEL WEIGHTS
(lb per bushel)

<i>Product</i>	<i>lb per bushel</i>	<i>Product</i>	<i>lb per bushel</i>	<i>Product</i>	<i>lb per bushel</i>
Apples	42	Maize	56	Pineapples	42
Apricots	48	Mandarins	48	Plums and prunes . .	58

CHAPTER 1

DISCOVERY, COLONISATION, AND FEDERATION OF AUSTRALIA

Early knowledge and discovery of Australia

The following paragraphs contain only a bare outline of the more important facts relating to the early history of Australian discovery. A more detailed summary of these facts may be found in Year Book No. 39 (see page 1) and earlier issues.

Terra Australis

Although references to an Austral land are found in the works of writers in the early centuries after Christ, and evidence appeared in maps, globes, and manuscripts from the Middle Ages onward, there is no definite evidence connecting this so-called *Terra Australis* with Australia. Cornelius Wytfliet's map of 1597, however, indicates roughly the eastern and western coasts of Australia, as well as the Gulf of Carpentaria.

Early discoveries of Australia

The Portuguese may have discovered part of the Australian coast before 1542, and it has been suggested that the Arabs may have come to Australia even earlier, though there is no evidence to support this theory. For all practical purposes, however, the coastal exploration of Australia may be taken as having begun with the Spaniards and the Dutch.

In 1606 the Spaniard Quiros, on reaching the island that has retained the name of Espiritu Santo (the largest island of the New Hebrides group), thought he had discovered the great land of the south, and therefore named the group *La Australia del Espiritu Santo*. After leaving the New Hebrides Quiros sailed eastward, but Torres, his second-in-command, took a westerly course and passed through the strait that now bears his name. In all probability he sighted the Australian continent but no mention of it is made in his records. This voyage marks the close of Spanish activity in the work of discovery in the South Seas.

The Dutch discovered Australia when the Dutch East India Company sent the *Duyfken* from Bantam, Java, to explore the island of New Guinea. During March 1606 the *Duyfken* coasted along the southern shores of New Guinea and followed the west coast of Cape York peninsula as far as Cape Keer-Weer (Turn Again).

During the following thirty years there were nine visits of Dutch navigators to Australian waters; by 1636, through their efforts, the coast of Australia from Cape York westward around to the Great Australian Bight had been discovered.

In 1642 Abel Janszoon Tasman set out from Batavia to ascertain the extent of the great southern continent. He named Van Diemen's Land, imagining it to be part of Australia proper, and sailing north-easterly discovered New Zealand and returned to Batavia. In his second voyage in 1644 Tasman visited the northern coast of Australia, sailing round the Gulf of Carpentaria and along the north-west coast as far south as the tropic of Capricorn. This voyage of Tasman's may be said to have ended the period of Dutch discoveries, although there were subsequent visits by the Dutch to Australia (de Vlamingh in 1696 and Van Delft in 1705).

Discoveries by the English

In the meantime the English had made their first appearance on the Australian coast in 1688, when the north-westerly shores were visited by William Dampier, as supercargo of the *Cygnat*, a trading vessel whose crew had turned buccaneers. In 1699 he again visited Australia, in command of H.M.S. *Roebuck*, and on his return to England published an account in which a description is given of trees, flowers, birds, and reptiles observed, and of encounters with natives.

At the end of the seventeenth century it was uncertain whether Tasmania and New Zealand were parts of Australia or whether they were separated from it but themselves formed part of a great Antarctic Continent. Lieutenant (later Captain) James Cook's first voyage, though undertaken primarily for the purpose of observing the transit of Venus from Tahiti, had also the objective of

ascertaining whether the unexplored part of the southern hemisphere was only an immense mass of water or contained another continent. In command of H.M.S. *Endeavour*, and accompanied by Sir Joseph Banks, the botanist, Dr Solander the naturalist, Green the astronomer, draughtsmen, and servants, Cook, after observing the transit of Venus at Tahiti, turned towards New Zealand, sighting that land on 7 October 1769 in the neighbourhood of Poverty Bay. Circumnavigating the North and South Islands, he proved that New Zealand was connected neither with the supposed Antarctic Continent nor with Australia, and took formal possession thereof in the name of the British Crown.

Discovery of Australia by Captain Cook

On 20 April 1770 Cook sighted the Australian mainland at a place he called Point Hicks, naming it after his first-lieutenant, who first saw it. Coasting northwards, on 29 April 1770 he discovered Botany Bay, where he landed. Cook sailed along the coast in a northerly direction for nearly 1,300 miles until 11 June 1770, when the *Endeavour* was seriously damaged by striking a coral reef in the vicinity of Trinity Bay. Repairs occupied nearly two months, and the *Endeavour* then again set her course to the north, sailing through Torres Strait and anchoring in the Downs on 13 July 1771. In 1772 Cook was put in command of the ships *Resolution* and *Adventure* with a view to ascertaining whether a great southern continent existed. Having satisfied himself that, even if it did, it lay so far to the south as to be useless for trade and settlement, he returned to England in 1774. Cook's last voyage was undertaken in 1776, and he met his death on 14 February 1779, by which date practically the whole coast of Australia had been explored. The only remaining discovery of importance, the existence of a channel between Tasmania and Australia, was made by Bass and Flinders in 1798.

The annexation of Australia

Possession taken of eastern coast of Australia by Captain Cook

Although representatives of the nations mentioned in the previous section landed or claimed to have landed on the shores of Australia on various occasions during the sixteenth and seventeenth centuries, it was not until 23 August 1770 that the history of Australia was brought into definite political connection with western civilisation. It was on that date that Captain Cook took possession 'of the whole eastern coast, from latitude 38° S. to this place, latitude 104° S., in right of His Majesty King George the Third', i.e. over only what are now the eastern parts of New South Wales, Victoria and Queensland.

Annexation of eastern part of Australian continent and Tasmania

Formal possession, on behalf of the British Crown, of the whole of the eastern part of the Australian continent and Tasmania was not taken until 26 January 1788, when Captain Phillip's Commission, first issued to him on 12 October 1786 and amplified on 2 April 1787, was read to the people whom he had brought with him in the 'First Fleet'. The commission appointed Phillip 'Captain-General and Governor-in-Chief in and over our territory called New South Wales, extending from the Northern Cape or extremity of the coast called Cape York, in the latitude of ten degrees thirty-seven minutes south, to the southern extremity of the said territory of New South Wales or South Cape, in the latitude of forty-three degrees thirty-nine minutes south and of all the country inland westward as far as the one hundred and thirty-fifth degree of east longitude reckoning from the meridian of Greenwich, including all the islands adjacent in the Pacific Ocean within the latitudes aforesaid of ten degrees thirty-seven minutes south and forty-three degrees thirty-nine minutes south'.

Extension of New South Wales westward

On 17 February 1824 Earl Bathurst notified Sir Thomas Brisbane that he had recommended to His Majesty the dispatch of a ship of war to the north-west coast of New Holland for the purpose of taking possession of the coast between the western coast of Bathurst Island and the eastern side of Coburg Peninsula. Captain James J. Gordon Bremer of H.M.S. *Tamar*, who was selected for the purpose, took possession on 20 September 1824 of the coast from the 135th to the 129th degree of east longitude. On 16 July 1825 the whole territory between those boundaries was described in Darling's commission as being within the boundaries of New South Wales.

Annexation of Western Australia

An expedition under Major Lockyer, sent by Lieutenant-General Sir Ralph Darling, then Governor of New South Wales, to found a settlement at King George Sound, sailed from Sydney on 9 November 1826, landed at the Sound on 26 December following, and on 21 January 1827 hoisted the British flag. Captain Stirling, in command of H.M.S. *Success*, arrived at Sydney a few

weeks after the departure of the expedition to King George Sound. He obtained the Governor's permission to visit Swan River with a view to seizing a position on the western coast and reporting upon its suitability as a place of settlement. Captain Stirling left Sydney on 17 January 1827, and on his return in the following April submitted a glowing report on what he described as a 'rich and romantic country', urging its occupation for the purpose of settlement. He left for England in July 1827, continuing his advocacy, notwithstanding much discouragement, with unabated enthusiasm. He was at last successful, the result being due mainly to the formation of an association of prospective settlers having capital at their disposal. He was appointed Lieutenant-Governor and with a party of settlers arrived at Garden Island, near the Swan River, in the ship *Parmelia* in June 1829. On the second of the preceding month Captain Fremantle, in command of H.M.S. *Challenge*, arrived and hoisted the British flag on the south head of Swan River, again asserting possession of 'all that part of New Holland which is not included within the territory of New South Wales'. Thus before the middle of 1829 the whole territory now known as the Commonwealth of Australia had been constituted a dependency of the United Kingdom.

The creation of the several Colonies

New South Wales

In Governor Phillip's commission of 1786 the mainland of Australia was divided by the 135th meridian of east longitude into two parts. The earliest colonists believed that the present State of Tasmania was actually joined to the mainland, and it was not until 1798 that the contrary was known. In that year Bass and Flinders proved that it was an island by sailing through Bass Strait. The territory of New South Wales, as originally constituted (1,480,527 square miles, including Van Diemen's Land, 26,215 square miles), and of New Zealand (103,862 square miles), which may be included although Cook's annexation was not properly given effect to until 1840, consisted of 1,584,389 square miles. A further area of 518,134 square miles was added in 1825 when the western boundary was extended to the 129th east meridian. The territory was subsequently reduced by the separation of various areas to form the other colonies, and at the time of the establishment of the Commonwealth the area of New South Wales was 310,372 square miles. Following the transfer of the Australian Capital Territory to the Commonwealth in 1911 the area was further reduced to 309,433 square miles.

Lord Howe Island, which is a dependency of New South Wales, and for political purposes is included in one of the electorates of Sydney, is situated in latitude 31° 30' south, longitude 159° 5' east, about 436 miles north-east of Sydney, and has an area of 3,220 acres.

Tasmania

Van Diemen's Land, first settled in 1803, was politically separated from New South Wales in 1825, being constituted a separate colony on 14 June. The area of the colony was 26,215 square miles. The name of the colony was officially changed to Tasmania in 1856 when responsible government was established. Following a resurvey of local government areas, the area of Tasmania was determined at 26,383 square miles at the end of 1964.

Macquarie Island, about 1,000 miles south-east of Hobart, together with a few rocky islets nearby, has been a dependency of Tasmania since the nineteenth century. In December 1911 five members of the Australasian Antarctic Expedition landed on the island and remained there until 1915. On 3 March 1948 another party was landed to man a new station which has since been maintained as a scientific base. The island is about twenty-one miles long and two miles wide.

Western Australia

The territory westward of the 129th meridian, comprising 975,920 square miles, was constituted a colony under the name of Western Australia in June 1829. It was always distinct and independent of New South Wales, except for the settlement on King George Sound (*see above*), which remained under the jurisdiction of New South Wales until 1831.

South Australia

On 15 August 1834 the Act 4 and 5 William IV., cap. 95, was passed, creating South Australia a 'province', and settlement took place towards the end of the year 1836. The first Governor, Captain Hindmarsh, R.N., arrived at Holdfast Bay on 28 December 1836, and on the same day the new colony was officially proclaimed. The new colony embraced 309,850 square miles of territory, lying south of the 26th parallel of south latitude and between the 141st and 132nd meridians of east longitude. On 10 December 1861, by authority of the Imperial Act 24 and 25 Vict., cap. 44, the western boundary of South Australia was extended to coincide with the eastern

boundary of Western Australia, namely, the 129th east meridian. The area of the extension was approximately 70,220 square miles. Nearly two years later, on 6 July 1863, the Northern Territory, comprising 523,620 square miles, was brought under the jurisdiction of South Australia, which thereupon controlled an area of 903,690 square miles. The Territory was transferred to the Commonwealth on 1 January 1911 (*see page 5*).

New Zealand

Although Captain Cook had taken possession of the North Island of New Zealand in November 1769, and of the South Island in January 1770, it is doubtful whether at the time when Captain Phillip's commission was drawn up New Zealand was considered as one of the 'islands adjacent in the Pacific Ocean' (*see page 2*). The fact that under the Supreme Court Act (Imperial) of 1823 British residents in New Zealand were brought under the jurisdiction of the Court at Sydney, and that in 1839 there was a proposal on the part of the British Government to appoint a consul in New Zealand, leaves this an open question, as nothing more than extra-territorial jurisdiction may have been intended. New Zealand does not appear to have become British territory unequivocally until 1840, when Captain Hobson arrived at the Bay of Islands, and on 30 January read his commissions, which extended the boundaries of the Colony of New South Wales so as to embrace and comprehend the islands of New Zealand. In February 1840 the Treaty of Waitangi, made with the native chiefs, was signed. Finally, on 21 May 1840 British sovereignty over the islands of New Zealand was explicitly proclaimed. New Zealand remained a dependency of New South Wales until, by letters patent of 16 November 1840, it was constituted a separate colony under the powers of the Act 3 and 4 Vict., cap. 62, of 7 August 1840. Proclamation of the separation was made on 3 May 1841. The area of the colony was 103,862 square miles. The present area of New Zealand, which acquired responsible government on 7 May 1856 and Dominion status on 26 September 1907, exclusive of island territories but including minor islands, is 103,736 square miles.

Victoria

In 1851 the 'Port Phillip District' of New South Wales was constituted the colony of Victoria, 'bounded on the north and north-west by a straight line drawn from Cape Howe to the nearest source of the River Murray and thence by the course of that river to the eastern boundary of the colony of South Australia'. The area of the new colony was 87,884 square miles, and its separate existence took effect from 1 July 1851.

Queensland

The northern squatting districts of Moreton, Darling Downs, Burnett, Wide Bay, Maranoa, Leichhardt, and Port Curtis, together with the reputed county of Stanley, were granted an independent administration and formed into a distinct colony under the name of Queensland by letters patent dated 6 June 1859, although separation from New South Wales was not completed until 10 December of the same year. The territory comprised by the new colony was 'so much of the colony of New South Wales as lies northwards of a line commencing on the sea-coast at Point Danger in latitude about 28° 8' south, running westward along the Macpherson and Dividing Ranges and the Dumaresq River to the MacIntyre River, thence downward to the 29th parallel of south latitude, and following that parallel westerly to the 141st meridian of east longitude, which is the eastern boundary of South Australia, together with all the adjacent islands, their members, and appurtenances in the Pacific Ocean'. The area of the colony thus constituted was 554,300 square miles. By letters patent dated 13 March 1861, forwarded by the Colonial Secretary to the Governor of Queensland on 12 April 1862, the area of Queensland was increased by the annexation of 'so much of the colony of New South Wales as lies to the northward of the 26th parallel of south latitude, and between the 141st and 138th meridians of east longitude, together with all and every the adjacent islands, their members, and appurtenances, in the Gulf of Carpentaria'. With this addition the area of Queensland became 670,500 square miles. Following a thorough revision of the area of each local government area of Queensland, based on the most recent maps available, the Surveyor-General in 1958 determined the area of Queensland as 667,000 square miles—a reduction of 3,500 square miles from the area previously determined.

The establishment of the Commonwealth of Australia

Federation

On 1 January 1901 the colonies mentioned, with the exception of New Zealand, were federated under the name of the 'Commonwealth of Australia', the designation of 'Colonies'—except in the case of the Northern Territory, to which the designation 'Territory' applied—being at the same time changed to that of 'States'.

Transfer of the Northern Territory to the Commonwealth

On 7 December 1907 the Commonwealth and the State of South Australia entered into an agreement for the transfer of the Northern Territory to the Commonwealth, subject to approval by the Parliaments of the Commonwealth and the State. This approval was given by the South Australian Parliament under The Northern Territory Surrender Act, 1907 and by the Commonwealth Parliament under the *Northern Territory Acceptance Act* 1910. The Territory was formally transferred to the Commonwealth on 1 January 1911, and became the Northern Territory of Australia.

By Imperial Order in Council dated 23 July 1931 Ashmore Islands, known as Middle, East, and West Islands, and Cartier Island, situated in the Indian Ocean off the north-west coast of Australia, were placed under the authority of the Commonwealth. The islands were accepted by the Commonwealth on 10 May 1934, in the *Ashmore and Cartier Islands Acceptance Act* 1933, under the name of the Territory of Ashmore and Cartier Islands. The Act authorised the Governor of Western Australia to make ordinances having the force of law in and in relation to the Territory. An amendment to the Act in July 1938 annexed the islands to the Northern Territory, whose laws, ordinances, and regulations, wherever applicable, thereupon applied.

The area of Ashmore Reef is approximately 60 square miles (to the limit of the reef), and it is situated 220 statute miles off the western coast of Australia and 520 statute miles west of Darwin. Cartier Island is approximately 17 square miles in area (to the limit of the reef), and is situated 184 statute miles off the western coast of Australia and 490 statute miles west of Darwin.

Transfer of the Australian Capital Territory to the Commonwealth

On 18 October 1909 the Commonwealth and the State of New South Wales entered into an agreement for the surrender to and acceptance by the Commonwealth of an area of 911 square miles as the Seat of Government of the Commonwealth. In December 1909, Acts were passed by the Commonwealth and New South Wales Parliaments approving the agreement, and on 5 December 1910 a proclamation was issued vesting the Territory in the Commonwealth on and from 1 January 1911. By the *Jervis Bay Territory Acceptance Act* 1915 an area of 28 square miles at Jervis Bay, surrendered by New South Wales according to an agreement made in 1913, was accepted by the Commonwealth, and was transferred as from 4 September 1915.

Present composition of the Commonwealth

Following revision of the areas of Tasmania and Queensland as mentioned on pages 3 and 4, and of the area of the Northern Territory during 1964, the total area of the Commonwealth of Australia has been determined as 2,967,909 square miles. The years in which the respective areas were annexed, the years of first permanent settlement, and the years in which responsible government was granted to the Colonies, and the present areas of the several States and Territories and of the Commonwealth are shown below.

THE COMMONWEALTH OF AUSTRALIA: COMPONENT STATES AND TERRITORIES

<i>State or Territory</i>	<i>Year of annexation</i>	<i>Year of first permanent settlement</i>	<i>Year of formation into separate Colony or Territory</i>	<i>Year in which responsible government was granted</i>	<i>Present area in square miles</i>
New South Wales	1770	1788	1786	1855	309,433
Victoria	1770	1834	1851	1855	87,884
Queensland	1770	1824	1859	(a) 1859	667,000
South Australia	1788	1836	1834	1856	380,070
Western Australia	1829	1829	1829	1890	975,920
Tasmania	1788	1803	1825	1855	26,383
Northern Territory	(b) 1863	..	520,280
Australian Capital Territory	(c) 1911	..	939
Commonwealth of Australia	(d)	2,967,909

(a) As a separate State—as part of New South Wales, in 1855. (b) Previously part of New South Wales—transferred to the Commonwealth in 1911—see page 4. (c) Previously part of New South Wales. (d) Constituted as from 1 January 1901.

The Constitution of the Commonwealth

Information regarding the development of the Constitutions of the various Colonies (now States), together with a brief history of the federal movement in Australia, was embodied in this chapter in issues of the Year Book up to and including No. 22.

Commonwealth Constitution Act

The Commonwealth of Australia Constitution Act, 63 and 64 Vict., Chapter 12, namely: 'An Act to constitute the Commonwealth of Australia', as amended by the *Constitution Alteration (Senate Elections)* 1906, the *Constitution Alteration (State Debts)* 1909, the *Constitution Alteration (State Debts)* 1928, the *Constitution Alteration (Social Services)* 1946, and the *Constitution Alteration (Aboriginals)* 1967, is given *in extenso* hereunder, and the text contains all the alterations of the Constitution which have been made up to and including 31 December 1967.

THE COMMONWEALTH OF AUSTRALIA CONSTITUTION ACT. 63 & 64 VICT., CHAPTER 12.

An Act to Constitute the Commonwealth of Australia. (9th July, 1900.)

WHEREAS the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, humbly relying on the blessing of Almighty God, have agreed to unite in one indissoluble Federal Commonwealth under the Crown of the United Kingdom of Great Britain and Ireland, and under the Constitution hereby established:

And whereas it is expedient to provide for the admission into the Commonwealth of other Australasian colonies and possessions of the Queen:

Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled and by the authority of the same, as follows:—

1. This Act may be cited as the Commonwealth of Australia Constitution Act.
2. The provisions of this Act referring to the Queen shall extend to Her Majesty's heirs and successors in the sovereignty of the United Kingdom.
3. It shall be lawful for the Queen, with the advice of the Privy Council, to declare by proclamation that, on and after a day therein appointed, not being later than one year after the passing of this Act, the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, and also, if Her Majesty is satisfied that the people of Western Australia have agreed thereto, of Western Australia, shall be united in a Federal Commonwealth under the name of the Commonwealth of Australia. But the Queen may, at any time after the proclamation, appoint a Governor-General for the Commonwealth.
4. The Commonwealth shall be established, and the Constitution of the Commonwealth shall take effect, on and after the day so appointed. But the Parliaments of the several colonies may at any time after the passing of this Act make any such laws, to come into operation on the day so appointed, as they might have made if the Constitution had taken effect at the passing of this Act.
5. This Act, and all laws made by the Parliament of the Commonwealth under the Constitution, shall be binding on the courts, judges, and people of every State and of every part of the Commonwealth, notwithstanding anything in the laws of any State: and the laws of the Commonwealth shall be in force on all British ships, the Queen's ships of war excepted, whose first port of clearance and whose port of destination are in the Commonwealth.
6. "The Commonwealth" shall mean the Commonwealth of Australia as established under this Act.
- "The States" shall mean such of the colonies of New South Wales, New Zealand, Queensland, Tasmania, Victoria, Western Australia, and South Australia, including the northern territory of South Australia, as for the time being are parts of the Commonwealth, and such colonies or territories as may be admitted into or established by the Commonwealth as States; and each of such parts of the Commonwealth shall be called "a State."

"Original States" shall mean such States as are parts of the Commonwealth at its establishment.

7. The Federal Council of Australasia Act, 1885, is hereby repealed, but so as not to affect any laws passed by the Federal Council of Australasia and in force at the establishment of the Commonwealth.

Any such law may be repealed as to any State by the Parliament of the Commonwealth, or as to any colony not being a State by the Parliament thereof.

8. After the passing of this Act the Colonial Boundaries Act, 1895, shall not apply to any colony which becomes a State of the Commonwealth; but the Commonwealth shall be taken to be a self-governing colony for the purposes of that Act.

9. The Constitution of the Commonwealth shall be as follows:—

THE CONSTITUTION.

This Constitution is divided as follows:—

- Chapter I.—The Parliament:
 - Part I.—General:
 - Part II.—The Senate:
 - Part III.—The House of Representatives:
 - Part IV.—Both Houses of the Parliament:
 - Part V.—Powers of the Parliament:
- Chapter II.—The Executive Government:
- Chapter III.—The Judicature:
- Chapter IV.—Finance and Trade:
- Chapter V.—The States:
- Chapter VI.—New States:
- Chapter VII.—Miscellaneous:
- Chapter VIII.—Alteration of the Constitution.
- The Schedule.

CHAPTER I.—THE PARLIAMENT.

PART I.—GENERAL.

1. The legislative power of the Commonwealth shall be vested in a Federal Parliament, which shall consist of the Queen, a Senate, and a House of Representatives, and which is hereinafter called “The Parliament”, or “The Parliament of the Commonwealth”.

2. A Governor-General appointed by the Queen shall be Her Majesty’s representative in the Commonwealth, and shall have and may exercise in the Commonwealth during the Queen’s pleasure, but subject to this Constitution, such powers and functions of the Queen as Her Majesty may be pleased to assign to him.

3. There shall be payable to the Queen out of the Consolidated Revenue Fund of the Commonwealth, for the salary of the Governor-General, an annual sum which, until the Parliament otherwise provides, shall be ten thousand pounds.

The salary of a Governor-General shall not be altered during his continuance in office.

4. The provisions of this Constitution relating to the Governor-General extend and apply to the Governor-General for the time being, or such person as the Queen may appoint to administer the Government of the Commonwealth; but no such person shall be entitled to receive any salary from the Commonwealth in respect of any other office during his administration of the Government of the Commonwealth.

5. The Governor-General may appoint such times for holding the sessions of the Parliament as he thinks fit, and may also from time to time, by Proclamation or otherwise, prorogue the Parliament, and may in like manner dissolve the House of Representatives.

After any general election the Parliament shall be summoned to meet not later than thirty days after the day appointed for the return of the writs.

The Parliament shall be summoned to meet not later than six months after the establishment of the Commonwealth.

6. There shall be a session of the Parliament once at least in every year, so that twelve months shall not intervene between the last sitting of the Parliament in one session and its first sitting in the next session.

PART II.—THE SENATE.

7. The Senate shall be composed of senators for each State, directly chosen by the people of the State, voting, until the Parliament otherwise provides, as one electorate.

But until the Parliament of the Commonwealth otherwise provides, the Parliament of the State of Queensland, if that State be an Original State, may make laws dividing the State into divisions and determining the number of senators to be chosen for each division, and in the absence of such provision the State shall be one electorate.

Until the Parliament otherwise provides there shall be six senators for each Original State.* The Parliament may make laws increasing or diminishing the number of senators for each State, but so that equal representation of the several Original States shall be maintained and that no Original State shall have less than six senators.

The senators shall be chosen for a term of six years, and the names of the senators chosen for each State shall be certified by the Governor to the Governor-General.

8. The qualification of electors of senators shall be in each State that which is prescribed by this Constitution, or by the Parliament, as the qualification for electors of members of the House of Representatives; but in the choosing of senators each elector shall vote only once.

9. The Parliament of the Commonwealth may make laws prescribing the method of choosing senators, but so that the method shall be uniform for all the States. Subject to any such law, the Parliament of each State may make laws prescribing the method of choosing the senators for that State.

The Parliament of a State may make laws for determining the times and places of elections of senators for the State.

10. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State, for the time being, relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections of senators for the State.

11. The Senate may proceed to the despatch of business, notwithstanding the failure of any State to provide for its representation in the Senate.

12. The Governor of any State may cause writs to be issued for elections of senators for the State. In case of the dissolution of the Senate the writs shall be issued within ten days from the proclamation of such dissolution.

13. As soon as may be after the Senate first meets, and after each first meeting of the Senate following a dissolution thereof, the Senate shall divide the senators chosen for each State into two classes, as nearly equal in number as practicable; and the places of the senators of the first class shall become vacant at the expiration of [the third year] *three years*,† and the places of those of the second class at the expiration of [the sixth year] *six years*,† from the beginning of their term of service; and afterwards the places of senators shall become vacant at the expiration of six years from the beginning of their term of service.

The election to fill vacant places shall be made [in the year at the expiration of which] *within one year before*† the places are to become vacant.

For the purposes of this section the term of service of a senator shall be taken to begin on the first day of [January] *July*† following the day of his election, except in the cases of the first election and of the election next after any dissolution of the Senate, when it shall be taken to begin on the first day of [January] *July*† preceding the day of his election.

14. Whenever the number of senators for a State is increased or diminished, the Parliament of the Commonwealth may make such provision for the vacating of the places of senators for the State as it deems necessary to maintain regularity in the rotation.

15. If the place of a senator becomes vacant before the expiration of his term of service, the Houses of Parliament of the State for which he was chosen shall, sitting and voting together, choose a person to hold the place until the expiration of the term, or until the election of a successor as hereinafter provided, whichever first happens. But if the Houses of Parliament of the State are not in session at the time when the vacancy is notified, the Governor of the State, with the advice of the Executive Council thereof, may appoint a person to hold the place until the expiration of fourteen days after the beginning of the next session of the Parliament of the State, or until the election of a successor, whichever first happens.

At the next general election of members of the House of Representatives, or at the next election of senators for the State, whichever first happens, a successor shall, if the term has not then expired, be chosen to hold the place from the date of his election until the expiration of the term.

The name of any senator so chosen or appointed shall be certified by the Governor of the State to the Governor-General.

16. The qualifications of a senator shall be the same as those of a member of the House of Representatives.

* The Parliament has otherwise provided, by means of the *Representation Act 1948*, that the number of senators shall be ten for each State from the first meeting of Parliament after the first dissolution of the House of Representatives occurring after the commencement of the Act (18 May 1948).

† As amended by Section 2 of the *Constitution Alteration (Senate Elections) 1906*. The words in square brackets have been repealed; amendments are shown in italics.

17. The Senate shall, before proceeding to the despatch of any other business, choose a senator to be the President of the Senate; and as often as the office of President becomes vacant the Senate shall again choose a senator to be the President.

The President shall cease to hold his office if he ceases to be a senator. He may be removed from office by a vote of the Senate, or he may resign his office or his seat by writing addressed to the Governor-General.

18. Before or during any absence of the President, the Senate may choose a senator to perform his duties in his absence.

19. A senator may, by writing addressed to the President, or to the Governor-General if there is no President or if the President is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

20. The place of a senator shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the Senate, fails to attend the Senate.

21. Whenever a vacancy happens in the Senate, the President, or if there is no President or if the President is absent from the Commonwealth the Governor-General, shall notify the same to the Governor of the State in the representation of which the vacancy has happened.

22. Until the Parliament otherwise provides, the presence of at least one third of the whole number of the senators shall be necessary to constitute a meeting of the Senate for the exercise of its powers.

23. Questions arising in the Senate shall be determined by a majority of votes, and each senator shall have one vote. The President shall in all cases be entitled to a vote; and when the votes are equal the question shall pass in the negative.

PART III.—THE HOUSE OF REPRESENTATIVES.

24. The House of Representatives shall be composed of members directly chosen by the people of the Commonwealth, and the number of such members shall be, as nearly as practicable, twice the number of the senators.

The number of members chosen in the several States shall be in proportion to the respective numbers of their people, and shall, until the Parliament otherwise provides, be determined, whenever necessary, in the following manner:—

- (i) A quota shall be ascertained by dividing the number of the people of the Commonwealth, as shown by the latest statistics of the Commonwealth, by twice the number of the senators;
- (ii) The number of members to be chosen in each State shall be determined by dividing the number of the people of the State, as shown by the latest statistics of the Commonwealth, by the quota; and if on such division there is a remainder greater than one-half of the quota, one more member shall be chosen in the State.

But notwithstanding anything in this section, five members at least shall be chosen in each Original State.

25. For the purposes of the last section, if by the law of any State all persons of any race are disqualified from voting at elections for the more numerous House of the Parliament of the State, then, in reckoning the number of the people of the State or of the Commonwealth, persons of that race resident in that State shall not be counted.

26. Notwithstanding anything in section twenty-four, the number of members to be chosen in each State at the first election shall be as follows:—

New South Wales	twenty-three;	South Australia	six;
Victoria	twenty;	Tasmania	five;
Queensland	eight;		

Provided that if Western Australia is an Original State, the numbers shall be as follows:—

New South Wales	twenty-six;	South Australia	seven;
Victoria	twenty-three;	Western Australia	five;
Queensland	nine;	Tasmania	five.

27. Subject to this Constitution, the Parliament may make laws for increasing or diminishing the number of the members of the House of Representatives.

28. Every House of Representatives shall continue for three years from the first meeting of the House, and no longer, but may be sooner dissolved by the Governor-General.

29. Until the Parliament of the Commonwealth otherwise provides, the Parliament of any State may make laws for determining the divisions in each State for which members of the House of Representatives may be chosen, and the number of members to be chosen for each division. A division shall not be formed out of parts of different States.

In the absence of other provision, each State shall be one electorate.

30. Until the Parliament otherwise provides, the qualification of electors of members of the House of Representatives shall be in each State that which is prescribed by the law of the State as the qualification of electors of the more numerous House of Parliament of the State; but in the choosing of members each elector shall vote only once.*

31. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State for the time being relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections in the State of members of the House of Representatives.

32. The Governor-General in Council may cause writs to be issued for general elections of members of the House of Representatives.

After the first general election, the writs shall be issued within ten days from the expiry of a House of Representatives or from the proclamation of a dissolution thereof.

33. Whenever a vacancy happens in the House of Representatives, the Speaker shall issue his writ for the election of a new member, or if there is no Speaker or if he is absent from the Commonwealth the Governor-General in Council may issue the writ.

34. Until the Parliament otherwise provides, the qualifications of a member of the House of Representatives shall be as follows:—

- (i) He must be of the full age of twenty-one years, and must be an elector entitled to vote at the election of members of the House of Representatives, or a person qualified to become such elector, and must have been for three years at the least a resident within the limits of the Commonwealth as existing at the time when he is chosen:
- (ii) He must be a subject of the Queen, either natural-born or for at least five years naturalized under a law of the United Kingdom, or of a Colony which has become or becomes a State, or of the Commonwealth, or of a State.†

35. The House of Representatives shall, before proceeding to the despatch of any other business, choose a member to be the Speaker of the House, and as often as the office of Speaker becomes vacant the House shall again choose a member to be the Speaker.

The Speaker shall cease to hold his office if he ceases to be a member. He may be removed from office by a vote of the House, or he may resign his office or his seat by writing addressed to the Governor-General.

36. Before or during any absence of the Speaker, the House of Representatives may choose a member to perform his duties in his absence.

37. A member may by writing addressed to the Speaker, or to the Governor-General if there is no Speaker or if the Speaker is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

38. The place of a member shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the House, fails to attend the House.

39. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the members of the House of Representatives shall be necessary to constitute a meeting of the House for the exercise of its powers.

40. Questions arising in the House of Representatives shall be determined by a majority of votes other than that of the Speaker. The Speaker shall not vote unless the numbers are equal, and then he shall have a casting vote.

PART IV.—BOTH HOUSES OF THE PARLIAMENT.

41. No adult person who has or acquires a right to vote at elections for the more numerous House of the Parliament of a State shall, while the right continues, be prevented by any law of the Commonwealth from voting at elections for either House of the Parliament of the Commonwealth.

* The Parliament has otherwise provided, by means of the *Commonwealth Electoral Act 1918–1965*, Sections 39 and 39A (repealing an earlier provision made by the *Commonwealth Franchise Act 1902*). For present qualifications see Chapter 3, General Government.

† The Parliament has otherwise provided, by means of the *Commonwealth Electoral Act 1918–1965*, Section 69. For present qualifications see Chapter 3, General Government.

42. Every senator and every member of the House of Representatives shall before taking his seat make and subscribe before the Governor-General, or some person authorized by him, an oath or affirmation of allegiance in the form set forth in the schedule to this Constitution.

43. A member of either House of the Parliament shall be incapable of being chosen or of sitting as a member of the other House.

44. Any person who—

- (i) Is under any acknowledgment of allegiance, obedience, or adherence to a foreign power, or is a subject or a citizen or entitled to the rights or privileges of a subject or a citizen of a foreign power: or
- (ii) Is attainted of treason, or has been convicted and is under sentence, or subject to be sentenced, for any offence punishable under the law of the Commonwealth or of a State by imprisonment for one year or longer: or
- (iii) Is an undischarged bankrupt or insolvent: or
- (iv) Holds any office of profit under the Crown, or any pension payable during the pleasure of the Crown out of any of the revenues of the Commonwealth: or
- (v) Has any direct or indirect pecuniary interest in any agreement with the Public Service of the Commonwealth otherwise than as a member and in common with the other members of an incorporated company consisting of more than twenty-five persons:

shall be incapable of being chosen or of sitting as a senator or a member of the House of Representatives.

But sub-section (iv) does not apply to the office of any of the Queen's Ministers of State for the Commonwealth, or of any of the Queen's Ministers for a State, or to the receipt of pay, half-pay, or a pension by any person as an officer or member of the Queen's navy or army, or to the receipt of pay as an officer or member of the naval or military forces of the Commonwealth by any person whose services are not wholly employed by the Commonwealth.

45. If a senator or member of the House of Representatives—

- (i) Becomes subject to any of the disabilities mentioned in the last preceding section: or
- (ii) Takes the benefit, whether by assignment, composition, or otherwise, of any law relating to bankrupt or insolvent debtors: or
- (iii) Directly or indirectly takes or agrees to take any fee or honorarium for services rendered to the Commonwealth, or for services rendered in the Parliament to any person or State:

his place shall thereupon become vacant.

46. Until the Parliament otherwise provides, any person declared by this Constitution to be incapable of sitting as a senator or as a member of the House of Representatives shall, for every day on which he so sits, be liable to pay the sum of one hundred pounds to any person who sues for it in any court of competent jurisdiction.

47. Until the Parliament otherwise provides, any question respecting the qualification of a senator or of a member of the House of Representatives, or respecting a vacancy in either House of the Parliament, and any question of a disputed election to either House shall be determined by the House in which the question arises.

48. Until the Parliament otherwise provides, each senator and each member of the House of Representatives shall receive an allowance of four hundred pounds a year, to be reckoned from the day on which he takes his seat.*

49. The powers, privileges, and immunities of the Senate and of the House of Representatives, and of the members and the committees of each House, shall be such as are declared by the Parliament, and until declared shall be those of the Commons House of Parliament of the United Kingdom, and of its members and committees, at the establishment of the Commonwealth.

50. Each House of the Parliament may make rules and orders with respect to—

- (i) The mode in which its powers, privileges, and immunities may be exercised and upheld;
- (ii) The order and conduct of its business and proceedings either separately or jointly with the other House.

* The Parliamentary allowance has been varied from time to time. For current allowances, see Chapter 3, General Government.

PART V.—POWERS OF THE PARLIAMENT*

51. The Parliament shall, subject to this Constitution, have power to make laws for the peace, order, and good government of the Commonwealth with respect to:—

- (i) Trade and commerce with other countries, and among the States:
- (ii) Taxation; but so as not to discriminate between States or parts of States:
- (iii) Bounties on the production or export of goods, but so that such bounties shall be uniform throughout the Commonwealth:
- (iv) Borrowing money on the public credit of the Commonwealth:
- (v) Postal, telegraphic, telephonic, and other like services:
- (vi) The naval and military defence of the Commonwealth and of the several States, and the control of the forces to execute and maintain the laws of the Commonwealth:
- (vii) Lighthouses, lightships, beacons and buoys:
- (viii) Astronomical and meteorological observations:
- (ix) Quarantine:
- (x) Fisheries in Australian waters beyond territorial limits:
- (xi) Census and statistics:
- (xii) Currency, coinage, and legal tender:
- (xiii) Banking, other than State banking; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money:
- (xiv) Insurance, other than State insurance; also State insurance extending beyond the limits of the State concerned:
- (xv) Weights and measures:
- (xvi) Bills of exchange and promissory notes:
- (xvii) Bankruptcy and insolvency:
- (xviii) Copyrights, patents of inventions and designs, and trade marks:
- (xix) Naturalization and aliens:
- (xx) Foreign corporations, and trading or financial corporations formed within the limits of the Commonwealth:
- (xxi) Marriage:
- (xxii) Divorce and matrimonial causes; and in relation thereto, parental rights, and the custody and guardianship of infants:
- (xxiii) Invalid and old-age pensions:
- (xxiiiA) †*The provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances:*
- (xxiv) The service and execution throughout the Commonwealth of the civil and criminal process and the judgments of the courts of the States:
- (xxv) The recognition throughout the Commonwealth of the laws, the public Acts and records, and the judicial proceedings of the States:
- (xxvi) The people of any race [other than the aboriginal race in any State]‡ for whom it is deemed necessary to make special laws:
- (xxvii) Immigration and emigration:
- (xxviii) The influx of criminals:
- (xxix) External affairs:
- (xxx) The relations of the Commonwealth with the islands of the Pacific:
- (xxxi) The acquisition of property on just terms from any State or person for any purpose in respect of which the Parliament has power to make laws:
- (xxxii) The control of railways with respect to transport for the naval and military purposes of the Commonwealth:

* Particulars of proposed laws which were submitted to referendums are referred to in Chapter 3, General Government, of this Year Book.

† Under Section 2 of the *Constitution Alteration (Social Services)* 1946, the Constitution was amended by the insertion of this paragraph.

‡ Under Section 2 of the *Constitution Alteration (Aboriginals)* 1967, the words in square brackets were omitted.

- (xxxiii) The acquisition, with the consent of a State, of any railways of the State on terms arranged between the Commonwealth and the State:
- (xxxiv) Railway construction and extension in any State with the consent of that State:
- (xxxv) Conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State:
- (xxxvi) Matters in respect of which this Constitution makes provision until the Parliament otherwise provides:
- (xxxvii) Matters referred to the Parliament of the Commonwealth by the Parliament or Parliaments of any State or States, but so that the law shall extend only to States by whose Parliaments the matter is referred, or which afterwards adopt the law:
- (xxxviii) The exercise within the Commonwealth, at the request or with the concurrence of the Parliaments of all the States directly concerned, of any power which can at the establishment of this Constitution be exercised only by the Parliament of the United Kingdom or by the Federal Council of Australasia:
- (xxxix) Matters incidental to the execution of any power vested by this Constitution in the Parliament or in either House thereof, or in the Government of the Commonwealth, or in the Federal Judicature, or in any department or officer of the Commonwealth.

52. The Parliament shall, subject to this Constitution, have exclusive power to make laws for the peace, order, and good government of the Commonwealth with respect to—

- (i) The seat of Government of the Commonwealth, and all places acquired by the Commonwealth for public purposes:
- (ii) Matters relating to any department of the public service the control of which is by this Constitution transferred to the Executive Government of the Commonwealth:
- (iii) Other matters declared by this Constitution to be within the exclusive power of the Parliament.

53. Proposed laws appropriating revenue or moneys, or imposing taxation, shall not originate in the Senate. But a proposed law shall not be taken to appropriate revenue or moneys, or to impose taxation, by reason only of its containing provisions for the imposition or appropriation of fines or other pecuniary penalties, or for the demand or payment or appropriation of fees for licences, or fees for services under the proposed law.

The Senate may not amend proposed laws imposing taxation, or proposed laws appropriating revenue or moneys for the ordinary annual services of the Government.

The Senate may not amend any proposed law so as to increase any proposed charge or burden on the people.

The Senate may at any stage return to the House of Representatives any proposed law which the Senate may not amend, requesting, by message, the omission or amendment of any items or provisions therein. And the House of Representatives may, if it thinks fit, make any of such omissions or amendments, with or without modifications.

Except as provided in this section, the Senate shall have equal power with the House of Representatives in respect of all proposed laws.

54. The proposed law which appropriates revenue or moneys for the ordinary annual services of the Government shall deal only with such appropriation.

55. Laws imposing taxation shall deal only with the imposition of taxation, and any provision therein dealing with any other matter shall be of no effect.

Laws imposing taxation, except laws imposing duties of customs or of excise, shall deal with one subject of taxation only; but laws imposing duties of customs shall deal with duties of customs only, and laws imposing duties of excise shall deal with duties of excise only.

56. A vote, resolution, or proposed law for the appropriation of revenue or moneys shall not be passed unless the purpose of the appropriation has in the same session been recommended by message of the Governor-General to the House in which the proposal originated.

57. If the House of Representatives passes any proposed law, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, and if after an interval of three months the House of Representatives, in the same or the next session, again passes the proposed law with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may dissolve the Senate and the House of Representatives simultaneously. But such dissolution shall not take place within six months before the date of the expiry of the House of Representatives by effluxion of time.

If after such dissolution the House of Representatives again passes the proposed law, with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may convene a joint sitting of the members of the Senate and of the House of Representatives.

The members present at the joint sitting may deliberate and shall vote together upon the proposed law as last proposed by the House of Representatives, and upon amendments, if any, which have been made therein by one House and not agreed to by the other, and any such amendments which are affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives shall be taken to have been carried, and if the proposed law, with the amendments, if any, so carried is affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives, it shall be taken to have been duly passed by both Houses of the Parliament, and shall be presented to the Governor-General for the Queen's assent.

58. When a proposed law passed by both Houses of the Parliament is presented to the Governor-General for the Queen's assent he shall declare, according to his discretion, but subject to this Constitution, that he assents in the Queen's name, or that he withholds assent, or that he reserves the law for the Queen's pleasure.

The Governor-General may return to the House in which it originated any proposed law so presented to him, and may transmit therewith any amendments which he may recommend, and the Houses may deal with the recommendation.

59. The Queen may disallow any law within one year from the Governor-General's assent, and such disallowance on being made known by the Governor-General by speech or message to each of the Houses of the Parliament, or by Proclamation, shall annul the law from the day when the disallowance is so made known.

60. A proposed law reserved for the Queen's pleasure shall not have any force unless and until within two years from the day on which it was presented to the Governor-General for the Queen's assent the Governor-General makes known, by speech or message to each of the Houses of the Parliament, or by Proclamation, that it has received the Queen's assent.

CHAPTER II.—THE EXECUTIVE GOVERNMENT.

61. The executive power of the Commonwealth is vested in the Queen and is exercisable by the Governor-General as the Queen's representative, and extends to the execution and maintenance of this Constitution, and of the laws of the Commonwealth.

62. There shall be a Federal Executive Council to advise the Governor-General in the government of the Commonwealth, and the members of the Council shall be chosen and summoned by the Governor-General and sworn as Executive Councillors, and shall hold office during his pleasure.

63. The provisions of this Constitution referring to the Governor-General in Council shall be construed as referring to the Governor-General acting with the advice of the Federal Executive Council.

64. The Governor-General may appoint officers to administer such departments of State of the Commonwealth as the Governor-General in Council may establish.

Such officers shall hold office during the pleasure of the Governor-General. They shall be members of the Federal Executive Council, and shall be the Queen's Ministers of State for the Commonwealth.

After the first general election no Minister of State shall hold office for a longer period than three months unless he is or becomes a senator or a member of the House of Representatives.

65. Until the Parliament otherwise provides, the Ministers of State shall not exceed seven in number, and shall hold such offices as the Parliament prescribes, or, in the absence of provision, as the Governor-General directs.*

66. There shall be payable to the Queen, out of the Consolidated Revenue Fund of the Commonwealth, for the salaries of the Ministers of State, an annual sum which, until the Parliament otherwise provides, shall not exceed twelve thousand pounds a year.*

67. Until the Parliament otherwise provides, the appointment and removal of all other officers of the Executive Government of the Commonwealth shall be vested in the Governor-General in Council, unless the appointment is delegated by the Governor-General in Council or by a law of the Commonwealth to some other authority.

* The number of Ministers of State has been increased from time to time and has been 26 since 1967. The annual appropriation for Ministers' salaries has been correspondingly increased and has been \$197,300 since February 1967.

68. The command in chief of the naval and military forces of the Commonwealth is vested in the Governor-General as the Queen's representative.

69. On a date or dates to be proclaimed by the Governor-General after the establishment of the Commonwealth the following departments of the public service in each State shall become transferred to the Commonwealth:—

Posts, telegraphs, and telephones:	Lighthouses, lightships, beacons, and buoys:
Naval and military defence:	Quarantine.

But the departments of customs and of excise in each State shall become transferred to the Commonwealth on its establishment.

70. In respect of matters which, under this Constitution, pass to the Executive Government of the Commonwealth, all powers and functions which at the establishment of the Commonwealth are vested in the Governor of a Colony, or in the Governor of a Colony with the advice of his Executive Council, or in any authority of a Colony, shall vest in the Governor-General, or in the Governor-General in Council, or in the authority exercising similar powers under the Commonwealth, as the case requires.

CHAPTER III.—THE JUDICATURE.

71. The judicial power of the Commonwealth shall be vested in a Federal Supreme Court, to be called the High Court of Australia, and in such other federal courts as the Parliament creates, and in such other courts as it invests with federal jurisdiction. The High Court shall consist of a Chief Justice, and so many other Justices, not less than two, as the Parliament prescribes.*

72. The Justices of the High Court and of the other Courts created by the Parliament—

- (i) Shall be appointed by the Governor-General in Council:
- (ii) Shall not be removed except by the Governor-General in Council, on an address from both Houses of the Parliament in the same session, praying for such removal on the ground of proved misbehaviour or incapacity:
- (iii) Shall receive such remuneration as the Parliament may fix; but the remuneration shall shall not be diminished during their continuance in office.†

73. The High Court shall have jurisdiction, with such exceptions and subject to such regulations as the Parliament prescribes, to hear and determine appeals from all judgments, decrees, orders, and sentences—

- (i) Of any Justice or Justices exercising the original jurisdiction of the High Court:
- (ii) Of any other federal court, or court exercising federal jurisdiction; or of the Supreme Court of any State, or of any other court of any State from which at the establishment of the Commonwealth an appeal lies to the Queen in Council:
- (iii) Of the Inter-State Commission, but as to questions of law only:

and the judgment of the High Court in all such cases shall be final and conclusive.

But no exception or regulation prescribed by the Parliament shall prevent the High Court from hearing and determining any appeal from the Supreme Court of a State in any matter in which at the establishment of the Commonwealth an appeal lies from such Supreme Court to the Queen in Council.

Until the Parliament otherwise provides, the conditions of and restrictions on appeals to the Queen in Council from the Supreme Courts of the several States shall be applicable to appeals from them to the High Court.

74. No appeal shall be permitted to the Queen in Council from a decision of the High Court upon any question, howsoever arising, as to the limits inter se of the Constitutional powers of the Commonwealth and those of any State or States, or as to the limits inter se of the Constitutional powers of any two or more States, unless the High Court shall certify that the question is one which ought to be determined by Her Majesty in Council.

The High Court may so certify if satisfied that for any special reason the certificate should be granted, and thereupon an appeal shall lie to Her Majesty in Council on the question without further leave.

Except as provided in this section, this Constitution shall not impair any right which the Queen may be pleased to exercise by virtue of Her Royal prerogative to grant special leave of appeal from the High Court to Her Majesty in Council. The Parliament may make laws limiting the matters in which such leave may be asked, but proposed laws containing any such limitation shall be reserved by the Governor-General for Her Majesty's pleasure.

* The *Judiciary Act 1903* provided for a Chief Justice and two other Justices, increased by subsequent amendments to six.
 † The *Judiciary Act 1903* provided for the payment of a salary of £3,500 (\$7,000) a year to the Chief Justice and of £3,000 (\$6,000) a year to each other Justice, increased by subsequent amendments to \$24,000 and \$21,000 a year, respectively.

75. In all matters—

- (i) Arising under any treaty:
- (ii) Affecting consuls or other representatives of other countries:
- (iii) In which the Commonwealth, or a person suing or being sued on behalf of the Commonwealth, is a party:
- (iv) Between States, or between residents of different States, or between a State and a resident of another State:
- (v) In which a writ of Mandamus or prohibition or an injunction is sought against an officer of the Commonwealth:

the High Court shall have original jurisdiction.

76. The Parliament may make laws conferring original jurisdiction on the High Court in any matter—

- (i) Arising under this Constitution, or involving its interpretation:
- (ii) Arising under any laws made by the Parliament:
- (iii) Of Admiralty and maritime jurisdiction:
- (iv) Relating to the same subject-matter claimed under the laws of different States.

77. With respect to any of the matters mentioned in the last two sections the Parliament may make laws—

- (i) Defining the jurisdiction of any federal court other than the High Court:
- (ii) Defining the extent to which the jurisdiction of any federal court shall be exclusive of that which belongs to or is invested in the courts of the States:
- (iii) Investing any court of a State with federal jurisdiction.

78. The Parliament may make laws conferring rights to proceed against the Commonwealth or a State in respect of matters within the limits of the judicial power.

79. The federal jurisdiction of any court may be exercised by such number of judges as the Parliament prescribes.

80. The trial on indictment of any offence against any law of the Commonwealth shall be by jury, and every such trial shall be held in the State where the offence was committed, and if the offence was not committed within any State the trial shall be held at such place or places as the Parliament prescribes.

CHAPTER IV.—FINANCE AND TRADE.

81. All revenues or moneys raised or received by the Executive Government of the Commonwealth shall form one Consolidated Revenue Fund, to be appropriated for the purposes of the Commonwealth in the manner and subject to the charges and liabilities imposed by this Constitution.

82. The costs, charges, and expenses incident to the collection, management, and receipt of the Consolidated Revenue Fund shall form the first charge thereon; and the revenue of the Commonwealth shall in the first instance be applied to the payment of the expenditure of the Commonwealth.

83. No money shall be drawn from the Treasury of the Commonwealth except under appropriation made by law.

But until the expiration of one month after the first meeting of the Parliament the Governor-General in Council may draw from the Treasury and expend such moneys as may be necessary for the maintenance of any department transferred to the Commonwealth and for the holding of the first elections for the Parliament.

84. When any department of the public service of a State becomes transferred to the Commonwealth, all officers of the department shall become subject to the control of the Executive Government of the Commonwealth.

Any such officer who is not retained in the service of the Commonwealth shall, unless he is appointed to some other office of equal emolument in the public service of the State, be entitled to receive from the State any pension, gratuity, or other compensation, payable under the law of the State on the abolition of his office.

Any such officer who is retained in the service of the Commonwealth shall preserve all his existing and accruing rights, and shall be entitled to retire from office at the time, and on the pension or retiring allowance, which would be permitted by the law of the State if his service with the Commonwealth were a continuation of his service with the State. Such pension or retiring allowance shall be paid to him by the Commonwealth; but the State shall pay to the Commonwealth a part thereof

to be calculated on the proportion which his term of service with the State bears to his whole term of service, and for the purpose of the calculation his salary shall be taken to be that paid to him by the State at the time of the transfer.

Any officer who is, at the establishment of the Commonwealth, in the public service of a State, and who is, by consent of the Governor of the State with the advice of the Executive Council thereof, transferred to the public service of the Commonwealth, shall have the same rights as if he had been an officer of a department transferred to the Commonwealth and were retained in the service of the Commonwealth.

85. When any department of the public service of a State is transferred to the Commonwealth—

- (i) All property of the State of any kind, used exclusively in connexion with the department, shall become vested in the Commonwealth; but, in the case of the departments controlling customs and excise and bounties, for such time only as the Governor-General in Council may declare to be necessary:
- (ii) The Commonwealth may acquire any property of the State, of any kind used, but not exclusively used in connexion with the department; the value thereof shall, if no agreement can be made, be ascertained in, as nearly as may be, the manner in which the value of land, or of an interest in land, taken by the State for public purposes is ascertained under the law of the State in force at the establishment of the Commonwealth:
- (iii) The Commonwealth shall compensate the State for the value of any property passing to the Commonwealth under this section; if no agreement can be made as to the mode of compensation, it shall be determined under laws to be made by the Parliament:
- (iv) The Commonwealth shall, at the date of the transfer, assume the current obligations of the State in respect of the department transferred.

86. On the establishment of the Commonwealth, the collection and control of duties of customs and of excise, and the control of the payment of bounties, shall pass to the Executive Government of the Commonwealth.

87. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, of the net revenue of the Commonwealth from duties of customs and of excise not more than one-fourth shall be applied annually by the Commonwealth towards its expenditure.

The balance shall, in accordance with this Constitution, be paid to the several States, or applied towards the payment of interest on debts of the several States taken over by the Commonwealth.

88. Uniform duties of customs shall be imposed within two years after the establishment of the Commonwealth.

89. Until the imposition of uniform duties of customs—

- (i) The Commonwealth shall credit to each State the revenues collected therein by the Commonwealth.
- (ii) The Commonwealth shall debit to each State—
 - (a) The expenditure therein of the Commonwealth incurred solely for the maintenance or continuance, as at the time of transfer, of any department transferred from the State to the Commonwealth;
 - (b) The proportion of the State, according to the number of its people, in the other expenditure of the Commonwealth.
- (iii) The Commonwealth shall pay to each State month by month the balance (if any) in favour of the State.

90. On the imposition of uniform duties of customs the power of the Parliament to impose duties of customs and of excise, and to grant bounties on the production or export of goods, shall become exclusive.

On the imposition of uniform duties of customs all laws of the several States imposing duties of customs or of excise, or offering bounties on the production or export of goods, shall cease to have effect, but any grant of or agreement for any such bounty lawfully made by or under the authority of the Government of any State shall be taken to be good if made before the thirtieth day of June, one thousand eight hundred and ninety-eight, and not otherwise.

91. Nothing in this Constitution prohibits a State from granting any aid to or bounty on mining for gold, silver, or other metals, nor from granting, with the consent of both Houses of the Parliament of the Commonwealth expressed by resolution, any aid to or bounty on the production or export of goods.

92. On the imposition of uniform duties of customs, trade, commerce, and intercourse among the States, whether by means of internal carriage or ocean navigation, shall be absolutely free.

But notwithstanding anything in this Constitution, goods imported before the imposition of uniform duties of customs into any State, or into any Colony which, whilst the goods remain therein, becomes a State, shall, on thence passing into another State within two years after the imposition of such duties, be liable to any duty chargeable on the importation of such goods into the Commonwealth, less any duty paid in respect of the goods on their importation.

93. During the first five years after the imposition of uniform duties of customs, and thereafter until the Parliament otherwise provides—

(i) The duties of customs chargeable on goods imported into a State and afterwards passing into another State for consumption, and the duties of excise paid on goods produced or manufactured in a State and afterwards passing into another State for consumption, shall be taken to have been collected not in the former but in the latter State:

(ii) Subject to the last sub-section, the Commonwealth shall credit revenue, debit expenditure, and pay balances to the several States as prescribed for the period preceding the imposition of uniform duties of customs.

94. After five years from the imposition of uniform duties of customs, the Parliament may provide, on such basis as it deems fair, for the monthly payment to the several States of all surplus revenue of the Commonwealth.

95. Notwithstanding anything in this Constitution, the Parliament of the State of Western Australia, if that State be an Original State, may, during the first five years after the imposition of uniform duties of customs, impose duties of customs on goods passing into that State and not originally imported from beyond the limits of the Commonwealth; and such duties shall be collected by the Commonwealth.

But any duty so imposed on any goods shall not exceed during the first of such years the duty chargeable on the goods under the law of Western Australia in force at the imposition of uniform duties, and shall not exceed during the second, third, fourth, and fifth of such years respectively, four-fifths, three-fifths, two-fifths and one-fifth of such latter duty, and all duties imposed under this section shall cease at the expiration of the fifth year after the imposition of uniform duties.

If at any time during the five years the duty on any goods under this section is higher than the duty imposed by the Commonwealth on the importation of the like goods, then such higher duty shall be collected on the goods when imported into Western Australia from beyond the limits of the Commonwealth.

96. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, the Parliament may grant financial assistance to any State on such terms and conditions as the Parliament thinks fit.

97. Until the Parliament otherwise provides, the laws in force in any Colony which has become or becomes a State with respect to the receipt of revenue and the expenditure of money on account of the Government of the Colony, and the review and audit of such receipt and expenditure, shall apply to the receipt of revenue and the expenditure of money on account of the Commonwealth in the State in the same manner as if the Commonwealth, or the Government or an officer of the Commonwealth, were mentioned whenever the Colony, or the Government or an officer of the Colony, is mentioned.

98. The power of the Parliament to make laws with respect to trade and commerce extends to navigation and shipping, and to railways the property of any State.

99. The Commonwealth shall not, by any law or regulation of trade, commerce, or revenue, give preference to one State or any part thereof over another State or any part thereof.

100. The Commonwealth shall not, by any law or regulation of trade or commerce, abridge the right of a State or of the residents therein to the reasonable use of the waters of rivers for conservation or irrigation.

101. There shall be an Inter-State Commission, with such powers of adjudication and administration as the Parliament deems necessary for the execution and maintenance, within the Commonwealth, of the provisions of this Constitution relating to trade and commerce, and of all laws made thereunder.

102. The Parliament may by any law with respect to trade or commerce forbid, as to railways, any preference or discrimination by any State, or by any authority constituted under a State, if such preference or discrimination is undue and unreasonable, or unjust to any State; due regard

being had to the financial responsibilities incurred by any State in connexion with the construction and maintenance of its railways. But no preference or discrimination shall, within the meaning of this section, be taken to be undue and unreasonable, or unjust to any State, unless so adjudged by the Inter-State Commission.

103. The members of the Inter-State Commission—

- (i) Shall be appointed by the Governor-General in Council:
- (ii) Shall hold office for seven years, but may be removed within that time by the Governor-General in Council, on an address from both Houses of the Parliament in the same session praying for such removal on the ground of proved misbehaviour or incapacity:
- (iii) Shall receive such remuneration as the Parliament may fix; but such remuneration shall not be diminished during their continuance in office.

104. Nothing in this Constitution shall render unlawful any rate for the carriage of goods upon a railway, the property of a State, if the rate is deemed by the Inter-State Commission to be necessary for the development of the territory of the State, and if the rate applies equally to goods within the State and to goods passing into the State from other States.

105. The Parliament may take over from the States their public debts [as existing at the establishment of the Commonwealth],* or a proportion thereof according to the respective numbers of their people as shown by the latest statistics of the Commonwealth, and may convert, renew, or consolidate such debts, or any part thereof; and the States shall indemnify the Commonwealth in respect of the debts taken over, and thereafter the interest payable in respect of the debts shall be deducted and retained from the portions of the surplus revenue of the Commonwealth payable to the several States, or if such surplus is insufficient, or if there is no surplus, then the deficiency or the whole amount shall be paid by the several States.

105A.† (1.) *The Commonwealth may make agreements with the States with respect to the public debts of the States, including—*

- (a) *the taking over of such debts by the Commonwealth;*
- (b) *the management of such debts;*
- (c) *the payment of interest and the provision and management of sinking funds in respect of such debts;*
- (d) *the consolidation, renewal, conversion, and redemption of such debts;*
- (e) *the indemnification of the Commonwealth by the States in respect of debts taken over by the Commonwealth; and*
- (f) *the borrowing of money by the States or by the Commonwealth, or by the Commonwealth for the States.*

(2.) *The Parliament may make laws for validating any such agreement made before the commencement of this section.*

(3.) *The Parliament may make laws for the carrying out by the parties thereto of any such agreement.*

(4.) *Any such agreement may be varied or rescinded by the parties thereto.*

(5.) *Every such agreement and any such variation thereof shall be binding upon the Commonwealth and the States parties thereto notwithstanding anything contained in this Constitution or the Constitution of the several States or in any law of the Parliament of the Commonwealth or of any State.*

(6.) *The powers conferred by this section shall not be construed as being limited in any way by the provisions of section one hundred and five of this Constitution.*

CHAPTER V.—THE STATES.

106. The Constitution of each State of the Commonwealth shall, subject to this Constitution, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be, until altered in accordance with the Constitution of the State.

107. Every power of the Parliament of a Colony which has become or becomes a State, shall, unless it is by this Constitution exclusively vested in the Parliament of the Commonwealth or withdrawn from the Parliament of the State, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be.

* Under Section 2 of the *Constitution Alteration (State Debts)* 1909, the words in square brackets were omitted.

† Under Section 2 of the *Constitution Alteration (State Debts)* 1928, the Constitution was amended by the insertion of this section.

108. Every law in force in a Colony which has become or becomes a State, and relating to any matter within the powers of the Parliament of the Commonwealth, shall, subject to this Constitution, continue in force in the State; and, until provision is made in that behalf by the Parliament of the Commonwealth, the Parliament of the State shall have such powers of alteration and of repeal in respect of any such law as the Parliament of the Colony had until the Colony became a State.

109. When a law of a State is inconsistent with a law of the Commonwealth, the latter shall prevail, and the former shall, to the extent of the inconsistency, be invalid.

110. The provisions of this Constitution relating to the Governor of a State extend and apply to the Governor for the time being of the State, or other chief executive officer or administrator of the government of the State.

111. The Parliament of a State may surrender any part of the State to the Commonwealth; and upon such surrender, and the acceptance thereof by the Commonwealth, such part of the State shall become subject to the exclusive jurisdiction of the Commonwealth.

112. After uniform duties of customs have been imposed, a State may levy on imports or exports, or on goods passing into or out of the State, such charges as may be necessary for executing the inspection laws of the State; but the net produce of all charges so levied shall be for the use of the Commonwealth; and any such inspection laws may be annulled by the Parliament of the Commonwealth.

113. All fermented, distilled, or other intoxicating liquids passing into any State or remaining therein for use, consumption, sale or storage, shall be subject to the laws of the State as if such liquids had been produced in the State.

114. A State shall not, without the consent of the Parliament of the Commonwealth, raise or maintain any naval or military force, or impose any tax on property of any kind belonging to the Commonwealth, nor shall the Commonwealth impose any tax on property of any kind belonging to a State.

115. A State shall not coin money, nor make anything but gold and silver coin a legal tender in payment of debts.

116. The Commonwealth shall not make any law for establishing any religion, or for imposing any religious observance, or for prohibiting the free exercise of any religion, and no religious test shall be required as a qualification for any office or public trust under the Commonwealth.

117. A subject of the Queen, resident in any State, shall not be subject in any other State to any disability or discrimination which would not be equally applicable to him if he were a subject of the Queen resident in such other State.

118. Full faith and credit shall be given, throughout the Commonwealth, to the laws, the public Acts and records, and the judicial proceedings of every State.

119. The Commonwealth shall protect every State against invasion and, on the application of the Executive Government of the State, against domestic violence.

120. Every State shall make provision for the detention in its prisons of persons accused or convicted of offences against the laws of the Commonwealth, and for the punishment of persons convicted of such offences, and the Parliament of the Commonwealth may make laws to give effect to this provision.

CHAPTER VI.—NEW STATES.

121. The Parliament may admit to the Commonwealth or establish new States, and may upon such admission or establishment make or impose such terms and conditions, including the extent of representation in either House of the Parliament, as it thinks fit.

122. The Parliament may make laws for the government of any territory surrendered by any State to and accepted by the Commonwealth, or of any territory placed by the Queen under the authority of and accepted by the Commonwealth, or otherwise acquired by the Commonwealth, and may allow the representation of such territory in either House of the Parliament to the extent and on the terms which it thinks fit.

123. The Parliament of the Commonwealth may, with the consent of the Parliament of a State, and the approval of the majority of the electors of the State voting upon the question, increase, diminish, or otherwise alter the limits of the State, upon such terms and conditions as may be agreed on, and may, with the like consent, make provision respecting the effect and operation of any increase or diminution or alteration of territory in relation to any State affected.

124. A new State may be formed by separation of territory from a State, but only with the consent of the Parliament thereof, and a new State may be formed by the union of two or more States or parts of States, but only with the consent of the Parliaments of the States affected.

CHAPTER VII.—MISCELLANEOUS.

125. The seat of Government of the Commonwealth shall be determined by the Parliament and shall be within territory which shall have been granted to or acquired by the Commonwealth, and shall be vested in and belong to the Commonwealth, and shall be in the State of New South Wales, and be distant not less than one hundred miles from Sydney.

Such territory shall contain an area of not less than one hundred square miles, and such portion thereof as shall consist of Crown lands shall be granted to the Commonwealth without any payment therefor.

The Parliament shall sit at Melbourne until it meet at the Seat of Government.

126. The Queen may authorize the Governor-General to appoint any person, or any persons jointly or severally, to be his deputy or deputies within any part of the Commonwealth, and in that capacity to exercise during the pleasure of the Governor-General such powers and functions of the Governor-General as he thinks fit to assign to such deputy or deputies, subject to any limitations expressed or directions given by the Queen; but the appointment of such deputy or deputies shall not affect the exercise by the Governor-General himself of any power or function.

*[127. In reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted.]

CHAPTER VIII.—ALTERATION OF THE CONSTITUTION.

128. This Constitution shall not be altered except in the following manner:—

The proposed law for the alteration thereof must be passed by an absolute majority of each House of the Parliament, and not less than two nor more than six months after its passage through both Houses the proposed law shall be submitted in each State to the electors qualified to vote for the election of members of the House of Representatives.

But if either House passes any such proposed law by an absolute majority, and the other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, and if after an interval of three months the first-mentioned House in the same or the next session again passes the proposed law by an absolute majority with or without any amendment which has been made or agreed to by the other House, and such other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, the Governor-General may submit the proposed law as last proposed by the first-mentioned House, and either with or without any amendments subsequently agreed to by both Houses, to the electors in each State qualified to vote for the election of the House of Representatives.

When a proposed law is submitted to the electors the vote shall be taken in such manner as the Parliament prescribes. But until the qualification of electors of members of the House of Representatives becomes uniform throughout the Commonwealth, only one-half the electors voting for and against the proposed law shall be counted in any State in which adult suffrage prevails.

And if in a majority of the States a majority of the electors voting approve the proposed law, and if a majority of all the electors voting also approve the proposed law, it shall be presented to the Governor-General for the Queen's assent.

No alteration diminishing the proportionate representation of any State in either House of the Parliament, or the minimum number of representatives of a State in the House of Representatives, or increasing, diminishing, or otherwise altering the limits of the State, or in any manner affecting the provisions of the Constitution in relation thereto, shall become law unless the majority of the electors voting in that State approve the proposed law.

SCHEDULE.

OATH.

I, *A.B.*, do swear that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law. SO HELP ME GOD!

AFFIRMATION.

I, *A.B.*, do solemnly and sincerely affirm and declare that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law.

(NOTE.—*The name of the King or Queen of the United Kingdom of Great Britain and Ireland for the time being is to be substituted from time to time.*)

* Under Section 3 of the *Constitution Alteration (Aboriginals) 1967* the section in square brackets was repealed.

The Royal Proclamation

The preceding Act received the Royal assent on 9 July 1900. This made it lawful to declare that the people of Australia should be united in a Federal Commonwealth. This proclamation, made on 17 September 1900, constituted the Commonwealth as from 1 January 1901; it read as follows.

BY THE QUEEN.
A PROCLAMATION.

(Signed) VICTORIA R.

WHEREAS by an Act of Parliament passed in the Sixty-third and Sixty-fourth Years of Our Reign, intituled "An Act to constitute the Commonwealth of *Australia*," it is enacted that it shall be lawful for the Queen, with the advice of the Privy Council, to declare by Proclamation, that, on and after a day therein appointed, not being later than One year after the passing of this Act, the people of *New South Wales*, *Victoria*, *South Australia*, *Queensland*, and *Tasmania*, and also, if Her Majesty is satisfied that the people of *Western Australia* have agreed thereto, of *Western Australia*, shall be united in a Federal Commonwealth under the name of the Commonwealth of *Australia*.

And whereas We are satisfied that the people of *Western Australia* have agreed thereto accordingly.

We therefore, by and with the advice of Our Privy Council, have thought fit to issue this Our Royal Proclamation, and We do hereby declare that on and after the First day of *January* One thousand nine hundred and one, the people of *New South Wales*, *Victoria*, *South Australia*, *Queensland*, *Tasmania*, and *Western Australia* shall be united in a Federal Commonwealth under the name of the Commonwealth of *Australia*.

Given at Our Court at *Balmoral* this Seventeenth day of *September*, in the Year of Our Lord One thousand nine hundred, and in the Sixty-fourth Year of Our Reign.

GOD SAVE THE QUEEN.

The External Territories of Australia

Norfolk Island

In 1856 Norfolk Island was created a distinct and separate settlement under the jurisdiction of New South Wales. Later, in 1896, it was made a dependency under the Governor of that colony, and finally by the passage of the *Norfolk Island Act* 1913 it was accepted as a Territory of the Commonwealth of Australia. The island is situated in latitude 29° 3' 3" S., longitude 167° 57' 5" E., and comprises an area of approximately 14 square miles.

Papua

Under the administration of the Commonwealth, but not included in it, is British New Guinea or Papua, finally annexed by the British Government in 1884. This Territory was for a number of years administered by the Queensland Government, but was transferred to the Commonwealth by proclamation on 1 September 1906, under the authority of the *Papua Act* 1905. The area of Papua is about 86,100 square miles.

Trust Territory of New Guinea

In 1919 it was agreed by the Principal Allied and Associated Powers that a mandate should be conferred on Australia for the government of the former German territories and islands situated in latitude between the Equator and 8° S., and in longitude between 141° E. and 159° 25' E. The mandate was issued by the League of Nations on 17 December 1920. The Governor-General of the Commonwealth was authorised to accept the mandate by the *New Guinea Act* 1920, which also declared the area to be a Territory under the authority of the Commonwealth by the name of the Territory of New Guinea. The land area comprises about 92,160 square miles, and the administration under the mandate dated from 9 May 1921. New Guinea is now administered under a Trusteeship Agreement with the United Nations, approved on 13 December 1946.

Trust Territory of Nauru (to 31 January 1968)

In 1919 the Governments of the United Kingdom, Australia and New Zealand entered into an agreement to make provision for the exercise of the mandate conferred on the British Empire for the administration of the island of Nauru, and for the mining of the phosphate deposits thereon. The island is situated in latitude 0° 32' S., and longitude 166° 55' E. and is about 8½ square miles

in area. The agreement provided that the administration of the island should be vested in an administrator, the first appointment to be made by the Commonwealth Government, and thereafter in such manner as the three Governments decided (administrators have been appointed by the Commonwealth Government). The agreement was approved by the Commonwealth Parliament in the *Nauru Island Agreement Act* 1919, and a supplementary agreement of 30 May 1923, which gave the Government immediately responsible for the administration greater powers of control over the Administrator, was approved in 1932. The administration under the mandate operated from 17 December 1920 to 1 November 1947, and from that date to 31 January 1968 Nauru was administered under a Trusteeship Agreement with the United Nations.

Following discussions between representatives of the Nauruan people and of the Governments of Britain, New Zealand, and Australia, legislation was enacted by each Government to provide for the independence of Nauru as from 31 January 1968. (See *Nauru Independence Act* 1967, page 71 and Chapter 29, The Territories of Australia.)

Australian Antarctic Territory

An Imperial Order in Council of 7 February 1933 placed under Australian authority 'all the islands and territories other than Adelie Land which are situated south of the 60th degree of South Latitude and lying between the 160th degree of East Longitude and the 45th degree of East Longitude'.

The Order came into force with a proclamation issued by the Governor-General on 24 August 1936, after the passing of the *Australian Antarctic Territory Acceptance Act* 1933 by the Commonwealth Parliament. The boundaries of Adelie Land were definitely fixed by a decree of 1 April 1938 as latitude 60° S., longitude 136° E., and longitude 142° E.

Heard and McDonald Islands

Heard and McDonald Islands, about 2,500 miles south-west of Fremantle, were transferred from United Kingdom to Australian control as from 26 December 1947. Heard Island is approximately 27 miles long and 13 miles wide, and McDonald Islands, about 26 miles to the west of Heard Island, are small, rocky and precipitous.

Cocos (Keeling) Islands

The Cocos (Keeling) Islands Act 1955 provided for the acceptance of the Cocos Islands, in the Indian Ocean, as a Territory under the authority of the Commonwealth of Australia and was parallel to an Act of the United Kingdom Parliament transferring authority over the islands to the Commonwealth. Consequent on the passing of these Acts, Her Majesty, by Order in Council, specified 23 November 1955 as the date of transfer. From that date the islands came under Australian administration and an Official Representative of Australia was appointed to take charge of the local administration of the islands. Their approximate area is about 5½ square miles, and they are situated in the Indian Ocean in latitude 12° 5' S. and longitude 96° 53' E.

Christmas Island

The *Christmas Island Act* 1958 provided for the acceptance of Christmas Island, in the Indian Ocean, as a Territory under the authority of the Commonwealth of Australia. Complementary legislation having been passed by the Parliament of the United Kingdom, the island was transferred to the Australian administration on 1 October 1958, and an Official Representative was appointed to administer the Territory. The area of the island is about 52 square miles and it is situated in the Indian Ocean in latitude 10° 25' 22" S. and longitude 105° 39' 59" E.

CHAPTER 2

PHYSICAL GEOGRAPHY AND CLIMATE

General description of Australia

Geographical position

The Australian Commonwealth, which includes the island continent of Australia and the island of Tasmania, is situated in the Southern Hemisphere, and comprises an area of 2,967,909 square miles, the mainland alone containing 2,941,526 square miles. Bounded on the west and east by the Indian and Pacific Oceans respectively, it lies between longitudes 113° 9' E. and 153° 39' E., while its northern and southern limits are the parallels of latitude 10° 41' S. and 43° 39' S., or, excluding Tasmania, 39° 8' S. On its north are the Timor and Arafura Seas and Torres Strait, on its south the Southern Ocean*. The extreme points are Steep Point on the west, Cape Byron on the east, Cape York on the north, and South-East Cape or, if Tasmania be excluded, Wilson's Promontory, on the south. The difference in latitude between Cape York and Wilson's Promontory is 1,959 miles, and in longitude between Steep Point and Cape Byron 2,489 miles.

Tropical and temperate regions

Of the total area of Australia, nearly 39 per cent lies within the tropics. Taking the latitude of the Tropic of Capricorn as 23° 30' S., the areas within the tropical and temperate zones are approximately as follows.

AREAS OF TROPICAL AND TEMPERATE REGIONS: STATES AND TERRITORIES
(Square miles)

<i>Area</i>	<i>N.S.W. (a)</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>Total</i>
Within tropical zone	360,642	..	364,000	..	422,980	1,147,622
„ temperate zone	310,372	87,884	306,358	380,070	611,920	26,383	97,300	1,820,287
Total area .	310,372	87,884	667,000	380,070	975,920	26,383	520,280	2,967,909

(a) Includes Australian Capital Territory (939 square miles).

Fifty-four per cent of Queensland lies within the tropical zone and 46 per cent in the temperate zone; 37 per cent of Western Australia is tropical and 63 per cent temperate; while 81 per cent of the Northern Territory is tropical and 19 per cent temperate. All the remaining States lie within the temperate zone.

Area of Australia compared with areas of other countries

The area of Australia is almost as great as that of the United States of America excluding Alaska, four-fifths of that of Canada, more than half as large again as Europe excluding the U.S.S.R., and about twenty-five times that of Great Britain and Ireland. The areas of Australia and of certain other countries are shown in the table on the following page. The areas shown are in the main obtained from the *Statistical Yearbook* 1966, published by the Statistical Office of the United Nations, and the countries have been arranged in accordance with the continental groups used therein.

* The Southern Ocean is a local designation for that part of the Indian Ocean lying between the southern shores of Australia and Antarctica.

AREAS OF STATES AND TERRITORIES, AND STANDARD TIMES

State or Territory	Area	Percentage of total area	Standard times	
			Meridian selected	Ahead of G.M.T.
	sq miles			hours
New South Wales	309,433	10.43	150° E.	10
Victoria	87,884	2.96	150° E.	10
Queensland	667,000	22.47	150° E.	10
South Australia	380,070	12.81	142°30'E.	9½
Western Australia . . .	975,920	32.88	120° E.	8

Australian Capital Territory .	939	0.03	150° E.	10
<i>Mainland</i>	2,941,526	99.11
Tasmania	26,383	0.89	150° E.	10
Australia	2,967,909	100.00

The coastline of Australia is approximately 12,000 miles long—New South Wales, 700 miles; Victoria, 700 miles; Queensland, 3,200 miles; South Australia, 1,500 miles; Western Australia, 4,000 miles; Northern Territory, 1,000 miles; Australian Capital Territory, Jervis Bay area included in New South Wales; Tasmania, 900 miles. These measurements are broadly on a 'direct' basis, but even so they must be regarded as approximate only.

Geographical features of Australia

The following description is a broad summary of the main physical characteristics of the Australian continent.

A section through the Australian continent from east to west, at the point of its greatest breadth, shows first a narrow belt of coastal plain. This plain, extending north and south along the whole east coast, is well watered by rivers. It is of variable width, seldom more than sixty or seventy miles, and occasionally only a few miles, the average being roughly about forty to fifty miles. Bordering this plain is the Great Dividing Range, which extends from the north of Queensland to the south of New South Wales, and thence one branch sweeps westwards towards the boundary of Victoria and South Australia, and the other, the main branch, terminates in Tasmania. This range, which rises, often abruptly, from the plain, frequently presents bold escarpments on its eastern face, but the descent on its western slopes is gradual, until, in the country to the north of Spencer's Gulf, the plain is not above sea-level and occasionally even below it. Thence there is another almost imperceptible rise until the mountain ranges of Western Australia are reached, and beyond these lies another coastal plain. The mountains of Australia are relatively low, the highest peak, Mount Kosciusko, in New South Wales, being only about 7,300 feet. Three-quarters of the land-mass of Australia lies between the 600 and 1,500 feet contours in the form of a huge plateau, constituting the most distinctive feature of the Australian continent, to which the peculiarities of Australia's climate can probably be largely ascribed.

The rivers of Australia may be divided into two major classes, those of the coastal plains with moderate rates of fall and those of the central plains with very slight fall. Of the former not many are navigable for any distance from their mouths, and bars make many of them difficult of access or inaccessible from the sea.

The two longest rivers of the northern part of the east coast are the Burdekin and the Fitzroy in Queensland. The Hunter is the largest coastal river of New South Wales, and the Murray River, with its great tributary the Darling, drains part of Queensland, the major part of New South Wales,

and a large part of Victoria, finally flowing into the arm of the sea known as Lake Alexandrina, on the eastern side of the South Australian coast. The total length of the Murray is about 1,600 miles, 400 being in South Australia and 1,200 constituting the boundary between New South Wales and Victoria. The total length of the Murray-Darling from the source of the Darling to the mouth of the Murray is about 2,300 miles. The rivers of the north-west coast of Australia (Western Australia), e.g. the Murchison, Gascoyne, Ashburton, Fortesque, De Grey, Fitzroy, Drysdale, and Ord are of considerable size. So also are those in the Northern Territory, e.g. the Victoria and Daly, and those on the Queensland side of the Gulf of Carpentaria, such as the Gregory, Leichhardt, Cloncurry, Gilbert, and Mitchell. The rivers of Tasmania have short and rapid courses, as might be expected from the configuration of the country.

The 'lakes' of Australia may be divided into three classes: true permanent lakes; lakes which, being very shallow, become mere morasses in dry seasons or even dry up, and finally present a cracked surface of salt and dry mud; and lakes which are really inlets of the ocean, opening out into a lake-like expanse. The second class is the only one which seems to demand special mention. These are a characteristic of the great central plain of Australia. Some of them, such as Lakes Torrens, Gairdner, Eyre, and Frome, are of considerable extent.

For further information on the geographical features of Australia earlier issues of the Year Book should be consulted. The list of special articles, etc., at the end of this volume indicates the nature of the information available and its position in the various issues.

Weather and climate of Australia

This section has been prepared by the Director of the Commonwealth Bureau of Meteorology, and the various States and Territories have been arranged in the standard order adopted by that Bureau. The section concludes with a brief summary of the weather of 1967.

Introduction

Australia extends from about latitude 10° S. to latitude 44° S., but owing largely to the moderating effects of the surrounding oceans and the absence of very pronounced and extensive mountain masses it is less subject to extremes of climate than are regions of similar size in other parts of the world. The average elevation of the land surface is low—probably close to 900 feet above the sea; while the maximum altitude is just above 7,300 feet. Latitude for latitude the Australian climate is generally more temperate than that of the other large land masses of the earth, although it varies considerably from the tropical to the alpine.

The Australian meteorological seasons are: Summer—December, January, February; Autumn—March, April, May; Winter—June, July, August; Spring—September, October, November.

The following general discussion of the climate of Australia is necessarily brief. However, extensive records of Australian climatic data are held and published in various forms by the Bureau of Meteorology. A programme of regional climatic survey has been in progress for some years, and a large number of studies have been published by the Bureau of Meteorology, by the Department of National Development, and by State Development Authorities. The Bureau of Meteorology welcomes inquiries for climatic information, which may be made at its Central Office in Melbourne or through the Regional Offices which are situated in each of the State capital cities and in Canberra and Darwin. Reference may also be made to various bulletins and research papers mentioned in this text for more detailed information on particular topics.

Precipitation

Precipitation of moisture from the atmosphere may take various forms depending chiefly on the thermal conditions existing at the time. Within the Australian region precipitation occurs chiefly as rain because of the generally mild temperatures, but may also occur as snow or hail. Broadly, the immediate physical cause of rainfall may be said to be the lifting of moist air with resultant cooling, condensation into cloud, and eventual precipitation of the heavy water droplets as rain. This process may be achieved by three different means each of which may be combined with either or both of the others:

- (a) Orographic lifting caused by winds blowing onto rising terrain;
- (b) convectional lifting resulting in the development of individual rain clouds of the cumulus or cumulonimbus type producing showers and thunderstorms;
- (c) lifting of a warm air mass as it rises over cooler air—known as a 'frontal' process.

Average annual rainfall. The distribution of the average annual rainfall over Australia is shown in plate 2 (between pages 32 and 33), while plate 3 shows the distribution in 1967.

While Australia is a continent of comparatively low relief, the orographic processes in rain production are very marked in the chain of the Great Dividing Range bordering the whole east coast of the continent, in the ranges of the south-western corner of Western Australia, and in Tasmania. Thus on the east coast the higher rainfall areas lie between the ranges and the Pacific Ocean in the region of prevailing south-east wind circulation. In Tasmania and the south-west of Western Australia the region of high rainfall lies between the ranges and the ocean to the west, these areas lying in a region of predominantly westerly wind flow.

The north-western part of the continent and to some extent the whole region of the Northern Territory and inland north Queensland comes under the influence of the Australian-Asian monsoon. This results in high rainfalls in a summer wet season with the inflow of moist air from the north-west, and a winter dry season with predominantly south-east winds blowing across the dry regions of the interior and producing little rainfall. Tropical cyclones affect the waters adjacent to the north-east and north-west of Australia between December and April. Their frequency varies greatly from season to season, but on the average about three of these disturbances occur in the Coral Sea each season and about two in the eastern Indian Ocean adjacent to the west coast of the continent. When tropical cyclones move close to the tropical coast of the continent they cause very heavy rainfalls over the coastal regions. On occasions these cyclones move over the land and lose intensity, but may still continue to be accompanied by heavy rainfall along their path.

Southern Australia lies in the region of the mid-latitude westerlies for the winter half of the year and is subject to the rain-producing influences of the great depressions of the Southern Ocean and their associated frontal systems. The combined effects of these systems and the topography lead to high winter rainfalls in south-western and south-eastern Australia and in Tasmania, with the highest falls occurring on the windward side of the mountains. The rainfall generally decreases inland with distance from the coast, although the 10-inch isohyet reaches the shore of the Great Australian Bight and the central western coast of Western Australia in regions which are of very flat relief and which, because of their position and the orientation of the coastline, are only rarely exposed to moist winds.

AREA DISTRIBUTION OF AVERAGE ANNUAL RAINFALL: STATES AND TERRITORIES (Per cent)

<i>Average annual rainfall</i>	<i>W.A.</i>	<i>N.T.</i>	<i>S.A.</i>	<i>Qld</i>	<i>N.S.W. (a)</i>	<i>Vic.</i>	<i>Tas.</i>	<i>Total</i>

(a) Includes Australian Capital Territory.

The region with the highest average annual rainfall is the east coast of Queensland between Port Douglas and Cardwell, where Tully has an annual average of 177 inches. A further very high rainfall region is the mountainous west coast of Tasmania, where Lake Margaret has the highest average annual total of 145 inches. The area of lowest average annual rainfall is that of some 180,000 square miles surrounding Lake Eyre in South Australia, where on the average only 4 to 6 inches are received annually. The lowest average over a long period of record is at Troudaninna—4.13 inches. Rain occurs very irregularly, averaging only about one or two days a month in this region.

Of all the continents (excluding Antarctica), Australia receives the least average depth of rainfall and has the least run-off from its rivers into the oceans. Only in relatively small areas of the continent could the rainfall be described as abundant.

Seasonal distribution of rainfall. The average monthly distribution of rainfall in the various Australian rainfall districts is shown by the histograms of plate 4.

The following are the most marked features.

- (a) The clearly defined wet summer and dry winter of the monsoon region of northern Australia.
- (b) The more regular distribution of rainfall throughout the year in south-eastern Australia. In the region to the south and west of the Great Dividing Range a less pronounced maximum of rainfall is noticeable in the winter or early spring. On the Gippsland (eastern Victoria) coast the rainfall is fairly evenly distributed throughout the year, but further along the east coast of the continent the rainfall minimum in late winter and early spring begins to appear and becomes more marked as the tropical regions are approached.
- (c) The marked rainfall maximum in the south-western districts of Western Australia in winter—the period of the most active southern depressions and frontal systems in this region.

For further information on monthly rainfalls reference may be made to the various Australian rainfall bulletins, to the Climatological Surveys of particular districts, and to the annual rain maps and books of normals (standard 30 year periods), all published by the Bureau of Meteorology.

Variability of rainfall. For most agricultural pursuits a more important criterion of the value of rainfall is its variability or reliability. The adequate description of rainfall variability over an extensive geographical area is a matter of some difficulty. Probably the best available measures are to be found in the tables which have been calculated for a number of individual stations in some of the Climatological Survey districts. These tables show the percentage chances of receiving specified amounts of rainfall in monthly seasonal or annual time spans. Statistical indexes of rainfall variation based on a number of different techniques have been used to produce maps which show the main features of the variability of annual rainfall over Australia. A discussion of these methods and the maps is given by F. Loewe in *Some Considerations Regarding the Variability of Annual Rainfall in Australia*, Bureau of Meteorology Bulletin No. 39 (1948).

In general it may be stated that the regions of most reliable rainfall are the south-west of Western Australia, western Tasmania, and western and southern Victoria south of the divide. These areas have one of the most reliable rainfalls in the world. Elsewhere in Australia the degree of variability, in general, increases inland, but the region of the highest variability for low average annual rainfalls extends across the central part of the continent from south-western Queensland to the central coast of Western Australia. Some outstanding examples of the numerous instances of high rainfall variability throughout Australia are given below.

At Onslow (Western Australia) annual totals vary from 0.05 inches to 28 inches, and in the four consecutive years 1921 to 1924 the annual totals were 22.25, 2.71, 26.82, and 2.18 inches respectively. At Whim Creek, where 29.41 inches have been recorded in a single day, only 17 points (0.17 inches) were received in the whole of 1924. Great variability can also occur in the heavy rainfall areas, e.g. at Tully the annual rainfalls have varied from 310.92 inches in 1950 to 104.98 inches in 1943.

The following table of annual rainfall for the Australian capital cities for the past thirty years indicates the variation in rainfall at these sites.

(a) Fairbairn Aerodrome; records in issues of the Year Book prior to No. 36 were for the station at Acton which closed down in 1939, while from Year Book No. 36 to Year Book No. 53 records were for the Commonwealth Forestry Bureau station. (b) Records taken from present site commenced 1883. (c) 1911-1940. (d) Commonwealth Forestry Bureau; thirty years to 1957 inclusive.

Prolonged dry spells are fairly common in much of Australia, particularly in inland areas. A detailed discussion of the history of droughts and the frequency in particular areas may be found in Foley, J. C., *Droughts in Australia*, Bureau of Meteorology Bulletin No. 43 (1957). A shorter account of droughts in Australia will be found in a special article in Year Book No. 45, pages 51-6.*

Rainfall and vegetation. In general, the three main climatic zones of the continent exert a particular controlling influence on the general vegetation. These are the northern third of the continent where rainfall is almost always restricted to the warmer months of the year, the southern third where rainfall is predominantly a winter and spring event, and a transitional zone which experiences rainfall from both sources, although in greatly reduced quantity over the interior which is subject to frequent drought.

The length of the growing season, or conversely the extent of dry periods during the year, decides the type of vegetation which establishes in a region. The climatic influence on vegetative response is primarily through soil moisture and temperature. Thus in colder south-eastern areas the growing season is mainly temperature dependent, but elsewhere the availability of soil moisture is the prime factor. All rainfall is not equally effective in increasing the soil moisture, its availability from the soil storage to plants depending on the extent of surface run-off, seepage beyond the root zone, and loss by surface evaporation. Furthermore, the effectiveness of available soil moisture depends on the evaporative demand of the local climate; for example, an inch of stored moisture may maintain

*See also the chapter Water Conservation and Irrigation.

vigorous plant growth for twice as long in Tasmania as in the warmer, drier atmosphere of inland New South Wales. Thus it is not a sound practice to assess the agricultural potential of different areas simply by reference to average rainfall.

Generally speaking, the length of the growing season exceeds nine months over the far south-west of Western Australia and in all eastern coastal districts from Cape York Peninsula to western Victoria, and within this region humid and semi-humid plant formations thrive. Soil types, of course, also play a part in the distribution of vegetation, but they too are, to a considerable extent, the result of climate and weather.

The climate of Arnhem Land (Northern Territory) is such that there is a considerable surplus of moisture for about five months of the warm season, followed regularly by a virtual drought which frequently reaches severe intensity, and this special combination of meteorological conditions results in annual and perennial vegetation adapted to this cycle.

Over the interior the position is more complex because of the lower levels of the rainfall, its greater variability, and the high evaporative power of the drier, warmer atmosphere. In this vast section of the continent the climatic demands are so severe that the vegetative formations of the moister zones (i.e. the mesophytes, requiring about five months or longer growing season) are unable to exist. Thus a plant species adapted to these very dry and variable conditions (xerophytes), e.g. spinifex, salt bush, blue bush, and stunted eucalypts, capable of maintaining a cattle population, predominates over the arid interior.

The arid and semi-arid lands of Western Australia and inland New South Wales which border the desert carry the majority of the sheep in these States. In New South Wales the most important vegetative formations in these areas are savannah (treeless plains), savannah woodland, mulga scrub, and mallee scrub. In Western Australia sclerophyllous grass steppe and mulga scrub border the deserts and are succeeded to the south by zones of mallee scrub and mallee heath.

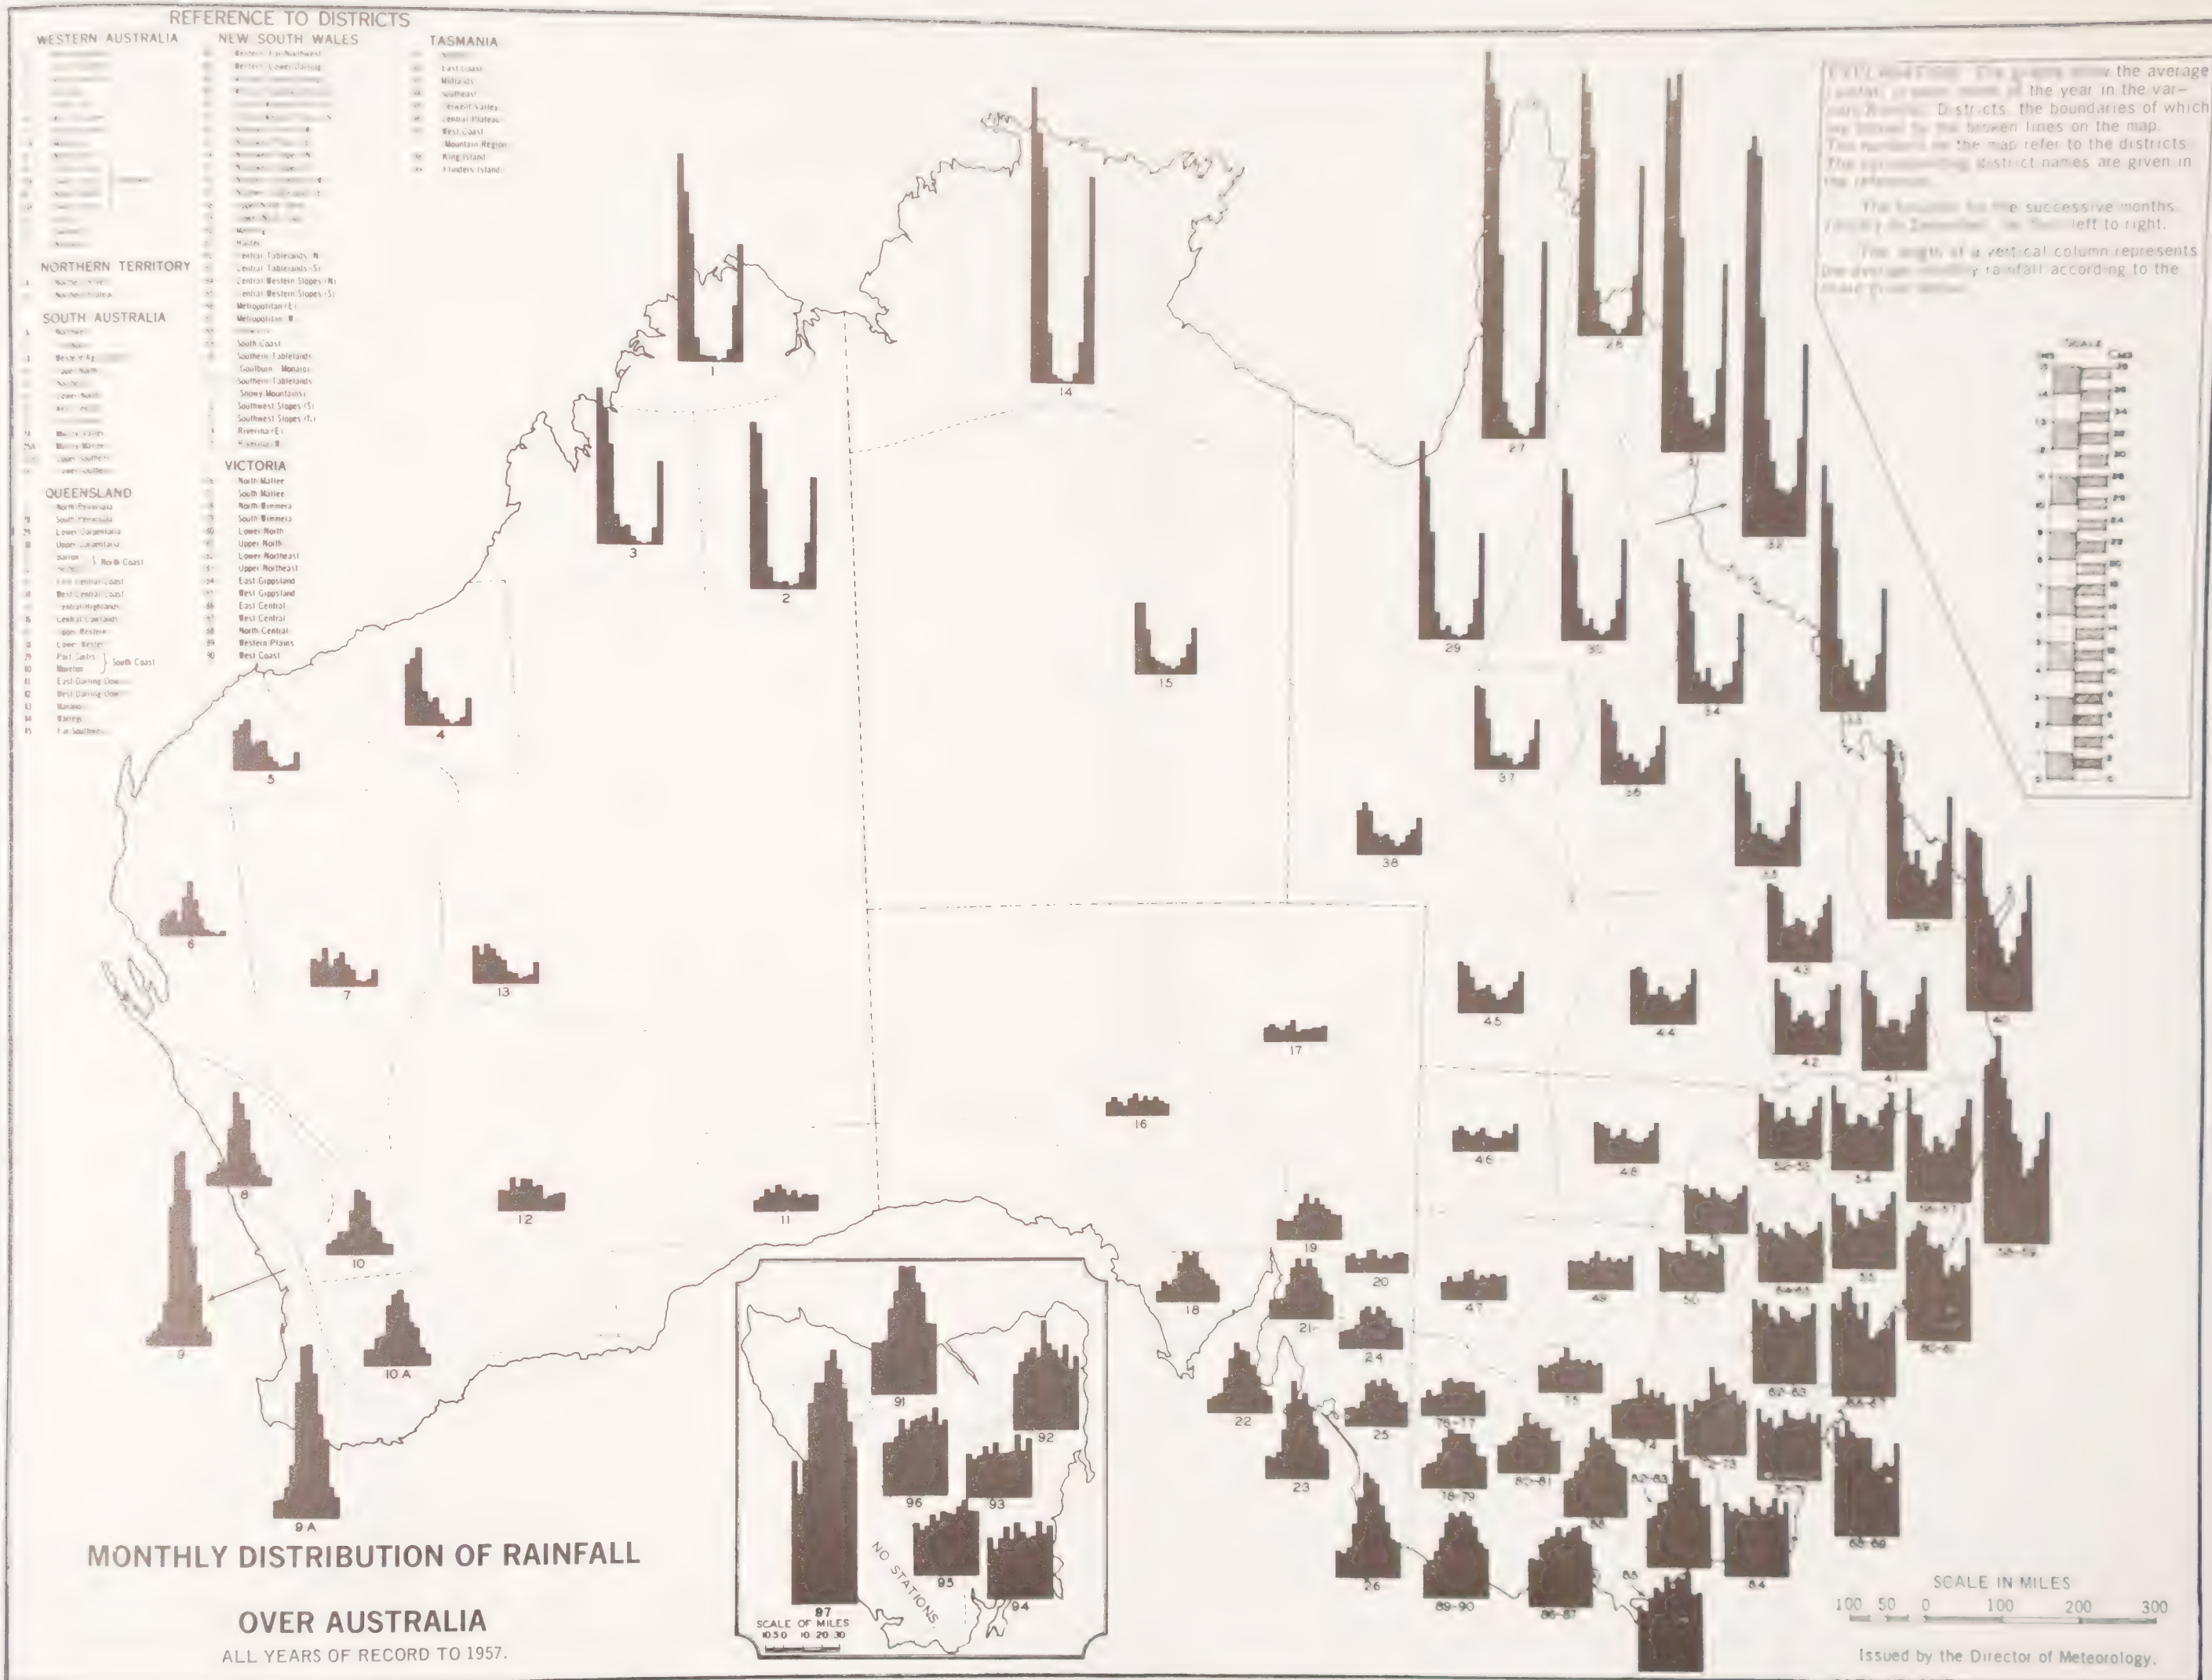

Rainfall intensity. The study of extremely high rainfall intensities is important in the investigation of the flow characteristics of river systems, and flood prevention measures, the design of irrigation works, and hydro-electric schemes. The highest rainfalls recorded in a period of twenty-four hours up to 1966 for each State and Territory were: Western Australia, Whim Creek, 29.41 inches, 3 April 1898; Northern Territory, Roper Valley, 21.44 inches, 15 April 1963; South Australia, Ardrossan, 8.10 inches, 18 February 1946; Queensland, Crohamhurst, 35.71 inches, 3 February 1893; New South Wales, Dorriggo, 25.04 inches, 24 June 1950; Australian Capital Territory, Jervis Bay, 7.15 inches, 29 April 1963; Victoria, Balook, 10.81 inches, 18 February 1951; and Tasmania, Mathinna, 13.25 inches, 5 April 1929. Most of the very high intensities have occurred in the coastal strip of Queensland, where the combination of a tropical cyclone moving close to mountainous terrain provides ideal conditions for spectacular falls. For other very heavy falls at various localities reference may be made to Year Books No. 14, pages 60-4, No. 22, pages 46-8, No. 29, pages 43, 44 and 51, and No. 53, pages 32-4.

Snow and hail. For varying periods from late autumn to early spring snow usually covers the ground to a great extent on the Australian Alps above a level of about 4,500 to 5,000 feet, where in both New South Wales and Victoria ski-ing resorts operate throughout the season.

In Tasmania also the highlands are frequently covered above the 3,500 feet level for extended periods of the winter. There are, however, some years when snowfalls are much lighter than normal and even fail completely. Light snow has been known to fall occasionally as far north as the New England plateau in New South Wales (latitude 31° S.), and in exceptional seasons much of the dividing range from Victoria to Toowoomba (Queensland) has been covered above a level of about 4,000 feet. In ravines around Mount Kosciuszko small areas of snow may persist throughout the summer after a heavy winter fall. This winter snowfall of south-eastern Australia is important in aiding the reliable flow of many streams which are utilised in the hydro-electric schemes of the Snowy Mountains, northern Victoria, and Tasmania. Snowfall at low terrain elevations occurs from time to time, particularly in Tasmania and Victoria, but falls are usually light and rarely lie more than a few days.

Hail is most frequent in winter and spring along the south-eastern coastal region of the continent and in Tasmania, where it is usually of a relatively small size. Summer storms, however, which are quite frequent, particularly in the highland plateau regions of eastern Australia, often produce stones of large size and of destructive intensity. Very large stones capable of piercing light gauge galvanised iron are reported from time to time, and damage to fruit crops in south-eastern Australia from large hail stones is quite frequent.

Floods. In general, flooding in Australia is most pronounced on the shorter streams flowing from the Great Dividing Range into the Pacific Ocean along the seaboard of Queensland and New South Wales. These floods are particularly destructive on the more densely populated coast

of New South Wales. The chief rivers in this area are the Tweed, Richmond, Clarence, McLeay, Nepean, Hawkesbury, Hunter, and Shoalhaven, all of which experience quite frequent and considerable flooding. These floods occur chiefly in summer but may occur at any time of the year.

The great Fitzroy and Burdekin river systems in Queensland are also subject to floods during the summer wet season, while much of the heavy monsoon rain in northern Queensland flows southward through the normally dry channels of the network of rivers draining into Lake Eyre. This water may cause extensive floods over a vast area, but it is soon lost by seepage and evaporation and rarely reaches the lake in any quantity. The Condamine and the other tributaries of the Darling also carry considerable volumes of water south through western New South Wales to the Murray, and flooding along their courses occurs from time to time.

Flooding also occurs from time to time, usually in autumn, winter, and spring, in the Murray-Murrumbidgee system of New South Wales and Victoria and on the smaller coastal streams of southern Victoria. In Tasmania, flooding of the north coast streams, particularly the South Esk system, is common in the same seasons. In South Australia some flooding has occurred in the lower reaches of the Murray owing to rainfall as far away as Queensland and south-eastern New South Wales. In the north of Western Australia and the Northern Territory, flooding of the coastal streams occurs frequently in summer but is not of such economic importance as the flooding of the eastern coastal streams of the continent, where many localities are more vulnerable to damage.

Temperature

Conditions vary greatly for a particular individual even in a fixed location, so that it is difficult to describe general comfort variability uniquely throughout a region as varied climatically as Australia. A number of indexes which attempt to incorporate some of the factors concerned* have been used experimentally from time to time, and further research continues on this very difficult problem. Generally speaking, there is an increase in discomfort northwards within the tropical regions of Australia in summer, owing to the heat and high absolute humidity which reach a maximum in the extreme north of the continent. Such conditions are, however, ameliorated to a large extent in highland areas such as the Atherton Tableland in Queensland. No part of Australia is uncomfortably hot in winter, and only in a small area of the Australian Alps and highland Tasmania does bodily strain due to cold exist in winter. The history of the settlement of the northern regions of Queensland and the Northern Territory indicates that with accelerating development of studies and experience in the arrangement of living and working accommodation, clothing, and general way of life, the effects of extremes of climate can be minimised.

For some further discussion of the problems of temperature and comfort conditions reference may be made to Ashton, H. T., *Meteorological Data for Air Conditioning in Australia*, Bureau of Meteorology Bulletin No. 47 (1964).

Average seasonal temperature distribution. Plates 5 to 8 show the normal daily maximum and minimum temperatures for January and July, which may be taken as indicative respectively of the summer and winter seasons in Australia. Further detailed temperature data are presented on pages 39-48 for the capital cities and more important country towns of the Commonwealth.

On the basis of average annual mean temperatures, and latitude for latitude, Australia is somewhat cooler than the other land masses of the southern hemisphere and considerably cooler than the same latitudes in the large continental areas of the northern hemisphere. This is due to the insular nature of Australia and the stronger general circulation of the atmosphere in the southern hemisphere resulting in the transport of higher latitude (cooler) air into the subtropical regions.

July is the month with the lowest mean temperature in all parts of the continent, while the month with the highest mean temperature varies from February in Tasmania and southern Victoria to December in the northern part of the continent and November in Darwin. The lateness of the month of highest average temperature in the extreme south of the continent is due in part to the effect of the Southern Ocean, where the sea surface temperature reaches its maximum in February. The cooler period of the late summer in the north is due largely to increased cloudiness associated with the inflow of north-west winds with the onset of the monsoon season.

In January average maximum temperatures exceed 95° F. over a vast area of the interior of the continent, and over large areas exceed 100° F. The hottest part of Australia is situated in the north of Western Australia around the Marble Bar and Nullagine area, where the daily maximum screen temperature during the summer frequently exceeds 100° F. for weeks at a time.

* See Year Book No. 53, page 35.

The marked change of maximum temperature in summer with distance from the sea, in areas close to the coasts, particularly along the Great Australian Bight and the Indian Ocean coast of Western Australia, is due to the penetration inland of the vigorous sea breezes which are initiated by the considerable temperature contrast between land and sea surface temperatures. The 75° F. isotherm of January mean maximum temperature skirts the southern coast of the continent from south-western Western Australia to Gippsland.

In January the mean minimum temperatures in the tropics, except for some highland regions, exceed 72° F., with a gradual decrease southward to values of 55° F. in Victoria and 50° F. in Tasmania. Highland regions in the south have mean values of 45° F. and lower. In July a more regular latitudinal distribution of mean maximum temperature is evident, only the extreme north of the continent having mean maxima higher than 80° F. Values lower than 60° F. are general over the south-eastern part of the continent, with mean maxima falling below 40° F. in small alpine areas. Average night minimum temperatures in July fall below 45° F. in areas south of the tropics and away from the coast. Alpine regions again record the lowest temperatures with some areas experiencing means lower than 25° F.

Extreme variation and daily range. Only at a few inland places in Australia does the absolute range of temperature (i.e. the range from the highest maximum to the lowest minimum) exceed 100° F. Generally it is in the range 70° F. to 90° F. in the inland areas and somewhat less on the coasts. The highest temperature recorded in Australia was 127.5° F. at Cloncurry (Queensland) on 16 January 1889 and the lowest -8° F. at Charlotte Pass in the southern Alps on 14 July 1945 and again on 22 August 1947. The world record maximum temperature is 136° F. at Azizia (Tripoli) on 13 August 1922 and the world record minimum temperature -126.9° F. at Vostok on the Antarctic plateau on 24 August 1960.

High temperatures. Heat waves with a number of successive days higher than 100° F. are relatively common in many parts of Australia. With the exception of the north-western coast of Western Australia, however, most coastal areas do not usually experience more than a few days in succession of such conditions. The frequency of such conditions increases inland, and periods of up to twenty days have been recorded over most of the settled areas. This figure increases in western Queensland and north-western Western Australia to more than sixty days in places. The central part of the Northern Territory and the Marble Bar-Nullagine area of Western Australia have recorded the most prolonged heat waves for the Australian region. The longest consecutive period of daily maxima greater than 100° F. was 160 consecutive days recorded in Marble Bar during the summer of 1923-24.

Frosts. Injury to the tissues of growing plants is not caused until the temperature has fallen considerably below the freezing point of water (32° F.), and a ground frost is regarded as having occurred when the grass thermometer has fallen below 30.4° F. However, as terrestrial minima are not recorded at all stations, it is usual for statistical purposes to regard the registration of a screen thermometer of 36° F. as indicating a 'light' frost. A map showing frequency of days with screen minima higher than 36° F. (i.e. the frost free period) is reproduced in plate 9. A 'heavy' frost is taken as a screen reading of less than 32° F. A 'black' frost occurs with a combination of low temperature and low humidity, and, although frost crystals are not observed on the ground, damage takes place to the plant cells by the freezing and expansion of the moisture they contain.

The frequency of frost depends largely on altitude, latitude, and proximity to the sea, and locally, to a very large extent, on even minor variations in contour of the land. The parts of Australia which are most subject to frost are the eastern highlands from north-eastern Victoria to the western Darling Downs in southern Queensland. Most stations in this region experience more than ten nights a month with readings of 32° F. or under for three to five months of the year. On Tasmania's Central Plateau similar conditions occur for three to six months of the year. Heavy frosts are comparatively infrequent in Western Australia, except in parts of the south and south-west. In South Australia frosts are most frequent in the agricultural areas of the south-east.

Frosts may occur within a few miles of the coast over the whole continent except the Northern Territory and most of north Queensland. Regions in which frosts may occur at any time of the year comprise most of Tasmania, large areas of the tablelands of New South Wales, much of inland Victoria, particularly the north-east, and a small part in the extreme south-west of Western Australia. Over most of the interior of the continent, and on the highlands of Queensland as far north as the Atherton Plateau, frosts commence in April and end in September, but they are infrequent in these months. Minimum temperatures below 32° F. are experienced in most of the sub-tropical interior in June and July.

For further details of frost conditions in Australia reference should be made to Foley, J. C., *Frost in the Australian Region*, Bureau of Meteorology Bulletin No. 32 (1945).

Humidity and saturation deficit

The annual variation of vapour pressure* for regions outside the tropics closely follows that of temperature. However, the mean relative humidity* in the temperate regions is generally highest in winter and lowest during the summer. In northern Australia the highest relative humidity occurs during the rainy summer season. The relative humidity variation during the day closely follows the diurnal variation of temperature, being highest with low temperatures and lowest with high temperatures. The relative humidity at 9 a.m. for Australian conditions may be considered as a close approximation to the mean for the whole day. In the tables for the capital cities, pages 39–46, the mean monthly vapour pressure and relative humidity for 9 a.m., together with the monthly extremes, are listed. The order of the stations in descending values of mean annual vapour pressure at 9 a.m. is Darwin, Brisbane, Sydney, Perth, Melbourne, Adelaide, Canberra, and Hobart, while the annual mean of the 9 a.m. relative humidities diminishes in the order Darwin, Sydney, Canberra, Melbourne, Brisbane, Hobart, Perth, and Adelaide.

In January the mean saturation deficit* at the mean temperature for the month has a maximum value of over 0.90 inches in the central parts of Western Australia and in south-eastern Queensland. Gradual decreases occur towards the coast, where values close to the north, east, and south coastlines are around 0.20 inches. On the western coast values are somewhat higher, and a strong gradient exists in the saturation deficit in the narrow region bordering the Indian Ocean. In July the variation is less, with maxima of 0.40 inches in the dry north of the Northern Territory and Western Australia, slowly decreasing generally to the south, with values over most of the south-east and extreme south-west of the continent being less than 0.10 inches. Extremely low values (less than 0.025 inches) exist in July over the highlands of south-eastern Australia and Tasmania.

Evaporation

In Australia the study of evaporation is of great importance, since in its drier regions water conservation must be practised by the use of tanks and dams. The magnitude of the economic loss by evaporation may be appreciated from plate 10, which shows that the yearly amount varies from 20 inches over the highland areas of central Tasmania to more than 130 inches in the northern and north-western part of South Australia.

Over an area of some 70 per cent of the continent, comprising most inland districts and extending to the coast in the north-west of Western Australia and to the head of the Great Australian Bight, the rainfall does not exceed the evaporation loss in any month of the year. The central and north-western portions of the continent experience evaporation far in excess of their rainfall. Vegetation over these areas is characterised by acacia, scrub steppe, and arid scrub, while many areas are merely sand hills and stony desert. Over many of the drier areas, however, particularly in the inland areas of south-eastern Australia, the loss of rainfall by evaporation is made good to some extent by the development of irrigation schemes. Some of these schemes, such as those at the Murrumbidgee Irrigation Area in New South Wales and at Mildura in Victoria and Renmark in South Australia, have been very successful. The Snowy Mountains Hydro-electric Scheme will also result in the large-scale supply of water from the south-eastern highlands of Australia for use in the drier areas to the west of the ranges in New South Wales and Victoria. The future development of such schemes as these holds promise for the reclamation of many marginal areas in Australia, which because of low rainfall and high evaporation are at present of little economic value.

Since the loss by evaporation depends largely on the net radiation absorbed and consequently on the extent of the exposed area, tanks and dams so designed that the surface area shall be a minimum are advantageous. Further, the more protected they are from the direct rays of the sun and from winds by means of suitable tree planting the less will be the evaporation loss. The Mansfield process for the treatment of tanks and dams by a mono-molecular chemical film which materially reduces evaporation is a recent development which is already giving beneficial results, particularly on large water storage areas. Such improvements are of considerable importance to the pastoralists of the drier regions of Australia and to water supply authorities.

Further information on evaporation may be found in Hounam, C. E., *Evaporation in Australia*, Bureau of Meteorology Bulletin No. 44 (1961).

* *Vapour pressure*—the pressure exerted by the water vapour of the atmosphere; *relative humidity*—the ratio of the existing vapour pressure to the saturated vapour pressure at the existing temperature, expressed as a percentage; *saturation deficit*—the difference between the saturation vapour pressure and the actual vapour pressure. See Year Book No. 53, page 37 for further information.

Sunshine and cloud

The proportion of the sky covered by cloud is of considerable meteorological and climatological importance. A cloud cover inhibits both incoming and outgoing radiation and thus profoundly affects the temperature distribution and other factors at the earth's surface. Cloud amount is measured in eighths of the sky covered.

In Australia the seasonal changes in cloudiness correspond closely to that of rainfall. In the southern or more temperate parts of the continent, particularly in the coastal and low lying areas, the winter months are generally more cloudy than the summer. This is due to the formation of extensive areas of stratiform cloud and fog during the colder months, when the structure of the lower layers of the atmosphere favours the physical processes resulting in this type of cloud. A particularly strong annual periodicity exists in the monsoonal regions of northern Australia, where it is heavily clouded during the summer wet season and practically cloudless during the winter 'dry'. Cloudiness is higher near coasts and on the windward slopes of the mountains of eastern Australia and is least over the dry interior parts of the continent.

A close relationship exists between cloud amount and number of sunshine hours, and it is possible to estimate from cloud data the equivalent number of sunshine hours over a given period. These data can be incorporated with records of direct measurement of sunshine hours, and approximate distribution maps produced for Australia. Maps of the mean sunshine distribution for January and July are reproduced in plates 11 and 12 and indicate the main features of the variation over Australia in these months.

Except for Tasmania and a narrow fringe bordering the southern, eastern, and northern coasts, the greater part of the continent receives more than 3,000 hours of sunshine each year, and in Central Australia and the mid-western coast of Western Australia totals in excess of 3,500 hours occur. The extreme south coast receives in the main 2,000 to 2,500 hours annually, while the east coast regions of New South Wales and Queensland receive 2,500 to 3,000 hours. A minimum of less than 1,750 hours occurs on the west coast and highlands of Tasmania.

Mean amounts of cloud for each month at the capital cities are included in the tables on pages 39-46, as are the mean daily hours of sunshine. The latter figure is a good single measure of the relative climatic characteristics of the individual cities for different months of the year.

Wind

Australia lies in those latitudes of the southern hemisphere where it is influenced largely by two wind systems:

- (a) the south-east trade winds blowing on the equatorial side of the mid-latitude anticyclones; and
- (b) the westerlies south of the mid-latitude anticyclones in which successive low pressure systems move eastward over the Southern Ocean.

The only pronounced seasonal variations of atmospheric pressure in the middle and high latitudes of the southern hemisphere are related to the latitudinal shift in the axes of the sub-tropical high pressure systems and to the change in the tracks of the migratory anticyclones. The latter systems move generally from west to east in the Australian region between the semi-permanent oceanic anticyclones of the Indian and Pacific Oceans. The mean path of these systems lies over southern Australia during the summer but moves northwards during the winter with the thermal equator. The movement is only of a few degrees of latitude but it is of very great importance to the climate of the Australian continent. During the summer months, when the anti-cyclones move on a more southerly track, the south-east trades affect the whole coast of eastern Australia north of around latitude 30° S., the westerlies retreating to higher latitudes, and conditions are more settled over southern Australia which then lies close to the axis of the anticyclones. In winter the anticyclones move further north, the trades affect only the northern parts of the continent, and southern Australia is exposed to the westerlies of the Southern Ocean.

In summer, with the retreat of the anticyclones to the south, the whole of northern and north-western Australia is exposed initially to light wind systems, and then during the period from December to April to the effects of the north-west monsoon. This process, which is associated with an inflow of north-west winds and intensive rains, is not as regular or persistent as the south-west monsoon of south-east Asia. However, it is a sufficiently regular feature of the climate of northern Australia to be designated as the north-west season, or, as it is best known in the area, 'the wet'. Its influence affects

areas as far south as central Queensland, but southern Queensland and the area east of the Great Dividing Range are largely still under the influence of the south-east trades. Fringe or marginal areas on the southern limits of the monsoonal penetration over the continent have a shorter and more uncertain 'wet' season, which in some years fails to appear at all. With the northward advance of the anticyclones in autumn, the monsoon gives way again to the trades, and 'the dry' of northern and north-western Australia commences.

The general features of these wind patterns may be seen in the wind rose diagrams of plates 13 and 14. It is important, however, to note the dynamic nature of the atmosphere, and that the continual growth, decay, and motion of the pressure systems result in a wide diversity of wind-flow types. Descriptions of wind conditions for particular geographical areas and seasons can thus be only of a very generalised kind. Further, local features can also be imposed on the overall wind pattern—channelling of winds due to topography (e.g. the high frequency of north-west winds in Hobart) and the marked summer sea breeze characteristics of most of the Australian coast, particularly near the Great Australian Bight as shown in the diagrams of 3 p.m. wind frequencies.

Storms and tropical cyclones

In general there are two types of weather systems in Australia which produce very strong winds and heavy rainfalls over large areas of the continent:

- (a) the active depressions which move westwards over the Southern Ocean; and
- (b) the tropical cyclones or hurricanes of north-eastern and north-western Australia.

During the winter the southern shores of the continent are subject to the deep depressions of the southern low pressure belt. They are felt most severely over the south-west of Western Australia, the south-east of South Australia, southern Victoria, and Tasmania, and may move inland in all these regions bringing strong winds and heavy rainfall. Further extensions of this type of system frequently develop close to the coast of New South Wales, often bringing severe weather to this region and to southern Queensland. These are generally known as 'east coast lows'.

The frontal systems (i.e. the narrow zones characterised by cloud and bad weather separating two air masses of different density) which are associated with these depressions vary widely in character. A common type in south-east Australia is a cold front located in a \wedge shaped trough. Such a system usually brings very strong north to north-west winds in advance of the front with a very abrupt backing of the wind to colder west to south-westerly winds after the frontal passage. Such frontal passages are, in their most severe form, associated with thunderstorms and line squalls, heavy rain, and a change to cold winds and showers. These violent changes with the passage of a cold front and strong southerly winds frequently affect the New South Wales coast as far north as Newcastle during the winter, and are popularly known as 'southerly busters'.

The most extensive rains of inland Australia occur when moist tropical air which has moved inland is lifted by convergence ahead of a slow moving colder air mass moving from the southern Ocean. The coast of Queensland, particularly the section from Cooktown to Mackay and the adjacent waters, is subject to visitations by tropical cyclones (the 'hurricanes' of the Caribbean and 'typhoons' of the China Sea). These destructive systems can affect this region from December to April, normally forming in the Coral Sea, moving south-west close to the coast and then passing away to the south-east into the Pacific. They may, however, cross the coast from time to time and bring torrential rain and violent winds (often more than 100 mph) to the coastal regions.

Similar systems affect the north-west coast of Western Australia where they bear the local name of 'willy willees', a name which is, however, often used generally in Australia for minor local whirlwinds or dust devils. The season in this region generally lasts from November to April, the storms originating in the Timor or Arafura Seas travelling usually south-west and approaching the coast most commonly between latitudes 20° S. and 22° S. Thence the systems may move southwards following the coast, or sometimes cross inland bringing high rainfalls to the otherwise dry interior of the continent. A further region which is affected somewhat less frequently by tropical cyclones is the coast of Arnhem Land in the Northern Territory and the waters and coasts of the Gulf of Carpentaria.

Tropical cyclones, in general, soon lose their intensity on crossing from sea to land, but, although the wind force rapidly abates, they are still capable of producing the heavy rainfall which leads to flooding of coastal rivers, damage to stock and property, and general disruption of transport.

Thunderstorms which bring local heavy rain and strong winds are common to most of Australia. They are also of particular importance because of the lightning damage which they cause to power transmission lines, and have been extensively studied for the purpose of siting electrical installations as far as possible in areas of low thunderstorm occurrence. Plate 15 shows the number of days annually on which thunder is heard, which is a better observational criterion than lightning observed. The region of maximum thunderstorm activity is the extreme north-west of the continent and the region south-east of the Gulf of Carpentaria. In the more settled areas maximum thunderstorm occurrence is in central western and south-eastern Queensland and the highland areas of New South Wales. The minimum number of storms occur over the interior of South Australia, western New South Wales, and eastern Tasmania.

Climatological tables

The averages and extremes for a number of elements which have been determined from long series of observations at the Australian capitals up to and including the year 1966 (data for Canberra up to 1967) are given in the following pages, together with more limited data for the larger country towns of the Commonwealth.

Barometric and vapour pressure data, which were expressed in inches of mercury in years before 1966, are now expressed in millibars (1 millibar=0.02953 inches of mercury).

The data for Canberra show the number of days of thunder; the other tables show the number of days of lightning.

The following points apply, except where otherwise stated. Where records are available, prevailing winds have been determined over a standard period of thirty years from 1911 to 1940. Other averages and extremes, including evaporation, temperature, and rainfall records for which thirty years normals have been published for a number of years past, have, since 1965, been extracted from all available years of actual record, but the number of years quoted does not include intervening periods when observations were temporarily discontinued.

Rainfall and temperatures, various cities

Year Book No. 34, page 28, shows rainfall and temperature, and No. 38, page 42, temperature, for various important cities throughout the world and for the Australian capitals.

Climatological data for selected Australian country towns

The following table shows some of the more important climatological data for selected Australian country towns, based on standard thirty years normals (1911–1940).

CLIMATOLOGICAL DATA FOR SELECTED AUSTRALIAN COUNTRY TOWNS

Town	Rainfall		Temperature				Relative humidity			
	Average annual rainfall (inches)	Average number of wet days	Mean maximum, January (°F.)	Mean maximum, July (°F.)	Mean minimum, January (°F.)	Mean minimum, July (°F.)	Average index of mean relative humidity(a), January	Average index of mean relative humidity(a), July	Mean 3p.m., January (%)	Mean 3p.m., July (%)

Zeehan . . .	94.06	246	66.3	51.6	48.0	38.2	73	81	61	74

(a) The average index of mean relative humidity has been derived from the ratio of the average 9 a.m. vapour pressure to the saturation vapour pressure at the average mean temperature of the month. Being thus related to the mean temperature this value of relative humidity is a good approximation to the daily mean.

The table on the next page gives the latitude, longitude, and altitude of the weather recording station at each of the above towns.

The weather of 1967 (December 1966 to November 1967)

The following is a brief summary of weather experienced during the four seasons ended in November 1967. Plate 3 (between pages 32 and 33) shows the rainfall distribution for 1967.

Summer, 1966-67. Rainfall during summer was normal or above in most of Australia, the main exceptions being in central and south-western Queensland, north-western New South Wales, and Tasmania. In two wide belts of country extending from Arnhem Land to the Bight and from the north-west coast to the Bight the summer rainfall was very much above average; but in large areas of central and south-west Queensland the rainfall was very much below average.

At the end of summer an area comprising south-western Queensland, far western New South Wales, and adjacent South Australia was either suffering from drought or was close to the commencement of drought. The south-east of Tasmania was critically short of rain.

Three tropical cyclones produced copious rain over parts of Australia; two in the east affected coastal areas; and one in the west moved inland from North West Cape producing widespread rains over most of Western Australia through to the coast of the Bight. Flooding was extensive in the inland of Northern Territory, South Australia, and Western Australia. Wind squalls, mainly associated with thunderstorms, caused areas of damage in New South Wales, Victoria, and Tasmania.

The temperatures of summer were free of marked extremes.

The pastoral situation was poor in the areas of western Queensland, western New South Wales, and the north-eastern corner of South Australia. Harvests ranged from good to excellent. Most water storages held adequate water.

Autumn, 1967. Early in March cyclone *Gwen* moved across the continent from Broome to Lismore (N.S.W.); about the middle of the month there were three cyclone centres in a line from the Gulf of Carpentaria to the southern Coral Sea and from late March to early April a cyclone moved from the Solomons to the south-eastern Tasman Sea. Depressions affected the south of Western Australia but weakened in their eastward movement and produced little effect in the south-east of the continent. Otherwise the circulation of the season was free of marked abnormalities.

The wet season ended in the north between late March in the Kimberleys, and late April in Arnhem Land. The rainfall over inland Australia was variable; there was a belt of above-average rain near the base of Cape York and in Arnhem Land and another from central Northern Territory across northern South Australia, northern New South Wales, and southern Queensland. In the south of Western Australia the opening rains were received in May and were an excellent start to the growing season. Elsewhere, and particularly in the south, autumn was dry with rainfall near or below the lowest on record at many places in Tasmania, Victoria, and parts of southern New South Wales.

A succession of months with low rainfall led to a recurrence of drought or near-drought conditions over parts of south-eastern Australia and most of Tasmania.

There were no marked extremes of temperature in autumn.

Winter, 1967. Rainfall was considerably below normal in South Australia, southern New South Wales, Victoria, and western Tasmania. There were also dry conditions in the rest of inland New South Wales and Western Australia. The northern part of the New South Wales coast and much of Queensland had more than normal winter rains. In inland Queensland the rains, which were mainly in June, were the heaviest for that month on record, and they transformed the seasonal situation there. Not all Queensland received these rains, and near the Northern Territory border it remained very dry, as it did in isolated pockets elsewhere. There were property losses from floods in coastal rivers in Queensland and northern New South Wales.

Although rainfalls in July and August were useful, they did little to relieve serious deficiencies in water storages in Tasmania, Victoria, and south-eastern New South Wales. These deficiencies were the result of extremely low rainfall totals since the beginning of the year; the totals to the middle of August were close to the lowest on record at many places in Tasmania, Victoria, and New South Wales.

Low rainfall had persisted in western Tasmania since November 1966, in Victoria since the beginning of 1967, in southern New South Wales since February 1967, and in South Australia since March 1967. The most noticeable effects of these low rainfall conditions were the low water levels in irrigation and hydro-electric storages.

Temperature means did not differ greatly from the average, and there were no lengthy periods of unusually cold conditions.

Spring, 1967. Rainfall in spring was mostly below normal except near the New South Wales coast and over a few scattered areas. Rainfall was very much below normal over most of Victoria, western New South Wales, South Australia, and the south-west of Western Australia.

The rainfall for the twelve months 1 December 1966 to 30 November 1967 was very much below normal in nearly all of Victoria and Tasmania, these States suffering most from drought conditions. In the south-east of South Australia, the south-west of New South Wales, and western Queensland the rainfall for the year was also very much below normal, and conditions were either at the drought or near-drought stage.

Day temperatures in spring in many areas were higher than normal, but minimum temperatures, because of clear nights, were generally near normal. In the south the bushfire danger became high during spring and was approaching dangerous levels at the end of spring.

In the south-east of the continent, except for the extreme east of Victoria, the condition of stock was deteriorating.

CHAPTER 3

GENERAL GOVERNMENT

Parliamentary government

Scheme of parliamentary government

Under section 1 of the Commonwealth of Australia Constitution the legislative power of the Commonwealth is vested in the Parliament of the Commonwealth, which consists of the Sovereign, the Senate, and the House of Representatives. The Sovereign is represented throughout the Commonwealth by the Governor-General who, subject to the Constitution of the Commonwealth, has such powers and functions as the Sovereign is pleased to assign to him. In each State there is a State Governor who is the representative of the Sovereign for the State and who exercises such powers within the State as are conferred upon him by the Letters Patent which constitute his office and by the instructions which detail the manner in which his duties are to be fulfilled. The Legislature in each State was bicameral until 1922, when the Queensland Upper House was abolished and the Parliament became unicameral. In the bicameral Parliaments the Upper House is known in the Commonwealth Parliament as the Senate, and in the State Parliaments as the Legislative Council, while the Lower House is known in the Commonwealth Parliament as the House of Representatives, in the State Parliaments of New South Wales, Victoria, and Western Australia as the Legislative Assembly, and in the State Parliaments of South Australia and Tasmania as the House of Assembly. In Queensland the sole legislative chamber is known as the Legislative Assembly. The extent of the legislative powers of the Parliaments is defined by the Commonwealth and State Constitutions. In those States that have a bicameral legislature the Legislative Assembly or House of Assembly is the larger House. The members of the Legislative Assembly or House of Assembly, as the case may be, of each State are elected by the people, the franchise extending to adult British subjects with certain residential qualifications. With the exception of the New South Wales Legislative Council, the members of State Legislative Councils are, in common with members of the Lower Houses, elected by the people of the respective States. In New South Wales a quarter of the members of the Legislative Council retire each three years, and the continuing members of the Council and the members of the Legislative Assembly, voting as an electoral body, elect members to fill the vacant positions. In Victoria and Western Australia members of the Legislative Council are elected by adult suffrage, while the franchise is limited in South Australia to the holders of certain property or service qualifications, and in Tasmania to the holders of certain property, educational, professional, or service qualifications. In the Commonwealth Parliament the qualifications for the franchise are identical for both Houses, extending to adult British subjects who have lived in Australia for six months continuously.

The Sovereign

On 7 February 1952 the Governor-General and members of the Federal Executive Council proclaimed Princess Elizabeth Queen Elizabeth the Second, Queen of this Realm and of all Her other Realms and Territories, Head of the Commonwealth, Defender of the Faith, Supreme Liege Lady in and over the Commonwealth of Australia. The coronation of Her Majesty in Westminster Abbey took place on 2 June 1953.

The Governor-General

Powers and functions. As the Queen's representative in Australia, the Governor-General exercises certain prerogative powers and functions assigned to him by the Queen. Other powers and functions are conferred on him by the Constitution. Powers which have been so assigned or conferred include, among others, the power to grant pardons and to remit fines for offences against the laws of the Commonwealth; to appoint certain officers in the Diplomatic or Consular Service of the Commonwealth; to appoint times for holding the sessions of the Parliament, prorogue Parliament, and dissolve the House of Representatives; to cause writs to be issued for general elections of members of the House of Representatives; to assent in the Queen's name to a proposed law passed by both Houses of the Parliament or withhold assent, or to reserve the law for the Queen's pleasure, or to return the proposed law to the House in which it originated and transmit therewith any amendments which he may recommend; to exercise the executive power of the Commonwealth; to choose and summon Executive Councillors, who hold office during his pleasure; and to appoint Ministers of State for the Commonwealth. In addition, the command-in-chief of the defence forces of the Commonwealth is vested in the Governor-General as the Queen's representative.

Many Acts of the Commonwealth Parliament provide that the Governor-General may make regulations to give effect to the Act. The Governor-General may also be authorised by statute to issue proclamations—for example, to declare an Act in force or a state of things to exist, e.g. the calling out of the Citizen Military Forces in time of war or defence emergency. He has been given power by statute to legislate for certain Territories of the Commonwealth. Under the conventions of responsible government obtaining in British Commonwealth countries, the Governor-General's functions are exercised generally on the advice of Ministers of State.

Holders of office. The following list shows the names of the Governors-General since the inception of the Commonwealth.

GOVERNORS-GENERAL

- Rt Hon. JOHN ADRIAN LOUIS, EARL OF HOPETOUN (afterwards MARQUIS OF LINLITHGOW), P.C. K.T., G.C.M.G., G.C.V.O. From 1 January 1901 to 9 January 1903.
- Rt Hon. HALLAM, BARON TENNYSON, P.C., G.C.M.G. From 17 July 1902 to 9 January 1903 (Acting).
- Rt Hon. HALLAM, BARON TENNYSON, P.C., G.C.M.G. From 9 January 1903 to 21 January 1904.
- Rt Hon. HENRY STAFFORD, BARON NORTHCOTE, P.C., G.C.M.G., G.C.I.E., C.B. From 21 January 1904 to 9 September 1908.
- Rt Hon. WILLIAM HUMBLE, EARL OF DUDLEY, P.C., G.C.B., G.C.M.G., G.C.V.O. From 9 September 1908 to 31 July 1911.
- Rt Hon. THOMAS, BARON DENMAN, P.C., G.C.M.G., K.C.V.O. From 31 July 1911 to 18 May 1914.
- Rt Hon. SIR RONALD CRAUFURD MUNRO FERGUSON (afterwards VISCOUNT NOVAR OF RAITH), G.C.M.G. From 18 May 1914 to 6 October 1920.
- Rt Hon. HENRY WILLIAM, BARON FORSTER OF LEPE, P.C., G.C.M.G. From 6 October 1920 to 8 October 1925.
- Rt Hon. JOHN LAWRENCE, BARON STONEHAVEN (afterwards 1ST VISCOUNT STONEHAVEN), P.C., G.C.M.G., D.S.O. From 8 October 1925 to 22 January 1931.
- Rt Hon. SIR ISAAC ALFRED ISAACS, G.C.B., G.C.M.G., K.C. From 22 January 1931 to 23 January 1936.
- Brigadier-General the Rt Hon. ALEXANDER GORE ARKWRIGHT, BARON GOWRIE (afterwards 1ST EARL OF GOWRIE), V.C., P.C., G.C.M.G., C.B., D.S.O., K.St.J. From 23 January 1936 to 30 January 1945.
- His Royal Highness PRINCE HENRY WILLIAM FREDERICK ALBERT, DUKE OF GLOUCESTER, EARL OF ULSTER AND BARON CULLODEN, K.G., P.C., K.T., K.P., G.C.B., G.C.M.G., G.C.V.O., General in the Army, Air Chief Marshal in the Royal Air Force, One of His Majesty's Personal Aides-de-Camp. From 30 January 1945 to 11 March 1947.
- Rt Hon. SIR WILLIAM JOHN MCKELL, G.C.M.G., Q.C. From 11 March 1947 to 8 May 1953.
- Field Marshal SIR WILLIAM JOSEPH SLIM (afterwards VISCOUNT SLIM OF YARRALUMLA), K.G., G.C.B., G.C.M.G., G.C.V.O., G.B.E., D.S.O., M.C., K.St.J. From 8 May 1953 to 2 February 1960.
- Rt Hon. WILLIAM SHEPHERD, VISCOUNT DUNROSSIL, P.C., G.C.M.G., M.C., K.St.J., Q.C. From 2 February 1960 to 3 February 1961.
- Rt Hon. WILLIAM PHILIP, VISCOUNT DE LISLE, V.C., P.C., G.C.M.G., G.C.V.O., K.St.J. From 3 August 1961 to 22 September 1965.
- Rt Hon. RICHARD GARDINER, BARON CASEY, P.C., G.C.M.G., C.H., D.S.O., M.C., K.St.J. From 22 September 1965.

Administrators. In addition to the holders of the office of Governor-General listed above, certain persons have, from time to time, been appointed as Administrator of the Government of the Commonwealth. Administrators are appointed in the event of the death, illness, or absence from Australia of the Governor-General, or for the period between the departure of a Governor-General and the arrival of his successor. The following is a list of such appointments.

ADMINISTRATORS

- Rt Hon. FREDERIC JOHN NAPIER, BARON CHELMSFORD (afterwards 1ST VISCOUNT CHELMSFORD), K.C.M.G. From 21 December 1909 to 27 January 1910.
- Lieut.-Colonel the Rt. Hon. ARTHUR HERBERT TENNYSON, BARON SOMERS, K.C.M.G., D.S.O., M.C. From 3 October 1930 to 22 January 1931.
- Captain the Rt Hon. WILLIAM CHARLES ARCEDECKNE, BARON HUNTINGFIELD, K.C.M.G., K.St.J. From 29 March 1938 to 24 September 1938.
- Major-General SIR WINSTON JOSEPH DUGAN (afterwards 1st BARON DUGAN OF VICTORIA), G.C.M.G., C.B., D.S.O. From 5 September 1944 to 30 January 1945; 19 January 1947 to 11 March 1947.

ADMINISTRATORS—*continued*

- General* SIR JOHN NORTHCOTT, K.C.M.G., C.B., M.V.O.† From 19 July 1951 to 14 December 1951; 30 July 1956 to 22 October 1956.
- General SIR REGINALD ALEXANDER DALLAS BROOKS, K.C.B., K.C.M.G.‡, K.C.V.O., D.S.O., K.St.J. From 8 January 1959 to 16 January 1959; 4 February 1961 to 3 August 1961; 5 June 1962 to 3 October 1962; 21 November 1962 to 18 December 1962.
- General SIR ERIC WINSLOW WOODWARD, K.C.M.G., K.C.V.O., C.B., C.B.E., D.S.O., K.St.J. From 16 June 1964 to 30 August 1964.
- Colonel SIR HENRY ABEL SMITH, K.C.M.G., K.C.V.O., D.S.O., K.St.J. From 7 May 1965 to 22 September 1965.
- General SIR EDRIC MONTAGUE BASTYAN, K.C.M.G., K.C.V.O., K.B.E., C.B., K.St.J. From 24 April 1967 to 1 June 1967.

Governors of the States

Powers and functions. The Queen is represented in each of the States by a Governor, the office having been constituted by Letters Patent under the Great Seal of the United Kingdom of various dates. The Governors of the States exercise prerogative powers conferred on them by these Letters Patent, their Commissions of appointment, and the Governor's Instructions given them under the Royal Sign Manual and Signet or other instrument as specified in the Letters Patent. In addition, they have been invested with various statutory functions by State Constitutions and other Imperial Acts or by Acts of the Parliaments of the States.

A Governor of a State assents in the Queen's name to Bills passed by the Parliament of the State, except those reserved for the Royal assent. The latter include certain classes of Bills which are regulated by the Constitution Acts and by the Governor's Instructions. He administers the prerogative of mercy by the reprieve or pardon of criminal offenders within his jurisdiction, and may remit fines and penalties due to the Crown. In the performance of his functions generally, particularly those conferred by Statute, the Governor of a State acts on the advice of Ministers of State for the State.

Holders of office. The names of the present (December 1967) State Governors are as follows:

STATE GOVERNORS, DECEMBER 1967

- New South Wales*—SIR ARTHUR RODEN CUTLER, V.C., K.C.M.G., C.B.E., K.St.J.
- Victoria*—MAJOR-GENERAL SIR ROHAN DELACOMBE, K.C.M.G., K.B.E., C.B., D.S.O., K.St.J.
- Queensland*—SIR ALAN JAMES MANSFIELD, K.C.M.G.
- South Australia*—LIEUT.-GENERAL SIR EDRIC MONTAGUE BASTYAN, K.C.M.G., K.C.V.O., K.B.E., C.B.
- Western Australia*—MAJOR-GENERAL SIR DOUGLAS ANTHONY KENDREW, K.C.M.G., C.B., C.B.E., D.S.O.
- Tasmania*—LIEUT.-GENERAL SIR CHARLES HENRY GAIRDNER, K.C.M.G., K.C.V.O., K.B.E., C.B.

The Cabinet and executive government

Both in the Commonwealth and in the States, executive government is based on the system which was evolved in Britain in the 18th century, and which is generally known as 'Cabinet' or 'responsible' government. Its essence is that the head of the State (Her Majesty the Queen, and her representative, the Governor-General or Governor) should perform governmental acts on the advice of her Ministers; that she should choose her principal Ministers of State from members of Parliament belonging to the party, or coalition of parties, commanding a majority in the popular House; that the Ministry so chosen should be collectively responsible to that House for the government of the country; and that the Ministry should resign if it ceases to command a majority there.

The Cabinet system operates chiefly by means of constitutional conventions, customs, or understandings, and through institutions that do not form part of the legal structure of the government at all. The Constitutions of the Commonwealth and the States make fuller legal provision for the Cabinet system than the British Constitution does—for example, by requiring that Ministers shall either be, or within a prescribed period become, members of the Legislature. In general, however, the legal structure of the executive government remains the same as it was before the establishment of the Cabinet system.

The executive power of the Commonwealth is exercisable by the Governor-General, and that of the States by the Governor. In each case he is advised by an Executive Council, which, however, meets only for certain formal purposes, as explained on page 54. The whole policy of a Ministry

* Lieutenant-General Sir John Northcott was granted honorary rank of **General** while administering the Government of the Commonwealth. † K.C.V.O., 1954. ‡ G.C.M.G., 1963.

is, in practice, determined by some or all of the Ministers of State, meeting without the Governor-General or Governor under the chairmanship of the Prime Minister or Premier. This group of Ministers is known as the Cabinet.

The Cabinet. This body does not form part of the legal mechanism of government. Its meetings are private and deliberative. The actual Ministers of the day alone are present, no records of the meetings are made public, and the decisions taken have, in themselves, no legal effect. In Australia until January 1956 all Ministers were members of the Cabinet. Since then, however, although in the States all Ministers are members of the Cabinet, the Commonwealth ministry is made up of twelve senior Ministers, who constitute the Cabinet, and other Ministers* of non-Cabinet rank who attend meetings of the Cabinet only when required, as, for example, when the business of the Cabinet concerns their departments. As Ministers are the leaders of the party or parties commanding a majority in the popular House, the Cabinet substantially controls, in ordinary circumstances, not only the general legislative programme of Parliament, but the whole course of Parliamentary proceedings. In effect, though not in form, the Cabinet, by reason of the fact that all Ministers are members of the Executive Council, is also the dominant element in the executive government of the country. Even in summoning, proroguing, or dissolving Parliament, the Governor-General or Governor is usually guided by the advice tendered him by the Cabinet, through the Prime Minister or Premier, though legally the discretion is vested in the Governor-General or Governor himself.

The Executive Council. This body is usually presided over by the Governor-General or Governor, the members thereof holding office during his pleasure. All Ministers of State must be members of the Executive Council. In the Commonwealth, and also in the States of Victoria and Tasmania, Ministers remain members of the Executive Council on leaving office, but are not summoned to attend its meetings, for it is an essential feature of the Cabinet system that attendance should be limited to the Ministers of the day. The meetings of the Executive Council are formal and official in character, and a record of proceedings is kept by the Secretary or Clerk. At Executive Council meetings the decisions of the Cabinet are, where necessary, given legal form, appointments made, resignations accepted, proclamations issued, and regulations and the like approved.

The appointment of Ministers. Legally, Ministers hold office during the pleasure of the Governor-General or Governor. In practice, however, the discretion of the Queen's representative in the choice of Ministers is limited by the conventions on which the Cabinet system rests. When a Ministry resigns, the Crown's custom is to send for the leader of the party which commands, or is likely to be able to command, a majority in the Lower House, and to commission him, as Prime Minister or Premier, to 'form a Ministry'—that is, to nominate other persons to be appointed as Ministers of State and to serve as his colleagues in the Cabinet.

Ministers in Upper and Lower Houses. The following table shows the distribution of Ministers in the Houses of each Parliament in December 1967.

AUSTRALIAN PARLIAMENTS: MINISTERS IN UPPER OR LOWER HOUSES
DECEMBER 1967

Ministers with seats in—	Cwlth(a)	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Total
The Upper House	5	2	4	(b)	3	3	1	18
The Lower House	20	14	11	13	6	9	8	81
Total	25	16	15	13	9	12	9	99

(a) There were twenty-six portfolios, but on the presumed death of the former Prime Minister, the Rt Hon. H. E. Holt, who disappeared while swimming off Portsea, Victoria, on 17 December, 1967, the Rt Hon. J. McEwen, Deputy Prime Minister and Minister for Trade and Industry, was appointed to the Prime Ministership on 19 December 1967. (b) Abolished in 1922.

Commonwealth Ministries

Names and tenure of office, 1901 to 1967. The following list shows the name of each Commonwealth Ministry to hold office since 1 January 1901, and the limits of its term of office.

COMMONWEALTH MINISTRIES, 1901 TO JANUARY 1968

- (i) BARTON MINISTRY, 1 January 1901 to 24 September 1903.
- (ii) DEAKIN MINISTRY, 24 September 1903 to 27 April 1904.
- (iii) WATSON MINISTRY, 27 April 1904 to 17 August 1904.
- (iv) REID-MCLEAN MINISTRY, 18 August 1904 to 5 July 1905.
- (v) DEAKIN MINISTRY, 5 July 1905 to 13 November 1908.

* Fourteen from 27 February 1967.

COMMONWEALTH MINISTRIES, 1901 TO JANUARY 1968—*continued*

- (vi) FISHER MINISTRY, 13 November 1908 to 1 June 1909.
- (vii) DEAKIN MINISTRY, 2 June 1909 to 29 April 1910.
- (viii) FISHER MINISTRY, 29 April 1910 to 24 June 1913.
- (ix) COOK MINISTRY, 24 June 1913 to 17 September 1914.
- (x) FISHER MINISTRY, 17 September 1914 to 27 October 1915.
- (xi) HUGHES MINISTRY, 27 October 1915 to 14 November 1916.
- (xii) HUGHES MINISTRY, 14 November 1916 to 17 February 1917.
- (xiii) HUGHES MINISTRY, 17 February 1917 to 10 January 1918.
- (xiv) HUGHES MINISTRY, 10 January 1918 to 9 February 1923.
- (xv) BRUCE-PAGE MINISTRY, 9 February 1923 to 22 October 1929.
- (xvi) SCULLIN MINISTRY, 22 October 1929 to 6 January 1932.
- (xvii) LYONS MINISTRY, 6 January 1932 to 7 November 1938.
- (xviii) LYONS MINISTRY, 7 November 1938 to 7 April 1939.
- (xix) PAGE MINISTRY, 7 April 1939 to 26 April 1939.
- (xx) MENZIES MINISTRY, 26 April 1939 to 14 March 1940.
- (xxi) MENZIES MINISTRY, 14 March 1940 to 28 October 1940.
- (xxii) MENZIES MINISTRY, 28 October 1940 to 29 August 1941.
- (xxiii) FADDEN MINISTRY, 29 August 1941 to 7 October 1941.
- (xxiv) CURTIN MINISTRY, 7 October 1941 to 21 September 1943.
- (xxv) CURTIN MINISTRY, 21 September 1943 to 6 July 1945.
- (xxvi) FORDE MINISTRY, 6 July 1945 to 13 July 1945.

- (xxxvii) GORTON MINISTRY, 10 January 1968.

Names of members of each Ministry to 31 January 1968. In Year Book No. 17, 1924, the names are given of each Ministry up to the Bruce-Page Ministry (9 February 1923 to 22 October 1929), together with the names of the successive holders of portfolios therein, and issue No. 39 contains a list, commencing with the Bruce-Page Ministry, which covers the period between the date on which it assumed power, 9 February 1923, and 31 July 1951, showing the names of all persons who held office in each Ministry during that period. The names of members of subsequent Ministries are listed in successive issues of the Year Book after No. 39.

This issue shows only particulars of the McEwen Ministry and the first Gorton Ministry.

McEWEN MINISTRY—19 DECEMBER 1967 TO 10 JANUARY 1968

(The State in which each Minister's electorate is situated and party affiliation are shown in parenthesis. Party affiliation is indicated by the use of the following abbreviations: C.P.—Australian Country Party, Lib.—Liberal Party of Australia.)

**Prime Minister and Minister for Trade and Industry—*

Minister for the Interior—

THE HON. P. J. NIXON (Vic.) (C.P.)

* Minister in the Cabinet.

GORTON MINISTRY—FROM 10 JANUARY 1968

On 10 January 1968 the Governor-General:

determined the appointment of the Right Honourable John McEwen, M.P., as Prime Minister; and

appointed Senator the Honourable John Grey Gorton to hold the office of Prime Minister.

On the occasion of the administration of the Oath of Office to Senator Gorton as Prime Minister of Australia, His Excellency made the following statement—

‘Whereas on the 17th day of December 1967 I was advised by the Right Honourable John McEwen, M.P., Deputy Prime Minister, that the Right Honourable Harold Edward Holt, M.P., then Prime Minister of Australia, was unavailable to perform the duties of his office and was in all probability dead;

‘And whereas, upon the information available to me, it appeared to me that, notwithstanding exhaustive and adequate search by land, sea and air (which was continued until 5th January, 1968) the body of the said Harold Edward Holt was lost in the sea and remained undiscovered, and that, having regard to the circumstances of his disappearance on the 17th day of December 1967 and to the searches so made, he was in all probability dead;

‘And whereas, upon the said advice and information, I decided on the 19th day of December 1967 to determine the Commission formerly granted by me to the said Harold Edward Holt to hold the office of Prime Minister and to grant a Commission to the said John McEwen to execute the duties of such office;

‘And whereas on the 19th day of December 1967 Harold Edward Holt’s Commission was determined and a Commission was issued to John McEwen;

‘And whereas on the 10th day of January 1968 the said John McEwen tendered to me and I accepted his resignation as Prime Minister of Australia;

‘Now, I address you, John Grey Gorton, having been advised by John McEwen, Prime Minister of Australia that you command the necessary political support—I have decided to grant a Commission to you, John Grey Gorton to hold the office of Prime Minister of Australia. I now invite you to make the Oath of Office.’

(See Section 64 of the Constitution of the Commonwealth, page 14.)

With the installation of Senator Gorton as Prime Minister and Minister for Education and Science, Mr McEwen again became Minister for Trade and Industry and Mr J. M. Fraser was appointed as Assistant Minister for Education and Science. Other portfolios remained the same. For subsequent changes, see Appendix.

Names of Ministers of State. Year Book No. 38 contains a statement listing the Commonwealth Departments in existence during the period 1 April 1925 to 31 December 1949 and the names of the Ministers of State who had administered them (pages 74-9). This is in continuation of a similar statement covering the period from the inauguration of the Commonwealth Government to 1925 which appears in Year Book No. 18.

State Ministries, December 1967

The names of the members of the Ministries in each State in December 1967 are shown in the following statement. For subsequent changes, *see* Appendix. Party affiliation is indicated in parenthesis after each name. For full party titles *see* page 67.

STATE MINISTRIES, DECEMBER 1967

NEW SOUTH WALES

Ministry (from 13 May 1965)

Premier and Treasurer—

THE HON. R. W. ASKIN, M.L.A. (Lib.)

Deputy Premier, Minister for Education, and Minister for Science—

THE HON. C. B. CUTLER, E.D., M.L.A. (C.P.)

Supplies—*

THE HON. R. HUTCHINSON, D.F.C., M.L.A.
(L.C.L.)

*Minister for Local Government, Minister for Town
Planning, and Minister for Child Welfare—*

THE HON. L. A. LOGAN, M.L.C. (L.C.L.)

*Chief Secretary, Minister for Police, and Minister
for Traffic—*

THE HON. J. F. CRAIG, M.L.A. (L.C.L.)

Minister for Housing and Minister for Labour—

THE HON. D. H. O'NEIL, M.L.A. (L.C.L.)

*Minister for Transport and Minister for Rail-
ways—*

THE HON. R. J. O'CONNOR, M.L.A. (L.C.L.)

*Minister for Health, and Minister for Fisheries
and Fauna—*

THE HON. G. C. MACKINNON, M.L.C. (L.C.L.)

STATE MINISTRIES, 1967—*continued*
TASMANIA

Ministry (from 13 May 1964)

<i>Premier, Treasurer, and Minister for Mines—</i> THE HON. E. E. REECE, M.H.A. (A.L.P.)	<i>Chief Secretary—</i> THE HON. B. K. MILLER, M.L.C. (A.L.P.)
<i>Deputy Premier and Attorney-General—</i> THE HON. R. F. FAGAN, M.H.A. (A.L.P.)	<i>Minister for Housing and Forests—</i> THE HON. S. V. WARD, M.H.A. (A.L.P.)
<i>Minister for Education—</i> THE HON. W. A. NELSON, M.H.A. (A.L.P.)	<i>Minister for Health—</i> THE HON. M. G. EVERETT, Q.C., M.H.A. (A.L.P.)
<i>Minister for Lands and Works—</i> THE HON. D. A. CASHION, M.H.A. (A.L.P.)	<i>Minister for Transport and Police—</i> THE HON. H. J. McLOUGHLIN, M.H.A. (A.L.P.)
<i>Minister for Agriculture and Tourists—</i> THE HON. A. C. ATKINS, M.H.A. (A.L.P.)	

Leaders of the Opposition, Commonwealth and State Parliaments, December 1967

The Leader of the Opposition plays an important part in the Party system of government which operates in the Australian Parliaments. The following list gives the names of the holders of this position in each of the Parliaments in December 1967.

LEADERS OF THE OPPOSITION, DECEMBER 1967

<i>Commonwealth—</i> E. G. Whitlam, Q.C., M.P. (A.L.P.)
<i>New South Wales—</i> J. B. Renshaw, M.L.A. (A.L.P.)
<i>Victoria—</i> A. C. Holding, M.P. (A.L.P.)
<i>Queensland—</i> J. W. Houston, M.L.A. (A.L.P.)
<i>South Australia—</i> R. S. Hall, M.P. (L.C.L.)
<i>Western Australia—</i> The Hon. J. T. Tonkin, M.L.A. (A.L.P.)
<i>Tasmania—</i> The Hon. W. A. Bethune, M.H.A. (Lib.)

Numbers and salaries of Commonwealth Ministers

Under sections 65 and 66, respectively, of the Constitution of the Commonwealth the number of Ministers of State was not to exceed seven, and the annual sum payable for their salaries was not to exceed £12,000 (\$24,000), each provision to operate, however, 'until the Parliament otherwise provides'.

Subsequently the number and salaries have been increased from time to time, and from 1967 the annual sum payable for salaries has been fixed at \$197,300 and the number of Ministers at twenty-six. An additional ministerial allowance of \$8,000 a year has been payable to the Prime Minister since 1964, and an additional ministerial allowance of \$3,600 a year for senior Ministers and \$3,000 a year for junior Ministers.

All amounts payable in the foregoing paragraphs are in addition to amounts payable as Parliamentary allowances (*see* page 68).

Parliaments and elections

The Commonwealth Parliaments

The first Parliament of the Commonwealth was convened by proclamation dated 29 April 1901 by His Excellency the Marquis of Linlithgow, then Earl of Hopetoun, Governor-General. It was opened on 9 May 1901 by H.R.H. the Duke of Cornwall and York. The Rt Hon. Sir Edmund Barton, G.C.M.G., K.C., was Prime Minister.

The following table shows the number and duration of Parliaments since federation.

COMMONWEALTH PARLIAMENTS

<i>Number of Parliament</i>	<i>Date of opening</i>	<i>Date of dissolution</i>
First	9 May 1901	23 November 1903
Second	2 March 1904	5 November 1906
Third	20 February 1907	19 February 1910
Fourth	1 July 1910	23 April 1913
Fifth	9 July 1913	30 July 1914(a)
Sixth	8 October 1914	26 March 1917
Seventh	14 June 1917	3 November 1919
Eighth	26 February 1920	6 November 1922
Ninth	28 February 1923	3 October 1925
Tenth	13 January 1926	9 October 1928
Eleventh	6 February 1929	16 September 1929
Twelfth	20 November 1929	27 November 1931
Thirteenth	17 February 1932	7 August 1934
Fourteenth	23 October 1934	21 September 1937
Fifteenth	30 November 1937	27 August 1940
Sixteenth	20 November 1940	7 July 1943
Seventeenth	23 September 1943	16 August 1946
Eighteenth	6 November 1946	31 October 1949
Nineteenth	22 February 1950	19 March 1951(a)
Twentieth	12 June 1951	21 April 1954
Twenty-first	4 August 1954	4 November 1955
Twenty-second	15 February 1956	14 October 1958
Twenty-third	17 February 1959	2 November 1961
Twenty-fourth	20 February 1962	1 November 1963
Twenty-fifth	25 February 1964	31 October 1966
Twenty-sixth	21 February 1967	

(a) A dissolution of both the Senate and the House of Representatives was granted by the Governor-General, acting on the advice of the Cabinet and under section 57 of the Constitution.

There have been twenty-five complete Parliaments since Federation. Until 1927 the Parliament met in Melbourne; it now meets in Canberra, the first meeting at Parliament House, Canberra, being opened by the Duke of York on 9 May 1927.

The twenty-fifth Parliament opened on 25 February 1964 and ended on 31 October 1966 when the House of Representatives was dissolved. Elections for the House of Representatives were held on 26 November 1966. Elections were also held on the same date to fill casual vacancies in the Senate for each of the States of New South Wales, Victoria, Queensland, and Western Australia. Particulars of electors and voting are given on page 62. For particulars of electors enrolled and of electors who voted in the several States and Territories at previous Commonwealth elections, see Year Book No. 52 and earlier issues.

A special article describing the Commonwealth Parliament, its functions and procedure, prepared by the Clerk of the Senate and the Clerk of the House of Representatives, appears in Year Book No. 49, pages 65-71.

Qualifications for membership and for franchise—Commonwealth Parliament

Qualifications necessary for membership of either House of the Commonwealth Parliament are possessed by any British subject, twenty-one years of age or over, who has resided in the Commonwealth for at least three years and who is, or is qualified to become, an elector of the Commonwealth. Qualifications for Commonwealth franchise are possessed by any British subject, not under twenty-one years of age and not disqualified on other grounds, who has lived in Australia for six months continuously. Residence in a subdivision for a period of one month prior to enrolment is necessary to enable a qualified person to enrol. Enrolment and voting are compulsory except that the compulsory enrolment provisions do not relate to an Aboriginal native of Australia. A member of the Defence Force on service outside Australia who is a British subject not less than 21 years of age and has lived in Australia for six months continuously is entitled to vote at Commonwealth elections, whether enrolled or not. In 1966 the franchise was extended to entitle a person who is less than twenty-one years of age, who has lived in Australia for six months continuously and who is, or has been, on 'special service' outside Australia as a member of the Defence Force, to vote at elections as if his name appeared on the roll. 'Special service' takes the same meaning as that term in the Repatriation (Special Overseas Service) Act and means, in relation to a person, service during a period when he is outside Australia and he or his unit is allotted for special duty in a special area.

The principal reasons for disqualification of persons otherwise eligible as members of either Commonwealth House are: membership of the other House, allegiance to a foreign power, being attainted of treason, being convicted and under sentence for any offence punishable by imprisonment for one year or longer, being an undischarged bankrupt or insolvent, holding office of profit under the Crown (with certain exceptions), or having pecuniary interest in any agreement with the public service of the Commonwealth except as a member of an incorporated company of more than twenty-five persons. Persons of unsound mind, attainted of treason, convicted and under sentence for any offence punishable by imprisonment for one year or longer, or persons who are holders of temporary entry permits under the *Migration Act* 1958–1966 or are prohibited immigrants under that Act are excluded from the franchise. In the main, these or similar grounds for disqualification apply also to State Parliament membership and franchise. Aborigines are entitled to vote at both Commonwealth and State elections in all States.

Commonwealth Parliaments and elections

From the establishment of the Commonwealth until 1949 the Senate consisted of thirty-six members, six being returned by each of the original federating States. The Constitution empowers Parliament to increase or decrease the size of the Parliament, and, as the population of the Commonwealth had more than doubled since its inception, the Parliament passed the *Representation Act* 1948 which provided that there should be ten Senators from each State instead of six, increasing the total to sixty Senators, thus enlarging both Houses of Parliament and providing a representation ratio nearer to the proportion which existed at Federation.

In accordance with the Constitution the total number of members of the House of Representatives must be as nearly as practicable double that of the Senate.* Consequently, in terms of the Constitution and the Representation Act, from the date of the 1949 elections the number of members in the House of Representatives was increased from 74 to 121 (excluding the members for the internal Territories). As the States are represented in the House of Representatives on a population basis, the numbers were increased as follows: New South Wales—from 28 to 47; Victoria—from 20 to 33; Queensland—from 10 to 18; South Australia—from 6 to 10; and Western Australia—from 5 to 8. Tasmania's representation remained at 5 and the total was increased from 74 to 121. The increase in the number of members of Parliament necessitated a redistribution of seats and a redetermination of electoral boundaries. Redistributions are carried out by distribution commissioners appointed for each State. The redistributions are effected on a quota basis, but taking into account community interests, means of communication, physical features, existing boundaries, and other factors.

The population as disclosed by the Census taken on 30 June 1954 necessitated a further alteration in representation in the House of Representatives in respect of New South Wales, South Australia, and Western Australia. Representation as from the general election for the House of Representatives on 10 December 1955 has been: New South Wales 46, Victoria 33, Queensland 18, South Australia 11, Western Australia 9, Tasmania 5, the total number of members (excluding the members for the internal Territories) being increased from 121 to 122.

The population as disclosed by the Census taken on 30 June 1961 revealed that, under the provisions of the Representation Act, New South Wales, Queensland, and Western Australia would each lose one member in the House of Representatives, while Victoria would gain a member. The distribution commissioners' reports were duly laid before both Houses of Parliament, but the Government decided not to proceed with the proposals and announced that it would amend the Representation Act. In November 1964 the formula provided by Section 10 of the Representation Act for determining the number of members of the House of Representatives was amended so as to give a State an additional member for 'any portion of a quota'. The effect of that amendment would have been that at the next redistribution Victoria and South Australia would each gain one member while all other States would retain their existing representation. However, no fresh redistribution was effected prior to the 1966 Census. Resulting from the population disclosed by the 1966 Census the Chief Electoral Officer has determined that the number of members of the House of Representatives to be chosen in the several States shall be: New South Wales 45, Victoria 34, Queensland 18, South Australia 12, Western Australia 9, and Tasmania 5. This new representation will then become effective at the next general election of members of the House of Representatives following the next redistribution.

Since the general election of 1922 the Northern Territory has been represented by one member in the House of Representatives, and the Australian Capital Territory has had similar representation since the elections of 1949. The member for the Australian Capital Territory has had full voting rights since the first sitting of the twenty-sixth Parliament. However, while the member for the Northern Territory may join in the debates he is not entitled to vote except on any proposed law

* See page 66 for results of referendum on proposal to alter the Constitution so that the numbers of members of the House of Representatives might be increased without necessarily increasing the number of Senators.

which relates solely to the Territory or on a motion for the disallowance of a regulation made under an Ordinance of the Territory and on any amendment of such a motion. In February 1968, however, a Bill was introduced designed to give full voting rights to the member for the Northern Territory after the next General Elections for Members of the House of Representatives.

The Constitution provides for a minimum of five members for each original State. Members of the House of Representatives are elected for the duration of the Parliament, which is limited to three years. At elections for Senators the whole State constitutes the electorate. For the purpose of elections for the House of Representatives the State is divided into single electorates corresponding in number to the number of members to which the State is entitled. Further information regarding the Senate and the House of Representatives is given in earlier issues of the Year Book.

The *Commonwealth Electoral Act* 1948, introduced with the *Representation Act* 1948 to enlarge the Commonwealth Parliament (see page 61), changed the system of scrutiny and counting of votes in Senate elections from the alternative vote to that of proportional representation. For a description of the system, see Year Book No. 38, pages 82-3. The system of voting for both the Senate and the House of Representatives is preferential.

Particulars of voting at Senate elections and elections for the House of Representatives up to 1964 appear in earlier issues of the Year Book, and additional information is available in the *Statistical Returns* issued by the Chief Electoral Officer following each election.

The numbers of electors and of primary votes cast for the major political parties in each State and Territory at the latest election for each House were as follows.

COMMONWEALTH ELECTIONS, 1966 AND 1967

State or Territory	Electors enrolled	Votes recorded					Others	Informal	Total
		Liberal Party of Australia	Aus- tralian Country Party	Aus- tralian Labor Party	Aus- tralian Demo- cratic Labor Party				
HOUSE OF REPRESENTATIVES ELECTION, 26 NOVEMBER 1966									
New South Wales	2,308,775	862,407	226,355	862,631	96,102	69,981	69,340	2,186,816

Membership at the end of 1967 was: *Senate*—Liberal Party of Australia, 22; Australian Country Party, 7; Australian Labor Party, 28; Australian Democratic Labor Party, 2; Independent, 1; *House of Representatives*—Liberal Party of Australia, 59; Australian Country Party, 21 (including the Northern Territory member with restricted voting rights); Australian Labor Party, 42; Independent, 1; Vacant, 1.

Members of the Commonwealth Parliament

The following is a list of Senators and Members of the House of Representatives of the Commonwealth Parliament as at 1 January 1968. Changes since that date are set out in the Appendix to this volume. Party affiliation is indicated by the use of the following abbreviations:

- A.D.L.P.—Australian Democratic Labour Party
- A.L.P.—Australian Labor Party
- C.P.—Australian Country Party
- Ind.—Independent
- Lib.—Liberal Party of Australia

MEMBERS OF THE COMMONWEALTH PARLIAMENT, 1 JANUARY 1968(a)

THE SENATE

President:

SENATOR THE HON. SIR ALISTER McMULLIN, K.C.M.G.

Chairman of Committees:

SENATOR T. C. DRAKE-BROCKMAN, D.F.C.

Leader of the Government in the Senate:

(a) For later changes see Appendix.

NOTE. The constituency of Higgins (V.) was vacant at 1 January 1968 following the presumed death of the Rt Hon. H. E. Holt (Lib.), who disappeared while swimming off Portsea, Victoria, on 17 December 1967.

Commonwealth referendums

In accordance with section 128 of the Constitution any proposed law for the alteration of the Constitution, in addition to being passed by an absolute majority of each House of Parliament, must be submitted to a referendum of the electors in each State, and must be approved also by a majority of the electors in a majority of the States and by a majority of all the electors who voted, before it can be presented for Royal Assent. Twenty-six such proposals have so far been submitted to referendums and the consent of the electors has been received in five cases, the first in relation to the election of Senators in 1906, the second and third in respect of State Debts—one in 1910 and the other in 1928, the fourth in respect of Social Services in 1946, and the fifth in respect of Aborigines in 1967. In addition to referendums for alteration of the Constitution, other Commonwealth referendums have been held, two prior to Federation regarding the proposed Constitution and two regarding military service during the 1914–18 War. For details of earlier referendums see Year Book No. 52, pages 66–8.

On 1 March 1967 two Bills were introduced in the House of Representatives to alter the Constitution, one to enable the number of members of the House of Representatives to be increased without necessarily increasing the number of Senators, the other to enable the Aboriginal people to be counted in reckoning the population and to omit certain words relating to the Aboriginal race which some people felt were discriminatory. The proposed laws, after being passed by both Houses of Parliament, were submitted to the electors of the States at referendums held on 27 May 1967. At the referendums the electors voted in all States in favour of the proposal regarding Aboriginals, but rejected in all States but New South Wales the proposal for increasing the number of members of the House of Representatives.

A summary of the results of the voting on each of the proposals follows.

CONSTITUTION ALTERATION REFERENDUMS, 27 MAY 1967

State	Electors enrolled	Result of scrutiny		Informal	Total
		Number of votes in favour of proposed law	Number of votes not in favour of proposed law		
CONSTITUTION ALTERATION (PARLIAMENT) REFERENDUM					
New South Wales . . .	2,315,828	1,087,694	1,044,458	34,355	2,166,507
Victoria . . .	1,734,476	496,826	1,112,506	21,262	1,630,594
Queensland . . .	904,808	370,200	468,673	9,855	848,728
South Australia . . .	590,275	186,344	363,120	11,380	560,844
Western Australia . . .	437,609	114,841	280,523	10,302	405,666
Tasmania . . .	199,589	42,764	142,660	3,821	189,245
Total . . .	6,182,585	2,298,669	3,411,940	90,975	5,801,584

CONSTITUTION ALTERATION (ABORIGINALS) REFERENDUM

New South Wales . . .	2,315,828	1,949,036	182,010	35,461	2,166,507
Victoria . . .	1,734,476	1,525,026	85,611	19,957	1,630,594
Queensland . . .	904,808	748,612	90,587	9,529	848,728
South Australia . . .	590,275	473,440	75,383	12,021	560,844
Western Australia . . .	437,609	319,823	75,282	10,561	405,666
Tasmania . . .	199,589	167,176	18,134	3,935	189,245
Total . . .	6,182,585	5,183,113	527,007	91,464	5,801,584

Consequent upon obtaining the approval of the electors, the Constitution Alteration (Aboriginals) was assented to on 10 August 1967. Section 51 of the Constitution is thereby altered by omitting from paragraph (xxvi) the words 'other than the aboriginal race in any State', and Section 127 of the Constitution is thereby repealed.

The Parliaments of the States and State elections

Pages 51, 60-1 and 68 of this chapter contain summarised information on the Parliaments of each State, the qualifications for members, the numbers of Houses and members, and salaries payable. For greater detail, including some historical material, reference should be made to Year Books No. 50, pages 69-72, No. 51, page 73, No. 52, page 68, No. 53, page 67, and earlier issues.

In Western Australia the *Electoral Act Amendment Act, 1967*, which came into operation by proclamation on 24 November 1967, provided that the residential qualifications for enrolment as an elector for the Western Australian Parliament shall be that a person shall have lived continuously in Australia for six months, in Western Australia for three months, and in the district for which he claims enrolment for one month immediately preceding the date of his claim.

State elections. Elections for both Houses of Parliament were held in Victoria on 29 April 1967. The numbers enrolled and votes cast at this election were as follows.

VICTORIAN ELECTIONS, 1967

	<i>Legislative Council</i>	<i>Legislative Assembly</i>
Electors enrolled	1,723,981	1,723,981
Electors who voted	1,625,371	1,625,239
Percentage of electors who voted	94.28	94.27

In accordance with the *Electoral Provinces and Districts Act* 1965, the number of members elected were, for the first time, thirty-five for the Legislative Council, and seventy-three for the Legislative Assembly (see Year Book No. 53, page 67).

These were the only State elections held during 1967, except for the annual Tasmanian Legislative Council elections (three members each year, four in each sixth year).

Membership of State Parliaments. The following table shows the party distribution in each of the various State Parliaments at the end of 1967.

STATE PARLIAMENTS: MEMBERSHIP, BY PARTY AFFILIATION, 31 DECEMBER 1967

(a) Abolished in 1922. (b) Plus expense allowances—Senators, \$2,100; Members of the House of Representatives, city electorates, \$2,200, country electorates, \$2,600. Certain additional allowances are also provided for holders of parliamentary offices, etc. (c) In addition, members who live outside the metropolitan area also receive a living away from home allowance of \$10 a day. (d) Plus allowances from \$1,700 for metropolitan to \$2,100 for urban, \$2,300 for inner country, and \$2,400 for outer country electorates. (e) Plus allowance of \$1,200 where electorate is less than 50 miles from Adelaide or if a Minister, \$1,600 if more than 50 miles but less than 200 miles, \$1,900 if more than 200 miles. (f) Plus expense reimbursement ranging from \$1,400 for a metropolitan member to \$2,800 for a north province member. (g) Plus allowance according to area of electorate and distance from the capital varying from \$600 to \$1,400 in the case of the Legislative Council, and from \$1,100 to \$2,100 in the case of the House of Assembly. (h) Plus allowance varying from \$1,620 to \$2,400 according to location of electorate. (i) Plus individual electoral allowances ranging from \$1,100 to \$2,630.

Enactments of the Parliaments

In the Commonwealth all laws are enacted in the name of the Sovereign, the Senate, and the House of Representatives. The subjects with respect to which the Commonwealth Parliament is empowered to make laws are enumerated in the Constitution. In the States other than South Australia and Tasmania laws are enacted in the name of the Sovereign by and with the consent of the Legislative Council (except in Queensland) and Legislative Assembly. In South Australia and Tasmania laws are enacted in the name of the Governor of the State, with the advice and consent of the Parliament in the case of South Australia, and of the Legislative Council and House of Assembly in the case of Tasmania. Generally, assent to Bills passed by the legislatures is given by the Governor-General or State Governor acting on behalf of, and in the name of, the Sovereign. In certain special cases Bills are reserved for the Royal assent. The Parliaments of the States are empowered generally, subject to the Commonwealth Constitution, to make laws in and for their respective States in all cases whatsoever. Subject to certain limitations they may alter, repeal, or vary their Constitutions. Where a law of a State is inconsistent with a law of the Commonwealth the latter prevails, and the former is to the extent of the inconsistency invalid.

The course of Commonwealth legislation

The actual legislation by the Commonwealth Parliament during 1967 is indicated in alphabetical order in *The Acts of the Parliament of the Commonwealth of Australia passed during the year 1967 in the First Session of the Twenty-sixth Parliament of the Commonwealth, with Appendix, Tables and Index*. A chronological table of Acts passed from 1901 to 1967 showing how they are affected by subsequent legislation or lapse of time is also given, and, further, a table of Commonwealth legislation passed from 1901 to 1967 in relation to the several provisions of the Constitution is furnished in the same volume. Reference should be made to these for complete information.

The Acts passed by the Commonwealth Parliament during the year 1967 are listed on pp. 69–73. In many cases the title of the Act indicates the general scope of the Act, but brief explanatory notes have been added where necessary. Appropriate chapters of this Year Book should be referred to for further information which may be available there.

The total enactments of the Commonwealth Parliament for a number of years at fairly even intervals since 1901 show a general increase. Seventeen Acts were passed in 1901, 36 in 1914, 38 in 1927, 87 in 1939, 109 in 1952, 156 in 1965, and 124 in 1967.

Commonwealth legislation passed during 1967

Aged Persons Homes Act 1967 (No. 83) amended the principal Act to make local governing bodies eligible to obtain financial assistance under the Act and to provide that funds received from such bodies shall be able to attract subsidy except when such local government moneys are received from the Commonwealth or State Governments.

Air Navigation (Charges) Act 1967 (No. 79) raised air navigation charges by ten per cent with effect from 1 January 1968.

Appropriation Act (No. 3) 1966–67 (No. 25); *Appropriation Act* (No. 4) 1966–67 (No. 26); *Appropriation Act* (No. 1) 1967–68 (No. 66); *Appropriation Act* (No. 2) 1967–68 (No. 67).

Australian National Airlines Commission Equipment Act 1967 (No. 49) approved the borrowing by the Commonwealth of \$A11.6m to assist in the financing of jet aircraft and related equipment being purchased by the Australian National Airlines Commission.

Australian National University Act 1967 (No. 65) empowers the University to remit fees to holders of its own scholarships, to forestry students awarded scholarships by a State or a State instrumentality, and to its own full-time staff.

Australian Tourist Commission Act 1967 (No. 27) established the Australian Tourist Commission to encourage visits to Australia and travel in Australia by people from other countries.

Australian Universities Commission Act 1967 (No. 35) repealed the sub-section of the Act referring to the Commonwealth Office of Education, now part of the Department of Education and Science.

Banking Act 1967 (No. 84) authorised the conduct of banking business by the Australian Resources Development Bank Ltd and the Papua and New Guinea Development Bank (see Chapter 18, Private Finance).

Bankruptcy Validation Act 1967 (No. 75) validated a defect in jurisdiction exercised in two cases in the Northern Territory in 1966.

Brigalow Lands Agreement Act 1967 (No. 48) provides for the development of a further area of brigalow lands in Queensland and the extension of the limit on Commonwealth financial assistance for this purpose to \$23m.

Broadcasting and Television Act 1967 (No. 47) increased the number of commissioners of the Australian Broadcasting Commission from seven to nine, and provides that persons in receipt of sheltered employment allowances shall be included in the definition of pensioner for consideration for a concessional broadcast listener's or television viewer's licence.

Canberra College of Advanced Education Act 1967 (No. 104) provides for the establishment in Canberra of the Canberra College of Advanced Education.

Commonwealth Employees Compensation Act 1967 (No. 96) increased the monetary benefits provided by the Act to a level approximately equal to similar State benefits.

Commonwealth Employees Furlough Act 1967 (No. 114) amended the principal Act to bring its provisions into line with the furlough provisions of the *Public Service Act* 1922–1967 and provides for the Public Service Board to be the administering authority under the Act.

Commonwealth Prisoners Act 1967 (No. 58) provides for the application, to persons sentenced to imprisonment for offences against laws of the Commonwealth, of State or Territory laws empowering a court to fix a minimum term of imprisonment which must be served by a prisoner before he is eligible to be released on parole. It also provides a system for the release on parole of such prisoners.

Conciliation and Arbitration Act 1967 (No. 101) set up a special tribunal, the Flight Crew Officers Industrial Tribunal, to deal with industrial disputes involving pilots, navigators, and flight engineers in the airlines industry (see Chapter 10, Labour, Wages, and Prices).

Constitution Alteration (Aboriginals) 1967 (No. 55) altered the Constitution by omitting certain words relating to the people of the Aboriginal race so as to empower the Commonwealth to make laws in their respect, and so that Aboriginals are to be counted in reckoning the population (see page 66).

Customs Act 1967 (No. 54) increased substantially a wide range of penalties for offences under the Act.

Customs Tariff 1967 (No. 7); *Customs Tariff* (No. 2) 1967 (No. 17)*; *Customs Tariff* (No. 3) 1967 (No. 68); *Customs Tariff* (No. 4) 1967 (No. 69); *Customs Tariff* (No. 5) 1967 (No. 70).

Customs Tariff Validation Act 1967 (No. 45); *Customs Tariff Validation Act* (No. 2) 1967 (No. 99).

Commonwealth legislation passed during 1967—continued

- Dairying Industry Act* 1967 (No. 23) extended for a further five years ending on 30 June 1972 the period in respect of which bounty is payable on the production of butter, cheese, and other butter-fat products.
- Defence Forces Protection Act* 1967 (No. 57) makes it an offence to send or take money or goods to certain named bodies that support forces opposed to Australian troops in or near Vietnam or to similar bodies which may be proclaimed from time to time.
- Defence Forces Retirement Benefits (Pension Increases) Act* 1967 (No. 91) increased existing pensions payable to retired members of the defence forces by five-sevenths of the difference between the actual pension and the pension that would have been received had retirement occurred on 30 June 1967.
- Defence (Re-establishment) Act* 1967 (No. 89) provides for the administering authority to exercise discretion in granting re-establishment loans to national servicemen in deserving cases.
- Designs Act* 1967 (No. 108) provides that it will be an infringement of the Act for a person, without the licence or authority of the registered owner, to import into Australia, for the purposes of sale or for the purposes of any trade or business, articles to which the registered design had been applied abroad without the authority of the registered owner, or to sell any such articles.
- Diplomatic Privileges and Immunities Act* 1967 (No. 16)*.
- Estate Duty Assessment Act* 1967 (No. 40)†.
- Excise Tariff* 1967 (No. 18)*; *Excise Tariff* (No. 2) 1967 (No. 82); *Excise Tariff Validation Act* 1967 (No. 46).
- Fisheries Act* 1967 (No. 116) extended the limits in which Australia has exclusive rights over fisheries from three to twelve miles.
- Gift Duty Assessment Act* 1967 (No. 41)†.
- Home Savings Grants Act* 1967 (No. 50) extended eligibility for a grant to include widowed persons aged less than thirty-six years with one or more dependent children and increased the limit on the value of a home that may attract a grant from \$14,000 to \$15,000.
- Income Tax Act* 1967 (No. 77); *Income Tax (Aged Persons) Act* 1967 (No. 13); *Income Tax Assessment Act* 1967 (No. 19)*; *Income Tax Assessment Act* (No. 2) 1967 (No. 38); *Income Tax Assessment Act* (No. 3) 1967 (No. 76); *Income Tax Assessment Act* (No. 4) 1967 (No. 85); *Income Tax (International Agreements) Act* 1967 (No. 39)†; *Income Tax (International Agreements) Act* (No. 2) 1967 (No. 86); *Income Tax (Non-resident Dividends and Interest) Act* 1967 (No. 87); *Income Tax (Partnerships and Trusts) Act* 1967 (No. 78).
- Industrial Research and Development Grants Act* 1967 (No. 51) provides up to \$6m a year for a scheme of grants to encourage increased industrial research and development in Australian manufacturing and mining industries.
- International Grains Arrangement Act* 1967 (No. 93) approved the signature and acceptance by Australia of the International Grains Arrangement 1967 (see Chapter 21, Rural Industry).
- International Wheat Agreement (Extension) Act* 1967 (No. 94) approved the signature and acceptance by Australia of the 1967 Protocol extending the operation of the International Wheat Agreement for a further year to 31 July 1968.
- Loan Act* 1967 (No. 72) authorised the raising and expending of a sum not exceeding \$300m for defence purposes.
- Loan (Airlines Equipment) Act* 1967 (No. 113) approved the borrowing by the Commonwealth of \$A2.5m from the Canadian Imperial Bank of Commerce to assist financing the purchase of up to six Twin Otter aircraft and related equipment by the Australian National Airlines Commission.
- Loan (Housing) Act* 1967 (No. 81) authorised the borrowing of an amount of \$122,840,000 for advances to the States under the Housing Agreement.
- Loan (Qantas Airways Ltd) Act* 1967 (No. 112) approved the borrowing by the Commonwealth of \$A61.4m from the United States Export-Import Bank and the Boeing Company to assist in the financing of jet aircraft and related equipment being purchased by Qantas Airways Ltd.
- Loan (War Service Land Settlement) Act* 1967 (No. 6) authorised the raising and expending of a sum not exceeding \$6.75m for financial assistance to the States of South Australia, Western Australia, and Tasmania in connection with War Service Land Settlement.

Commonwealth legislation passed during 1967—continued

Ministers of State Act 1967 (No. 1) amended the *Ministers of State Act* 1952–1966 to permit the appointment of one additional Minister and to increase the annual sum provided for ministerial salaries to \$197,300.

Narcotic Drugs Act 1967 (No. 53) gave the Commonwealth power to control the manufacture of narcotic drugs from locally produced raw materials and to direct certain other operations in accordance with obligations assumed by Australia on becoming a party to the Single Convention on Narcotic Drugs 1961.

National Debt Sinking Fund Act 1967 (No. 15) corrected a drafting error in the Schedule to the Act.

National Health Act 1967 (No. 14) made existing benefits under the Act available to persons eligible for pensions and allowances as a result of relaxations to the Social Services Means test (see Chapter 13, Welfare Services).

National Health Act (No. 2) 1967 (No. 100) authorised the provision of hearing aids for pensioners and their dependants and revised the First Schedule of the Act which sets out details of the medical benefits payable and the services in respect of which benefits are payable by the Commonwealth.

National Library Act 1967 (No. 28) provided for the appointment of the National Librarian to be made under the National Library Act instead of under the Public Service Act.

Nationality and Citizenship Act 1967 (No. 11) provided for the reduction of the qualifying period of residence for naturalisation for citizenship of non-British subjects called up for national service. They are now eligible for citizenship after three months' service regardless of their period of residence in Australia.

Natural Gas Pipeline (South Australia) Agreement Act 1967 (No. 56) approved an agreement between the Commonwealth and South Australia for the provision of financial assistance to the State towards financing the construction of a pipeline to carry natural gas to Adelaide from the Gidgealpa-Moomba region in the north-east of the State.

Nauru Independence Act 1967 (No. 103) provided for the independence of Nauru from 31 January 1968 (see Chapter 29, The Territories of Australia).

Navigation Act 1967 (No. 60) amended the *Navigation Act* 1912–1966 to give effect to the International Convention for the Safety of Life at Sea 1960.

Parliamentary Retiring Allowances (Increase) Act 1967 (No. 92) increased existing pensions under the Parliamentary Retiring Allowances Act on principles similar to those incorporated in the Defence Forces Retirement Benefits (Pension Increases) Act (see page 70).

Pay-roll Tax Assessment Act 1967 (No. 20)*; *Pay-roll Tax Assessment Act* (No. 2) 1967 (No. 88).

Petroleum (Ashmore and Cartier Islands) Act 1967 (No. 124); *Petroleum (Submerged Lands) Act* 1967 (No. 118); *Petroleum (Submerged Lands) (Exploration Permit Fees) Act* 1967 (No. 120); *Petroleum (Submerged Lands) (Pipeline Licence Fees) Act* 1967 (No. 122); *Petroleum (Submerged Lands) (Production Licence Fees) Act* 1967 (No. 121); *Petroleum (Submerged Lands) (Registration Fees) Act* 1967 (No. 123); *Petroleum (Submerged Lands) Royalty Act* 1967 (No. 119). These Acts provide a legislative framework to govern the exploration for and the exploitation of the petroleum resources of submerged lands adjacent to Australia and certain of the Territories of the Commonwealth (see Chapter 25, Mineral Industry).

Petroleum Search Subsidy Act 1967 (No. 43) extended the operations of the *Petroleum Search Subsidy Act* 1959–1964 for twelve months so that operations completed before 30 June 1969 may qualify for subsidy.

Post and Telegraph Rates Act 1967 (No. 62); *Post and Telegraph Regulations Act* 1967 (No. 63). These Acts provided for increases in a range of postal and telegraph charges.

Processed Milk Products Bounty Act 1967 (No. 24) extended to 30 June 1972 the operations of the Act.

Public Service Act 1967 (No. 2) added the Department of Education and Science to the Departments constituting the Commonwealth Service.

Public Service Act (No. 2) 1967 (No. 115) provided for the inclusion of allowances in furlough payments and removed a limitation placed on the length of leave periods which can be granted to officers of the Commonwealth Service to enable them to perform services for prescribed international organisations or with certain governments.

Repatriation Act 1967 (No. 64) increased the rates of pensions payable to children in the case of the death of a member of the forces by 50 cents where they have lost one parent through war service or by \$1 where both parents are dead.

Commonwealth legislation passed during 1967—continued

Sales Tax (Exemptions and Classifications) Act 1967 (No. 21); Sales Tax (Exemptions and Classifications) Act (No. 2) 1967 (No. 29); Sales Tax (Exemptions and Classifications) Act (No. 3) 1967 (No. 80).*

Seamen's Compensation Act 1967 (No. 97) increased the amounts of compensation payable to seamen under the Act in line with increases being made in the amounts of compensation payable under the Commonwealth Employees Compensation Act (see page 69).

Seamen's War Pensions and Allowances Act 1967 (No. 102) increased the pensions payable under the Act for the children of deceased Australian mariners in line with similar increases made in the *Repatriation Act 1967* (see page 71).

Sheltered Employment (Assistance) Act 1967 (No. 22) enables the Government to make grants to eligible organisations to assist them in establishing and equipping sheltered workshops to assist severely handicapped persons to live a normal life in the community. Sheltered workshops are declared if a substantial number of the persons employed or to be employed on the premises are disabled persons and are paid for the work they perform. A disabled person is one who is either incapacitated to the extent necessary to qualify him for an invalid pension or would be likely to become incapacitated to that extent if he were not provided with sheltered employment. The Act provides assistance to eligible organisations on a \$2 for \$1 basis towards the capital cost of purchasing, erecting, or extending premises for use as sheltered workshops, towards the cost of equipping such workshops, and towards the annual rental of premises for use as a sheltered workshop up to three years. Eligible organisations are churches, charitable and benevolent groups, ex-servicemen's organisations, and local governing bodies, or other bodies approved by the Governor-General.

Social Services Act 1967 (No. 10) raised by \$156 the amount of means as assessed which will permit the payment of a full pension under the Act and provided for payment of an allowance for disabled persons employed in sheltered workshops.

Social Services Act (No. 2) 1967 (No. 61) increased the rate of child endowment for the fourth and subsequent children in an endowed family (see Chapter 13, Welfare Services).

Softwood Forestry Agreement Act 1967 (No. 42) enables the Commonwealth to enter into agreements with the States for the provision of financial assistance to be used for the purpose of expanding softwood plantings by the States.

States Grants Act 1967 (No. 12); States Grants Act (No. 2) 1967 (No. 71); States Grants (Advanced Education) Act 1967 (No. 33); States Grants (Advanced Education) Act (No. 2) 1967 (No. 9); States Grants (Advanced Education) Act (No. 3) 1967 (No. 105); States Grants (Mental Health Institutions) Act 1967 (No. 74); States Grants (Science Laboratories) Act 1967 (No. 8); States Grants (Special Assistance) Act 1967 (No. 98); States Grants (Teachers Colleges) Act 1967 (No. 34); States Grants (Water Resources Measurement) Act 1967 (No. 73).

Statute Law Revision (Decimal Currency) Act 1967 (No. 3) corrected certain typographical errors and incorrect citations in the *Statute Law Revision (Decimal Currency) Act 1966*.

Stevedoring Industry Charge Act 1967 (No. 4) fixed for the future the rate of the stevedoring industry charges at 48 cents a man-hour.

Stevedoring Industry Charge Act (No. 2) 1967 (No. 110); Stevedoring Industry Charges Assessment Act 1967 (No. 111); Stevedoring Industry (Temporary Provisions) Act 1967 (No. 109). These Acts provide for the re-organisation of the stevedoring industry by the introduction of a scheme for permanent employment on a weekly hiring basis. The former charge on a man-hour basis is replaced by three rates of charge according to type of workers, i.e. a sum not exceeding \$17.55 per man-week in respect of those employed on weekly hiring in permanent and continuous posts, 80 cents a man-hour in respect of other regular waterside workers in continuous posts, and 55 cents an hour in respect of irregulars in all posts and regulars employed in posts which are neither permanent nor continuous.

Sugar Agreement Act 1967 (No. 95) approved a Supplemental Agreement made between the Commonwealth and Queensland Governments to amend the Sugar Agreement 1962. The Supplemental Agreement includes provision for increasing the maximum wholesale prices specified in the Agreement and for extension of the current Agreement by one year to 31 August 1968 (see Chapter 21, Rural Industry).

Sugar Industry Assistance Act 1967 (No. 117) approved an agreement between the Commonwealth and the State of Queensland concerning the provision of financial assistance to the State so as to enable it to assist the sugar industry in respect of the 1967 season's No. 1 Pool sugar.

Commonwealth legislation passed during 1967—continued

Sugar Marketing Assistance Agreement Act 1967 (No. 44) approved an agreement between the Commonwealth and the State of Queensland for the provision of financial assistance to the State in connection with the marketing of the 1966 No. 1 Pool of the Australian sugar crop.

Superannuation Act 1967 (No. 52) provides for the extension of superannuation benefits to married women employed as permanent officers in the Commonwealth Public Service.

Superannuation (Pension Increases) Act 1967 (No. 90) increased existing pensions under the Superannuation Act on principles similar to those incorporated in the Defence Forces Retirement Benefits (Pension Increases) Act (*see* page 70).

Supply Act (No. 1) 1967–68 (No. 36); *Supply Act* (No. 2) 1967–68 (No. 37).

Tasmania Grant (Fire Relief) Act 1967 (No. 31); *Tasmania Grant (Gordon River Road) Act* 1967 (No. 5).

Trade Practices Act 1967 (No. 30) extended the operation of the *Trade Practices Act* 1965 in relation to the State of Tasmania to give it full operation in that State.

Universities (Financial Assistance) Act 1967 (No. 106); *Universities (Financial Assistance) Act* (No. 2) 1967 (No. 107).

Wireless Telegraphy Act 1967 (No. 59) makes it an offence to establish or maintain a transmitter on a ship in waters adjacent to Australia for unauthorised broadcasting services or to assist such operations.

Wool Industry Act 1967 (No. 32) increased the Government contribution for wool research and promotion for the three years 1967–68 to 1969–70 to payment on a basis of matching dollar for dollar moneys paid by wool growers by way of levy on wool sold up to a maximum of \$14m per annum.

* The purpose of these Acts is to give effect to the 1961 Vienna Convention on Diplomatic Privileges and Immunities. They provide for the first time in Australia a comprehensive code of law on the subject of diplomatic privileges and immunities and enable Australia to ratify the Convention, which came into force on 24 April 1964.

† These Acts exempt from payment of Australian taxes persons in Australia in connection with the establishment of the Joint Defence Space Research Facility where they are subject to equivalent taxation in the United States.

Cost of parliamentary government

The table below shows, in broad groups, the expenditure incurred in the operation of the parliamentary system in Australia, comprising the Governor-General and Governors, the Ministries, the Upper and Lower Houses of Parliament, and electoral activities; *it does not attempt to cover the expenditure on Commonwealth and State administration generally*. Only broad groups are shown, but even these are not entirely comparable because of differences in accounting procedures and in the presentation of accounts. A very large part of the expenditure under the head of Governor-General or Governor represents official services entirely outside the Governor's personal interest, carried out at the request of the Government. The item includes salaries of Government House staffs and maintenance of residences, official establishments, grounds, etc., and expenditure on capital works and services.

COST OF PARLIAMENTARY GOVERNMENT, 1966-67

Commonwealth Government Departments

In Year Book No. 49 (pages 87-98) a list appears of the Commonwealth Government Departments, giving particulars of each Department, as at the end of 1962, of the principal matters dealt with and the Acts administered by the Minister concerned, and changes made during 1963 and 1966 are shown, respectively, on page 83 of Year Book No. 50 and page 74 of Year Book No. 53. The *Commonwealth of Australia Directory*—1968 contains the latest detailed information for Departments. The Appendix to this Year Book gives particulars of some recent changes.

CHAPTER 4

DEFENCE

Department of Defence

Functions of Department of Defence

The functions of the Department of Defence include: defence policy; joint Service matters and matters having an inter-departmental defence aspect; the financial requirements of defence policy and the allocation of the funds made available; the supply aspect of defence policy including the review of production programmes and capacity; important matters of policy or principle affecting the Defence Forces and their requirements, including the strength, organisation and disposition of the forces, higher appointments in the Services, their weapons and equipment, and defence research and development.

Organisation, higher defence machinery, and the control of the joint Service machinery

The joint Service and inter-departmental advisory machinery of the Department consist of various committees headed by the Defence Committee, the Chiefs of Staff Committee, the Defence Administration Committee, and the Joint War Production Committee.

The *Defence Committee* is a statutory body consisting of the Secretary, Department of Defence, who is Chairman; the Chairman of the Chiefs of Staff Committee; the Chiefs of Staff of the three Services; the Secretary, Prime Minister's Department; the Secretary, Department of External Affairs; and the Secretary to the Treasury. Its function is to advise the Minister for Defence on: the defence policy as a whole and the co-ordination of military, strategic, economic, financial, and external affairs aspects of defence policy; matters of policy or principle and important questions having a joint Service or an inter-departmental defence aspect; and such other matters having a defence aspect as are referred to the Committee by or on behalf of the Minister for Defence.

The *Chiefs of Staff Committee* meets regularly for the discussion of technical military matters on a joint service basis, and is responsible in peace for the preparation of military appreciations and plans. The functions of the *Defence Administration Committee* are the regular review of the progress of the Defence Programme, the co-ordination or integration of Service activities where appropriate in the interests of improved efficiency and economy, and the improvement of methods and organisation. The function of the *Joint War Production Committee* is, briefly, to examine the Services' requirements for war *matériel* and to recommend whether industrial capacity is adequate to meet them.

In addition, a *Defence Business Board* is constituted to advise on business matters of common interest to the three Services, or important subjects on which the collective advice of the Board is desired from the business aspect, with a view to promoting efficiency and economy in the execution of the Defence Programme. The Board comprises businessmen who serve in a part-time honorary capacity and consists of an independent chairman and deputy chairman and the business advisers of the three Service Departments.

Basis of current defence policy

The primary aim of Australia's defence policy is to ensure the security of the Australian mainland and island Territories and to protect Australian national interests.

To meet the problem of Communist pressure in the general area of south-east Asia, and to ensure international order and progress, it is regarded as essential that the south-east Asian region should comprise free and independent states in a secure environment. In these circumstances Australia continues to play an active part in regional security alliances in south-east Asia and the Pacific—SEATO, ANZUS and Commonwealth defence arrangements—and has committed an expanding military and civil aid contribution to the Vietnam conflict.

The decision of the British Government to withdraw British forces from bases in Singapore and Malaysia will involve changes and adjustments to the present Commonwealth defence arrangements in the area. Changes in Australia's defence planning and preparations to meet this and other developments affecting the strategic situation in south-east Asia will emerge as the various requirements are examined continuously and in consultation as necessary with our allies.

The defence programme

To meet the requirements of our own defence, and to meet our regional responsibilities, Australia is continuing to expand her defence forces. The overall objective is to raise, train, and equip forces to be operationally ready at short notice to participate in a wide range of likely military situations. This aim is pursued through a series of flexible defence programmes designed to give progressive effect to the objectives of policy approved by the Government. Large scale re-equipment of the Service has taken place, and Australia now has the most powerful and effective defence force it has ever had short of war-time mobilisation.

Navy. The naval programme provides for the progressive development and modernisation of the Royal Australian Navy into a well-balanced and effective operational fleet with emphasis on anti-submarine capabilities. Details of ships in commission and in reserve and of the current ship-building programme are shown on pages 79-80. In addition, a wide range of naval projects is being provided. These include fourteen Tracker and ten Skyhawk aircraft, delivered in November 1967, naval construction and support facilities, and accommodation and training equipments. The Navy personnel requirement by June 1968 is 16,980. The Navy Emergency Reserve has been raised with a planned strength of 2,000, and enlistment is proceeding.

Army. The reorganisation of the field force in the new tropical warfare organisation referred to in Year Book No. 53 has now been completed. Eight regular battalions of the Royal Australian Regiment have been raised and a ninth is being formed. The Australian Support Area, which provides the command, administrative, training, and maintenance organisation for the Army as a whole, has been progressively built up to meet the increased commitments both in Vietnam and Australia. Reorganisation of the Citizen Military Forces has also been completed; to provide additional opportunities for service with the C.M.F. the number of battalions has been increased from twenty to twenty-five including one battalion in the Territory of Papua and New Guinea. The Pacific Islands Regiment and supporting units continue to be developed, and at present two battalions of the Regiment have been raised.

The strength of the Regular Army is to be increased to 42,650 by 30 June 1968, and provision has been made to increase the C.M.F. up to 37,000 by the same date.

A scheme of selective national service was introduced in 1965 to supplement voluntary recruitment into the Regular Army. Details of this scheme were given in Year Book No. 53.

About \$150 million will be spent from 1965 to 1968 in buying modern equipment throughout the whole range of weapons, ammunition, vehicles, light aircraft, engineering, and signal stores, etc.

A large works programme for the accommodation of the Pacific Islands Regiment in Papua and New Guinea is almost completed, and a greatly increased Army works programme is being undertaken in Australia to provide the accommodation, training, and support requirements for the increase in Army strength to 42,650.

Air Force. The operational units of the Royal Australian Air Force comprise three bomber squadrons, five fighter squadrons, four transport squadrons, two utility helicopter squadrons, one surface-to-air missile squadron, and two control and reporting radar units. The fighter squadrons are being re-equipped with supersonic Mirage 111-O jet fighters, and three of the squadrons are scheduled to be completely re-equipped by the end of 1968. Twenty-four F111C strike reconnaissance aircraft have been ordered from the United States of America to replace the Canberra bombers now in service. Deliveries are scheduled for the latter half of 1968. Twenty-five Caribou short take-off and landing transport aircraft have been delivered. An additional medium range transport squadron was equipped with twelve C130E aircraft, which were received between August 1966 and February 1967. Ten Orion P3B aircraft, scheduled for delivery at the rate of two per month from January 1968, have been ordered to replace the obsolescent P2E Neptune maritime reconnaissance aircraft. Seventy-five Macchi all-through jet trainer aircraft have been ordered. The first six aircraft are being test flown in Italy before shipment to Australia, and the balance are to be assembled in Australia. The first aircraft was accepted by the R.A.A.F. on 2 October 1967. A further thirty-eight Macchi aircraft are to be ordered by June 1968. Delivery of ten dual Mirage trainer aircraft was completed in October 1967. Eight HS748 aircraft are on order from the United Kingdom for training air electronics officers and navigators. Two BAC 111 aircraft for V.I.P. transports and two new control and reporting units are also on order from the United Kingdom. The provision of modern airfield, operational, and technical facilities is being undertaken prior to the introduction of new aircraft types. In addition, the construction of permanent domestic accommodation is proceeding on a continuing basis. The number of personnel required for the operation of the R.A.A.F. by June 1968 is 21,335. Also, ex-R.A.A.F. personnel are being enlisted in the Air Force Emergency Force, which has a planned strength of 1,300.

Research and development. In this field Australia is making its principal contribution through the Long Range Weapons Project, which is a joint effort with the United Kingdom. Australia also participates in the European Launcher Development Organisation and is associated with the United States in many space and defence projects. The Australian executive authority in these matters is the Department of Supply.

Defence expenditure

Logistic arrangement with United States Government

A logistic arrangement has been agreed with the United States Government in respect of Australian equipment purchases during the programme period up to 30 June 1968. This arrangement is in effect a 'package deal' covering all the items required instead of negotiating each separate purchase as it arises, and by this method Australia has obtained more advantageous financial terms together with assurances of better delivery dates to meet our requirements. Under this arrangement, instead of paying for the equipment roughly in line with deliveries, the Government is enabled to spread payments over an extended period.

Personnel strengths

PERSONNEL STRENGTHS: SERVICES, 30 NOVEMBER 1967

<i>Category</i>	<i>Navy</i>	<i>Army</i>	<i>Air Force</i>	<i>Total</i>

Total Forces	21,037	78,031	21,862	120,930

(a) Excludes 2,196 Pacific Islanders.

Reserve of Citizen Forces

Under amendments made to defence legislation in 1964 the Citizen and Reserve Forces may be called out by proclamation for continuous full-time service in a 'Time of Defence Emergency'. The particular circumstances giving rise to the proclamation of a time of defence emergency could be varied, but would occur in a situation where the Regular Forces needed the full-time support of the Citizen and Reserve Forces in hostilities short of general war.

The legislation also provided for the establishment of volunteer Emergency Reserves for the three Services. These Reserves provide a ready means of supplementing and reinforcing operational units and may be called out for continuous full-time service when the Governor-General considers it desirable to do so.

Australian forces serving overseas

Australia has participated with the United Kingdom and New Zealand in the Commonwealth Strategic Reserve since it was first established in Malaya in 1955, and has continued to station forces in the Reserve following the formation of Malaysia and Singapore. The Australian component of the Strategic Reserve comprises:

Navy—two destroyers or frigates with an annual visit by an aircraft carrier and escorts;

Army—one infantry battalion group and a light anti-aircraft battery;

Air Force—two fighter squadrons and supporting units.

Details of additional forces deployed to the Strategic Reserve during the period of Indonesian confrontation are contained in Year Book No. 53.

In response to an invitation of the Government of South Vietnam Australia has provided forces since 1962 to assist in the defence of that country. These forces have been increased progressively since then, as outlined in Year Book No. 53. In October 1967 the Government announced a further increase from the existing level of 6,300 to a total of over 8,000, to be attained during the first half of 1968. When the deployment of the additional elements is completed the following forces will be serving in South Vietnam:

Navy—a guided missile destroyer, a clearance diving team, and pilots, ground crew, and supporting personnel.

Army—a task force of three infantry battalions, a Centurion tank squadron, a special air service squadron, and other combat support units; a logistic support force; and a 100-man Army Training Team.

Air Force—a squadron of eight Canberra bombers, a squadron of sixteen Iroquois helicopters, and a squadron of six Caribou transport aircraft.

In pursuance of our obligations under the SEATO Treaty, at the invitation of the Government of Thailand, a squadron of R.A.A.F. Sabre fighter aircraft is deployed in Thailand as an integral part of the air defence system of that country.

Defence support aid

In support of Australia's strategic policy of contributing to the common defence of south-east Asia the Government provides substantial financial aid to our Asian allies. This aid is given in the forms of direct defence assistance to support the armed forces of these countries and to increase their defence capability, and of civil aid and technical assistance.

Under the Aid programme assistance to the extent of \$2,500,000 will be provided for South Vietnam, Thailand, Pakistan, and the Philippines during 1967-68. This will include material assistance, the training of service and civilian personnel both in their home countries and in Australia, and, in the case of South Vietnam, special aid in the form of the provision of surgical teams to staff surgical blocks at the Long Xuyen, Bien Hoa, and Vung Tau hospitals, an engineering team to carry out a water supply project at Bien Hoa, the printing of school text books, and civic action by the Australian Force Vietnam.

Malaysia is also being further assisted to strengthen its defence capability by the extension of the aid programme commenced in 1964. The Australian Government, having provided some \$25 million for Malaysia and Singapore to the end of 1967, announced the provision of a further \$20 million to the end of 1970. The aid to Malaysia includes ammunition, military vehicles, weapons, small craft, engineer equipment, and general stores. Malaysian servicemen will continue to be trained in Australia and in the Malaysian area, and the seconding of Australian servicemen to the Malaysian armed forces will also be continued. Defence aid to Singapore comprises engineer equipment, field ambulances, vehicle maintenance equipment, and 2½ ton four-wheel-drive trucks. Army training courses will also be provided in Australia for Singapore services personnel.

Naval defence

Prior to 1901, naval defence systems were organised under the State Governments. Information regarding these systems is given in Year Book No. 2, page 1084. An outline of the development of Australian naval policy is given in Year Books No. 3, page 1060, and No. 12, page 1012. An account appears in Year Book No. 15, pages 921-3, of the building of the Australian Navy, its costs, the compact with the Imperial Government, and other details. The growth and the activities of the Royal Australian Navy during the 1939-45 War are shown in Year Book No. 36, pages 1023-7.

Under the provisions of the Commonwealth of Australia Constitution Act the Minister of State for the Navy administers the Department of the Navy. Under the *Naval Defence Act* 1910-1966 the Royal Australian Navy is administered by the Naval Board. The Naval Board consists of the Minister as Chairman, four Naval Members, and the Secretary to the Department of the Navy.

Strong links with the Royal Navy are maintained by a constant exchange of officers for extended tours of duty and by a full exchange of information and ideas. A liaison staff is maintained by the Royal Australian Navy in London and by the Royal Navy in Australia. Advanced training and staff courses in the United Kingdom are provided by the Royal Navy for Royal Australian Navy officers. A liaison staff is also maintained by the Royal Australian Navy in Washington, and a comprehensive exchange of information is provided by this link. Staff courses in the United States are also attended by officers of the Royal Australian Navy.

Ships of the Royal Australian Navy

In commission, March 1968: Melbourne—aircraft carrier; *Sydney*—fast troop transport; *Supply*—fast fleet replenishment tanker; *Stalwart*—escort maintenance ship; *Vampire*, *Vendetta*, *Duchess*, and *Anzac*—destroyers; *Perth*, *Hobart*, and *Brisbane*—guided missile destroyers; *Stuart*, *Parramatta*, *Derwent*, and *Yarra*—escort ships; *Queenborough*—training ship; *Diamantina*—training and oceanographic ship; *Hawk* and *Gull*—minesweepers; *Kimbla*—training ship and boom defence vessel; *Moresby* and *Paluma*—survey vessels; *Oxley*—submarine; *Attack*, *Aitape*, *Samarai*, *Advance*, and *Acute*—patrol boats.

In reserve, March 1968: Tobruk—destroyer; *Quickmatch* and *Quiberon*—escort ships; *Gascoyne*—oceanographic ship; *Culgoa*—accommodation ship; *Teal*, *Ibis*, *Curlew*, and *Snipe*—minesweepers; *Bass* and *Banks*—general purpose vessels.

On service overseas. During the year ended March 1968 the following ships served in south-east Asian waters as units of the Commonwealth Strategic Reserve with headquarters in Singapore: *Melbourne*, *Supply*, *Vampire*, *Duchess*, *Derwent*, *Yarra*, and *Stuart*. The following ships served in support of the allied forces in South Vietnam: *Perth*, *Hobart*, *Sydney*, and *Boonaroo*. H.M.A.S. *Anzac* also made a visit overseas.

Fleet Air Arm

The Fleet Air Arm of the Royal Australian Navy maintains three front line squadrons for embarkation in the operational carrier H.M.A.S. *Melbourne*. These squadrons currently consist of Skyhawk A4-G fighter/ground attack aircraft, Tracker S2-E anti-submarine aircraft, and Wessex MK. 31B submarine helicopters. Four training and support squadrons are based at the Naval Air Station H.M.A.S. *Albatross* at Nowra, New South Wales. Other aircraft operated by the Navy are the Scout helicopter (survey ships), Iroquois helicopter (training and search and rescue), Dakota, Vampire trainer, and Sea Venom (target towing).

Ship construction and repairs

There are two naval dockyards, one at Garden Island, New South Wales, and one at Williamstown, Victoria. Also, the dockyard at Cockatoo Island, which is operated by the Cockatoo Docks and Engineering Company Pty Ltd by agreement with the Commonwealth, carries out considerable naval work. All three dockyards carry out ship refitting for the Navy.

Included in the present ship construction plan is the building of two destroyer escorts, one each at Cockatoo Island and Williamstown Dockyards. A 15,000-ton destroyer tender (H.M.A.S. *Stalwart*) was completed at Cockatoo Island in December 1967. Three submarines of the Oberon class are under construction in the United Kingdom. A guided missile destroyer (H.M.A.S. *Brisbane*) was completed in the United States in December 1967. Twenty 100-foot patrol vessels are being built by Evans Deakin and Co. Pty Ltd, Brisbane, Queensland, and Walkers Ltd, Maryborough, Queensland (ten by each contractor). The first two of these patrol boats (H.M.A.S. *Aitape* and H.M.A.S. *Attack*) were completed in November 1967, while H.M.A.S. *Samarai*, H.M.A.S. *Advance*, and H.M.A.S. *Acute* were completed in February 1968. H.M.A.S. *Melbourne* is to undergo an extended refit in 1968 at Garden Island Dockyard. The Daring class destroyers *Vendetta* and *Vampire* are

to be modernised, commencing in 1970. The anti-submarine guided weapon Ikara, which has been designed and developed in Australia, is being fitted into the guided missile destroyers and escorts.

Personnel, entry, training, women's services, reserves

Personnel. The authorised establishment of the Royal Australian Navy in relation to personnel borne for full-time duty for 1967-68 is 17,400. At 30 November 1967 the actual strength of personnel borne for full-time duty was 1,747 officers and 14,439 sailors, which includes 161 officers and sailors of the Citizen Naval Forces and 22 officers and sailors of the Royal Australian Navy Emergency Reserve.

Naval college. The Royal Australian Naval College, H.M.A.S. *Creswell*, is at Jervis Bay. The College was established to provide trained officers for the R.A.N. Junior entry to the College is at the age of fifteen to seventeen years, and senior entry at a maximum age of twenty years. Subsequent training as midshipmen and sub-lieutenants is in ships of the fleet, at universities or technical colleges, and at Royal Navy training establishments in the United Kingdom. In November 1967 there were sixty-nine cadet midshipmen under training.

Direct entry into Navy. To meet increasing requirements for officers, direct entries are accepted into the Royal Australian Navy. Short service commissions of seven years are granted on completion of training as seamen or aircrew officers to suitable applicants who have completed their secondary schooling and who are over seventeen years of age and under twenty-three years of age for seamen applicants, and under twenty-four years for aircrew applicants. Other direct entries may be approved outside these age limits from persons with appropriate qualifications and experience.

Opportunities exist for university undergraduates studying medicine, dentistry, mechanical engineering, electrical engineering, or aeronautical engineering to enter the R.A.N., and on successful completion of their studies to commence short or full-time service in the Navy. Fully qualified doctors, dentists, mechanical or electrical engineers, and instructors may also enter the R.A.N. directly if they are of the appropriate age.

Training establishments. H.M.A.S. *Cerberus* at Westernport, Victoria, is the main training establishment for adult sailors in the permanent naval forces, while several advanced training schools are established in New South Wales. The period of initial engagement for sailors varies from six years for tradesmen entry to nine or twelve years, and on completion sailors may re-engage for shorter periods up to the age of fifty.

H.M.A.S. *Nirimba* at Quakers Hill, New South Wales, is the naval school for apprentices. It provides secondary education, as well as technical training in trades, to boys aged fifteen to seventeen and a half years. The school was established in 1956 to meet the R.A.N.'s increasing demand for highly skilled tradesmen. In November 1967 there were 648 naval artificer apprentices under training. H.M.A.S. *Leeuwin* at Fremantle, Western Australia, is the junior recruit training establishment. Entrants must be aged between fifteen and a half and sixteen and a half years. Training lasts one year and instruction is mainly academic, the remaining time being devoted to basic naval and disciplinary training. On completion of the course sailors are posted for a period of sea training, after which they proceed to technical and specialist courses. In November 1967 there were 598 junior recruits undergoing training.

Women's Services. The present Women's Royal Australian Naval Service was inaugurated in January 1951. The numbers serving in shore establishments in November 1967 were 22 officers and 627 Wrens. The Royal Australian Naval Nursing Service was reconstituted in November 1964, and its strength in November 1967 was 23 officers.

Emergency Reserve. In November 1964 approval was given to form the Royal Australian Naval Emergency Reserve to provide a readily available source of trained manpower which may be called on for continuous full-time service. The authorised establishment of this force is 2,000 officers and sailors. At 30 November 1967 the strength of the reserve available for mobilisation was 61 officers and 777 sailors, which excludes 3 officers and 19 sailors serving full-time. Members are required to complete thirteen days' training annually and are paid an annual bounty.

Citizen Naval Forces. The Citizen Naval Forces consist of the R.A.N. Emergency List, Royal Australian Fleet Reserve, Royal Australian Naval Reserve, Royal Australian Naval Reserve (Sea-going), and Royal Australian Naval Volunteer Reserve. The authorised establishment of the combined forces is 10,000. At 30 November 1967 there were 1,199 officers and 2,814 sailors in the Citizen Naval Forces. These figures exclude 100 officers and 61 sailors serving full time. The R.A.N.R. is the training reserve of the Citizen Naval Forces. Members carry out weekly training and thirteen days' continuous training annually; sailors engage for periods of three years. Other reserves do not normally carry out part-time training, but members may volunteer for periods of annual training and for periods of full-time service with the R.A.N. A Women's Royal Australian Service Reserve consisting of ex-permanent naval forces W.R.A.N.S. officers and W.R.A.N.S. is being formed.

Military defence

A detailed historical account of the Australian defence forces prior to federation appears in Year Book No. 2, pages 1075–81. *See also* Year Book No. 12, page 999.

Commonwealth systems

Under the terms of the Commonwealth of Australia Constitution Act the Commonwealth took over control of defence matters in March 1901. The growth of the Commonwealth Military Forces may be considered to have taken place in a number of phases. For particulars of the phases which cover the period from the welding together of the military forces of the States into one homogeneous Army in 1902 up to the re-establishment of the Military Board and the organisation of Commands after the 1939–45 War *see* Year Book No. 46 and earlier issues.

National Service Training was introduced in 1951 and suspended in 1959–60. In November 1964 the Government announced that National Service Training was to be re-introduced from June 1965. The scheme provides for a period of two years full-time duty in the Regular Army followed by three years in the reserve. National Service registrants who are members of the Citizen Military Forces or who join prior to the ballot may elect to serve in the C.M.F. for a total of five or six years, depending on length of previous service, as an alternative to full-time continuous National Service Training. Special C.M.F. units have been formed to provide for those persons who wish to serve in the C.M.F., but who are unable to do so in normal units, because of remote location, etc.

Organisation

Army Headquarters is responsible for the policy and control of the Australian Military Forces. The Military Board consists of the Minister for the Army, President; the Chief of the General Staff; the Adjutant-General; the Quartermaster-General; the Master-General of the Ordnance; the Deputy Chief of the General Staff; the Citizen Military Forces Member; and the Secretary, Department of the Army. After the 1939–45 War, Command Headquarters were established to implement Army Headquarters policy and to command and administer those units placed under their authority. Command Headquarters are established in the capital cities of Australia and Papua-New Guinea. The geographic extent of Commands is as follows.

Northern Command—the State of Queensland.

Eastern Command—the State of New South Wales, less those parts included in Southern and Central Commands.

Southern Command—the State of Victoria and part of southern New South Wales.

Central Command—the State of South Australia, plus a portion of south-western New South Wales.

Western Command—the State of Western Australia.

Tasmania Command—the State of Tasmania.

Northern Territory Command—the Northern Territory.

Papua-New Guinea Command—the Territory of Papua-New Guinea.

The Army is divided into the Field Force, Forces in Papua-New Guinea, and the Australian Support Area, with both Regular and Citizen Military Forces elements in each. The basic formation of the Field Force is the division, which consists of nine infantry battalions with supporting arms and services units. Within the division three task force headquarters can command varying combinations of divisional units. The substantial parts of the combat elements of one Regular and two C.M.F. divisions have been raised, together with logistic support units. The Regular element of the Forces in Papua-New Guinea consists of two battalions of the Pacific Islands Regiment with a number of supporting units. It is intended to raise a third battalion of the Pacific Islands Regiment. An infantry battalion forms the major C.M.F. element. The Australian Support Area provides the training, administrative, and command structure on the mainland.

At 30 December 1967, units of the Australian Regular Army were deployed overseas as follows. In Malaysia a battalion group was serving as part of the British Commonwealth Far East Strategic Reserve, while an anti-aircraft battery was serving at the invitation of the Malaysian Government. In Vietnam a Task Force of three battalions with supporting units, including aircraft support provided by the Royal Australian Air Force, was serving at the invitation of the Government of that country; and an armoured squadron had been warned for service in 1968.

Personnel, training, women's services, cadets

Personnel. The effective strength at 29 November 1967 was: Australian Regular Army (including 2,190 Pacific Islanders and 793 Women's Services), 43,544; Citizen Military Forces, 35,972.

Staff College. Until 1938 the training of staff officers was carried out in the various Military Districts throughout Australia, except in cases where officers were selected from time to time to attend courses abroad. In 1938 an Australian Command and Staff School, located in the original Officers' Mess at Victoria Barracks, Sydney, was established. Between 1939 and 1945 the training of staff officers was carried out under varying conditions by different schools in accordance with the changing needs of the war.

Early in 1946 the Staff School (Australia) was established at Seymour, Victoria, and redesignated the Staff College in conformity with other Commonwealth training establishments for training officers for command and staff appointments. The College was later moved to Queenscliff, Victoria, where it is at present situated. The course is held annually and is of twelve months duration. The normal intake is sixty-six students, and on successfully completing the course an officer is awarded the symbol 'psc'. The course is designed to train selected officers for appointments in all branches of the staff in peace and war and to prepare them to assume, after experience, command and higher staff appointments.

Included in the 1968 course will be students from the United Kingdom, Canada, New Zealand, India, United States of America, Thailand, Malaysia, the Philippines, Pakistan, Singapore, and Indonesia. Vacancies on each course are reserved also for officers who may be nominated by the Royal Australian Navy, the Royal Australian Air Force, and the Commonwealth Public Service.

In order to ensure common standards in tactical doctrine and staff and command training throughout the Commonwealth of Nations liaison is maintained with other Staff Colleges, and to this end there is also a reciprocal exchange of instructors between the United Kingdom and Australia. An instructor is also provided by New Zealand.

Royal Military College. The Royal Military College was established in 1911 at Duntroon in the Australian Capital Territory for the purpose of providing trained officers for the Army. The conditions of entry are laid down in the Royal Military College Regulations. The length of the normal course is four years. While at the College, Staff Cadets are wholly maintained, and, in addition, receive payment increasing with each year of the course. The course of instruction is organised into military and civil departments, and instruction is given by officers of the Army and academic staff. On graduation cadets are appointed lieutenants in the Australian Regular Army. The College also trains New Zealand cadets for commissions in the New Zealand Permanent Forces. In 1967 one Thai cadet commenced training at the College.

Officer Cadet School. The Officer Cadet School was established in 1951 at Portsea, Victoria, for the purpose of speeding up the production of junior regimental officers for the Australian Regular Army. Serving members of the Australian Regular Army, the Citizen Military Forces and civilians between the ages of eighteen and a half and twenty-two and a half years are eligible to apply for entrance. A special entry provides for candidates up to twenty-four and a half years. The course lasts for forty-four weeks, and on graduation cadets are appointed second-lieutenants in the Australian Regular Army. Graduates normally proceed to further training at the Army School of the Arm and Service to which they have been allotted before being posted to regimental duties. The Officer Cadet School also trains officers on occasions for Malaysia, New Zealand, Thailand, the Philippines, and Brunei.

Officer Training Unit. An Officer Training Unit has been established at Scheyville, New South Wales, which is responsible for the training of National Service officers.

Women's Royal Australian Army Corps School. The W.R.A.A.C. School, established in 1952 at Mildura, Victoria, moved to Mosman, New South Wales, in 1958. It has three wings, one whose primary task is the training of officer cadets for the W.R.A.A.C., one for the training of non-commissioned officers at all levels and for other special courses, and one which is a basic training wing. The officer cadets are selected from eligible applicants, who may be serving members between nineteen and a half and thirty-two years of age, or civilians between twenty-one and thirty years of age. The course is of six months' duration and on graduation cadets are appointed lieutenants in the Women's Royal Australian Army Corps.

Army Apprentices' School. The Army Apprentices' School was opened in 1948 at Balcombe, Victoria, with the aim of training youths as skilled tradesmen for the Australian Regular Army and to form a background for an Army career with prospects of promotion. The course is open to boys between the ages of fifteen and seventeen years and provides training in a number of highly skilled

trades. A three-year course of intensive theoretical and practical work at the Apprentices' School is followed by one year in an appropriate Army workshop or technical unit. At the end of their third year boys are given their Army trade test and also take the Victorian Apprenticeship Commission's final grade public examinations, which ensures that they will be accepted as qualified tradesmen in civil life when they eventually leave the Army. In addition to trade training the Apprentices' School provides general educational facilities up to the School Leaving Standard.

Other schools. Army Schools have been established for the major Arms and Services for the purpose of training officers and other ranks in the up-to-date techniques of their own Arm or Service, to qualify them for promotion requirements, and to produce trained instructors. Courses at Army Schools are conducted for members of both the Australian Army and the Citizen Military Forces.

The following Army Schools have been established: Jungle Training Centre, Armoured Centre, School of Artillery, School of Military Engineering, Transportation Centre, School of Military Survey, School of Signals, Infantry Centre, Army Intelligence Centre, Royal Australian Army Service Corps Centre, Royal Australian Army Medical Corps School of Army Health, Royal Australian Army Ordnance Corps Centre, Royal Australian Electrical and Mechanical Engineers' Training Centre, School of Music, Air Support Unit (Army Component), and Air Movement Training and Development Unit (Army Component).

Women's Services. In July 1950 approval was given for the enlistment of women into the Australian Regular Army on a limited scale. Enlistment commenced into the Royal Australian Army Nursing Service in November 1950 and into the Australian Women's Army Corps early in 1951. In February 1951 the Royal Australian Army Nursing Service became a Corps and was designated the Royal Australian Army Nursing Corps (R.A.A.N.C.). During June 1951 the Australian Women's Army Corps was redesignated the Women's Royal Australian Army Corps (W.R.A.A.C.). The Women's Services in the Australian Regular Army now comprise two Corps only, the Royal Australian Army Nursing Corps and the Women's Royal Australian Army Corps.

Women's Services are incorporated in the Citizen Military Forces, and one company of the Women's Royal Australian Army Corps is located in each Command excluding Northern Territory Command and Papua-New Guinea Command. Companies of the Royal Australian Nursing Corps are located in each Command excluding Northern Territory Command and Papua-New Guinea Command.

Australian Cadet Corps. The Australian Cadet Corps is a voluntary organisation. It serves as a training ground to provide, to some extent, the future officers and non-commissioned officers of the Australian Military Forces, and, as such, occupies a foremost position in the scheme of national defence. The Australian Cadet Corps, does not, however, form part of the Australian Military Forces. School Cadet units are raised at educational establishments throughout the Commonwealth and Papua and New Guinea, except in the Northern Territory. The minimum age for enrolment is the year in which the applicant reaches the age of fourteen years, and cadets, who, in the large majority of schools receive a free issue of A.M.F. pattern uniform, may remain in the Cadet Corps until they cease to be pupils of the educational establishments concerned. A few units retain their own pattern school uniform and are not issued with A.M.F. pattern uniforms. Provision is made for the appointment of officers, cadet under-officers, warrant and non-commissioned officers on an authorised establishment scale from within school units. School Cadet units may be, and in many cases are, affiliated with Citizen Military Force units. The establishment of the Corps is 45,000 all ranks, and at 30 September 1967 comprised 351 School Cadet units with a posted strength of 41,434, all ranks.

Air defence

A statement regarding the preliminary steps taken in connection with the development of air defence appears in Year Book No. 18, page 610, and one on the expansion and development and type of operations of the Royal Australian Air Force during the 1939-45 War in Year Book No. 36, page 1027. Details of the current defence expansion as it affects the R.A.A.F. were outlined by the Prime Minister in his speech in the House of Representatives on 8 November 1965.

Higher organisation

The Air Board is responsible to the Minister for Air for the control, organisation, and administration of the Royal Australian Air Force and is constituted as follows: Chief of the Air Staff, Air Member for Personnel, Air Member for Supply and Equipment, Air Member for Technical Services, and the Secretary, Department of Air.

The Air Board administers and controls R.A.A.F. units in Australia and its Territories through two commands, Operational Command and Support Command. The guiding principles of the command organisation within Australia are to decentralise day-to-day operating activities as far as possible and to streamline the force and make it as efficient as possible. The operational units overseas, working within the broad directives issued by the Air Board, comprise the R.A.A.F. component of the British Commonwealth Strategic Reserve located at Butterworth in Malaysia, a unit in Thailand and the R.A.A.F. component of the Australian task force in South Vietnam.

The members of the Air Board and their staffs are located at the Department of Air in Canberra. An R.A.A.F. representative is located in London, and air attachés are located in Djakarta, Saigon, Paris, and Washington. *Operational Command* is responsible for the command of operational units and the conduct of their operations within Australia and its territories. *Support Command* is responsible for the recruitment and training of personnel, and the supply and maintenance of service equipment.

Organisation of units

Bases. Each command is established with the units necessary to carry out its allotted function. There is no fixed rule in relation to the number and types of units within each command, as this depends upon the nature of its present and future responsibilities. Where possible, units having similar functions or requiring similar facilities are located together, and the geographical locations are known as bases.

Formations—comprising a headquarters unit to control the activities of a number of units at one location; each formation has a base squadron which provides common services to all units at the location.

Flying squadrons—strike reconnaissance, air defence, ground attack, medium and short range transport, helicopter, and maritime reconnaissance squadrons which undertake the operational flying and, in conjunction with operational conversion units, the operational flying training commitments of the R.A.A.F.

Operational conversion units—specialising in operational conversion training of aircrew for the strike reconnaissance, air defence, and ground attack squadrons.

Aircraft depots—specialising in major overhaul, etc., of aircraft and equipment.

Stores depots—centrally located depots to which stores and equipment ordered by the R.A.A.F. are delivered for distribution to units.

Airfield construction squadron—specialising in the construction of aerodromes and associated buildings and works required by the R.A.A.F. in Australia, its Territories, and south-east Asia.

Telecommunications units—responsible for the communications services of the R.A.A.F.

R.A.A.F. Hospitals—hospitals in Australia and at Butterworth providing medical services for the R.A.A.F.

Flying and ground schools and units—schools and units specialising in the aircrew and ground staff training required by the R.A.A.F.

R.A.A.F. Diploma Squadron and R.A.A.F. Academy—training units, to diploma and university degree level respectively for officer cadet entrants to the R.A.A.F.

R.A.A.F. Staff College—trains specially selected R.A.A.F. officers for higher staff and command posts.

Aircraft

The R.A.A.F.'s strike reconnaissance force is equipped with Canberras, and the air defence and ground attack squadrons are equipped with the Mirage 111-O and Avon Sabre. Transport aircraft currently in use are Hercules C130A and E. Caribou, Dakota, Mystere 20, HS748, Metropolitan, and Viscount. The two helicopter squadrons operate the Iroquois and the two maritime squadrons operate Neptune SP2H and Orion P3-B aircraft. During 1968 the strike reconnaissance force is to be re-equipped with the F111 C, and BAC 111 aircraft are to replace the Metropolitans. Aircraft used for training are the Winjeel, Macchi, HS748, Sabre, and Mirage.

Personnel, reserve, women's services

At 1 December 1967 the authorised Permanent Air Force establishment was 22,814 and the Citizen Air Force, 1,080; the enlisted strength was Permanent Air Force 20,365 and Citizen Air Force 1,155; while the strength of the General Reserve was 7,326. The preceding Permanent Air Force figures include the Women's Royal Australian Air Force, which has an establishment of 1,046 and strength of 859, and the R.A.A.F. Nursing Service with an establishment of 99 and strength of 90.

Department of Supply

For information relating to the creation of the Department of Supply and its development up to 1959 see Year Book No. 51, page 1204, and earlier issues. On 18 December 1959 the Department assumed responsibility for the operation and management of space tracking stations in Australia on behalf of the United States National Aeronautics and Space Administration. On 29 March 1962 Australia became a foundation member of the European Launcher Development Organisation, and the Department accepted responsibility for the test firing of the launching rocket for that Organisation's experimental satellite, using the facilities of the Woomera Rocket Range.

Functions of Department

The functions of the Department of Supply include the following.

Defence research and development, including the operation of the Joint United Kingdom-Australia Weapons Research Project, and Australian research and development.

Operation and management of factories, workshops, and undertakings concerned in the production of munitions (including aircraft), clothing, canvas-ware, and other defence goods.

Manufacture, acquisition, provision, and supply of munitions (including aircraft) and miscellaneous goods and services required by the defence forces.

Arrangement of contracts for the supply of goods and the performance of services.

Operation and management of space tracking stations in Australia on behalf of the United States National Aeronautics and Space Administration.

Test firing of the launching rocket for the European Launcher Development Organisation's experimental satellite, using the facilities of the Woomera Rocket Range.

Acquisition, maintenance, and disposal of strategic materials.

Planning and establishment of manufacturing facilities for the production of munitions and other defence goods.

Investigation and development of Australian sources of supply in connection with defence.

Sale or disposal of surplus Commonwealth property other than land or buildings.

Provision of Commonwealth transport facilities outside the Australian Capital Territory and the Northern Territory.

Provision and control of stores required for or in connection with matters administered by the Department of Supply, and general storage for other Departments as required.

Arrangements for ascertaining costs and the control and limitation of profits in connection with the production of munitions and other defence goods.

The Minister for Supply administers the *Supply and Development Act* 1939-1966, except in so far as it concerns the building (*see also* the chapter Transport and Communication), repair, and maintenance of merchant ships and the building, extension, alteration, repair, and maintenance of shipyards, drydocking, and repair facilities for merchant ships.

Research and Development

The Research and Development Division is responsible for research and scientific development in relation to war *matériel*, including the operation of the Joint United Kingdom-Australia Weapons Research Project. The headquarters of the Division is situated in Canberra, and the following establishments are included in the Division: (a) Weapons Research Establishment, Salisbury, South Australia; (b) Defence Standards Laboratories, Maribyrnong, Victoria; Woodville North, South Australia; and Alexandria, New South Wales; (c) Aeronautical Research Laboratories, Fishermen's Bend, Victoria.

Weapons Research Establishment, Salisbury, South Australia

This establishment, which occupies an area of about six square miles, includes Edinburgh Airfield, where accommodation is provided for a unit of the R.A.A.F. which carries out the experimental and other flying required. Extensive facilities have been provided for branches of British firms which have contracted with the British Ministry of Aviation to develop weapons systems or components.

The Establishment has four main sections, namely the Trials Wing, the Space Physics Wing, the Weapons Research and Development Wing, and the Engineering Wing. The Trials Wing is concerned with the operation, development, and instrumentation of the Woomera Range, also the planning, execution, and assessment of trials. The Space Physics Wing undertakes the operation of United States satellite and space tracking stations throughout Australia and conducts research and development in support of the Range, including investigations into the characteristics of the upper atmosphere

using sounding rockets. The Weapons Research and Development Wing is concerned primarily with Australian-initiated defence research, but assistance is also given with some phases of the Joint Project programme. The Engineering Wing provides the design and manufacturing effort required to support the work of the Establishment and the Range.

Testing ranges have been established at Woomera, which is approximately 280 miles north-west of Adelaide. A township, together with modern amenities such as hospital, school, kindergarten, community store, swimming pool, and all sporting facilities, has been built at Woomera to accommodate the staff and their families. The population is approximately 5,300.

European Launcher Development Organisation (ELDO)

By virtue of the major facilities at Woomera for launching space vehicles and the associated technical skills, Australia has become a member of ELDO, which has been established with the object of developing a launching vehicle for placing satellites in orbit for peaceful purposes. Other members of ELDO are Britain, Belgium, the Federal Republic of Germany, France, Italy, and the Netherlands. Test firings of the ELDO rocket will continue at Woomera until 1970.

United States space projects

Agreements have been signed by the Australian and United States Governments for a co-operative programme for the establishment and operation in Australia of space vehicle tracking stations. The agencies for the Australian and American Governments are the Department of Supply and the National Aeronautics and Space Administration (NASA) respectively.

As part of the world-wide network supporting NASA's space programme the stations are designed to track spacecraft in their orbits around the earth or on their journey into space, to receive telemetered data from the vehicle, and to issue radio commands controlling the vehicle's manoeuvres. The Department of Supply is responsible for managing, staffing, and operating the stations on behalf of NASA. The stations which are now in operation or under construction are at:

- Island Lagoon near Woomera (deep space probes and optical tracking of scientific satellites);
- Carnarvon in Western Australia (manned space flights and scientific satellites);
- Tidbinbilla in the A.C.T. (deep space probes and manned space flights);
- Orroral Valley in the A.C.T. (scientific satellites);
- Honeysuckle Creek in the A.C.T. (manned space flights, particularly the 'man on the moon' Apollo project);
- Cooby Creek near Toowoomba, Queensland (applications technology satellites).

An extensive communications system links the tracking stations with the control centres in the United States.

At all six stations the responsibility is vested in a station director who is a senior officer of the Weapons Research Establishment of the Department of Supply.

Under the Australian Government's policy of using the resources of private industry wherever possible, contracts for operation and/or maintenance services at the stations have been let as follows. Space Track Pty Ltd (Tidbinbilla and Island Lagoon), Amalgamated Wireless (A'asia) Ltd (Carnarvon and Cooby Creek), E.M.I. Electronics (Australia) Pty Ltd (Orroral Valley), and Standard Telephones and Cables Pty Ltd (Honeysuckle Creek).

NASA space projects requiring Australian participation are as follows.

Manned space flights

Project Apollo—landing of men on moon and their return to earth.

Scientific and applications satellites

Large multiple experiment scientific satellites (Orbiting Geophysical Observatories;

Orbiting Astronomical Observatories, etc.). Operations satellites for meteorology (Tiros).

Applications technology satellites for communications, navigation, radio propagation, etc. (ATS).

Deep space probes

Surveyor—soft landing of instrumented package on moon, including T.V. cameras.

Mariner—probes to Mars, Venus, etc.

Pioneer—interplanetary investigations.

Defence Standards Laboratories

The broad function of these Laboratories is to provide a scientific service to the Armed Services, civilian defence, and the factories, branches, and establishments of the Department of Supply. It also provides trained groups in specialist fields for which there is no counterpart elsewhere in Australia.

This service covers problems arising in the provision and use of defence *matériel* and is given generally within the fields of chemistry, physics, metallurgy, and engineering, and, to a limited extent, in those of bio-chemistry and physiology.

Aeronautical Research Laboratories

The work of these Laboratories lies in the fields of: (a) aeronautics; (b) guided missiles; and (c) branches of engineering appropriate to the special facilities, resources, or experience resulting from (a) and (b). In particular it comprises aerodynamics, including wind tunnel, free flight model and actual flight testing; structures of aircraft and missiles; metals and other materials used in the construction of airframes and engines; engines of the air-breathing type used for the propulsion of aircraft or missiles; human engineering studies relating to the operation of aircraft and guided missiles; research and development related to Australian-initiated guided missiles; and operational assessment studies on devices and techniques employed or proposed for the defence of Australia.

Production of munitions

The Department is responsible for the production of a wide range of munitions required by the Armed Services. Production is carried out substantially in Government factories, although some orders, mainly for components, are placed with private industry.

The following Government factories are currently in operation: Ammunition—Footscray, Victoria; Explosives and Filling—Albion and Maribyrnong, Victoria; Mulwala and St Marys, New South Wales; Ordnance—Maribyrnong, Bendigo, and Port Melbourne, Victoria; Small Arms—Lithgow, New South Wales; Clothing—South Melbourne and Brunswick, Victoria.

The Ammunition Factory produces the complete round of small arms ammunition and also components for larger calibre gun ammunition, including empty cartridge cases, electronic and mechanical fuses, and primers. The Explosives Factories produce the various types of explosive compositions and propellants required for gun ammunition, rockets, and guided missiles. The Filling Factory at St Marys fills and assembles into complete rounds of ammunition (other than small arms ammunition) the empty components and materials supplied by the other munitions factories and by private industry.

The Ordnance Factories at Maribyrnong and Bendigo are equipped to produce heavy ordnance equipment, such as naval guns and gun mountings; large turbine gears; steel shell bodies; empty rocket motors for guided missiles; trailers and tank transporters; and other items requiring heavy engineering capacity. As well as work for the Services, the Bendigo Factory is producing equipment for projects of national importance, e.g. control equipment for the Snowy Mountains Hydro-electric Authority, components for marine diesel engines for Australian shipping, large heavy engineering items for the coal, cement, and steel industries, and coining presses for the Royal Australian Mint.

The Port Melbourne Factory builds large marine diesel engines for the Australian shipbuilding industry. Major forgings and fabrications for these engines are produced at the Ordnance Factories at Maribyrnong and Bendigo. The Small Arms Factory is equipped to produce the rifles and other small arms required by the Services. Current production is the 7.62-mm automatic rifle, for which orders have also been received from overseas, and the 9-mm carbine, which replaces the Owen as the infantry light machine gun. The Clothing Factories make uniforms, clothing, and canvas goods for the three Services and also for the Postmaster-General's Department and some other Commonwealth authorities.

Production of aircraft and guided weapons

Production both in Government factories and in industry of military types of aircraft and aero engines and of other aircraft components required by the Royal Australian Air Force is administered by the Department of Supply. Planning of capacity and the negotiation of contractual arrangements concerning aircraft modification, repair and overhaul, and for the supply of spare parts and airborne equipment for the R.A.A.F., the R.A.N., and the Army are also functions of the Department.

The following factories are operated by the Department: The Government Aircraft Factory at Fishermen's Bend and the Final Assembly Workshops and Test Airfield at Avalon, Victoria, and the Airframe Repair Workshops at Parafield and Northfield, South Australia. The current aircraft production programme at the Government Aircraft Factory comprises the French Mirage supersonic fighter for the R.A.A.F. and the Jindivik radio-controlled target aircraft, which has been or is being supplied to Britain, Sweden, and the United States, as well as to the Weapons Research Establishment and the Royal Australian Navy. Apart from the Government Aircraft Factory, the Commonwealth Aircraft Corporation Pty Ltd is the only major aircraft manufacturer in Victoria, and this company is currently producing the French Atar turbo-jet engine for the Mirage fighter and also some sections of the airframe. The Corporation is also the prime contractor for the Australian production for the R.A.A.F. of the Italian Macchi jet trainer and for the production of the British Viper engine that powers this aircraft.

Other major activities carried out in the Government factories or by various private contractors are the manufacture of airframe and engine spare parts; the overhaul, repair, and modification of military aircraft and engines currently in service with the R.A.A.F., R.A.N., and Army; and the reconditioning and servicing of aircraft instruments and other ancillary equipment.

The production of the Ikara anti-submarine missile is continuing at the Government Aircraft Factory at Fishermen's Bend. Production of the complete Ikara system, covering broadly the missile, motor, propellants, guidance equipment, launcher, and magazine handling equipment, is a combined effort by departmental establishments and industry, directed and co-ordinated by the Department.

At St Mary's, New South Wales, a guided weapons repair facility has been established to repair and maintain the Tartar surface-to-air missile supplied by the United States for Australia's new missile destroyers. Later, the facility will be expanded to cater for other Service missiles.

Electronics supply

The Department is responsible for the technical aspects of production and procurement from local industry of telecommunications and electronic equipment for the Australian Forces and for certain other organisations such as Colombo Plan and SEATO. A wide range of these equipments is obtained from industry; some of the more important projects are the complete equipping of several major automatic telegraph relay centres for Army and Air; the local manufacture of ultra high-frequency ground station equipment for communication with high-speed aircraft, automatic direction finders for the Macchi aircraft, remote-controlled target ranges for the Army, electronic guidance equipment for the Ikara system, and the development and production of a transistorised field transceiver for the Army.

Contracts have also been arranged for the local development of a high stability quartz-crystal oscillator, and of other high stability electronic components, such as various types of fixed and variable resistors, mica and tantalum capacitors, and matched crystals.

Contract Board

Under the *Supply and Development Act 1939-1966* the Contract Board is the authority responsible for the arranging of contracts for the performance of services and the purchase of supplies for the Naval, Military, and Air Forces of the Commonwealth, as well as for the Department of Supply. The Board is also responsible for the sale or disposal of all surplus or unserviceable Commonwealth goods approved for disposal. By arrangement, the Board also arranges purchases on behalf of other Commonwealth departments and authorities which desire to use its facilities.

Although the head office of the Department transferred to Canberra in January 1968, the Contract Board will continue to meet in Melbourne for the present. The Board comprises representatives of the Departments of Supply, Navy, Army, and Air. In each State other than Victoria there is at present a District Contract Board, and it is proposed to establish a District Board also in Victoria. The administrative organisation of the Contract Board and the District Boards is the Contracts and Disposals Branch with offices in Canberra and each State. The table following shows, in respect of the Contract Board organisation, the purchases and realisations from disposals for the years 1965-66 and 1966-67.

CONTRACT BOARD ORGANISATION: PURCHASES AND REALISATIONS
FROM DISPOSALS, 1965-66 AND 1966-67
(\$'000)

	Purchases		Realisations from disposals	
	1965-66	1966-67	1965-66	1966-67
Contract Board, Victoria . . .	129,549	184,784	3,315	3,153
District Contract Board—				
New South Wales	25,294	29,651	1,950	2,674
Queensland	4,475	5,644	662	862
South Australia	7,007	10,258	1,054	1,154
Western Australia . . .	1,662	1,418	292	495
Tasmania	230	235	104	153
Total	168,217	231,990	7,377	8,491

Defence supply planning

The central planning authority of the Department is the Production Planning Branch, whose principal functions are:

- to study manufacturing capacity available for the Services' requirements in peace and war;
- to plan for and assist in the development of additional production capacity;
- to prepare submissions on defence production preparedness to the higher defence machinery;
- to plan the organisation of industrial resources for defence production in war;
- to provide and administer stocks of relevant materials and reserve pools of plant equipment and other requirements needed for rapid expansion of production in the event of war;
- to prepare advance co-ordinated production programmes against Service orders and to analyse and interpret achievement against these programmes for the information of the Department and the Services;
- to provide advisory services in the field of materials, supply, and utilisation to Government factories and contractors engaged in the production of munitions requirements;
- to administer the national stockpile;
- to administer overseas aid programmes allocated to the Department; and
- to undertake commercial sales.

A series of Industry Advisory Committees has been established to advise the Minister and the Department on the ability of industry to meet the Services' *matériel* requirements for mobilisation and war. The Committees are: Aircraft and Guided Weapons; Chemical; Electrical; Electronics and Telecommunications; Fibres, Textiles, Clothing, and Cordage; Leather and Footwear; Machine Tools and Gauges; Materials; Mechanical Engineering; and Rubber. Members of the Committees include industrialists of wide experience and the highest ability in their chosen fields.

Stores and Transport Branch

This Branch functions as the central storage and transport authority for most Commonwealth Departments. It is the authority for the arrangement of furniture removals at departmental expense in all States, but not in the Northern Territory. It has agents in Darwin. It also operates a shipping and customs section and the England-Australia bulk air freight scheme for Commonwealth Departments.

On 30 June 1967 the Branch had under its control land, buildings, and works, vehicles, plant, and equipment valued at \$26,139,056, and 3,569,436 sq ft of storage space as well as storage facilities for large quantities of chemicals, bulk liquids, and explosives.

Finance Branch

The total expenditure on Department of Supply activities in 1966-67 was \$155,159,000, comprising \$77,958,000 (net) from Parliamentary appropriations and \$77,201,000 from Trust Fund accounts. The latter included expenditure of \$15,149,000 for storage and transport and \$55,962,000 in Government Munitions and Aircraft Factories.

In addition, transactions under the United States-Australian logistics arrangement in 1966-67 amounted to \$2,355,000, comprising \$1,731,000 relating to Parliamentary appropriations and \$624,000 relating to Trust Fund accounts.

CHAPTER 5

REPATRIATION

The Repatriation Commission, established under the *Repatriation Act* 1920–1967, consists of three full-time members. It is responsible for the administration of the Repatriation Act and associated legislation, all matters of policy, and the general administration and overall supervision of the Repatriation Department. The central office is in Melbourne and there is a branch office, under the control of a Deputy Commissioner, in each State.

The principal functions of the Department are: the payment of war and service pensions to eligible ex-servicemen and ex-servicewomen and their dependants; the provision of medical treatment for ex-servicemen and ex-servicewomen for injuries and illnesses caused or aggravated by their war service; the provision of medical treatment in certain circumstances to ex-servicemen and ex-servicewomen who are suffering from injuries and illnesses not caused or aggravated by war service; and the provision of medical treatment to widows and dependants of deceased ex-servicemen whose deaths are due to war service.

Benefits are provided in respect of service, not only in the 1914–18 and 1939–45 Wars, but also in the Korea and Malaya operations and with the British Commonwealth Far East Strategic Reserve and the Special Overseas Forces.

Other functions of the Repatriation Department are outlined in a later section of this chapter.

For information on war service land settlement *see* Chapter 19, Public Finance; for statistics relating to war service homes *see* Chapters 9, Housing and Building and 19, Public Finance.

War pensions

The first provision for the payment of war pensions to ex-servicemen and their dependants was made by the Commonwealth Parliament in the *War Pensions Act* 1914. This Act was repealed in 1920 by the *Australian Soldiers' Repatriation Act* 1920 (amended from 31 December 1950 to the Repatriation Act). The main features relating to war pensions under repatriation legislation are set out in the following paragraphs.

Eligibility for pensions

Claims for eligibility for war pensions are determined in the first instance by Repatriation Boards, of which there is one in each State of the Commonwealth. Members of women's services are eligible for pensions and other benefits, as prescribed in the Act, on the same basis as male members of the forces. Amendments to the Act in 1943 considerably widened the eligibility provisions, to the benefit, mainly, of members of the Citizen Military Forces who had not served outside Australia. These provisions are summarised as follows:

A member of the forces who served (a) outside Australia, (b) in the Territories of Australia, such as Papua and New Guinea, or (c) within Australia in circumstances which can be regarded as combat against the enemy is covered for war pension purposes in respect of incapacity or death which may result from any occurrence that happened during the period from the date of his enlistment to the date of the termination of his service in respect of that enlistment.

In other cases where a member served only in Australia, incapacity or death to be pensionable must have been attributable to service.

There is a third ground applicable to all members except those with less than six months camp service. This provides that, where a condition existed at enlistment, a pension may accrue if it is considered that the condition was aggravated by service.

If, at any time after discharge, an ex-serviceman who served in a theatre of war becomes incapacitated or dies from pulmonary tuberculosis, war pension is payable as if the incapacity or death resulted from an occurrence on service (*see also* Service pensions, page 98). Medical treatment may also be provided.

Korea and Malaya operations. The commencement of hostilities in Korea and Malaya in 1950 made necessary the insertion in the Repatriation Act of a new division, under the terms of which the pension provisions of the Act were extended to Australian ex-servicemen and ex-servicewomen who served or were allotted for duty in prescribed operational areas. A new Regulation was also made, in 1951, to make such service personnel eligible for almost all the benefits available under the existing Regulations applicable to members of the forces.

Repatriation (Far East Strategic Reserve) Act 1956-1966. Provision was made under this Act for Australian forces who served in south-east Asia as part of the British Commonwealth Strategic Reserve. This Act, together with Regulations made under it, gave members with Malayan service the right to many benefits available under the Repatriation Act.

Repatriation (Special Overseas Service) Act 1962-1966. This legislation provides repatriation benefits for serving members of the defence forces, the circumstances of whose service expose them to risks above the normal conditions of peace-time service. Regulations made under the Act prescribe special areas within which service qualifies for Repatriation benefits. These special areas now include the Malayan Peninsula and Singapore and fifty miles to seaward but excluding the territories of Indonesia; South Vietnam; an area in Borneo comprising Sarawak, Brunei and Sabah; and an area fifty miles to seaward but excluding any territories of the Philippines.

Rates

The main classes of war pensions are the special (T.P.I.) rate, the intermediate rate, the general rate, and the war widow's pension. These are not subject to a means test except where stated for certain classes of dependants.

The *special rate* of war pension is payable to those who are totally and permanently incapacitated and are unable to earn more than a negligible percentage of a living wage. The weekly rate is \$30.50, plus \$4.05 wife's allowance and \$1.38 for each child under sixteen years.

The *intermediate rate* of war pension, which previously applied only to certain cases of tuberculosis, was extended from 6 October 1965 to include ex-servicemen who, because of the severity of a war-caused incapacity, can only work part-time or intermittently and in consequence are unable to earn a living wage. The weekly rate is \$21.25, plus \$4.05 wife's allowance and \$1.38 for each child under sixteen years.

The *general rate* of war pension is the rate payable to those who suffer war-caused disabilities but are not thereby prevented from working, although their earning capacity may be reduced. The actual pension payable is assessed in accordance with the degree of incapacity suffered. The maximum (100 per cent) rate is \$12 a week. A wife and children under sixteen years also receive pensions at rates according to the assessed degree of incapacity of the ex-serviceman, the maximum being \$4.05 for a wife and \$1.38 for each child.

The *war widow's pension* is paid to widows of ex-servicemen who died as a result of war service and to their children under the age of sixteen years. A war widow's pension may also be paid to the widow of an ex-serviceman who was receiving, at the time of his death, the special rate of war pension or the rate payable to double amputees. The weekly rates are: widow, \$13; first child, \$4.40; second and each subsequent child, \$3.25.

Other dependants of an ex-serviceman who is suffering from a disability due to war service may be granted pensions under certain circumstances. Such pensions are subject to a means test and are assessed in accordance with the degree of the ex-serviceman's incapacity. Except in the case of a widowed mother of an unmarried ex-serviceman, other dependants are required to prove dependence on the ex-serviceman.

Allowances

The following allowances are provided in addition to pension.

Domestic allowance (\$7 a week). This is paid, in addition to pension, to a widow of an ex-serviceman whose death is due to war service if she is fifty years of age, or is permanently unemployable, or has a dependent child under the age of sixteen years, or a dependent child over sixteen years being educated or trained and not in receipt of an adequate living wage.

Attendant's allowance (maximum rate \$10.50 a week). This allowance is paid, in addition to war pension, to certain classes of seriously disabled ex-servicemen, for example, the war blinded, the paralysed, and certain double amputees.

Clothing allowance. A clothing allowance is paid at various rates (38c to 75c a week) to an ex-serviceman who, as a result of war service, has lost an arm or a leg or, because of an injury to a limb, is required to use a surgical aid or appliance. An amount not exceeding \$19.50 in any one year is also payable to certain other war disabled ex-servicemen.

Sustenance allowance. This allowance is paid where an ex-serviceman is prevented from following his normal occupation through treatment of a war-caused disability or while undergoing medical investigation. The rate payable, where out-patient treatment is being received for a period of up to four weeks, or in-patient medical investigation is being carried out, is the same as the general (100 per cent) rate pension, less the amount of any war pension being paid.

Where an ex-serviceman, receiving in-patient treatment for a war-caused disability, is undergoing periods of essential convalescence immediately following discharge from hospital, or is prevented from following his usual occupation because of the necessity of out-patient treatment for a war-caused disability for a continuous period in excess of four weeks, a higher rate to bring the sustenance allowance up to the equivalent of the special (T.P.I.) rate is paid.

The wife, and any children under sixteen years of age, of an ex-serviceman who is receiving a sustenance allowance, are paid an amount which, when added to any war pension being paid, is equal to the full general rate pension for a wife and such children.

Recreation transport allowance. This allowance provides transport for recreation purposes and may be paid to an ex-serviceman who, as a result of war service, suffers certain amputations of the arms or legs or is seriously disabled to the extent that his powers of locomotion are negligible.

Other allowances and general assistance. These include a guardian's allowance, re-establishment loans and allowances, funeral benefits, vocational training allowances for education and training of children, fares and allowances for loss of remunerative time in connection with medical or pension purposes, and motor vehicle allowances for seriously disabled ex-servicemen.

Appeals tribunals

The principal Act was amended as from 1 June 1929 to create tribunals to hear appeals in respect of war pensions. War Pensions Entitlement Appeal Tribunals are empowered to hear and decide any appeal by or on behalf of ex-servicemen or their dependants against decisions of a Repatriation Board or the Repatriation Commission that the incapacity or death of an ex-serviceman did not arise out of war service. Assessment Appeal Tribunals were created to hear and decide any appeal against a current assessment or a 'Nil' assessment of war pension made by a Repatriation Board or the Repatriation Commission in respect of the incapacity of an ex-serviceman which had been accepted as arising out of war service. Provision was made by subsequent legislation to enable the tribunals to hear appeals by certain members whose applications for a service pension had been refused on the grounds that they were not suffering from pulmonary tuberculosis or were permanently unemployable.

Summary of war pensions

The following tables provide a summary of war pensions (excluding miscellaneous war pensions) for the 1914-18 War, the 1939-45 War (including war pensions payable under the *Interim Forces Benefits Act* 1947-1966 and the *Native Members of the Forces Act* 1957-1966), the Korea and Malaya operations, the Far East Strategic Reserve, and the Special Overseas Service. Statistics relating to miscellaneous war pensions are shown on pages 97 and 98 of this Chapter.

Total	140,731	154,530	153,483	170,146	161,399

(a) Includes domestic allowances paid to widows. (b) Includes five 12-weekly payments.
(c) Includes Australian Capital Territory. (d) Includes Northern Territory.

Miscellaneous war pensions

The Commission is also responsible for the payment of pensions and allowances to beneficiaries under the *Seamen's War Pensions and Allowances Act 1940-1967* and Cabinet decisions granting eligibility to persons who were attached to the armed forces during war-time.

The following table shows the number and class of pensions and the annual liability at 30 June 1967, and the table thereafter shows the amounts paid during the years 1962-63 to 1966-67 and the place of payment.

MISCELLANEOUS WAR PENSIONS: NUMBER OF PENSIONS AND ANNUAL LIABILITY, AUSTRALIA, 30 JUNE 1967

(a) Includes five 12-weekly payments.
(c) Includes Northern Territory.

(b) Includes Australian Capital Territory.

Service pensions

The *Repatriation Act 1920-1967* provides for a service pension to be paid, subject to a means test of income and property, to the following persons:

- ex-servicemen who served in a theatre of war and have attained the age of sixty years or are permanently unemployable;
- ex-servicemen who suffer from pulmonary tuberculosis, irrespective of the area of their service; and
- ex-servicewomen who suffer from tuberculosis, or who served in a theatre of war, or served abroad or embarked for service abroad and have attained the age of fifty-five years, or are permanently unemployable.

Rates of pension

The maximum rate of service pension is the same as that paid to an age or invalid pensioner by the Department of Social Services. A single or married ex-serviceman receives a pension of \$13.00 a week. If, however, an ex-serviceman's wife is receiving a social service pension, a tuberculosis allowance or a service pension as a member of the forces, the rate is \$11.75 a week. The service pension of an ex-serviceman is increased by \$1.50 a week for each eligible child other than the first and by \$4.00 a week if a guardian's allowance is payable.

The maximum weekly rates payable to a service pensioner's wife and eligible children are: wife \$6.00; first child, \$1.50; other children up to the fourth, 25c each. *Eligible child* means a child of a service pensioner under the age of sixteen years, or a child over that age who is wholly or substantially dependent on the pensioner and is undergoing full-time education, in which case pension may continue until the child's twenty-first birthday.

Supplementary assistance of \$2.00 a week is paid in addition to service pension to an ex-serviceman who is paying rent, or for lodging, or board and lodging, and whose *means as assessed* do not exceed \$1.00 a week or \$2.00 a week if he is married. (The allowance is reduced if the *means as assessed* exceed these amounts.)

A service pensioner who is unmarried, widowed, divorced, or married but separated, and who has care and control of one or more children, qualifies for a guardian's allowance of \$4.00 a week.

The means test sets limits to the amount of income or property which a pensioner may have for the purpose of service pension. The amount of service pension payable depends upon the claimant's *means as assessed*, which consist of his annual rate of income plus a property component equal to \$2.00 for each complete unit of \$20 of net value of property above \$400. For married couples, except where they are separated or in other special circumstances, the income and property of each for purposes of applying the means test is taken to be half the total income and property of both, even if only one is a pensioner or claimant. A person's *means as assessed* may consist entirely of income, entirely of property, or of both income and property components. If a single person's *means as assessed* do not exceed \$7 a week, he receives the maximum rate of pension. If his *means as assessed* exceed \$7 a week, the rate payable is the maximum rate less the amount by which *means as assessed* exceed \$7 a week. If his *means as assessed* are \$20 a week or more, no service pension is payable.

Income means earnings and other forms of income derived from any source, with certain exceptions, of which the principal are: certain income derived from property; gifts or allowances from children, parents, brothers or sisters; benefits from friendly societies; child endowment; Commonwealth health benefits. The value of board and lodging received by a pensioner, either free or in return for services, is normally assessed as income at \$1.25 a week. Property includes all real and personal property, such as houses, land, money in hand, in a bank or on loan, shares, investments or legacies, vehicles used for business purposes, and livestock. Property does not include an applicant's permanent home, furniture or personal effects, the surrender value of life insurance policies (up to \$1,500), the value of any reversionary interest, the capital value of any life interest, annuity or contingent interest, or vehicles maintained only for personal use.

Eligibility for service pensions was extended on 1 November 1941 to veterans of the South African War 1899–1902 and in 1943 to members of the Forces of the 1939–45 War. Members of the Forces who served in Korea and those who served in Malaya prior to the commencement of the *Repatriation (Far East Strategic Reserve) Act* 1956–1966 are also eligible.

An ex-serviceman or ex-servicewoman in receipt of a service pension is entitled, with certain exceptions, to free medical benefits for disabilities not caused by war. These benefits include general practitioner service, specialist service where necessary, full pharmaceutical benefits, surgical aids and appliances (including spectacles), dental treatment, and treatment in Repatriation General Hospitals.

Medical treatment for ex-servicemen and dependants of ex-servicemen

Medical treatment is provided for all disabilities which have been accepted as due to war service. In addition, and subject to certain conditions, treatment is provided for disabilities not due to war service for: ex-servicemen and ex-servicewomen receiving war pensions at or exceeding the maximum general (100 per cent) rate; ex-servicemen who have contracted pulmonary tuberculosis; nurses who served in the 1914-18 war; widows and certain dependants of ex-servicemen whose deaths have been accepted as due to war service and of deceased T.P.I. pensioners; and service pensioners, including service pensioners of the Boer War.

In-patient treatment for eligible patients is provided at the six Repatriation General Hospitals (one in each State) and eight auxiliary hospitals and sanatoriums as follows: *New South Wales*—Lady Davidson Hospital; *Victoria*—Macleod Hospital and Anzac Hostel; *Queensland*—Kenmore Hospital, Rosemount Hospital and Anzac Hostel; *South Australia*—Biralee Hospital; and *Western Australia*—The Edward Millen Hospital. The Anzac Hostels specialise in the care and treatment of long-term patients.

The total number of available beds for patients in open wards or parts of wards in all these institutions at 30 June 1967 was 4,168, and expenditure amounted to \$25,320,421. In addition, expenditure of \$30,576,677 was incurred on medical services outside these institutions.

Repatriation hospitals and institutions

Details of full-time staff in Repatriation general hospitals and other Repatriation institutions are given in the following table.

**REPATRIATION HOSPITALS AND INSTITUTIONS: FULL-TIME STAFF

In addition to the Repatriation institutions, eligible patients may be treated in other country and metropolitan hospitals and nursing homes at Repatriation expense. During 1966-67, 13,785 Repatriation in-patients were accommodated and treated in hospitals and 718 in nursing homes.

Repatriation psychiatric patients requiring custodial care are, by agreement with the State Governments, accommodated at the expense of the Repatriation Department in separate wings of psychiatric hospitals administered by the State authorities. At 30 June 1967 there were 848 Repatriation patients in these hospitals.

Out-patient treatment is provided throughout the Commonwealth at Repatriation hospitals and clinics and through the Repatriation Local Medical Officer Scheme. During 1966-67, 574,191 out-patients were treated at Repatriation institutions, and visits to or by local medical officers totalled 2,695,306.

General Repatriation benefits and miscellaneous

Other Repatriation Department activities

The activities of the Department in respect of general benefits for the welfare of ex-servicemen and dependants concern mainly education and training of children under the Soldiers' Children Education Scheme (*see* pages 103-5), medical benefits for widows and children of deceased ex-servicemen and for widowed mothers of deceased unmarried ex-servicemen, funeral expenses for certain classes of ex-servicemen and dependants, and allowances to certain classes of dependants.

These and new benefits designed for the re-establishment of servicemen and servicewomen after discharge were extended and made available, by legislation passed in June 1940, to servicemen and servicewomen engaged in the 1939-45 War, and in November 1950 and May 1963 to those engaged in the Korea and Malaya operations and to those serving in such other areas as may be prescribed under the *Repatriation (Special Overseas Service) Act* 1962-1966, respectively. The re-establishment benefits generally administered by the Repatriation Commission are: payment of re-employment allowance while awaiting employment; provision of tools of trade and equipment where they are necessary to employment; transportation expenses to meet the cost of fares and removal of household belongings where an ex-serviceman takes up training, employment, or a business, or settles on the land; supplements to wages of apprentices whose apprenticeships were interrupted by war service; re-establishment loans to enable ex-servicemen and widows to establish themselves in business, practices or occupations, including (until the Division of War Service Land Settlement began operations early in 1946) agricultural occupations; payment of re-establishment allowances during the early stages of establishment in business; gifts up to \$150 for furniture to ex-servicemen who are blind or totally and permanently incapacitated, also to widows with children under sixteen years of age; and free passages to Australia for wives, widows and children of ex-servicemen who married abroad (and passages outward from Australia in certain cases of ex-servicemen and dependants).

In 1949 the Department took over the functions of the Re-establishment Division of the former Department of Post-War Reconstruction and became responsible for the co-ordination of all matters relating to training under the Commonwealth Reconstruction Training Scheme. This scheme is now concluded, the prescribed time limits for eligibility having expired on 30 June 1950. Re-establishment of the more seriously disabled, where ordinary training is not sufficient, continues to be a function of the Department, and special means have to be found to overcome each problem.

Expenditure in 1966-67 on general Repatriation benefits for all wars was \$3,942,000, comprising: Soldiers' Children Education Scheme, \$2,462,000; recreation transport allowance, \$623,000; and other benefits \$857,000. In addition, \$28,000 was expended by other Commonwealth authorities on Repatriation employment and vocational training.

Expenditure by the Repatriation Department, 1966-67

The net expenditure by the Department for the year ended 30 June 1967 was \$265,344,010 distributed as follows.

	\$'000
Pensions, allowances and other benefits	194,783
Medical treatment	55,897
Administration	11,543
Works, rent and maintenance	3,120
Total	265,344

Soldiers' Children Education Scheme

The Soldiers' Children Education Scheme was established in 1921 and operates with the assistance of the voluntary Education Boards in each State. These Boards consist of representatives of government and non-government education authorities and of ex-service and other organisations which have a general interest in the welfare of the children of ex-servicemen. The objects of the Scheme are to assist and encourage eligible children in acquiring a standard of education compatible with their aptitude and ability, and to prepare them to enter an agricultural, commercial, professional, or industrial calling of their own choice.

Eligible children. Eligible children are children of ex-servicemen whose deaths have been accepted as due to war service; or of ex-servicemen who died from causes not due to war service but who were receiving at the date of death a war pension at a special rate for blindness, total and permanent incapacity, pulmonary tuberculosis, or amputation of two or more limbs; or of ex-servicemen who, as a result of war service, are blinded, totally and permanently incapacitated, or receiving the special rate pension for pulmonary tuberculosis and are likely to receive such pension for a period of at least three years.

General benefits. From the commencement of primary education up to twelve years, school requisites and fares are provided. An education allowance is also payable for a child from commencement of secondary education or from the age of twelve years, whichever is the earlier, while the child is undertaking primary or secondary education. Further assistance beyond, or parallel with, the later years of secondary education is provided where an approved beneficiary continues with a course of specialised education or training necessary for a career. Specialised education covers a wide range and may include: professional degree or diploma courses at universities and technical colleges; theological training; cadet and pupilage training, i.e. training combined with employment, such as nursing, pharmacy and journalism; industrial, including apprenticeship training, and other courses of trade and business training approved by an Education Board; and agricultural training at an agricultural college. At this stage of training, in addition to the education allowance, fees are paid and text books, essential equipment and other minor benefits are provided.

All education allowances are subject to an allowed income limit test, i.e. the amount of education allowance payable depends on the amount of income a child receives over the allowed limit. The child's income for the purpose of determining the allowance payable means earnings from employment and other earnings from personal exertion and such portion of a scholarship, bursary or grant as the Education Board determines to be income. Income does not include war or service pensions paid for the child or any similar payment, income the child receives from private means, or income from casual employment during the entire period of a school or university vacation where the student is to continue as a full-time student under the scheme after the vacation. The parent's income does not affect the child's allowance. The scale of maximum allowances payable to eligible children at various stages of education is as follows.

(c) Includes Northern Territory. (d) From 12 years of age or the commencement of secondary education, whichever is the earlier.

Settlement of returned service personnel on the land

Reference to the settlement of returned service personnel on the land will be found in the chapters Public Finance and Rural Industry.

Re-establishment benefits for national servicemen

Subject to prescribed conditions, special re-establishment benefits are provided for national servicemen under the *Defence (Re-establishment) Act* 1965–1967. They apply to all national servicemen whether or not they have served on 'special service' and ensure that servicemen will not be at a disadvantage on their return to civil life. The scheme includes appropriate full or part-time training as a supplement to skills acquired in the Army, refresher training for specialists and training for those who, for various reasons, may not be able to return to their former employment. The assistance includes payment of tuition fees, other associated fees and fares, and provision of books and equipment as appropriate. A training allowance is also provided for trainees undertaking full-time studies.

Re-establishment loans may be granted, subject to certain conditions, to those national servicemen who, prior to call-up, were engaged in professional practice, business, or agricultural occupations, or who, because of their call-up, were prevented from engaging in these occupations, and who are in need of financial assistance for their re-establishment in civil life.

The maximum amounts of the loans are business and professional \$3,000, agricultural \$6,000.

The Services Canteens Trust Fund

The Services Canteens Trust Fund was established under the *Services Trust Funds Act* 1947. Its funds are derived from the assets and profits of wartime services canteens, mess and regimental funds of disbanded units, and several other sources.

The total amount transferred to the Fund to 31 December 1967 was \$11,053,986. The Act prescribed that, of this, \$5 million and such further amounts as the trustees of the Fund might from time to time decide, should be devoted to the provision of education facilities for the children of eligible ex-servicemen and ex-servicewomen, and that the balance of the Fund should be used to provide relief for ex-servicemen and ex-servicewomen and their dependants in necessitous circumstances.

The Fund is administered by eleven honorary trustees appointed by the Governor-General. The trustees have power to determine the persons or groups of persons to benefit from the Fund and the extent of the benefits to be granted within the provisions of the Act, and to appoint regional committees to assist with the administration. Members of regional committees are all persons who served in the 1939–45 War or are widows of men who served during the war. They serve in an honorary capacity.

Assistance from the Fund

Persons eligible for assistance from the Fund are those who, between 3 September 1939 and 30 June 1947, served in the Australian Naval, Military or Air Forces, including members of the canteens staff of any ship of the Royal Australian Navy, persons duly accredited to any part of the

Defence Forces who served in an official capacity on full-time paid duty, and their dependants. The trustees have introduced schemes for providing welfare relief for ex-servicemen and ex-servicewomen who are eligible for benefits, and for their dependants; benefits for children of eligible ex-servicemen and ex-servicewomen who are suffering from serious and incapacitating afflictions; and education benefits for the children of eligible ex-servicemen and ex-servicewomen. From its inauguration in 1947 the Fund is to be available for forty years for welfare relief and for thirty years for educational benefits.

Welfare relief. The trustees have prescribed a policy for welfare relief which makes assistance available only to those who are in genuine distress from which they cannot extricate themselves by their own efforts. To 31 December 1967, \$3,225,791 has been granted as welfare relief from the Fund \$1,963,640 to ex-servicemen and their dependants, and \$1,262,151 to widows and orphans. The amount granted during 1967 was \$173,929. A total of 34,322 ex-servicemen and ex-servicewomen and 17,746 widows and orphans were granted welfare assistance from the Fund to 31 December 1967.

Assistance under Afflicted Children's Scheme. The Fund assists dependent children suffering from afflictions which permanently disable or seriously retard their progress or prevent the enjoyment of normal health and strength, and who face a prospect of dependence on others for all or part of their lives. The extent to which assistance will be granted in a particular case depends largely on the nature of the child's affliction, the facilities available, the family circumstances, and the funds that can be made available. Up to 31 December 1967, 2,623 afflicted children had been assisted under the Afflicted Children's Scheme, involving an expenditure of \$301,702. The amount granted during 1967 was \$11,866. The number of new children assisted in 1967 was 47.

Educational Assistance Scheme. Educational assistance is restricted to children who are fifteen years of age and over, thirteen years and over where there are exceptional circumstances, and twelve years in the case of orphans. The object is to assist eligible children to obtain the highest education within their capacity. Assistance is in the form of awards ranging up to \$400 a year depending on the nature of the course undertaken and the family circumstances. These awards are granted chiefly for children at secondary education level, but are also available for other types of education. They are designed to cover, or contribute towards, the cost of essential books, fees in cases where government school courses are not available, fares between the child's home and school, essential equipment and material, uniforms in certain cases, and maintenance for the child while at school. Higher training awards are provided for selected students for post-graduate study, in Australia or overseas, in the ancillary services to medicine, welfare and science, and also for selected craftsmen to gain experience in their trade overseas. One post-graduate scholarship is provided each year for study overseas, valued at \$2,500 per annum for up to three years.

The number of children assisted under the educational assistance scheme to 31 December 1967 was 61,400, and the expenditure on educational awards, post-graduate scholarships and higher training awards to 31 December 1967 was \$6,895,831. The number granted in 1967 was 7,193 at a value of \$629,193.

Total assistance. The total assistance granted under the three schemes during 1967 was \$814,988 and from the inception of the Fund to 31 December 1967 totalled \$10,423,324.

CHAPTER 6

INTERNATIONAL RELATIONS

Relations with Commonwealth and other countries

Australia's international relations have developed steadily since its attainment of nationhood at the beginning of this century. Initially, association with Britain and co-operation with the Commonwealth countries were a major preoccupation. These links remain important principles of foreign policy. Australia also maintains particularly close relations with the United States of America and is continuing to foster regional association with the countries of Asia.

Commonwealth relations

In addition to being represented at the meetings of Commonwealth Prime Ministers, Finance Ministers, and Ministers for External Affairs, Australia belongs to the sterling area, retains the system of judicial appeal from the States' courts to the Privy Council, maintains High Commissions in most other Commonwealth countries, and is a member of the main Commonwealth organisations providing for co-operation in economic, scientific, educational, and other fields.

Relations with the United States of America

An important feature of Australia's international relations is its relationship with the United States of America. This relationship is formally expressed in the so-called ANZUS Treaty which was signed pursuant to Articles 51 and 52 of the United Nations Charter. It provides that, in the event of armed attack on any one of them in the Pacific, the United States, Australia, and New Zealand would each act to meet the common danger in accordance with its constitutional processes.

Australia and Asia

Geographical location to the south of Asia has become an increasingly important factor in Australia's foreign policy. Australia is active as a member of the South-East Asia Treaty Organisation (SEATO), as a regional member of the United Nations Economic Commission for Asia and the Far East (ECAFE), as a member of the Colombo Plan Consultative Committee of the Asian Development Bank, and of the Asian and Pacific Council (ASPAC); and also in commercial and professional associations.

United Nations

From the time of the drafting of the United Nations Charter, Australia has taken an active role in that organisation, primarily through participation in the General Assembly but also through membership of the Security Council (1946-47 and 1956-57), the Economic and Social Council (1948-50, 1953-55 and 1962-64), and the Trusteeship Council.

Contributions are made to various forms of international aid through the United Nations and other international agencies.

SEATO

Following the cessation of fighting in Indo-China in 1954, Australia, with other countries situated in the south-east Asian region, or having responsibilities there, supported a proposal to form a collective defence alliance to guarantee the peace and security of the region from external aggression. On 8 September 1954 Australia, France, New Zealand, Pakistan, the Philippines, Thailand, the United Kingdom, and the United States signed the South-East Asian Collective Defence Treaty at Manila. They also signed a Pacific Charter stating the principles on which they had acted. A Protocol to the Treaty extended its operation to Cambodia, Laos and the free territory under the jurisdiction of the State of Vietnam, although no action on these territories would be taken except at the invitation or with the consent of the government concerned.

While primary emphasis has been placed on the defence significance of the Treaty, an organisation has been established in Bangkok to co-ordinate activities to combat subversion both by counter-propaganda and security training and by the development of the economic and social welfare of the peoples of the Treaty Area. To facilitate this task the Australian Government in 1956 instituted a

SEATO Aid Programme, under which by 30 June 1967 aid to the value of \$16.42 million had been given to member countries in Asia to help develop their capacity to resist aggression and subversion and to stimulate economic development. This programme is complementary to Australia's Colombo Plan contribution. Australian SEATO Aid projects, completed or in progress, include the provision of geodetic survey vessels for the Philippines; a military technical training school, a vehicle base repair shop, and two 50 kW radio transmitters to Thailand; telecommunication and technical training equipment to Pakistan; and barbed wire, corrugated iron and blacksmith's tools, town water supply systems for Bien Hoa and Can Tho, three surgical teams, and primary school textbooks for Vietnam. Australia has also provided military training, and technical training in the fields of engineering, telecommunications, naval architecture and dockyard maintenance, security procedures, and surveying for more than 220 trainees from Asian member countries. In addition a number of senior service officers of other member countries have visited Australia to foster understanding and to develop co-operation between the armed forces.

The Colombo Plan

The Colombo Plan originated at a meeting of Commonwealth Foreign Ministers in Colombo in January 1950. The meeting set up a consultative committee to review economic development in south and south-east Asia. The task of this committee was to devise the most effective means of tackling the problems of economic development in the area and of focusing world attention on them.

Membership of the consultative committee is now made up of Australia, Canada, Ceylon, India, New Zealand, Pakistan, the United Kingdom, Malaysia, the United States, Burma, Cambodia, Indonesia, Japan, Laos, Nepal, the Philippines, Thailand, Vietnam, Korea, Bhutan, the Maldives Islands, Afghanistan, Singapore, and Iran.

Australian assistance under the Colombo Plan to 30 June 1967 amounted to \$141,751,000. Of this, \$96,404,800 had been spent on economic development projects and \$45,346,200 had been spent under the Technical Co-operation Scheme. Australia has placed emphasis on the importance of technical assistance in providing a base for economic development. A summary of expenditure, by country and under different heads, is set out in the following table.

AUSTRALIA'S EXPENDITURE ON THE COLOMBO PLAN TO 30 JUNE 1967
(\$'000)

Country	Economic development	Technical assistance			Total	Grand total
		Training	Experts	Equipment		
Afghanistan	78.8	1.4	0.3	80.5	80.5

(a) Includes Miscellaneous.

Economic development aid

Most of Australia's contribution under the Colombo Plan has been spent on providing predominantly Australian-made equipment for developmental projects or on gifts of commodities such as wheat, flour, fertiliser, coal, copper, and condensed milk which have been sold in the recipient country to raise counterpart funds for agreed developmental projects.

The projects assisted by Australia cover a wide range, including irrigation and preparation of land for food crops, irrigation and electric power projects, secondary industries, municipal services, road building, transport and communications facilities, broadcasting equipment, and lignite mining.

A Technical Co-operation Scheme has been an integral part of the Colombo Plan since its inception in 1950. Co-ordination of technical assistance is provided by a Council for Technical Co-operation, which meets regularly in Colombo, served by a Colombo Plan Bureau.

Technical assistance

Australia had spent a total of \$26,459,600 on training awards under the Colombo Plan up to 30 June 1967. A total of 7,309 awards for training in Australia had been made. The main fields of study include engineering, public administration, education, nursing, science, medicine and health, and agriculture. Substantial numbers have also been trained in such fields as accountancy, arts, economics, food technology, social studies, and industry.

At 30 June 1967 a total of 4,284 awards had been granted under the correspondence scholarship scheme inaugurated by Australia in 1955. Main fields of study are accountancy, engineering, English, and trade courses.

Australia had spent a total of \$7,124,400 on experts and advisers up to 30 June 1967. This involved the services of experts and advisers on 1,083 assignments. The majority of these were in Malaysia and Thailand.

The following table shows the number of training awards and experts provided to Colombo Plan countries by Australia up to 30 June 1967.

**AUSTRALIA: TRAINING AWARDS AND EXPERTS PROVIDED UNDER COLOMBO PLAN
TO 30 JUNE 1967**

<i>Country</i>	<i>Training awards</i>	<i>Correspondence awards</i>	<i>Expert assignments</i>	<i>Country</i>	<i>Training awards</i>	<i>Correspondence awards</i>	<i>Expert assignments</i>
Afghanistan .	39	..	2	Maldives .	10

Laos .	102	..	13				
Malaysia .	1,611	2,217	253	Total .	7,309	4,284	1,083

At 30 June 1967 a total of 412 requests for technical equipment had been met, at a total cost of \$8,930,400. The range of items supplied include text books and Australian reference books for schools, universities and technical training institutions; equipment and tools for technical education; livestock and equipment for breeding programmes; radio receivers for use in remote areas; film projectors and visual aids for training centres; X-ray equipment for hospitals; and agricultural research equipment.

In addition to training awards, experts and equipment, technical assistance funds have been spent on contributions to the Colombo Plan Bureau, publications, International House, training centres, and the ECAFE Asian Economic Development Institute.

Participation in the United Nations

Australia's contributions to the United Nations

Australia played an active part in drafting the Charter of the United Nations at the Conference on International Organization in San Francisco in 1945 and has been a consistent supporter of the principles and objectives of the United Nations since its foundation. Australia's influence in the affairs of the United Nations has been exerted primarily through the annual debates in the General Assembly, through membership of the Security Council (1946-47 and 1956-57) and the Economic and Social Council (1948-50, 1953-55 and 1962-64), and through the Trusteeship Council. By virtue of responsibility for the administration of the Trust Territory of Nauru prior to Nauru's independence in January 1968 and the continuing administration of the Trust Territory of New Guinea, Australia has been a member of the Trusteeship Council, as an administering power, since the Council's establishment.

In 1950 Australia joined fifteen other member States in answering the Security Council's call to help the Republic of Korea to repel Communist aggression from the north, and members of all three armed services took part in the three years of fighting which followed. Australia has also been directly involved in United Nations activities in many other parts of the world. Australia has contributed its share of the costs, both assessed and voluntary, of all United Nations peace-keeping operations, the largest of which have been the United Nations Emergency Force (UNEF) in the Middle East in 1956-67, the United Nations Operation in the Congo (ONUC) in 1960-64, and the United Nations Force in Cyprus (UNFICYP) since 1964. In addition to financial contributions, an element of fifty Australian policemen has been made available for service with UNFICYP.

In the economic, social and cultural sphere Australia has contributed to the work of the United Nations through membership of its specialised agencies and of the Economic and Social Council. Australia is a foundation member of one of the four Regional Economic Commissions—the Economic Commission for Asia and the Far East, the 4th and 15th Sessions of which were held in Australia. In 1963 Australia became a regional member of ECAFE.

Australia has had varying periods of service as a member of the executive bodies of the principal specialised agencies. As a leading agricultural country, Australia played a large part in the establishment of the Food and Agriculture Organization (FAO). Australia is a member of the Board of Governors of the International Atomic Energy Agency. Australia served as a member of the governing body of the International Labour Organisation either as a titular government member or as a deputy member from 1945 to 1960, and in 1963 was again elected to the governing body as a titular government member for a further three-year term. Australia has also been a prominent member of the International Civil Aviation Organization since its inception, and in 1962 was re-elected to the Council as one of the nine States of principal civil aviation importance. Australia was a member of the executive board of the United Nations Children's Fund (UNICEF) from 1947 to 1961 and was re-elected in 1966 for a three-year term.

Australia's contributions in international aid

Australia's contributions towards various forms of international aid through the United Nations and other international organisations to June 1967 amounted to about \$165,200,000. This is additional to the funds provided for the Colombo Plan and the cash grant for the development of Papua and New Guinea.

The Australian Government contributed \$7,527,000 to the United Nations Expanded Programme of Technical Assistance (EPTA) from the inception of the Programme in 1950 to December 1965. This was spent on the provision of experts, training, supplies, and equipment, and supplemented Australian aid under the Technical Co-operation Scheme of the Colombo Plan. Australia also contributed \$1,500,000 to the Special Fund to December 1965. EPTA and the Special Fund were merged on 1 January 1966 into the United Nations Development Programme (UNDP) and Australia's contribution to the Programme to 30 June 1967 was \$1,755,000.

Australian experts sent abroad under the United Nations aid programmes up to 30 June 1967 totalled 634. A total of 752 United Nations trainees had come to Australia up to 30 June 1967.

Other contributions by Australia (to June 1967) have included \$45,044,000 to the United Nations Relief and Rehabilitation Administration (UNRRA); \$6,594,000 to the International Refugee Organization; \$3,660,000 to Post-UNRRA Relief; \$14,056,000 for food and medical supplies to the United Nations Children's Fund (UNICEF), which has been helping the under-privileged children of the world since its establishment in 1946; \$3,598,000 of essential supplies to the United Nations Korean Reconstruction Agency; \$3,320,000 of supplies to the United Nations Relief and Works Agency for Palestine refugees; \$1,443,000 for the programmes for the United Nations High Commissioner for Refugees; and \$96,000 for the WHO Malaria Eradication Special Account.

Australia has also contributed \$530,000 to the Intergovernmental Committee for European Migration's programme for providing transportation from Hong Kong to countries of resettlement for refugees of European origin coming out of mainland China.

In addition, Australia has made significant contributions to the development funds of international financial institutions; to June 1967 these amounted to \$47,590,000 to the International Bank for Reconstruction and Development, \$1,996,000 to the International Finance Corporation, \$20,779,000 to the International Development Association, and \$3,795,000 to the Asian Development Bank.

In 1962 Australia supported the establishment of the UN/FAO World Food Programme and has contributed \$1,679,000 in cash and kind to the Programme.

Diplomatic representation

The Department of External Affairs is responsible for advising the Minister for External Affairs and the Australian Government on the conduct of foreign affairs and relations with foreign Governments. Its officers staff the Australian diplomatic service and the consular and administrative service.

Australian missions overseas

In December 1967 Australia maintained the following diplomatic and consular missions abroad.

AUSTRALIAN MISSIONS OVERSEAS

Embassies (31)

- Argentina*—Calle Rivadavia 1829, Piso 5, Buenos Aires.
- Austria*—Concordia-platz 2/3, Vienna 1.
- Belgium*—51/52 Avenue des Arts, Brussels-4.

Commission in—

Fiji—C.M.L.A. Building, 3 Central Street, Suva.

The Department of External Affairs is responsible for the control and administration of all the diplomatic and consular missions listed above with the exception of the High Commission, London, which is the responsibility of the Prime Minister's Department.

Specialist officers of the Trade Commissioner Service, other Commonwealth Government Departments and the Defence Services stationed abroad are attached to Australian diplomatic or consular missions. Senior attached officers are in some cases accredited to the missions with diplomatic or consular ranks approved by the Minister for External Affairs. In addition, the Department of Trade and Industry maintains Trade Commissioner posts which engage in trade promotion in a number of cities where Australia does not have diplomatic or consular representation (for complete list of Trade Commissioner posts see pages 114–15).

The Department of Immigration similarly maintains offices overseas which engage in recruitment of migrants. A complete list of these offices is given on pages 115–16.

Diplomatic representatives in Australia

There are thirty-six non-Commonwealth and ten Commonwealth countries represented by diplomatic missions in Australia.

The following list shows the addresses of the overseas representatives in Australia. Full details of Commonwealth and foreign representation in Australia may be obtained from publications issued by the Department of External Affairs, Canberra. Consular representatives are not included. Particulars of these are contained in a publication *Consular and Trade Representatives in Australia*, issued by the Department of External Affairs, Canberra. There are about 250 such representatives in Australia, and fifty-five countries are represented.

* Administered by Prime Minister's Department. † The Australian High Commissioner in India is concurrently Ambassador to Nepal. ‡ The Australian High Commissioner in Kenya is concurrently High Commissioner to Uganda. § The Australian Ambassador to Germany is also head of the Australian Military Mission in Berlin.

Agents-General for States

From early times the Australian colonies maintained agents in London to encourage immigration and to carry out commercial and financial negotiations. Since federation the States have continued to maintain Agents-General in London, all of whom work in close co-operation with the High Commissioner for Australia at Australia House, The Strand, London. The addresses of the Agents-General are as follows: New South Wales—56-7 The Strand, London, W.C.2; Victoria—Victoria

* The Nepalese Ambassador to Japan is concurrently Ambassador to Australia and to New Zealand.

House, Melbourne Place, The Strand, London, W.C.2; Queensland—392 The Strand, London, W.C.2; South Australia—South Australia House, 50 The Strand, London, W.C.2; Western Australia—Western Australia House, 115 The Strand, London, W.C.2; Tasmania—458 The Strand, Charing Cross, London, W.C.2.

Overseas trade representation

The Australian Trade Commissioner Service

The Department of Trade maintains Trade Commissioners in thirty-four countries. The first permanent Trade Commissioner Post was set up in Canada in 1929. Before that Australia's only official trade representatives abroad were in the High Commission Office in London and at the Office of the Commissioner-General for Australia in New York. By late 1967 Trade Commissioners were established at the following posts: United States of America—New York, Washington, Los Angeles, and San Francisco; Canada—Vancouver, Ottawa and Montreal; West Indies—Trinidad; Britain and Europe—London, Brussels, The Hague, Vienna, Athens, Paris, Bonn, Hamburg, Geneva, Stockholm, Rome and Valletta; Persian Gulf—Bahrain; Africa—Nairobi, Johannesburg, and Cairo; Lebanon—Beirut; India—New Delhi and Calcutta; Ceylon—Colombo; South-east Asia—Singapore, Djakarta, Kuala Lumpur, Bangkok, and Hong Kong; China—Taipei; Japan—Tokyo and Osaka; New Zealand—Wellington, Christchurch, and Auckland; Philippines—Manila; Pakistan—Karachi; South America—Buenos Aires and Lima; Pacific Islands—Sydney. Twenty-eight editions of the Department of Trade's promotion periodical *Austral News* now circulate in over 100 countries in four languages. (See also Australian Trade Missions in the chapter Overseas Transactions.)

The addresses of Australian Trade Commissioner Posts overseas are shown in the following list.

Trade Commissioner Service of the Commonwealth of Australia

Argentina—Australian Embassy, Seccion Comercial, Calle Rivadavia 1823, Piso-Dto. 'A', Buenos Aires.

Austria—Australian Embassy, Concordia-platz 2/3, Vienna 1.

Bahrain—Almoayyed Building, Government Road, Bahrain.

Belgium—Australian Embassy, 51/52 Avenue des Arts, Brussels-4.

Britain—Australia House, The Strand, London, W.C.2.

Canada—1155 Dorchester Boulevard West, Montreal 2, P.Q.; 1030 W. Georgia Street, Vancouver 5, B.C.; Australian High Commission, 90 Sparks Street, Ottawa 4, Ontario.

Ceylon—Australian High Commission, 3 Cambridge Place, Colombo 7.

China (Taiwan)—Australian Embassy, 400 Tun Hua South Road, Taipei.

France—Australian Embassy, 26 Rue de la Pepiniere, Paris, 8^e.

Germany, Federal Republic of—Australian Embassy, Kölnerstrasse 157, Bad Godesburg, Bonn;

Australian Consulate, Hamburg 36, Neuerwall 39.

Greece—Australian Embassy, 8 Makedonon Street, Athens.

Hong Kong—Union House, Chater Road, Hong Kong.

India—9 Shakespeare Sarani, Calcutta 2; 1/50G Shantipath, Chanakyapuri, New Delhi.

Indonesia—C/o Australian Embassy, Djalan Thamrin 15, Djakarta.

Italy—Australian Embassy, Via Sallustiana 26, Rome.

Japan—Australian Embassy, 1-14 Mita 2-Chome, Minato-ku, Tokyo; 50, 5-Chome, Koraibashi-suji, Higashi-ku, Osaka.

Kenya—Silopark House, Queensway, Nairobi.

Lebanon—L'Union de Paris Building, Rue Maamari, Beirut.

Malaysia—44 Jalan Ampang, Kuala Lumpur.

Malta—Australian High Commission, Airways House, Gaiety Lane, cnr High Street, Sliema, Valletta.

The Netherlands—143 Koninginnegracht, The Hague.

New Zealand—203 Queen Street, Auckland C.1; Bank of New Zealand House, Cathedral Square, Christchurch; Australian High Commission, I.C.I. House, Molesworth Street, Wellington.

Pacific Islands—C/o Department of Trade and Industry, A.N.Z. Bank Building, cnr Pitt and Hunter Streets, Sydney, N.S.W.

Pakistan—Australian High Commission, 9 Kutchery Road, Karachi 4.

Peru—Jiron Arica 837, Lima.

The Philippines—Australian Embassy, 1414 Roxas Street, Manila.

Singapore—Australian High Commission, MacDonald House, Orchard Road, Singapore 9.

South Africa—32 Plein Street, Johannesburg.

Sweden—Australian Embassy, Sergelstorg 12, Stockholm 40.

Switzerland—Australian Consulate-General, 56–58 Rue de Moillebeau, Petit Saconnex 1211, Geneva 19.

Thailand—Australian Embassy, 40 Chartered Bank Lane, Bangkok.

Trinidad—72 South Quay, Port-of-Spain, Trinidad.

United Arab Republic—Australian Embassy, 1097 Corniche el Nil, Garden City, Cairo.

United States of America—Paramount Building, 1735 Eye Street, N.W. Washington, D.C.; Australian Consulate-General, 636 Fifth Avenue, New York 20, New York; Australian Consulate-General, 350 Post Street, Union Square, San Francisco, California; 3600 Wilshire Boulevard, Los Angeles 5, California.

Australian Trade Correspondents and Marketing Officers

Australian Trade Correspondents and Marketing Officers have no official status but supplement the work of the Trade Commissioner Service. Correspondents are located in Suva, Fiji; Mozambique; Port Louis, Mauritius; Tel Aviv, Israel; and Istanbul, Turkey. Marketing Officers are located in Rangoon, Burma; Madrid, Spain; Dublin, Ireland; and Mexico City, Mexico.

Trade Commissioners of overseas governments in Australia

Britain—Senior British Trade Commissioner—Commonwealth Avenue, Canberra, A.C.T.

British Trade Commissioners—16–20 Bridge Street, Sydney, N.S.W.; 330 Collins Street, Melbourne, Vic.; M.L.C. Building, cnr Adelaide and Edward Streets, Brisbane, Qld; F.C.A. Building, Franklin Street, Adelaide, S.A.; 84 St George's Terrace, Perth, W.A.

Office of the Hong Kong Government Trade Representative—Kembla Building, Margaret Street, Sydney, N.S.W.

Office of the Fiji Government Representative—38 Martin Place, Sydney, N.S.W.

Canada—Canadian Trade Commissioners—A.M.P. Building, Circular Quay, Sydney, N.S.W.; 2 City Road, South Melbourne, Vic.

Ceylon—Ceylon Trade Commissioner—66 Pitt Street, Sydney, N.S.W.

China—300 George Street, Sydney, N.S.W.

India—Indian Trade Commissioner—167–187 Kent Street, Sydney, N.S.W.

Malaysia—Malaysian Trade Commissioner—50 Young Street, Sydney, N.S.W.

New Zealand—Senior New Zealand Trade Commissioner—280–288 George Street, Sydney, N.S.W.

New Zealand Government Trade Commissioners—330 Collins Street, Melbourne, Vic.; M.L.C. Building, Adelaide Street, Brisbane, Qld.

Pakistan—4–6 Bligh Street, Sydney, N.S.W.

South Africa—South African Trade Commissioner—622 St Kilda Road, Melbourne, Vic.

Sweden—14th Floor, West Tower, Prince's Gate, Melbourne, Vic.

Commonwealth Migration Offices overseas

The Department of Immigration has established offices overseas to handle migration matters, and in some countries regional offices are provided. Inquiries and applications may also be made at any Australian diplomatic, consular or trade post overseas. Special facilities for migration business are available as follows.

Argentina—Australian Embassy, Calle Rivadavia 1829, Piso 5, Buenos Aires.

Austria—Australian Embassy, Migration Office, Teinfaltstrasse 1, Vienna.

Belgium—Australian Embassy, Migration Office, 51/52 Avenue des Arts, Brussels–4.

Britain—‘Canberra House’, Migration Office, 10–16 Maltravers Street, The Strand, London, W.C.2.

Denmark—Australian Consulate, Hammerensgade 4, 1267 Copenhagen, K.

Fiji—Australian Commission, C.M.L.A. Building, 3 Central Street, Suva.

France—Australian Embassy, Migration Office, 28 Rue de la Pepiniere, Paris, 8^e.

Germany, Federal Republic of—Australian Embassy, Migration Office, Hohenzollernring 103, Cologne.

Greece—Australian Embassy, Migration Office, 8 Makedonon Street, Athens.

Hong Kong—Australian Government Trade Commission, Migration Office, 9th Floor, Union House, Connaught Road Central, Hong Kong.

India—Australian Government Trade Commission, Mercantile Bank Building, 52 Mahatma Gandhi Road, Bombay.

Italy—Australian Embassy, Migration Office, Via Magenta 5, Rome.

Kenya—Australian High Commission, Silopark House, Queensway, Nairobi.

Lebanon—Australian Embassy, Migration Office, 7th Floor, S.F.A.H. Building, Kantari Street, Beirut.

Malta—Australian Migration Office, Airways House, Gaiety Lane, cnr High Street, Sliema, Valletta.

The Netherlands—Australian Embassy, Migration Office, Mauritskade 19, The Hague.

Spain—Australian Consulate-General, Calle General Sanjurjo 44, Madrid 3.

Sweden—Australian Embassy, Migration Office, Sergelstorg 12, Stockholm 40.

Switzerland—Australian Consulate-General, Migration Section, 56–58 Rue de Moillebeau, Petit Saconnex, 1211, Geneva 19.

Turkey—Australian Embassy, Room 1007, Grand Ankara Hotel, Ankara.

United Arab Republic—Australian Embassy, Migration Office, 12 Hassan Sabri Street, Zamalek, Cairo.

United States of America—Australian Consulate-General, International Building, 636 Fifth Avenue, New York 20, New York.

Australian Consulate-General, Qantas Building, 350 Post Street, Union Square, San Francisco 8, California.

Yugoslavia—Australian Embassy, Migration Office, Bulevar Revolucije 191–193, Belgrade.

CHAPTER 7

POPULATION

Statistics in this chapter cover, in the main, the year 1967. More detailed figures will be found in the annual bulletin *Demography*, and current statistics are published in the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics*, and the mimeographed series *Australian Demographic Review* and *Overseas Arrivals and Departures*. The final detailed results of the various population censuses are published in a series of printed volumes and parts (*see list at end of this Year Book*, also the chapter *Miscellaneous—Statistical and other official publications of Australia*). Pending publication of the 1966 printed volumes a series of mimeographed bulletins are being issued containing the census results in summary form.

With the proclamation of the *Constitution Alteration (Aborigines)* 1967 on 10 August 1967 the provision of the Constitution in Section 127 requiring the exclusion of Aborigines in reckoning the numbers of the people of the Commonwealth or of a State or other part of the Commonwealth, was repealed.* Population statistics now include particulars of Aborigines, and population statistics for earlier periods starting with 30 June 1961 have been revised to include particulars of Aborigines. Rates based on population statistics have been revised accordingly. However, detailed analyses of population enumerated in the censuses of June 1961 and 1966 exclude full-blood Aborigines. Particulars of the Aboriginal population are given on page 150 in this chapter.

Types of population statistics

Statistics of the population and its characteristics for Australia or the component States and Territories or other constituent areas at specific dates are divided in three main ways.

- (i) *Those ascertained by census enumeration.* The population censuses result in comprehensive statistics of characteristics of the population, such as age, sex, birthplace, etc.
- (ii) *Those ascertained by 'population counts'.* From time to time in specific areas there are additional enumerations of the population, which are known as population counts, because normally very little information other than number of persons and their sex is obtained.
- (iii) *Estimates of number and sex.* Estimates for dates subsequent to a census, for Australia as a whole, take account of natural increase and net overseas migration since the last census. Estimates for States and Territories are approximate, since complete records of interstate migration are not available. The population in each State and Territory is estimated by adding to the population ascertained at the census the natural increase and the recorded net gain to Australia from overseas migration for that State or Territory; gains and corresponding losses that result from movements between States and Territories in so far as they are recorded as transfers of residence under child endowment procedures or Commonwealth electoral procedures are also taken into account, supplemented by results of any special count or sample survey. Holiday, business, or other similar short-term movements between the States and Territories subsequent to the census are not taken into account.

Estimates carried forward in this way eventually reach the point when another census is taken, and the numbers so ascertained supersede those resulting from the estimates. In the light of the census results the estimates for the newly completed intercensal period are revised to adjust for the differences between the new census result and the population at the census date estimated on the basis of the previous census. This is to bring intercensal estimates into line with the two census results and thus effect adjustment for unrecorded or inaccurately recorded movement of population in the intercensal period. Such a revision is made when the preliminary (field count) results of a census become available. Further revision may be necessary when the final results of a census become available.

Final revised estimates become the permanent population estimates. A mean population for twelve month periods is required for certain purposes, and is calculated by the method described on page 130. As populations at specific dates are used in these calculations, consequential revisions are made to mean populations when the estimates for specific dates are revised as described above.

The method used for estimating State and Territory populations, as described in (iii) above is different from that used prior to June 1961 (for particulars see Year Book No. 52, page 191). Population estimates subsequent to the 1961 Census are based on a method which excludes holiday, business or

* For fuller particulars *see* page 66.

POPULATION OF AUSTRALIA, 1788 TO 1967

RATIO GRAPH

AUSTRALIAN CENSUS

other similar short-term movements since the census between States and Territories. As a consequence, marked quarterly seasonal movements in some States due to interstate holiday movements are reflected in population figures prior to 1961 but not for subsequent years. This has some effect on the continuity of the series of mean population figures and should be borne in mind when making calculations which use mean populations as a basis (*see* page 130).

All population statistics shown in this issue of the Year Book for dates up to and including June 1966, and all mean populations for calendar years up to 1965 and financial years up to 1965-66, are final. Population statistics for dates or years subsequent to these will be revised in accordance with the results of the next census.

The census

In Year Book No. 53 a special article was included outlining the history, purposes, legal basis, organisation, and publication of results of the population census in Australia (*see* pages 164 to 170 of that issue), but considerations of space preclude its repetition in this issue.

Early 'musters'

Although regular censuses were not instituted in the several colonies until the years specified in the table below, population returns in one form or another have existed from a very early period in the history of Australia. The earliest enumerations were known as 'musters', and although the actual results of very few of them have been preserved, it is probable that during the early days of colonisation they were of frequent occurrence. The first official 'muster' was taken in 1788 soon after the new settlement at Sydney Cove was formed, and in 1803 the first 'muster' of convicts in Van Dieman's Land (now Tasmania) was conducted.

Development of the census

The first regular census in Australia was taken in New South Wales in November 1828, and included the population of Moreton Bay (now Queensland) but not Van Dieman's Land (Tasmania). Particulars were asked concerning the names, ages and civil conditions of the inhabitants. The next census was taken in 1833, and was followed by another in 1836, when arrangements were made for the enumeration of the population of the newly-established settlement at Port Phillip (Victoria). The first censuses taken in Tasmania, Victoria and Queensland as separate colonies were in 1841, 1854 and 1861 respectively. The first regular census in South Australia was taken in 1844 and in Western Australia in 1848. The 1881 census was the first simultaneous census taken in Australia and formed part of the first simultaneous census of the British Empire.

The following table shows the total population recorded at each census conducted prior to 1891.

POPULATION ENUMERATED(a), CENSUSES IN AUSTRALIA, 1828 TO 1886

Date	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.

1886- 1 May	322,853

(a) Excludes full-blood Aborigines. (b) Previously included with New South Wales. (c) Included with South Australia for the censuses of 1866, 1871 and 1876. Actually Northern Territory was not transferred to the Commonwealth until 1 January 1911.

Population recorded at censuses

State and Territorial populations recorded at the Australia-wide censuses taken over the period 1881 to 1966 are shown in the following table. The figures relate to the political boundaries of the several States (or Colonies) and Territories as they existed at the date of each census, except that the Northern Territory has been shown separately from South Australia for the censuses prior to its transfer from that State. The years of formation of the separate Colonies and transfer of the Territories are shown in the chapter Discovery, Colonisation and Federation of Australia (page 5).

Increase since 1901 census

The increases in the populations of the several States and Territories and of Australia as a whole during the last seven intercensal periods are shown in the following table, which distinguishes the numerical increases, the proportional increases (which do not allow for the differences in the length of the intercensal periods) and the average annual rates of increase.

**POPULATION: INTERCENSAL INCREASES(a), STATES AND TERRITORIES
1901 TO 1966**

<i>State or Territory</i>	<i>1901-1911 (10 years)</i>	<i>1911-1921 (10 years)</i>	<i>1921-1933 (12½ years)</i>	<i>1933-1947 (14 years)</i>	<i>1947-1954 (7 years)</i>	<i>1954-1961 (7 years)</i>	<i>1961-1966 (5 years)</i>

(a) Includes Aborigines from 1963. The results of the census of 30 June 1966 have been taken into account in the preparation of estimates for dates subsequent to the census of 30 June 1961. See text, page 117. (b) Part of New South Wales prior to 1911. (c) Includes all defence personnel enlisted in Australia irrespective of movement subsequent to enlistment. (d) Includes Aborigines.

The estimated population at 31 December each year from 1788 to 1946 is shown in *Demography*, Bulletin No. 67, 1949, and for the period 1886 to 1966 in *Demography*, Bulletin No. 84, 1966. A graph illustrating the growth of the population of Australia and of each State and Territory appears on plate 16, page 118.

Proportions of area and of population, density and masculinity

In the following table the proportions of the total area and of the total population represented by each State and Territory are given, together with the density and the masculinity of the population. Additional information regarding density and masculinity of population appears later in this chapter (see pages 134–5).

PROPORTIONS OF AREA AND OF POPULATION(a); DENSITY AND MASCULINITY OF POPULATION(a); STATES AND TERRITORIES, 31 DECEMBER 1967

State or Territory	Proportion of total area per cent	Proportion of population, 31 Dec. 1967 (per cent)			Density(b)	Masculinity(c)

(a) Includes Aborigines.

(b) Number of persons per square mile.

(c) Number of males per 100 females.

Urban and rural distribution

In censuses before 1966 *metropolitan and other urban* boundaries were delineated without common criteria, but for the 1966 census a new uniform concept of *urban*, based on a minimum population density of 500 persons per square mile, was introduced. Other new criteria concerned land use, continuity of dwellings, enclaves, and unoccupied dwellings in holiday areas. No account was taken of administrative boundaries in delineating these urban centres.

Because of practical difficulties (notably lack of time to carry out an extensive examination of each area in order to re-design suitable collector's districts and the absence of suitable topographic boundaries around small towns) the new criteria were for the time being uniformly applied only to urban centres within the capital city statistical divisions and the statistical districts (*see below*), to other urban centres with a population of 30,000 or more, and to a few smaller centres (Katoomba-Wentworth Falls, Lawson-Hazelbrook, and urban centres in the Shires of Wyong and Gosford in New South Wales, Moe-Yallourn in Victoria, Cairns in Queensland, and Kalgoorlie in Western Australia). It is proposed to extend the application of the new criteria to smaller centres in future censuses.

Briefly the new criteria are as follows.

- (1) Population clusters of 1,000 or more persons having a minimum density of 500 persons per square mile shall be designated 'urban'. This density shall be determined for each census collector's district (the smallest geographical area available). Additionally, some areas of lower population and/or density shall be classified as 'urban' on other grounds (e.g. holiday areas, industrial areas).
- (2) Around each principal urban centre with a population of 75,000 or more *two* boundaries shall be drawn. The *outer* boundary shall circumscribe the area which is expected to be in close economic and social contact with the principal urban centre for the next two or three decades. These areas shall be designated STATISTICAL DIVISIONS (for State capital cities) or STATISTICAL DISTRICTS (for Canberra, Newcastle, Wollongong, and Geelong). The *inner* boundary shall delimit the principal urban centre itself. It shall be a *moving* boundary, which from census to census, as urbanisation proceeds, will move outwards to encompass peripheral development. For capital cities the principal urban centre encompassed by the inner boundary shall be designated the METROPOLITAN AREA.
- (3) Other urban centres shall be described by name as URBAN.

For urban centres *not* yet delimited by the new criteria, this procedure was used: urban centres were intensively examined on the most recent aerial photographs available and the boundaries set as closely as possible to the periphery of the built-up area without regard to local government boundaries. The greater availability of recent aerial photographs in 1966 than in 1961 enabled more meaningful boundaries to be delineated for many small urban centres.

Census field count statement No. 4, *Population, Principal Urban Centres of Australia* contains an appendix in which are expounded the full criteria now being applied.

Rural population comprises the inhabitants of the remaining portions of each State or Territory. The term *migratory* used in the following tables refers to persons not elsewhere enumerated who at midnight on 30 June 1966 were on ships in Australian waters or were travelling on long-distance trains, motor coaches or aircraft.

Principal incorporated cities and towns

The following table shows the population of the principal incorporated cities and towns with a population of 6,000 or more in each State and Territory of Australia at 30 June 1966. The figures relate to areas delimited for local government or other administrative purposes, and differ in some cases from figures shown in the table on page 125 which are based on the new census concept of 'urban' (see page 123).

(a) Excludes full-blood Aborigines. (b) See table on page 125. The capital city (metropolitan area) population in each State comprises the populations of a number of separately incorporated local government areas and/or parts of local government areas.

Classification of urban centres by size

The following table classifies the urban centres in each State and Territory of Australia into grades of size of population at the census of 30 June 1966.

A table showing the aggregate urban population at the 1961 census of all cities and towns outside the metropolitan area of each State with 2,000 or more and 3,000 or more urban inhabitants was included in Year Book No. 51, page 267. A table showing similar data for the 1954 census was included in Year Book No. 47, page 295 and one for the 1947 census in Year Book No. 40, page 334. Comparisons between these various tables can be made only if allowance is made for changes in the status and structure of local government areas and for changes in the manner of determining urban population at each census.

(a) Excludes full-blood Aborigines. (b) Includes that part of urban Gold Coast in this State. Total population of Gold Coast, 53,183. (c) Includes that part of urban Albury-Wodonga in this State. Total population of Albury-Wodonga 32,032. (d) Includes that part of urban Echuca-Moama in this State. Total population of Echuca-Moama, 8,010. (e) Includes that part of urban Yarrowonga-Mulwala in this State. Total population of Yarrowonga-Mulwala, 3,990. (f) Includes that part of urban Barham-Koondrook in this State. Total population of Barham-Koondrook, 1,743. (g) Urban centres so classified on grounds other than population and density.

In the foregoing table those parts of urban centres which are located in adjoining States are classified each according to its respective State, the particulars for each *part* being included opposite the size grade applicable to the *whole* area. The urban centres concerned are: Gold Coast (Queensland-New South Wales); and Albury-Wodonga, Echuca-Moama, Yarrowonga-Mulwala, and Barham-Koondrook (New South Wales-Victoria).

Principal cities of the world

The following table shows the population of the world's largest cities at the latest available date. Since the way in which cities are delimited differs from country to country, the table shows data for the urban agglomeration, where available, as well as data for the so-called city proper. The urban agglomeration is defined in the United Nations *Demographic Yearbook* 1966 (page 24), from which most of the figures in the table have been taken, as including the suburban fringe or thickly settled territory lying outside of, but adjacent to, the city boundaries. (See also the Technical Notes on Statistical Tables and footnotes to the table in the *Demographic Yearbook*.)

POPULATION OF THE WORLD'S LARGEST CITIES

Mean population

Mean populations are calculated for twelve-month periods to provide a satisfactory average basis for calculations requiring allowance for the continuous change in population figures during such periods. From 1901 onwards the mean population for any year has been calculated by the formula:

$$\text{Mean population} = \frac{a + 4b + 2c + 4d + e}{12}$$

where *a*, *b*, *c*, *d*, and *e*, respectively, are the populations at the end of the quarter immediately preceding the year and at the end of each of the four succeeding quarters; e.g. in the case of a calendar year, 31 December of the preceding year, and 31 March, 30 June, 30 September and 31 December of the year under consideration. This formula gives a close approximation to the mean of a theoretical population progressing smoothly through the five values *a*, *b*, *c*, *d*, and *e*.

The following tables show the mean populations for the calendar and financial years 1958 to 1967.

(a) Includes Aborigines from year ended 30 June 1962. Population estimates subsequent to the 1961 census are based on a method which omits holiday, business or other short-term movements between States and Territories. As a consequence, marked quarterly seasonal movements in some States due to interstate holiday movements are reflected in the mean population figures for the States prior to 1962 (and 1961-62) but not in those for 1962 (1961-62) and subsequent years.
(b) Includes Aborigines.

Elements of increase

The two factors which contribute to the growth of a population are 'natural increase', i.e. the excess of births over deaths, and 'net migration', i.e. the excess of arrivals over departures. The 'total increase' of the population is obtained by combining natural increase with the increase by net migration. However, comparison of the total increase so obtained with that derived by subtracting the population recorded at one census from that recorded at the next census reveals differences which can be attributed partly to differences in the coverage of the census enumerations, and partly to deficiencies in the records of the elements of increase.

Elements of increase, 1941 to 1967

In the following table particulars are given of the elements of increase for each five-year period from 1941 to 1965 and for each of the years 1963 to 1967.

POPULATION(a): ELEMENTS OF INCREASE, BY SEX

1967 (f)	126,593	91,909 (f)	218,502

(a) Includes Aborigines from 30 June 1961. (b) Excess of births registered over deaths registered. From September 1939 to June 1947, deaths of defence personnel whether overseas or in Australia are included. (c) Includes Aborigines from 1 January 1967. (d) Excess of recorded overseas arrivals over recorded overseas departures. Excludes troop movements for the period September 1939 to June 1947. (e) Increase in total population as recorded at censuses or as estimated for intercensal periods. It includes, in addition to the recorded figures for natural increase and net overseas migration gain, adjustments for differences between the population as estimated and as recorded at census dates up to the census of 30 June 1966, and for the exclusion of Aboriginal births and deaths between 30 June 1961 and January 1967. (f) Includes Aborigines.

Rate of population growth

In the following two tables natural increase refers to the excess of births over deaths (including deaths of Australian defence personnel), net migration refers to excess of overseas arrivals over departures excluding overseas movement of defence personnel for the period September 1939 to June 1947, and total increase is the sum of natural increase and net migration together with differences disclosed by results of population censuses up to 30 June 1966.

Annual rates of natural increase, net migration and total increase, for single years, represent the increase during the year expressed as a proportion (per cent) of the population at the beginning of the year. These rates are slightly higher than those calculated as a proportion (per cent) of the mean population for the year.

Average annual rates of increase for periods greater than one year have been calculated in the following manner.

The average annual rate of total increase is computed by the formula:

$$P_t = P_0 (1 + r)^t$$

where P_0 and P_t are the populations at the beginning and end respectively of a t -year period and r is the average annual rate of growth.

The average annual rate of natural increase and net migration is computed by dividing the average annual rate of total increase between its components in proportion to the fraction of total increase due to each component during the period. Differences between the sum of the rates of natural increase and of net migration and the rate of total increase are due to the intercensal adjustment.

**POPULATION(a): ANNUAL RATE OF GROWTH, AUSTRALIA
1941 TO 1967
(Per cent)**

<i>Period</i>	<i>Natural increase (b)</i>	<i>Net migration</i>	<i>Total increase (c)</i>

(a) Population on which rates calculated includes Aborigines from 30 June 1961. (b) Includes Aborigines from 1 January 1967. (c) Includes Aborigines from 30 June 1961. (d) Includes Aborigines.

The average annual rate of population growth during the present century has been 1.72 per cent, but the results from year to year have deviated widely from this figure. In the following table the period 1 January 1901 to 31 December 1967 has been arranged into certain defined groups of years according to the occurrence of influences markedly affecting the growth of population.

POPULATION(a): PERIODIC RATES OF GROWTH, AUSTRALIA
1901 TO 1967

Period	Interval (years)	Total increase (‘000)	Average annual numerical increase (‘000)	Average annual rate of population growth (per cent)		
				Natural increase	Net migration	Total
1901 to 1913 . . .	13	1,128	87	1.55	0.49	2.04
1914 to 1923 . . .	10	862	86	1.49	0.15	1.64
1924 to 1929 . . .	6	680	113	1.26	0.62	1.88
1930 to 1939 . . .	10	569	57	0.82	0.02	0.85

1962 to 1967 . . .	6 (b)	1,286 (b)	214 (c)	1.17	0.77 (b)	1.92

(a) Includes Aborigines from 1962. (b) Includes Aborigines. (c) Includes Aborigines from 1 January 1967.

Rates of population growth from 1886 are shown for each State and Territory of Australia in the annual bulletin, *Demography*. Estimated rates of growth of the population of Australia in comparison with those for other countries of the world for the years 1958–1966 are shown in the table on pages 173–4.

Density

From certain aspects, population may be less significant in respect of its absolute amount than in its relation to the area of the country. Australia, with an area of 2,967,909 square miles and a population in December 1967 of 11,928,889, has a density of only 4.02 persons to the square mile, and is, therefore, one of the most sparsely populated countries of the world. For other continents and sub-continents, the densities in 1966 were approximately as follows: Europe (excluding U.S.S.R.), 236; Asia (excluding U.S.S.R.), 176; Latin America, 31; U.S.S.R., 26; Africa, 28; and Northern America, 26. The population density of Australia in 1966 was 3.91, about one-seventh of that of Northern America, of Africa and of the U.S.S.R.; about one-eighth of that of Latin America; about one-forty-fifth of that of Asia (excluding U.S.S.R.), and about one-sixtieth of that of Europe (excluding U.S.S.R.).

Because of the large area of Australia and the unsuitability for settlement of much of the country, the density of population must necessarily increase slowly. In Australia as a whole the figure has increased from 1.29 per square mile in 1901 to 4.02 in 1967. The rise in density from 1901 to 1967 in each State and Territory was: New South Wales 4.45 to 14.05, Victoria 13.77 to 37.59, Queensland 0.76 to 2.58, South Australia 0.95 to 2.94, Western Australia 0.20 to 0.91, Tasmania 6.68 to 14.39, Northern Territory 0.01 to 0.12, and Australian Capital Territory 2.05 (in 1911) to 115.20. When comparing the density of population of the several States, consideration should be given to the average annual rainfall distribution in each State as an indication of the climatic influence upon probable population numbers. The proportion of the area of Australia receiving an average of less than 10 inches of rainfall is 39 per cent; that of the various States is: New South Wales, 20 per cent; Victoria, nil; Queensland, 13 per cent; South Australia, 83 per cent; Western Australia, 58 per cent; and Tasmania, nil.

The number and density of population of the principal countries and continental groups of the world are shown in the tables on pages 172–4.

Sex distribution

The number of males to each hundred females has been adopted as a measure of the 'masculinity' of the population. With the exception of some dislocation arising from the two World Wars, there was a continuous diminution of the masculinity of the population until 1945. This resulted from the increasing proportion of the population in the higher age groups, in which females preponderate owing to their greater longevity, and the general long-term fall in the birth rate. At the 1947 census the numbers of the sexes were practically equal, but during the following decade there was an increase in masculinity owing to the greater number of males as compared with females in net overseas migration, and the recovery of the birth rate in the post-war period from the low levels of the 1930s. In more recent years, however, the trend has declined again.

(b) Part of New South Wales prior to 1911.

(c) Includes Aborigines.

The masculinity of the population in the principal countries of the world is shown in the table on pages 173-4.

Age distribution

The next table shows the changes which have taken place in the age distribution of the population of Australia since 1871.

POPULATION(a): PROPORTIONAL AGE DISTRIBUTION, BY SEX, AUSTRALIA
1871 TO 1966
(Per cent)

Census	Males				Females				Persons			
	Under 15 years	15 years and under 65	65 years and over	Total	Under 15 years	15 years and under 65	65 years and over	Total	Under 15 years	15 years and under 65	65 years and over	Total

(a) Excludes full-blood Aborigines.

General characteristics of the population

Particulars of the characteristics of the population of Australia at the 1966 census compared with the 1961 census and for the individual States and Territories at the 1966 census are shown in this section. Information concerning the industry, occupational status, and occupations of the population as recorded at the 1966 census is given in the chapter Employment and Unemployment, and on dwellings in the chapter Housing and Building.

The characteristics dealt with in the following pages are: age; marital status; country of birth; period of residence in Australia of overseas born; nationality; religion. Further details are available in a series of mimeographed bulletins which are listed in the chapter Miscellaneous. All tables exclude particulars of full-blood Aborigines.

(a) So described in individual census schedules.

The Aboriginal population of Australia

In Year Book No. 17, pages 951-61, a brief account was given of the Australian Aboriginal population, its origin, its numbers as estimated from time to time and the steps taken for its protection. On pages 914-16 of Year Book No. 22 particulars were shown for each of the States and Territories of Australia at successive periods, while a special article dealing with the estimated number and distribution of the native population at the date of first settlement of the white race in the continent appeared on pages 687-96 of Year Book No. 23.

Aborigines have been enumerated in all censuses of the Commonwealth, but the degree of coverage and information obtained has varied substantially since 1911. Since the census taken in 1933 the adequacy of the particulars obtained has improved progressively as a result of an increasing number of Aborigines coming into contact with more populated areas.

At the 1966 Census extensive arrangements were made to obtain as full a coverage of full-blood Aborigines as possible and to enumerate fully those Aborigines 'out of contact'. Throughout Australia the assistance of Aboriginal welfare bodies, mission superintendents, station owners, patrol officers, and police was sought in an effort to include all Aborigines and to obtain complete information about them, e.g. in the Northern Territory information was obtained from missions and settlements concerning Aborigines normally resident at such locations but who were absent at the time of the Census, and of Aborigines resident at such locations but who normally resided elsewhere. The two sets of information were then reconciled to produce what is considered to be a fairly complete and accurate coverage of Aborigines in the Territory.

The following table shows particulars of the Aboriginal population of Australia at the censuses of 30 June, 1954, 1961, and 1966. Because of some doubt about the accuracy of separate figures for full-blood and half-blood Aborigines as shown in previous issues of the Year Book, their separate publication has been discontinued.

(a) Persons of 50 per cent or more Aboriginal blood. Enumerated population only (see below).

Prior to the 1966 census Aborigines 'out of contact' were not enumerated, and estimates of these were made by authorities responsible for native welfare. It is estimated that at the 1954 census 12,956 full-blood Aborigines (of which 2,311 were estimated to be in Queensland, 1,760 in South Australia, 3,516 in Western Australia, and 5,369 in the Northern Territory) were not contacted by census collectors and were not included in the census. Increasing numbers however, were coming into contact, and it is estimated that at the 1961 census 2,000 full-blood Aborigines in Western Australia and 1,944 in the Northern Territory were not contacted by census collectors. At the 1966 Census efforts were made to obtain complete coverage (see text above table).

Torres Strait Islanders are not included in the above table, but are included in the census figures shown elsewhere in this chapter. At the 1966 census they numbered 5,403 persons.

Overseas arrivals and departures

In this section summary figures are given of the total movement of overseas passengers, and full details are given in respect of permanent arrivals and departures. For information on passengers in other categories, see Chapter 12, Transport, Communication and Travel.

More detailed statistics of overseas arrivals and departures, covering country of residence, country of embarkation or disembarkation, mode of travel, month of arrival or departure, etc., are shown in the tables of Section II, Overseas Arrivals and Departures, of the annual bulletin *Demography*. Monthly and quarterly mimeographed bulletins, containing the latest available statistics of overseas arrivals and departures, are also issued.

Overseas arrivals and departures since 1936

Earlier issues of the Year Book contain, in summary form, tables showing the increase of population by net migration from 1861 to the latest date, while information for individual years from 1881 is published in the annual bulletin *Demography*. The following table shows, for Australia, arrivals and departures since 1936, and refers to total movement irrespective of length of stay. Air crews and ships' crews, persons passing through Australia on board the same ship or flight, and also persons on short pleasure cruises in the south-west Pacific commencing and finishing in Australia on ships not then engaged in regular voyages, are excluded from Australian statistics of overseas arrivals and departures. A graph showing arrivals and departures from 1946 to 1967 appears on plate 24, over the page.

(a) Excludes movements of defence personnel from September 1939 to June 1947.

Excess of arrivals over departures

The excess of total overseas arrivals over departures is one of the elements of population increase taken into account in preparing the estimated population for other than census dates (see page 117 of this chapter). It is necessary to use statistics of total overseas arrivals and departures for this purpose, because Australian population statistics relate to the total population present in Australia at the date of the census or estimate, and not the population normally resident in Australia (which would include those temporarily overseas and exclude those temporarily visiting Australia). The two following tables give particulars of the net gain or loss of population due to overseas migration, according to age and marital status and according to country of birth.

EXCESS OF ARRIVALS OVER DEPARTURES, BY SEX: AGE DISTRIBUTION AND MARITAL STATUS, AUSTRALIA, 1966 AND 1967

Minus sign (—) indicates excess of departures over arrivals.

Classification of travellers

Since 1 July 1924 overseas travellers have been classified according to declared intention in regard to residence into two principal categories, distinguishing movements for short terms from movements for longer periods (including permanently). Prior to 1957 these categories were *temporary* and *permanent*. Thereafter the categories were entitled *short-term* and *permanent and long-term*, but the basis of classification was not changed and the figures are directly comparable for the whole period. For short-term movements overseas visitors and Australian residents were identified separately.

Revised questions for travellers were introduced in mid-1958, and these enabled the separation, from 1 January 1959, of permanent from other long-term movements and also the identification among the permanent departures of former settlers departing.

The principal categories of travellers are as follows.

Permanent movement—consists of persons arriving with stated intention of settling permanently in Australia (settlers), and Australian residents departing with stated intention of residing permanently abroad; the latter include *former settlers*, i.e. persons who, on departure from Australia, stated that they had come to Australia to settle, had stayed for a period of twelve months or more and were now departing permanently.

Long-term movement—consists of the arrival of visitors and the departure of residents with stated intention of staying (in Australia or in a country abroad respectively) for twelve months or more; and the departure of visitors and the return of Australian residents who have stayed (in Australia or in a country abroad respectively) for twelve months or more.

Short-term movement—consists of all other movements, including the movement of Australian troops irrespective of period of stay, and U.S. troops visiting Australia on rest and recreation leave.

This classification is based on statements made by the traveller on arrival in, or departure from, Australia. They represent the traveller's intention at that time. Many travellers subsequently change their intentions, and this must be borne in mind in interpreting the statistics.

The numbers so classified since 1 January 1941, on the basis of declared intention as to residence, and since 1 January 1961, on this basis supplemented by additional particulars as to stated purpose of journey, are as follows.

OVERSEAS ARRIVALS AND DEPARTURES: CLASSIFICATION OF TRAVELLERS AUSTRALIA, 1941 TO 1967

State or Territory of intended residence (arrivals) or last residence (departures). The following table shows the number of settlers arriving in Australia by State or Territory of intended residence and the number of Australian residents departing permanently by State or Territory of last residence, for the years 1965 to 1967. Settlers are asked, on or before arrival, the State or Territory of Australia in which they next intend to stay for twelve months or more. The statements represent the settlers' intentions at the time and may not be realised. The allocation to States and Territories in the table is based on these statements, except that settlers proceeding to the migrant reception centre, Bonegilla, Victoria, are allocated, as far as is practicable, to the State or Territory of their placement from the centre. Residents departing permanently are asked the State or Territory in which they last stayed for twelve months or more.

Assisted migration into Australia

Detailed statistics of assisted migration into Australia are shown in *Australian Immigration: Consolidated Statistics* published by the Department of Immigration.

Immigration has always been a major factor in Australia's economic growth. Since the 1939-45 War immigration programmes have been pursued as a central feature of government policies for national development. Since 1945 successive Australian governments have borne a substantial part of the passage costs of selected migrants from overseas countries. This assistance has in some cases been matched or partly matched by contributions from the government of the emigration country and from international funds. The trend in recent years has been towards financial assistance by the Australian Government with a nominal personal contribution by the migrant. The basis of operation has varied from country to country—bilateral migration agreements have been negotiated with some countries, migration arrangements have been made through the Intergovernmental Committee for European Migration (ICEM) with other countries, and in other instances unilateral assistance has been given by the Australian Government. The following table shows the numbers of persons who were assisted to come to Australia by the Australian Government under all assisted passage schemes during the period 1946 to 1967.

ASSISTED MIGRATION: AUSTRALIA, 1946 TO 1967

Period	Nominated and selected (assisted) arrivals
1946-50	273,195
1951-55	275,241
1956-60	305,517
1961-65	337,132
1963	62,914
1964	79,604
1965	93,653
1966	89,743
1967	82,247

Details of the joint scheme of assisted immigration arrived at by agreement between the Commonwealth and State Governments, which operated from 1920 to 1939, were published in earlier issues of the Year Book (*see* No. 38, page 576). After the outbreak of hostilities in 1939 it was decided to discontinue the grant of assisted passages for the duration of the war.

Migration from Britain

At the conclusion of the 1939-45 War two migration agreements were negotiated between the Australian and British Governments and signed on 5 March 1946. These agreements came into operation on 31 March 1947 and provided respectively for granting free passages to British ex-service-men and their dependants and assisted passages to other residents of Britain wishing to settle permanently in Australia. The free passage agreement was terminated on 28 February 1955, but the assisted passage agreement has continued in operation by renewal from time to time. It is now valid until 31 May 1972.

Assisted passages. Under the present agreement the British Government contributes £Stg150,000 per annum towards the cost of the movement of migrants to Australia. Each migrant 19 years of age or over contributes £Stg10 towards his passage costs. Migrants under 19 years of age make no contribution. The Australian Government meets the balance of the overall transport costs.

Eligibility for consideration for assisted passages is confined generally to citizens of the United Kingdom and colonies, normally resident in Britain. Within those broad conditions of eligibility the following six categories of applicants may be granted assisted passages under current arrangements: *personal nominees*—persons sponsored by relatives or friends already established in Australia who provide accommodation for their nominees; *group nominees*—workers and their dependants sponsored or selected to meet labour requirements specifically notified by public and private employers; *Commonwealth nominees*—workers and their dependants selected to meet labour requirements within industry generally in Australia; *'bring out a Briton' nominees*—persons sponsored by special voluntary committees formed throughout Australia to stimulate the flow of British migrants through community effort; *single men and women and married couples without children*—persons with a minimum capital of £Stg25 each, selected without specific nomination, who are prepared to make their own accommodation arrangements upon arrival; *'nest-egg families'*—families with a minimum capital of £Stg1,000 and prepared to make their own accommodation arrangements on arrival.

Hostels are operated by the Australian Government and also by the State Governments to provide transit or temporary accommodation for certain groups of newly arrived migrants.

Number of arrivals. The numbers of British migrants who came to Australia under the Free and Assisted Passage Agreement during the period January 1947 to June 1967 are given in the following table according to the State or Territory of intended residence.

UNITED KINGDOM FREE AND ASSISTED PASSAGE AGREEMENT: NUMBER OF
MIGRANTS^(a), STATES AND TERRITORIES OF INTENDED RESIDENCE
JANUARY 1947 TO JUNE 1967

(a) Includes child migrants as shown below.

(b) See text above for explanation.

Child migration from Britain

The pre-war arrangements under which child migrants were brought to Australia under the sponsorship of various religious denominations and voluntary organisations were resumed in 1947. Under current arrangements these young migrants receive assisted passages and special maintenance provisions involving the British Government and the Australian and State Governments. From the beginning of 1947 to 30 June 1967 a total of 8,144 British child and youth migrants arrived under sponsorship, 5,730 to New South Wales, 1,375 to Western Australia, 584 to Victoria, and 455 to other States. These arrivals are included in the table above.

Maltese migration

The Australian Government and the Government of Malta entered into an agreement on 28 April 1965, under which financial assistance is granted jointly towards the movement to Australia of approved migrants from Malta. The agreement supersedes earlier ones signed in 1948 and 1956. ICEM (Intergovernmental Committee for European Migration—see page 163) is associated with the assisted migration arrangements under this agreement. Up to 30 June 1967 a total of 38,386 Maltese had arrived under the assisted passage scheme.

Netherlands migration

Details of early agreements between the Netherlands and Australia were given in Year Books No. 39, page 567, and No. 53, page 196. The Australia-Netherlands Migration and Settlement Agreement was signed on 1 June 1965. In accordance with Article II of that agreement an 'Australian-Netherlands Assisted Passage Migration Arrangement' was negotiated to come into force concurrently with the agreement. The agreement is for a basic period of five years but will then continue indefinitely subject to termination at one year's notice by either Party. The 'Arrangement' will normally run for the same period as the 'Agreement' but may be terminated at 180 days notice by either party. Passage costs are met by the Australian Government, the migrants and in certain circumstances the Netherlands Government. The Australian Government is responsible for the reception of assisted migrants and for general assistance towards their settlement in Australia. ICEM is associated with the assisted migration arrangements under this agreement. Up to 30 June 1967, 71,236 Dutch assisted migrants had arrived in Australia.

Italian migration

A migration agreement between Italy and Australia came into operation on 1 August 1951 and continued in operation under extensions until 31 January 1964. A new Migration and Settlement Agreement was signed on 26 September 1967, and an assisted migration arrangement was entered into in conjunction with this Agreement. This provides for the movement to Australia under assisted passage arrangements of selected Italian workers in categories and numbers as agreed between the Australian and Italian Governments. Dependants of selected workers are also moved under assisted passage arrangements. Provision is also made for movement as nominated dependants of the wives and dependent children of any selected workers who move in advance of their families; and of the unmarried sisters, unmarried daughters, fiancées and proxy wives of Australian residents. Passage costs are met by the migrant and the Australian Government. The Australian Government is responsible for the reception of assisted migrants and for general assistance towards their settlement in Australia. ICEM is associated with the assisted migration arrangements under this agreement. Up to 30 June 1967, 41,596 Italian assisted migrants had settled in Australia.

German migration

On 29 August 1952 a migration agreement was signed between the Federal Republic of Germany and Australia under which selected German workers and their dependants could receive assisted passages to Australia. The agreement was renewed for five years from 29 August 1957, but assisted migration under the terms of the 1957 agreement continued until a new agreement was signed on 21 June 1965, to run indefinitely subject to one year's notice of termination by either party. Passage costs are met by the migrant, the Australian Government, and in certain circumstances the German Government. The Australian Government is responsible for the reception of assisted migrants and for general assistance towards their settlement in Australia. ICEM is associated with the assisted migration arrangements under this agreement. Up to 30 June 1967, 81,869 German assisted migrants had settled in Australia.

Austrian migration

Late in 1952 arrangements were made between the Austrian Government, the Australian Government and ICEM under which selected Austrian workers and their dependants could receive assisted passages to Australia. These arrangements still apply. Contributions to passage costs are made by the migrant and the Australian Government. The Australian Government is responsible for the reception of assisted migrants and for general assistance towards their settlement in Australia. Up to 30 June 1967, 19,865 Austrian assisted migrants had settled in Australia.

Greek migration

Late in 1952 arrangements were made between the Greek Government, the Australian Government and ICEM under which selected Greek workers and their dependants could receive assisted passages to Australia. These arrangements still apply. Contributions to passage costs are made by the migrant

and the Greek and Australian Governments. The Australian Government is responsible for the reception of assisted migrants and for general assistance towards their settlement in Australia. Up to 30 June 1967, 45,309 Greek assisted migrants had settled in Australia.

Spanish migration

In 1958 arrangements were made between the Spanish Government, the Australian Government and ICEM under which selected Spanish workers and their dependants could receive assisted passages to Australia. At the request of the Spanish authorities these arrangements, so far as workers are concerned, were temporarily suspended in March 1963. Since then certain female dependants nominated by Spanish assisted migrants already in Australia have continued to arrive in Australia as assisted migrants. Negotiations with the Spanish Government have resulted in approval in principle of the resumption of worker movements on a limited scale. Dependants of selected workers will also be moved under assisted passage arrangements. The Australian Government is responsible for the reception of assisted migrants and for general assistance towards their settlement in Australia. Up to 30 June 1967, 8,168 Spanish assisted migrants had settled in Australia.

Belgian migration

On 1 February 1961 arrangements were made between the Belgian Government, the Australian Government and ICEM under which selected Belgian workers and their dependants could receive assisted passages to Australia. These arrangements still apply. Contributions to passage costs are made by the migrant and the Belgian and Australian Governments. The Australian Government is responsible for the reception of assisted migrants and for general assistance towards their settlement in Australia. Up to 30 June 1967, 2,062 Belgian assisted migrants had settled in Australia.

Turkish migration

An agreement with the Turkish Government was signed on 5 October 1967 to run indefinitely subject to termination at ninety days notice by either Government. This provides for the assisted passage movement to Australia of selected Turkish workers and their dependants. The numbers and categories of workers to be moved annually will be as agreed from time to time between the Australian and Turkish Governments. Passage costs are met by the Australian Government and the migrant. Transportation and reception arrangements are the responsibility of the Australian Government.

Refugee migration

By agreement with the International Refugee Organization, Geneva, on 21 July 1947, Australia undertook to provide resettlement opportunities for displaced persons. A total of 170,700 displaced persons arrived in Australia under this agreement in the following years. The International Refugee Organization was terminated in 1951 and refugee problems became the responsibility of the United Nations High Commissioner for Refugees, whose office was created by the United Nations specifically for this purpose. At about the same time ICEM was established partly to provide arrangements for the actual resettlement overseas of refugees, particularly with regard to transport.

Australia has continued to provide resettlement opportunities for refugees from Europe and elsewhere. In the period from 1945 to 30 June 1967, 311,363 refugees had been resettled in Australia including the 170,700 displaced persons mentioned above. Of the total number of refugees received by Australia since the end of World War II up to 30 June 1967, 215,247 have received financial assistance from the Australian Government towards their passage costs.

General Assisted Passage Scheme

This scheme has operated since 10 September 1954 and provides for a contribution by Australia towards passage costs to be granted to selected British and non-British workers and their dependants from a number of countries. Australia provides for the reception of migrants accepted under this scheme and for general assistance towards their settlement in Australia. From 1 July 1966 a new assisted migration programme, the Special Passage Assistance Programme, has operated in Europe. As a result the General Assisted Passage Scheme now applies only to applicants resident outside Europe, e.g. the United States of America, South America and Africa. Up to 30 June 1967, 34,663 assisted migrants had settled in Australia under the General Assisted Passage Scheme.

Special Passage Assistance Programme

This programme has applied since 1 July 1966 to selected applicants residing in Britain, Ireland, continental Europe (excluding Luxembourg and Communist countries) and Malta. Persons in those countries who are already eligible under existing assisted passage schemes are not considered for the Special Passage Assistance Programme. Approved applicants may make their own travel arrangements

or travel by sea or air on bookings made by the Department of Immigration. For those persons who travel privately and are over nineteen years, a contribution of \$25 towards passage costs is required and the extent of assistance is up to \$335. Persons under nineteen years make no contribution and receive assistance up to \$360. Approved migrants who travel on departmentally arranged bookings make the same passage contribution, and the balance of movement costs from their place of residence overseas to the port of disembarkation in Australia is met by the Australian Government. Up to 30 June 1967, 4,603 assisted migrants had settled in Australia under the Programme.

The Intergovernmental Committee for European Migration (ICEM)

This Committee, like the office of the United Nations High Commissioner for Refugees, was established to perform functions that had formerly been carried out by the International Refugee Organization. In addition to assuming responsibility for the resettlement of refugees, ICEM has been concerned also with the movements of national migrants from Europe. Australia was one of the sixteen foundation members of the Committee; there are now thirty-two member countries including the British Commonwealth countries of Australia, New Zealand, the United Kingdom and Malta.

The three main functions of ICEM are: the movement of national migrants and the provision of related services; the resettlement of refugees and the provision of related services; and developmental activities and technical co-operation (this includes activities such as language teaching, vocational and orientation training, and in particular measures to facilitate the acceptance of European migrants by Latin American countries).

Each member government is required to contribute an agreed percentage of the Committee's administrative expenditure. Contributions to its operational expenditure are voluntary and governments may stipulate the terms and conditions under which they are to be used.

Up to 30 June 1967 ICEM had moved 1,491,937 persons, of whom 473,055 (339,564 nationals and 133,491 refugees) had departed for Australia.

Summary of arrivals of assisted migrants

The following table shows the number of assisted migrants who arrived in Australia in each of the last five financial years and since January 1947. All arrivals included in this table have obtained some financial assistance from the Australian Government towards payment of their passage money. Transport to Australia for the migrants concerned has been arranged on ships under charter to the Department of Immigration, ships and aircraft under charter to the Intergovernmental Committee for European Migration, and normal commercial shipping and airlines. The arrivals under these schemes include a small number of nationals of countries other than those referred to, and stateless persons.

(a) Mostly Scandinavians, U.S. Americans, and British nationals from countries other than the United Kingdom.

Immigration Advisory, Planning and Publicity Councils

Three bodies have been established to advise the Minister for Immigration on the social, economic and publicity aspects of the immigration programme.

The *Immigration Advisory Council*, established in 1947, consists of representatives of major national organisations (e.g. the Australian Council of Trade Unions, the Returned Servicemen's League of Australia, and the National Youth Council) and advises the Minister on the social aspects of immigration. The *Immigration Planning Council*, established in 1949, consists of eminent persons chosen in their own right; it advises the Minister on the economic considerations affecting the immigration programme. The *Immigration Publicity Council*, established in 1962, advises on publicity and publications used in Australia and overseas. Its members represent the press (including the foreign language newspapers), radio and television interests.

Professional migration

The Department of Immigration, working in close co-operation with the Department of Labour and National Service, provides a special service, including advisory staff in London, to encourage immigration of professionally qualified persons by giving advice and information on prospects in Australia and by putting such applicants in touch with Australian employers.

The number of professional applicants is growing (the majority come from the United Kingdom). Some difficulties being experienced in the recognition of foreign qualifications are yet to be resolved.

The regulation of immigration into Australia

Powers and legislation of the Commonwealth

Under section 51 (xix), (xxvii) and (xxviii) of the Commonwealth Constitution, the Parliament of the Commonwealth is empowered to make laws with respect to immigration, emigration, aliens and the influx of criminals. Immigration into Australia is regulated by the *Migration Act* 1958–1966 which came into force on 1 June 1959.

Any immigrant entering Australia after the commencement of the Act without having been granted an 'entry permit' or who is not within an exempted class is a prohibited immigrant. Exempted persons include diplomatic, consular and trade representatives of other countries, and seamen who enter with leave while their ships are in Australian ports. For the purposes of the Migration Act an immigrant includes a person entering for temporary stay.

An entry permit is normally granted at the port of entry by means of a stamp in the traveller's passport or equivalent travel document. No form of application is involved. Temporary permits are granted to visitors and persons whose stay is to be of limited duration. For other persons permits are issued without limitation as to stay. A person who is refused an entry permit must not be permitted (by the carrier company) to enter Australia; otherwise the carrier company is liable to a fine of \$1,000.

The Act regulates the deportation of persons who enter Australia without an entry permit, who overstay their approved period of residence or who are convicted of crimes. It also contains provisions relating to the emigration of children and Aborigines.

The Act does *not* affect passport or visa requirements for travel to Australia. All persons who, prior to the 1958 Act, had been required before embarkation to obtain visas or other kinds of authority to proceed to Australia, are still required to obtain them. Likewise, persons who have not had to obtain prior authority to proceed to Australia are not now required to obtain such authority solely as a result of the Act. Persons previously allowed to enter without production of passports—notably British people arriving from New Zealand—are still able to do so.

The *Aliens Act* 1947–1966 provides that a register of aliens shall be maintained for every State and mainland Territory of Australia. Unless exempted, aliens 16 years of age and over are required to register with the Department of Immigration and to notify the Department of their address, occupation, or employment during the month of September each year. They are required to notify marriage within thirty days of marriage taking place. The Act provides also that the consent of the Department must be obtained before an alien may change his surname.

The *Immigration (Guardianship of Children) Act* 1946–1966 provides that the Minister for Immigration becomes the legal guardian of every person under the age of 21 years who enters Australia (except for certain exempted groups) other than in the charge of, or for the purpose of living in the care of, a parent or adult relative. It is primarily administered through the child welfare authorities in each State and mainland Territory who, as the Minister's delegates under the Act, supervise the welfare of each 'immigrant child'.

Conditions of immigration into Australia

Admission of non-Europeans. Australia's immigration policy is based on the need to maintain a predominantly homogeneous population. It is fundamental to the policy that people coming to Australia for residence should be capable, both economically and socially, of ready integration into the community.

Australia does not exclude from residence persons of other than European origin. Immigration laws and policy permit the Minister to authorise their entry, taking into account the qualifications of persons wishing to settle here, their ability to integrate readily into the community, and other aspects including considerations of a humanitarian nature and broad national interest.

The present policy provides, *inter alia*, that:

non-Europeans, who are the spouses, unmarried minor children, aged parents or fiancées of Australian citizens, and of other British subjects already having resident status, or eligible to enter with such status, may be admitted for permanent residence (the non-European wife and unmarried minor children of a European alien in similar circumstances may also be admitted for residence);

non-Europeans who have already been admitted under temporary permit but with the expectation of indefinite stay may, after completing five years' residence, qualify to apply for resident status and subsequently for citizenship.

The following examples of persons may be considered for entry for settlement, accompanied by their wives and children, on the basis of their general suitability and possession of qualifications positively useful to Australia:

persons with specialised technical skills for appointments for which local residents are not available;

persons of high attainment in the arts and sciences, or of prominent achievement in other ways; persons nominated by responsible authorities or institutions for specific important professional appointments, which otherwise would remain unfilled;

executives, technicians, and other specialists who have spent substantial periods in Australia—for example, with the branches here of large Asian companies—and who have qualifications or experience in positive demand here;

businessmen who in their own countries have been engaged in substantial international trading and would be able to carry on such trade from Australia;

persons who have been of particular and lasting help to Australia's interest abroad in trade or in other ways;

persons who by former residence in Australia or by association with Australia have demonstrated an interest in or identification with Australia that should make their future residence here feasible.

In addition to visitors and students, provision exists also for the entry on a limited temporary residence basis of staffs of companies, professional, technical and specialist personnel, and of persons coming for medical treatment, religious training, or as sportsmen and entertainers, and in other miscellaneous categories.

Private students. Young people may enter Australia for the purpose of study, irrespective of their countries of origin. The greater proportion of such private students in Australia are from Asia, the Pacific area and, to a lesser extent, from the continent of Africa (there are at present more than 10,000 Asian and other non-European private students in Australia). The objective is to provide the opportunity for young people in these areas to come to Australia for advanced secondary, tertiary,

and other post-secondary study and training which will result in qualifications in demand and of use in their countries. The student, as well as meeting other requirements of entry, must have the capacity to undertake the course of study proposed and produce evidence of enrolment and assurances as to maintenance and accommodation. The student is admitted with temporary residence status and is required to acknowledge that he is obliged to return home on completing the approved course of study or training and that authority for stay and for extensions of stay as a student is dependent upon satisfactory academic progress.

Persons of European race. Maltese, Cypriots, and aliens of European race desiring to settle permanently in Australia are required to obtain authority for admission from the Department of Immigration or an Australian overseas post. Their admission under the present policy is subject to clearance on health, character, and security grounds, and depends on their suitability as settlers generally.

Passports

Australian passports are issued under the *Passports Act* 1938–1966 and Passport Regulations. Passports are obtainable on application at offices of the Commonwealth Department of Immigration in each State, the Northern Territory, and the Australian Capital Territory, from overseas offices of that Department, from any Australian diplomatic or consular mission abroad, or from the office of any Australian Government Trade Commissioner overseas. Applicants for passports must furnish evidence of their identity and nationality and pay a fee of four dollars. Approximately 95,000 Australian passports are issued each year in Australia and abroad.

Citizenship and naturalisation

Commonwealth legislation

Statistics of persons granted Australian citizenship are shown in *Australian Immigration: Consolidated Statistics* published by the Department of Immigration.

The *Nationality and Citizenship Act* 1948–1967 commenced on Australia Day (26 January) 1949, and repealed all previous Commonwealth legislation on this subject. The most significant effect of the Act was the creation for the first time of the status of 'Australian Citizen'. In this respect the Act was complementary to citizenship legislation passed or about to be passed by other countries of the British Commonwealth. All Australian citizens, and the citizens of other countries of the British Commonwealth, are declared to be British subjects. The status of 'British subject' flows from the possession of citizenship of one of the Commonwealth countries. It could best be described as the connecting link between the citizenship of the countries of the British Commonwealth. Australian citizenship was automatically acquired as from 26 January 1949 by persons who were British subjects at that date and who either (a) were born in Australia or New Guinea; or (b) were naturalised in Australia; or (c) had been residing in Australia during the five years immediately preceding 26 January 1949; or (d) were born outside Australia of fathers to whom (a) or (b) above applied (provided the persons concerned had entered Australia without being placed under any immigration restriction); or (e) were women who had been married to men who became Australian citizens under the above headings (provided that the women concerned had entered Australia without being placed under immigration restriction). For the purposes of the Act, 'Australia' includes the Territories of the Commonwealth which are not Trust Territories. By an amendment of the Act in 1950 it was further provided that Nauru should be treated in the same manner as New Guinea.

Citizenship may be acquired in the following ways: (a) by birth in Australia; (b) by birth outside Australia, of a father who is an Australian citizen, provided that the birth is registered at an Australian Consulate; (c) by registration—Certificates of Registration as Australian citizens may be granted by the Minister to British subjects or Irish citizens who make application and satisfy the Minister that they can comply with specified requirements as to residence in Australia, good character and intention to reside permanently in Australia; (d) by naturalisation—Certificates of Naturalisation as Australian citizens may be granted by the Minister to aliens and protected persons who make application and can comply with requirements somewhat similar to those previously required under the *Nationality Act* 1920–1946. Requirements for naturalisation are: (i) as a rule five years residence

in Australia, but residence in other British countries or service under a British Government may be accepted (special concessions in the matter of residence qualifications are available to persons who have enlisted in the Australian armed forces; (ii) the applicants must have an adequate knowledge of the responsibilities and privileges of citizenship. Certificates do not take effect until the applicant takes the oath of allegiance. The oath is now taken, and citizenship is conferred, at public ceremonies held in the locality of the applicant's place of residence, and presided over by the mayor or equivalent head of the local government authority.

The declaration of intention to apply for naturalisation, which was introduced by the original Act of 1948, is no longer compulsory, although it can still be made if an intending applicant so desires. This change was made by the amending Acts of 1955 and 1959 under the provisions of which aliens may lodge applications on completing 4½ years residence, but may not be granted naturalisation until five years' residence has been completed.

Under the Act the independence of married women in nationality matters is recognised, and British nationality was restored to those women who had lost it through marriage to aliens prior to 26 January 1949. Such women automatically became Australian citizens if they were born in Australia or had lived here for the five years prior to the commencement of the Act. Marriage does not affect a woman's nationality. Alien women who marry Australian citizens may, however, be naturalised under somewhat easier conditions than those which apply to other aliens.

Persons granted Australian citizenship by naturalisation and registration during 1966-67

The following tables show the previous nationalities and the countries in which persons were ordinarily resident immediately before entering Australia and New Guinea, of persons:

- (a) who became Australian citizens by reason of the grant of certificates of naturalisation; and
- (b) who became Australian citizens by reason of the grant of certificates of registration.

Migrant integration

An integration programme operates to aid the social settlement of migrants into the Australian community. The programme includes the following activities.

English-language tuition is arranged by the Department of Immigration to assist migrants to overcome their language problems. The services provided include instruction in Europe, English-language classes on board ships travelling to Australia, and adult education classes within Australia which are also supplemented by radio and correspondence courses. A course of instruction on gramophone records which has been developed from the radio course is also available. Approximately 613,000 migrants have taken advantage of the English-language facilities. By 30 June 1967, 13,985 migrants had enrolled in 908 language classes throughout Australia and 6,927 students had enrolled to receive instruction through the correspondence lessons.

Field surveys are undertaken which embrace sociological research studies of migrant integration and furnish information on such questions as the habits and behaviour of migrants within the community, the practical difficulties they experience during the process of integration, their ability to understand and accept their obligations and responsibilities as members of the Australian community, and the attitude of the native-born to the migrant.

Qualified social workers are employed in each State Branch of the Department of Immigration and provide a social welfare counselling and referral service. Welfare Officers are also employed in several Branches as part of this service. Accommodation Advisory Officers are available to provide information to migrants in Melbourne and Sydney.

The Good Neighbour Movement operates as a voluntary organisation throughout Australia to assist in the integration of migrants. Membership of the movement is made up of hundreds of community organisations whose activities are co-ordinated by State Councils. The Commonwealth Government assists each Council financially through grants to cover administrative expenses.

Citizenship Conventions. The principal occasion for community and Government to meet together and discuss the major issues involved in the successful integration of the migrant population is provided by the Citizenship Conventions convened in Canberra from time to time by the Commonwealth Government. Delegates from a wide range of community organisations and from Commonwealth and State Governments participate. The subjects discussed relate not only to the integration of migrants but also to the concept of Australian citizenship and the role of immigration in Australia's development.

Population of External Territories

Ordinances of the individual External Territories under the control of Australia provide for a census of the population to be taken on the day prescribed for the taking of a census in the Commonwealth of Australia. The following table shows the population of the Territories of Christmas Island, Cocos (Keeling) Islands, Norfolk Island, Papua, the Trust Territory of New Guinea and the Trust Territory of Nauru at the censuses of 30 June 1961 and 30 June 1966.

On 31 January 1968 Nauru became an independent State (*see* page 23, also the chapter The Territories of Australia).

POPULATION: EXTERNAL TERRITORIES, 30 JUNE 1961 AND 1966

Territory	Census 30 June 1961			Census 30 June 1966		
	Males	Females	Persons	Males	Females	Persons
Christmas Island .	1,963	1,136	3,099	2,154	1,232	3,386

<i>Total, New Guinea</i> .	<i>n.a.</i>	<i>n.a.</i>	<i>n.a.</i>	<i>821,898</i>	<i>756,756</i>	<i>1,578,654</i>
Trust Territory of Nauru(c) . .	3,019	1,594	4,613	3,701	2,354	6,055

(a) Not available. The indigenous population was estimated to be: Papua, 513,648; Trust Territory of New Guinea, 1,433,383. (b) The 1966 Census of Papua-New Guinea was the first to include the indigenous population, and was based upon a 10 per cent sample of rural villages in the two Territories. (c) Independent State, 31 January 1968.

Further particulars concerning the indigenous populations of the Territories are given in the chapter The Territories of Australia.

International statistics of population

In the following tables the population, density, rate of growth, natural increase and masculinity are shown in respect of all countries which had an estimated population of at least one million persons in 1966, plus Papua. The source of these figures is the 1966 *Demographic Yearbook*, which is prepared and published by the Statistical Office of the United Nations. The tables include figures varying in reliability and accuracy, there being considerable variation in the quality of demographic statistics as between countries, but this information has been shown to provide some form of guide as to the magnitude and trend of population movements in overseas countries.

Where the information available to the Statistical Office of the United Nations relates to only part of the population of a country, the population characteristic (e.g. rate of growth), or vital statistics rate (e.g. marriages), has been omitted from the tables, and this is indicated by a footnote. For fuller particulars of the differences in the quality of the statistics and their reliability and for other qualifications, reference should be made to the detailed explanations contained in the *Demographic Yearbook* of the Statistical Office of the United Nations (*see* particularly Technical Notes on Statistical Tables and footnotes to the tables).

Population, rate of growth and density: world, continents and regions

The following table shows for the world, continents, and regions, estimated population in 1930, 1940, 1950, 1958, 1960, and 1966. The annual rate of increase (per cent), together with the average annual increase, during the period 1960-1966, is also shown. Population figures have been adjusted for under enumeration and errors in estimation. In preparing these figures, the Population Branch of the United Nations revises, from time to time, the estimates for previous years as new data become available, for example, from a census. The figures are estimates only, and as such are subject to a substantial margin of error.

CHAPTER 8

VITAL STATISTICS

The tables in this chapter are confined to the principal characteristics of vital statistics for Australia and relate, in the main, to the year 1967 for marriages and 1966 for births, deaths, and infant deaths. Comparisons have been restricted, in general, to the individual years 1963 to 1967 and the five-year periods 1941-45 to 1961-65, while age data have been shown in five-year groups. Comparisons over longer periods, together with more detailed figures such as single age particulars and cross-classifications of various characteristics, will be found in the annual bulletins, *Demography* and *Causes of Death*. Current information is published in the *Monthly Review of Business Statistics*, the *Quarterly Summary of Australian Statistics*, and the *Australian Demographic Review* (a mimeographed series issued at intervals throughout the year on population and vital statistics).

Statistics of 1967 births, deaths and marriages include particulars of Aborigines. For earlier years registrations identified as those of full-blood Aborigines were excluded. Differences between the statistics now published and those formerly published which implied the exclusion of Aboriginal vital events cannot be taken as reliable statistics of births, deaths, or marriages among full-blood Aborigines, because in many areas no satisfactory administrative or other basis existed for distinguishing vital events among full-blood Aborigines from those among part-Aborigines or the rest of the population.

Vital statistics for the principal countries of the world are set out in International Vital Statistics at the end of this chapter.

Provisions for registration and compilation of statistics

In Australia vital statistics are compiled from information supplied for the registration of births, deaths, and marriages. Each State and Territory has an independent system of registration. Provisions for the civil registration of births, deaths, and marriages have been in force in Tasmania from 1839, in Western Australia from 1841, in South Australia from 1842, in Victoria from 1853, and in New South Wales and Queensland (then part of New South Wales) from 1856. Registration in the Territories is administered by the Commonwealth Government, registration having been taken over from South Australia in 1911 in respect of the Northern Territory and from New South Wales in 1930 in respect of the Australian Capital Territory. The authority responsible for the registration of births, deaths, and marriages occurring within his particular State or Territory is the Registrar-General (the Government Statist in Victoria) or the Principal Registrar.

Information concerning a birth is required to be supplied within 28 days in the Australian Capital Territory and the Northern Territory, 42 days in South Australia, and 60 days in other States. For the registration of a death the period allowed is 8 days in Tasmania, 10 days in South Australia, 14 days in Western Australia, Australian Capital Territory, and Northern Territory, 21 days in Victoria, and 30 days in New South Wales and Queensland.

The *Marriage Act* 1961 came into operation on 1 September 1963, placing the marriage laws of all States, the mainland Territories and Norfolk Island on a uniform basis. Provision is made for the celebration of marriage by ministers of religion registered with the Registrar of Ministers of Religion appointed in each State and Territory by the Attorney-General, and by certain civil officers. In all cases the authorised celebrant is required to register particulars of the parties married with the appropriate registering authority in each State or Territory. The celebrant is requested to register a marriage as soon as practicable and in any case not later than fourteen days after the marriage.

Information is required in all States and Territories concerning what have been commonly known as 'still-births'. These are excluded from all the tables of births and deaths in this chapter and are included only in the special tables of still-births shown on page 195. The statistics of still-births shown relate to those, in several States, of at least seven months gestation or, in other States and the two Territories, the approximate equivalent of twenty-eight weeks. The statistics relate to periods up to the end of 1966. Compulsory registration was introduced in Western Australia in 1908, the Australian Capital Territory in 1930, New South Wales in 1935, South Australia in 1937, the Northern Territory in 1949, Victoria in 1953, and Queensland in 1959.

Legislation has been adopted in most States and in the Territories for the completion of a medical certificate of cause of perinatal death for children not born alive (equivalent terms—foetal death, still-birth) and children dying within the first twenty-eight complete days of life. The purpose of this new certificate of cause of death is to make available additional information on the causes of such mortality, and it has originated from the endeavours of the medical profession and health authorities to seek further reduction of the loss of life at or around birth.

The medical certificate of cause of perinatal death came into use in Western Australia, the Australian Capital Territory, and the Northern Territory in 1963, in Tasmania and Queensland in 1967, and in South Australia in 1968. No date has yet been proclaimed for the operation of the New South Wales amending Act of 1967.

The period of gestation was 'at least twenty weeks' (or if not known, alternatively a weight of at least four hundred grammes) in the Australian Capital Territory and the Northern Territory from September 1963, in Tasmania from 15 March 1967, in Queensland from 1 October 1967, and in South Australia and Western Australia from 1 January 1968. The New South Wales legislation (yet to be proclaimed) also provides for the same criteria.

The data for the compilation of vital statistics are obtained from registry records and dispatched, through the Statistical Office in each State and Territory, to the Commonwealth Statistician. The compilation and publication of vital statistics for Australia is one of the functions of the Commonwealth Statistician. The Deputy Commonwealth Statisticians compile and publish statistics relating to their respective States.

Marriages

Numbers of marriages and crude marriage rates

The numbers of marriages registered in each State and Territory in five-year periods from 1941–45 to 1961–65, and for each of the years 1963 to 1967, and crude marriage rates for the same periods are shown in the following tables. Annual averages for each five-year period from 1861 to 1950 were published in Year Book No. 39, page 575. The graph opposite shows the number of marriages in each year from 1870 to 1967. From the beginning of 1967 marriages of Aborigines are included. Before 1967 marriages between full-blood Aborigines were excluded. The marriage rates (number per thousand of mean population) for 1966 including marriages between Aborigines are shown in footnote (c) to the table of rates on page 178.

1966(b) .	8.40	8.41	8.01	8.29	8.36	7.93	8.3	7.7	8.31
1967(c) .	8.60	8.55	8.01	8.49	8.47	8.53	5.5	8.5	8.46

(a) Number of marriages per 1,000 of mean population. (b) Recalculated from population figures revised in accordance with results of the census of 30 June 1966. (c) Number of marriages (including marriages of Aborigines) per 1,000 of mean population (including Aborigines). For 1966 the corresponding marriage rates (i.e. including marriages of Aborigines) are: New South Wales, 8.39; Victoria, 8.41; Queensland, 7.97; South Australia, 8.27; Western Australia, 8.25; Tasmania, 7.93; Northern Territory, 5.5; Australian Capital Territory, 7.7; Australia, 8.28.

NOTE. In some instances rates are based on too few marriages to warrant calculation to the second decimal place.

The crude marriage rates for Australia and the more populous countries of the world are shown for the latest available year in International Vital Statistics at the end of this chapter.

Marriage rates based on marriageable population

As the marriage rates in some international tabulations are based on the unmarried population aged 15 years and over, the corresponding rates have been calculated for Australia for the ten census periods to 1965-67. The period in each case comprises the census year with the year immediately preceding and the year immediately following, and the figures are as follows.

**PERSONS MARRYING, PER 1,000 OF UNMARRIED
POPULATION(a): AUSTRALIA
1880-82 TO 1965-67**

<i>Period</i>	<i>Rate(b)</i>	<i>Period</i>	<i>Rate(b)</i>
1880-82 . . .	48.63	1932-34 . . .	42.88
1890-92 . . .	44.04	1946-48 . . .	71.24
1900-02 . . .	42.14	1953-55 . . .	65.32
1910-12 . . .	50.12	1960-62 . . .	62.27
1920-22 . . .	55.97	1965-67 . . .	68.34

(a) Excludes full-blood Aborigines. (b) Average annual number of persons who married per 1,000 unmarried persons, including widowed and divorced, aged 15 years and over.

Age and marital status at marriage

Particulars of age at marriage in age groups, and previous marital status, of bridegrooms and brides in 1967 are given hereunder. There were 14,991 males under 21 years of age married during 1967, while the corresponding number of females was 43,145. At the other extreme there were 1,096 bridegrooms and 585 brides in the age group 65 years and over.

**AGE AND MARITAL STATUS OF BRIDEGROOMS AND BRIDES
AUSTRALIA, 1967(a)**

(a) Includes Aborigines.

The average age at marriage of brides and bridegrooms has declined during recent years. The average ages, in years, of brides for each of the five years to 1967 were: 1963, 24.42; 1964, 24.31; 1965, 24.09; 1966, 24.02; and 1967, 24.03. The average ages, in years, of bridegrooms were: 1963, 27.76; 1964, 27.58; 1965, 27.24; 1966, 27.10; and 1967, 27.01. The difference in the average age at marriage between brides and bridegrooms is generally about three years, the difference in 1967 being 2.98 years.

Previous marital status

The following table shows the relative marital status of bridegrooms and brides in 1967.

MARITAL STATUS OF BRIDEGROOMS AND BRIDES
AUSTRALIA, 1967(a)

Marital status of bridegrooms	Total bride- grooms	Marital status of brides

(a) Includes Aborigines.

Occupation of bridegrooms

The distribution of the 100,000 bridegrooms for 1967 among classes of occupations was as follows: craftsmen, 32,313; administrative and clerical workers, 14,298; labourers, 10,822; rural and mining workers, 8,618; professional and technical workers, 10,869; workers in transport and communication, 6,749; service, sport, and other workers, 8,174; sales workers, 6,164; persons not in the work force, 1,993.

Celebration of marriages

Under the provisions of the *Marriage Act* 1961–1966 marriages may be celebrated either by ministers of religion who are registered for that purpose with the Registrar of Ministers of Religion in each State or Territory, or by certain civil officers, in most cases district registrars. Most of the marriages are celebrated by ministers of religion. The registered ministers in 1967 belonged to more than fifty different denominations, some of which, however, have only very few adherents. The categories 'Ministers of Other recognised denominations' and 'Other ministers' combine ministers of some of these denominations. The figures for 1967 are shown in the following table.

MARRIAGES IN EACH DENOMINATION: STATES AND TERRITORIES, 1967(a)

Divorce

The number of dissolutions of marriage, nullities of marriage and judicial separations was 9,921 in 1966 and 9,746 in 1967. Further information may be found in the chapter Public Justice.

Fertility and reproduction

Natural increase has been a significant element of increase in the population of Australia for many years. The level of natural increase depends on the excess of births over deaths, and the relation between fertility and mortality determines the rate of reproduction or replacement of the population.

Number of live births and confinements

There are various methods of measuring the fertility of the population by relating the number of births to the numbers of the population. In each the basic data are, of course, the numbers of live births. The number of live births registered in Australia during 1966 is shown in the following table. The table shows also the number of confinements resulting in one or more live births. The figures exclude cases where the births were of still-born children only.

LIVE BIRTHS AND CONFINEMENTS: STATES AND TERRITORIES, 1966(a)

(a) Excludes full-blood Aborigines.

NOTE. Owing to the registration procedure adopted in some States, it is possible that in some cases where one child only of a multiple pregnancy was live-born, the confinement has been treated as a single birth. However, the numbers of multiple births are not significantly affected. See also page 190.

The average annual number of live births in each State and Territory for each five-year period from 1941 to 1965 and the total number of live births for each year from 1963 to 1967 are given in the following table. Corresponding figures for each five-year period from 1861 to 1950 were published in Year Book No. 39, page 583.

From the beginning of 1967 births of Aborigines are included. Before 1967 births of full-blood Aborigines were excluded. The birth rates (number per 1,000 of mean population) for 1966 including Aborigines are shown in footnote (c) to the table of rates on page 184.

A graph on page 177 shows the number of births in each year from 1870 to 1967.

RATES OF BIRTHS, DEATHS AND NATURAL INCREASE: AUSTRALIA

1870 TO 1967

Crude birth rates

The oldest and most popular method of measuring fertility is to relate the number of births to the total population, thus obtaining the crude birth rate. The crude birth rate measures the rate per thousand persons (irrespective of age or sex) at which the population has added to its numbers by way of births during a given period. Other methods of measuring fertility are shown on pages 185, 187-8. Crude birth rates for each five-year period from 1941 to 1965 and for each year from 1963 to 1967 are set out below for each State and Territory.

CRUDE BIRTH RATES(a): STATES AND TERRITORIES, 1941 TO 1967

<i>Period</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>	<i>Aust.</i>

Annual rates—									
1963(b)	20.77	21.59	22.90	21.20	22.23	23.66	28.4	27.2	21.61
1964(b)	19.61	20.93	21.84	20.16	20.93	22.64	27.6	24.3	20.60
1965(b)	18.71	20.08	20.54	19.63	19.85	20.48	25.8	24.4	19.65
1966(b)	18.35	19.87	19.74	18.62	20.31	19.92	25.9	24.0	19.27
1967(c)	18.30	19.98	20.37	18.34	20.55	20.04	32.3	23.1	19.40

(a) Number of births per 1,000 of mean population. (b) Recalculated from population figures revised in accordance with results of the census of 30 June 1966. (c) Number of births (including births of Aborigines) per 1,000 of mean population (including Aborigines). For 1966 the corresponding birth rates (i.e., including births of Aborigines) are: New South Wales, 18.34; Victoria, 19.87; Queensland, 19.65; South Australia, 18.60; Western Australia, 20.26; Tasmania 19.91; Northern Territory, 31.2; Australian Capital Territory, 24.0; Australia, 19.28.

NOTE. In some instances rates are based on too few births to warrant calculation to the second decimal place.

The birth rates in the table above are based on *live births registered in the respective States and Territories*. Some confinements, however, take place in States other than the State in which the mother usually resides, particularly in areas near State borders. The variations thus caused in the birth rates for the States and Territories by *referring the birth registrations to the mother's usual residence* are shown by the following corrected rates for 1966—New South Wales, 18.38; Victoria, 19.86; Queensland, 19.69; South Australia, 18.57; Western Australia, 20.32; Tasmania, 19.93; Northern Territory, 27.1; and Australian Capital Territory, 24.2. See Year Book No. 47 (p. 339) for the effect of the variations in the availability of hospital facilities on the birth rate in the Australian Capital Territory and in the neighbouring town of Queanbeyan in New South Wales.

A graph showing the birth rate for each year from 1870 to 1967 will be found on page 183. The crude birth rates of Australia and the more populous countries of the world for the latest available year are shown in International Vital Statistics at the end of this chapter.

Fertility rates

The principal demographic factors affecting the level of crude birth rates are the proportion of women of child-bearing age in the population and the proportion of such women who are married. These factors may vary considerably at different periods and for different countries, and a population with a high proportion of married women of child-bearing age will have a higher crude birth rate than one with a low proportion, although the fertilities of the two populations may be identical. In order to compare fertilities births are sometimes related to the number of women of child-bearing age or, alternatively, nuptial births are related to the number of married women of child-bearing age. Thus births are related to potential mothers, giving the fertility rate.

The following table sets out for certain periods, commencing with 1880-82, the number of births per thousand of mean population, the number of births per thousand women of child-bearing age and the number of nuptial births per thousand married women of child-bearing age. For purposes of this table the child-bearing age has been taken to be fifteen to forty-four years inclusive, but births to mothers who were stated to be under fifteen or over forty-four years have been included in the compilations.

CRUDE BIRTH RATES AND FERTILITY RATES: AUSTRALIA, 1880-82 TO 1960-62(a)

Period	Average annual rates			Index Nos (Base: 1880-82 = 100)		
	Fertility rates			Fertility rates		
	Crude birth rate(b)	Births per 1,000 women aged 15-44 years	Nuptial births per 1,000 married women aged 15-44 years	Crude birth rate(b)	Births per 1,000 women aged 15-44 years	Nuptial births per 1,000 married women aged 15-44 years
1880-82 . . .	35.3	170	321	100	100	100
1890-92 . . .	34.5	159	332	98	94	103
1900-02 . . .	27.2	117	235	77	69	73
1910-12 . . .	27.2	117	236	77	69	74
1920-22 . . .	25.0	107	197	71	63	61
1932-34 . . .	16.7	71	131	47	42	41

1953-55 . . .	22.7	109	149	64	64	46
1960-62 . . .	22.5	112	154	64	66	48

(a) Excludes full-blood Aborigines. (b) Number of births per 1,000 of mean population.

The table above shows how increasing proportions both of women of child-bearing age and of married women of child-bearing age inflate the crude birth rate. Thus, while the nuptial birth rate for married women increased by only 22 per cent over the period 1932-34 to 1946-48, the crude birth rate rose by 41 per cent owing principally to the greatly increased number of marriages during that period.

Age-specific birth rates

So long as customary ages at marriage do not change drastically the main demographic factor affecting the number of births is the age composition of the potential mothers in the population. Within the child-bearing group the fertility of women of different ages varies considerably, and a clearer view of the fertility of the population can be obtained from an examination of what are known as its age-specific birth rates, that is the number of births to women of specified ages per thousand women of those particular ages.

Age-specific birth rates are more commonly expressed in age groups than in single ages. In the following table such rates are shown in five-year age groups for Australia for the period 1941 to 1966. A graph on the following page shows the age-specific birth rates for each year during the period 1921 to 1966.

AGE-SPECIFIC BIRTH RATES(a): AUSTRALIA, 1941 TO 1966(b)

Age group (years)	1941	1946	1951	1956	1961	1964	1965	1966
15-19 . . .	24.27	26.13	38.62	42.99	47.35	46.95	47.52	48.89
20-24 . . .	121.02	151.07	177.23	210.87	225.81	190.51	179.31	173.07
25-29 . . .	143.46	183.18	185.32	203.04	221.21	198.11	188.54	183.88
30-34 . . .	104.94	131.72	123.10	123.52	131.11	119.12	110.10	105.12
35-39 . . .	57.82	78.29	65.03	64.20	63.38	58.38	53.00	50.62
40-44 . . .	19.61	24.57	21.02	19.74	19.17	16.53	15.03	14.16
45-49 . . .	1.67	2.10	1.61	1.58	1.41	1.16	1.11	1.04

(a) Number of births per 1,000 women in each age group. (b) Excludes full-blood Aborigines.

Gross and net reproduction rates for females

A single measure of reproduction, known as the gross reproduction rate, is obtained by adding together the specific fertility rates for each age in the child-bearing group. This measure indicates the number of female children who would be born on an average to women living right through the child-bearing period, if the conditions on which the rate is based continue. The rate is unaffected by the age composition of the potential mothers, and consequently it shows more clearly than the crude birth rate the reproductive propensity of the population. It is, however, an imperfect measure

BIRTH RATES BY AGE OF MOTHER: AUSTRALIA, 1921 TO 1966

(NUMBER OF BIRTHS PER 1,000 OF FEMALE POPULATION IN EACH AGE GROUP)

of reproduction because it does not take into account the females who fail to live from birth to the end of the reproductive period. A more accurate measure of this nature is obtained by multiplying the specific fertility rates by the number of females in the corresponding age group of the stationary or life table population and summing the products. Allowance is thus made for the effect of mortality and the result is known as the net reproduction rate. The net reproduction rate indicates the average number of female children who would be born to women during their lifetime if they were subject at each age to the fertility and mortality rates on which the calculation is based. A constant net reproduction rate of unity indicates that the population will ultimately become stationary. If it continues greater than unity, the population will ultimately increase; if less than unity, it will ultimately decrease. The following table should be read in the light of the comment which follows it and of the index of marriage fertility, page 188.

GROSS AND NET REPRODUCTION RATES(a): AUSTRALIA, 1881 TO 1966

Year	Gross reproduction rate	Net reproduction rate	Year	Gross reproduction rate	Net reproduction rate
1881(b)	2.65	(c) 1.88	1951	1.485	(h) 1.409
1891(b)	2.30	(c) 1.73	1954	1.558	(i) 1.497
1901(b)	1.74	(d) 1.39	1961	1.728	(j) 1.672
1911	1.705	(e) 1.421	1962	1.666	(j) 1.609
1921	1.511	(f) 1.313	1963	1.625	(j) 1.572
1931	1.141	(g) 1.039	1964	1.529	(j) 1.480
1941	1.154	(g) 1.053	1965	1.447	(j) 1.400
1947	1.493	(h) 1.416	1966	1.400	(j) 1.355

(a) Excludes full-blood Aborigines. (b) Approximate only. (c) 1881-1890 mortality experience used. (d) 1891-1900 mortality experience used. (e) 1901-1910 mortality experience used. (f) 1920-1922 mortality experience used. (g) 1932-1934 mortality experience used. (h) 1946-1948 mortality experience used. (i) 1953-1955 mortality experience used. (j) 1960-1962 mortality experience used.

It is not strictly correct to assume, as in the calculations of the rates above, that a particular age-specific fertility rate can be applied to a hypothetical group of women reaching that age, without taking into account previous fertility and marriage experience. Reproduction rates are therefore unreliable when birth and marriage rates have been changing. The indexes of marriage fertility shown on the next page are also of doubtful reliability in similar circumstances.

In the following table a comparison is given of the gross and net reproduction rates recorded for various countries in the period 1954 to 1966. These represent the latest available international comparisons. The registration of vital events has not been fully established in many countries and consequently details for the calculation of reproduction rates are not available. In order that the table should be as representative as possible some countries have been included even though the gross reproduction rate is the only figure available.

GROSS AND NET REPRODUCTION RATES: VARIOUS COUNTRIES

Country	Period	Reproduction rate		Country	Period	Reproduction rate	
		Gross	Net			Gross	Net
Venezuela	1963	3.04	..	Norway	1963	1.42	1.38
Mauritius	1964	2.94	2.54	France	1964	1.42	1.37
Malaya	1960	2.9	..	Australia(a)	1966	1.40	1.36
Ceylon	1961	2.5	..	England and Wales	1963	1.39	1.34
Thailand	1954	2.26	1.70	Belgium	1963	1.30	1.25
Chile	1964	2.16	1.83	Yugoslavia	1963	1.29	1.06
Ireland, Republic of	1963	1.90	1.74	Czechoslovakia	1963	1.22	1.18
New Zealand	1964	1.83	1.77	Germany—			
Canada	1964	1.72	1.66	Federal Rep.	1963	1.22	1.17
United States of America	1963	1.62	1.56	Democratic Rep.	1960	1.16	1.06
Netherlands	1964	1.55	1.50	Sweden	1964	1.21	1.18
Portugal	1960	1.52	1.33	Switzerland	1962	1.20	1.16
Scotland	1964	1.49	1.44	Japan	1963	0.96	0.92
				Hungary	1964	0.87	0.81

(a) Excludes full-blood Aborigines.

In comparing the reproduction rates of the countries shown allowance should be made for any differences in years, as the rates for any one country from year to year are affected by variations in the incidence of marriage, as well as the stationary or life table population used.

Fertility of marriages

More satisfactory estimates of the fertility of marriages may be made by relating nuptial births in each year to the marriages from which they could have resulted. Births to women of a certain number of years duration of marriage are related to the number of marriages taking place that number of years previously. The table below sets out this index of current fertility per marriage in respect of births in the individual years shown.

FERTILITY OF MARRIAGES: AUSTRALIA, 1955 TO 1966

<i>Year</i>	<i>Nuptial births per marriage</i>	<i>Year</i>	<i>Nuptial births per marriage</i>	<i>Year</i>	<i>Nuptial births per marriage</i>
1955 . . .	2.54	1959 . . .	2.73	1963 . . .	2.72
1956 . . .	2.58	1960 . . .	2.76	1964 . . .	2.58
1957 . . .	2.69	1961 . . .	2.84	1965 . . .	2.42
1958 . . .	2.69	1962 . . .	2.78	1966 . . .	2.32

See text following first table on page 187.

The figure for a particular year gives the estimated number of children which a marriage would produce according to the fertility conditions of that year. The figures published in recent years present a somewhat inflated index, as many of the births used to calculate the index related to marriages of immigrants which took place overseas and consequently were not included in Australian marriage records. A revised series of indexes from which such births have been eliminated has been calculated from the year 1955 and is shown in the table above. The index has also now been expressed in terms of nuptial births and not nuptial confinements as formerly, while at the same time weights used for the calculation of fertility during the first two years of marriage have been revised. The net effect of these adjustments has been to reduce the index of current marriage fertility, as calculated on the original basis, by percentages varying from 6 in 1955 to 8 in 1966.

As formerly, some understatement is present in the index owing to the non-inclusion of births which occur overseas to Australian marriages. Furthermore the results do not take account of the previous reproductive history of a marriage or of age at marriage.

Masculinity of live births

The masculinity of live births, i.e. the number of males born for every 100 female births, has remained fairly stable for Australia at about 105. But when the number of births for which masculinity is being calculated is small (for example, totals for smaller States) considerable variation is shown. The averages for the ten years 1951-60 were as follows: New South Wales, 105.38; Victoria, 105.50; Queensland, 105.80; South Australia, 104.89; Western Australia, 105.25; Tasmania, 104.96; Northern Territory, 107.16; Australian Capital Territory, 108.77; Australia, 105.43. The following table shows the figures for Australia for each ten-year period from 1901 to 1960 and for each of the years 1965 to 1967.

MASCULINITY(a) OF LIVE BIRTHS REGISTERED: AUSTRALIA, 1901 TO 1967

	1901-10	1911-20	1921-30	1931-40	1941-50	1951-60	1965	1966	1967(b)
Total births . . .	105.22	105.27	105.55	105.12	105.38	105.43	105.61	105.95	105.43
Ex-nuptial births . . .	104.08	105.25	105.16	105.36	105.34	103.99	107.47	103.91	106.16

(a) Number of males born for every 100 female births.

(b) Includes Aborigines.

Ex-nuptial live births

The variations in the proportions of ex-nuptial live births as between the individual States and Territories for 1966 and for Australia at intervals from 1901 to 1966 are shown in the following table.

EX-NUPTIAL LIVE BIRTHS
NUMBER AND PROPORTION, STATES AND TERRITORIES, 1966(a)

	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>	<i>Aust.</i>
Number .	6,024	3,578	3,227	1,372	1,607	524	135	74	16,541
Proportion of total births % .	7.75	5.59	9.83	6.75	9.45	7.08	13.89	3.19	7.43

(a) Excludes full-blood Aborigines.

EX-NUPTIAL LIVE BIRTHS: NUMBER AND PROPORTION
AUSTRALIA, 1901 TO 1966(a)

	<i>Annual average</i>						1962	1963	1964	1965	1966
	1901-10	1911-20	1921-30	1931-40	1941-50	1951-60					
Number .	6,498	6,836	6,238	5,133	6,780	9,013	12,813	13,454	14,925	15,531	16,541
Proportion of total births % .	6.05	5.22	4.66	4.40	4.13	4.25	5.40	5.71	6.51	6.97	7.43

(a) Excludes full-blood Aborigines.

A further measure of ex-nuptiality is obtained by calculating the number of ex-nuptial births per thousand of the single, widowed and divorced female population aged from 15 to 44 years. On this basis, the number of ex-nuptial births per 1,000 unmarried women of ages 15 to 44 is as follows: 1880-82, 14.49; 1890-92, 15.93; 1900-02, 13.30; 1910-12, 12.53; 1920-22, 10.50; 1932-34, 6.91; 1946-48, 11.45; 1953-55, 14.45; and 1960-62, 18.49. Ex-nuptial births to married women, which are not recorded separately, are included in these figures and it is not possible to determine to what extent they influence the trend shown. The following table shows the relative ratios of ex-nuptial and nuptial births to the total population for periods from 1901.

CRUDE EX-NUPTIAL, NUPTIAL, AND TOTAL BIRTH RATES(a)
AUSTRALIA, 1901 TO 1966(b)

<i>Birth rate</i>	<i>Annual average</i>						1964	1965	1966
	1901-10	1911-20	1921-30	1931-40	1941-50	1951-60			
Ex-nuptial .	1.60	1.39	1.04	0.76	0.90	0.97	1.34	1.37	1.43
Nuptial .	24.91	25.18	21.40	16.47	20.99	21.75	19.26	18.28	17.84
Total .	26.51	26.57	22.44	17.23	21.89	22.72	20.60	19.65	19.27

(a) Number of births per 1,000 of mean population. (b) Excludes full-blood Aborigines.

Legitimations

Under the provisions of the Commonwealth *Marriage Act* 1961-1966, which came into operation on 1 September 1963, a child whose parents were not married to each other at the time of its birth becomes legitimised on the subsequent marriage of its parents. The legitimisation takes place whether or not there was a legal impediment to the marriage of the parents at the time of the child's birth and

whether or not the child was still living at the time of the marriage, or in the case of a child born before 1 September 1963, at that date. Prior to the introduction of this Act, legitimations took place under Acts passed in the several States to legitimise children born before the marriage of their parents, provided that no legal impediment to the marriage existed at the time of birth. On registration in accordance with the provisions of the Legitimation Acts, any child who came within the scope of their purposes, born before or after the passing, thereof, was deemed to be legitimate from birth by the post-natal union of its parents, and entitled to the status of offspring born in wedlock. The number of children legitimised in Australia during 1966 was 2,927.

Multiple births

Because the current Australian birth statistics are based only on those confinements which resulted in a live-born child, the number of confinements for multiple births for Australia is understated—firstly, because in cases where all children of a multiple birth are still-born the confinement is excluded, and secondly, because some cases of multiple births in which only one child was live-born are registered as single births.

Multiple births recorded on this basis during 1966 comprised 2,310 cases of twins, 19 cases of triplets and one case of quadruplets, the resultant numbers of live-born and still-born children being respectively 4,553 and 67 for twins, 55 and 2 for triplets and 4 live-born children for quadruplets. This represents an average of 10.48 recorded cases of twins and 0.09 recorded cases of triplets per 1,000 confinements or, alternatively, mothers of twins represented 1 in every 95 mothers and mothers of triplets 1 in every 11,597. Total cases of multiple births represented 10.57 per 1,000 confinements or 1 in every 95 mothers. The proportion of mothers of multiple births to total mothers does not vary greatly from year to year.

Confinements—ages of parents

The relative ages of the parents of children whose births were registered in 1966 have been tabulated separately for male and female births, multiple births being distinguished from single births. For confinements and for multiple births, the relative ages of parents are shown in *Demography*, Bulletin No. 84. In the following table the relative ages of parents are shown in five-year groups.

CONFINEMENTS, BY RELATIVE AGES OF PARENTS: AUSTRALIA, 1966(a)

Age of father (years) and type of birth		Total	Age of mother (years)							45 and over	Not stated

(a) Excludes full-blood Aborigines.

Confinements—occupations of fathers

In the 203,961 cases where nuptial confinements resulted in one or more live births, the classes of occupations of the fathers were distributed as follows: craftsmen, 66,938; rural and mining workers, 24,546; administrative and clerical workers, 27,039; labourers, 21,966; workers in transport and communication, 17,683; professional and technical workers, 20,197; sales workers, 12,613; service, sport and other workers, 12,308; persons not in the work force, 671.

Confinements—age, duration of marriage and issue of mothers

The total number of nuptial confinements resulting in live births in 1966 was 203,961, comprising 201,793 single births, 2,148 cases of twins, 19 cases of triplets and one case of quadruplets. The following tables relating to previous issue exclude the issue of former marriages and still-born children. On the other hand, they include in some States children by the same father who were born to the mother prior to the marriage. Children born at the present confinement are included in the total issue shown.

The following table shows that in 1966 the duration of marriage of mothers of nuptial children ranged from less than one year to over 25 years and that the average family increased fairly regularly with the duration of marriage. The average issue of married mothers who bore children in 1966 was 2.42, compared with 2.48 in 1965, 2.56 in 1964, 2.60 in 1963 and 2.61 in 1962.

**NUPTIAL CONFINEMENTS, BY DURATION OF MARRIAGE AND ISSUE OF MOTHERS
AUSTRALIA, 1966(a)**

Total married mothers	18,379	66,770	63,258	33,029	17,285	4,915 (c)	325	203,961

(a) Excludes full-blood Aborigines.

(b) Includes 1, age not stated.

(c) Includes 2, age not stated.

Multiple births—previous issue of mothers

Of married mothers of twins in 1966, 624 had no previous issue either living or dead, 542 had one child previously, 432 had two previous issue, 257 three, 134 four, 67 five, 39 six, 22 seven, 11 eight, 7 nine, 9 ten, 2 eleven, 1 twelve, and 1 thirteen. Of the 20 cases of nuptial triplets and one case of quadruplets registered during 1966, 3 mothers had no previous issue, 4 had one, 5 had two, 3 had three, 2 had four, 2 had six, and 1 had eight previous issue.

Nuptial first births

The following table shows the interval between marriage and first birth for periods since 1911. In cases of multiple births, the first live-born child only is enumerated.

NUPTIAL FIRST BIRTHS, BY DURATION OF MARRIAGE: AUSTRALIA, 1911 TO 1966(a)

	Annual average						
Duration of marriage	1911-20	1921-30	1931-40	1941-50	1951-60	1965	1966

1966	73,462	130,499	203,961	36.02

(a) Excludes full-blood Aborigines.

Still-births

Interstate comparisons of the figures and rates in the following tables are affected by the differences in the definitions of still-births adopted by the various States, and only the trends in the rates for the States should be compared. For various reasons, the registration of still-births is not as complete as for live births and deaths; particulars for the Territories and the smaller States are more affected by this than are those for the larger States. Still-birth registration was not compulsory in Tasmania until 1967. The figures shown in the tables represent those still-births voluntarily registered during the year.

STILL-BIRTHS: STATES AND TERRITORIES, 1936 TO 1966(a)

Period	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Annual average—

1956-60 . . .	15.5	13.5	16.1	13.5	13.7	12.6	8.6	14.3	14.59
1961-65 . . .	13.1	12.0	13.1	12.2	11.4	10.2	18.4	9.3	12.49
Annual rate—									
1962 . . .	12.7	11.6	14.4	12.8	11.8	11.3	(f)	10.9	12.52
1963 . . .	13.6	11.9	13.1	12.1	10.2	7.3	33.7	(f)	12.48
1964 . . .	12.3	11.7	11.4	11.9	10.1	8.3	(f)	(f)	11.62
1965 . . .	12.0	11.6	11.5	12.1	11.1	11.7	(f)	10.5	11.75
1966 . . .	12.25	11.76	11.94	11.53	9.78	14.78	(f)	13.2	11.90

(a) Numbers of still-births per 1,000 of all births (live and still). (b) Excludes full-blood Aborigines. (c) Three years 1938-40. (d) Figures for Queensland are not available for 1941. (e) Excludes Northern Territory. (f) Less than twenty events; rates not calculated.

NOTE. Because of the smallness of the numbers of still-births occurring in the Australian Capital Territory and the Northern Territory the rates for these Territories (i.e. the number per thousand live births and still-births) are subject to considerable fluctuation.

Mortality

Number of deaths

The following tables show the number of deaths, male and female, registered in each State and Territory during 1967. Still-births, although registered as both births and deaths in some States, are excluded from the death statistics published herein.

From the beginning of 1967 deaths of Aborigines are included. Prior to 1967 deaths of full-blood Aborigines were excluded. Death rates (number per 1,000 of mean population) for 1966 including deaths of Aborigines are shown in footnote (d) to the table of rates shown on the following page.

DEATHS, SEXES: STATES AND TERRITORIES, 1967(a)

Sex	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Males . . .	21,947	15,659	8,580	5,031	3,956	1,789	312	234	57,508
Females . . .	17,666	12,714	6,156	4,040	2,823	1,439	215	142	45,195

1967(b)	39,613	28,373	14,736	9,071	6,779	3,228	527	376	102,703

(a) Excludes deaths of defence personnel and of internees and prisoners of war from overseas for the period September 1939 to June 1947. (b) Includes Aborigines.

A graph on page 177 shows the number of deaths in each year from 1870 to 1967.

Crude death rates

The commonest method of measuring the mortality rate is to relate the number of deaths for a given period to the mean population for that period, thus obtaining the crude death rate. This rate for a given period measures the number per thousand of population by which the population is depleted through deaths during that period.

CRUDE DEATH RATES(a): STATES AND TERRITORIES, 1941 TO 1967

<i>Period</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>	<i>Aust.</i>
Average annual rate—									
1941-45(b)	9.73	10.63	9.24	10.26	9.86	10.21	6.4	5.0	9.96

1956-60	9.20	8.91	8.36	8.62	7.90	7.97	5.32	4.31	8.78
1961-65(c)	9.27	8.73	8.63	8.28	7.78	8.15	4.95	3.94	8.75
Annual rate—									
1963(c)	9.20	8.85	8.46	8.14	7.68	7.82	5.3	4.3	8.70
1964(c)	9.61	8.87	9.07	8.61	8.06	8.71	5.0	4.5	9.04
1965(c)	9.33	8.86	8.64	8.26	7.70	8.27	4.6	4.0	8.79
1966(c)	9.57	8.90	8.93	8.54	8.09	8.50	4.1	4.6	8.99
1967(d)—									
Males	10.15	9.53	9.94	9.01	8.85	9.42	9.5	4.4	9.66
Females	8.23	7.78	7.33	7.30	6.56	7.71	8.0	2.8	7.70
Persons	9.19	8.66	8.65	8.16	7.73	8.57	8.9	3.6	8.69

(a) Number of deaths per 1,000 of mean population. (b) Excludes deaths of defence personnel, etc., from September 1939 to June 1947. (c) Recalculated from population figures revised in accordance with the results of the census of 30 June 1966. (d) Number of deaths (including deaths of Aborigines) per 1,000 of mean population (including Aborigines). For 1966 corresponding rates (i.e. including deaths of Aborigines) for persons are: New South Wales, 9.57; Victoria, 8.90; Queensland, 8.90; South Australia, 8.54; Western Australia, 8.13; Tasmania, 8.50; Northern Territory, 9.5; Australian Capital Territory, 4.6; Australia, 9.01.

NOTE. Crude death rates (i.e. the number of deaths per thousand of mean population) are affected by the particular age and sex composition of the population. In the Australian Capital Territory and the Northern Territory the population at risk in the higher ages is lower proportionately than in other States, largely as a result of the rapid increases of the population in the lower ages. In some instances rates are based on too few deaths to warrant calculation to the second decimal place.

A graph showing the crude death rate for each year from 1870 to 1967 will be found on page 183.

Standardised death rates

The death rates quoted on page 196 are crude rates, i.e. they simply show the number of deaths per thousand of mean population without taking into consideration differences in the sex and age composition of the population. Other conditions being equal, however, the crude death rate of a community will be low if it contains a large proportion of young people (not infants), and conversely it will be relatively high if the population includes a large proportion of elderly people. The foregoing table of crude death rates, therefore, does not indicate comparative incidence of mortality either as between States in the same year or in any one State over a period of years. In order to obtain a comparison of mortality rates on a uniform basis as far as sex and age constitution are concerned, 'standardised' death rates may be computed. This is done by selecting a particular distribution of age and sex as a standard, and then calculating what would have been the general death rate if the death rates for each sex and in each age group had been as recorded, but the age and sex distribution had been the same as in the standard population. For the standardised rates which follow, the standard population compiled by the International Institute of Statistics has been used. This standard is based upon the age distribution according to sex of nineteen European countries at their censuses nearest to the year 1900. An examination of the age distribution of deaths and the resultant age-specific death rates is made on pages 201-2.

Comparison of crude and standardised death rates

The relative incidence of mortality as between individual States and as between the years 1921, 1933, 1947, 1954, 1961, and 1966 is illustrated in the following statement of crude and 'standardised' death rates. These years have been chosen for comparison because the census data give essential information as to sexes and ages of the State populations. Crude death rates are shown to indicate the degree to which they disguise the true position.

CRUDE AND STANDARDISED DEATH RATES: STATES, 1921 TO 1966

	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>Aust.</i>
Crude death rate(a)—							
1921 . . .	9.50	10.52	9.37	10.02	10.42	10.30	9.91
1933 . . .	8.58	9.59	8.84	8.44	8.64	9.60	8.92
1947 . . .	9.53	10.44	9.15	9.61	9.39	9.17	9.69
1954 . . .	9.46	9.20	8.63	9.01	8.38	8.67	9.10
1961 . . .	8.95	8.37	8.41	8.06	7.77	7.89	8.47
1966 . . .	9.57	8.90	8.93	8.54	8.09	8.50	8.99
Standardised death rate(b)—							
1921 . . .	10.35	10.79	10.24	10.38	11.88	10.83	10.58
1933 . . .	8.52	8.74	9.10	7.66	8.74	8.86	8.62
1947 . . .	7.44	7.31	7.47	6.77	7.28	7.21	7.34
1954 . . .	7.24	6.63	6.80	6.52	6.71	7.02	6.90
1961 . . .	6.56	6.12	6.26	5.90	6.02	6.19	6.27
1966 . . .	6.84	6.42	6.34	6.18	6.25	6.47	6.53

(a) Total deaths per 1,000 of mean population. Excludes full-blood Aborigines.

(b) See explanation of standardised death rates above.

The comparisons above relate to individual years in which a census of population was taken and should not be used as the basis for general conclusions as to changes in incidence of mortality for other than those years.

True death rates

The main objections to standardised death rates are that the choice of a standard population is arbitrary and that the standardised rates have little value except for comparative purposes, and even then variation of the standard population may make appreciable differences. However, a correct measurement of the mortality of the population can be obtained from life tables. A life table represents the number of survivors at each age from a group of newly-born children who are subject to

given mortality conditions, and from such a table the complete expectation of life at birth can be calculated. The reciprocal of this figure is known as the true death rate, since, if the complete expectation of life of a person at birth is fifty years, say, then each person will on the average die fifty years after birth, so that in a stationary population one person in fifty or twenty per thousand, will die each year. The true death rate for a given period is unaffected by the particular age distribution of that period and is determined solely by the mortality experience of the period as manifested in the rate of survival from each year of age to the next. The table below sets out complete expectation of life at birth and true death rates for the periods covered by Australian life tables.

COMPLETE EXPECTATION OF LIFE AT BIRTH, AND TRUE DEATH RATES: AUSTRALIA, 1881-90 TO 1966(a)

Period	Complete expectation of life at birth (years)		True death rate	
	Males	Females	Males(b)	Females(c)
1881-90 . . .	47.20	50.84	21.19	19.67
1891-1900 . . .	51.06	54.76	19.58	18.26
1901-10 . . .	55.20	58.84	18.12	17.00
1920-22 . . .	59.15	63.31	16.91	15.80
1932-34 . . .	63.48	67.14	15.75	14.89
1946-48 . . .	66.07	70.63	15.14	14.16
1953-55 . . .	67.14	72.75	14.89	13.75
1960-62 . . .	67.92	74.18	14.72	13.48
1964(d) . . .	67.40	73.81	14.84	13.55
1965(d) . . .	67.69	74.19	14.77	13.48
1966(d) . . .	67.58	74.01	14.80	13.51

(a) Excludes full-blood Aborigines. (b) Number of deaths per 1,000 males in stationary population. (c) Number of deaths per 1,000 females in stationary population. (d) Based on abridged life tables calculated by the Commonwealth Statistician. These tables are based on estimates of population by age, adjusted to take into account the 1966 census.

The crude death rates and the true death rates of Australia and the more populous countries of the world for the latest available year are shown in the table in International Vital Statistics at the end of this chapter.

Australian Life Tables

Life Tables prior to 1961. It has been the practice at each census from 1911 onwards to prepare Life Tables representative of the mortality experience of Australia. The mortality of the Australian population for the thirty years from 1881 to 1910 inclusive was investigated in 1911 by the Commonwealth Statistician. Tables were compiled for each State and for Australia as a whole in respect of each sex for each of the decennial periods 1881-90, 1891-1900 and 1901-10. These compilations furnished a comprehensive view of Australian mortality in respect of sex, time, and geographical distribution, and practically superseded all Life Tables prepared in Australia prior to 1911. In addition, mortality tables based on the experience for the whole of Australia for the ten years 1901-10 were prepared and published. At the census of 1921 Life Tables were prepared by the Commonwealth Statistician from the recorded census population and the deaths in the three years 1920 to 1922. In 1933, 1947 and 1954, Life Tables based on the census population and the deaths in the years 1932 to 1934, 1946 to 1948 and 1953 to 1955 respectively were compiled by the Commonwealth Actuary.

Life Tables of census of 1961. On the occasion of the 1961 Census the eighth Life Tables in the series were compiled by the Commonwealth Actuary. These were based on the population recorded at the census, adjusted to allow for variation in the net movement into Australia over the years 1960 to 1962, and deaths during these years. Full particulars of the data used, the method of construction and the tabulation of these Life Tables will be found in the report of the Commonwealth Actuary, which was published by the Commonwealth Statistician in 1966. This report will also appear in Volume VIII of the detailed tables of the 1961 census. The main features of the tables, including comparisons with earlier Australian tables, are set out in the following summary tables.

AUSTRALIAN COMPARATIVE LIFE TABLES
RATES OF MORTALITY (q_x) AT REPRESENTATIVE AGES

80	4.96	5.36	5.47	5.57	5.73	6.02	6.30	6.68

l_x = number surviving at specified ages out of 100,000 births. e_x = complete expectation of life at specified ages.

As indicated in the foregoing tables, the progress towards lower mortality rates for both males and females has continued over the past sixty years or more. For example, the probability of a child born in 1961 dying in one year is less than one-quarter of the probability of death in one year attached to the child who was born sixty years ago. Even at advanced ages, the reductions which have occurred in mortality rates as compared with sixty years ago are very substantial. With the exception of males of ages forty to forty-seven and ages sixty-two to sixty-six lower mortality rates were experienced by males and females during 1960 to 1962 than for the period 1953 to 1955.

There is evidence that female longevity continues to improve at a faster rate than male longevity. It would seem that the risks associated with child-bearing for females are far out-weighted by the greater accident propensity of younger males and the more rapid deterioration of health, presumably due to business and other pressures, of older males.

An improvement has occurred in male mortality from accidents of all types, although there is some indication that for females the accident rates have deteriorated slightly. The rates for females are, nevertheless, still substantially below the corresponding rates for males.

Age distribution at death

Age at death is recorded for statistical purposes in days for the first week of life, in weeks for the first four weeks, in months for the first year and in completed years of life thereafter. These ages are usually combined in groups for publication, the most common being weeks for the first four weeks, months or groups of months for the first year, single years of age for the first five years, and thereafter the five-year group 5-9 years, 10-14 years, etc. A summary in this form for the year 1966 is given for Australia in the following table.

DEATHS, BY AGE AT DEATH AND SEX: AUSTRALIA, 1966(a)

Age at death	Males	Fe- males	Per- sons	Age at death	Males	Fe- males	Per- sons
Under 1 week	1,513	1,105	2,618	5-9 years	277	204	481
1 week and under 2 weeks	92	73	165	10-14 "	256	137	393
2 weeks and under 3 weeks	46	31	77	15-19 "	733	286	1,019
3 weeks and under 4 weeks	35	32	67	20-24 "	731	268	999
Total under 4 weeks	1,686	1,241	2,927	25-29 "	544	250	794
4 weeks and under 3 months	215	147	362	30-34 "	572	341	913
3 months and under 6 months	220	174	394	35-39 "	991	599	1,590

Total under 5 years	2,847	2,045	4,892	70-74 "	7,775	6,198	13,973
				75-79 "	8,100	7,510	15,610
				80-84 "	5,829	7,046	12,875
				85 years and over	4,469	7,536	12,005
				Age not stated	15	3	18
				Total all ages	57,795	46,134	103,929

(a) Excludes full-blood Aborigines.

There are different mortality rates at various stages of life, and the actual number of deaths in any period is related to the numbers living at the respective stages. Changes in the number of deaths from one period to another are associated with changes in the rate of mortality in the various age groups and by the changed proportions of persons living in the different groups. The combined effect of various influences, i.e. the steady decline in the rate of mortality, the long term decline in the birth-rate, and the effects of past and present migration on the age distribution of the population, is shown in the following table, which shows the proportion of deaths in various age groups in ten-year periods from 1901 to 1960 and for the year 1966.

PROPORTION OF DEATHS IN EACH AGE GROUP: AUSTRALIA, 1901 TO 1966(a)
(Per cent)

Age at death (years)							1966		
	1901-10	1911-20	1921-30	1931-40	1941-50	1951-60	Males	Females	Persons

Total	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00

(a) Excludes full-blood Aborigines.

A table showing these proportions for males and females separately for the period 1901 to 1950 was published in Year Book No. 39, page 614.

Age-specific death rates

In previous issues of the Year Book, average annual age-specific death rates were given for each State and Australia for the periods 1932-1934, 1946-1948, 1953-1955, and 1960-1962 (see Year Books, No. 37, pp. 778-9, No. 39, pp. 615-6, No. 44, pp. 640-1, and No. 52, p. 253). These rates were based on the age distribution of the population at the relevant censuses.

Intercensal estimates of the age distribution of the population are available for Australia and for the larger States. The following table shows age-specific death rates, i.e. the average number of deaths per 1,000 of population in each age group, for Australia for the year 1966, for males and females.

AGE-SPECIFIC DEATH RATES(a): AUSTRALIA, 1966(b)

Age group (years)	Males	Females	Age group (years)	Males	Females
Under 1(c)	20.3	15.9	45-49	6.0	3.8
1-4	1.1	0.7	50-54	10.4	6.0

15-19	1.4	0.6	65-69	44.1	22.7
20-24	1.7	0.6	70-74	67.7	38.3
25-29	1.4	0.7	75-79	102.5	64.5
30-34	1.6	1.0	80-84	151.8	110.6
35-39	2.5	1.6	85 and over	250.5	204.3
40-44	3.8	2.2			

(a) Average number of deaths per 1,000 of mid-year population in each age group as recorded at the Census of 30 June 1966 and adjusted for mis-statement of age. (b) Excludes full-blood Aborigines. (c) Infant deaths per 1,000 live births registered.

Infant deaths and death rates—States and Territories

Compared with other countries, Australia occupies a favourable position in respect of infant mortality. In 1966 only a few countries recorded a lower rate than Australia. Rates for Australia and the more populous countries of the world for the latest available year are shown in the table International Vital Statistics, pages 217-18. The next table shows for each State and Territory for the period 1941 to 1967, the number of deaths under one year of age and the rates of infant mortality under one year.

INFANT MORTALITY UNDER ONE YEAR: STATES AND TERRITORIES, 1941 TO 1967

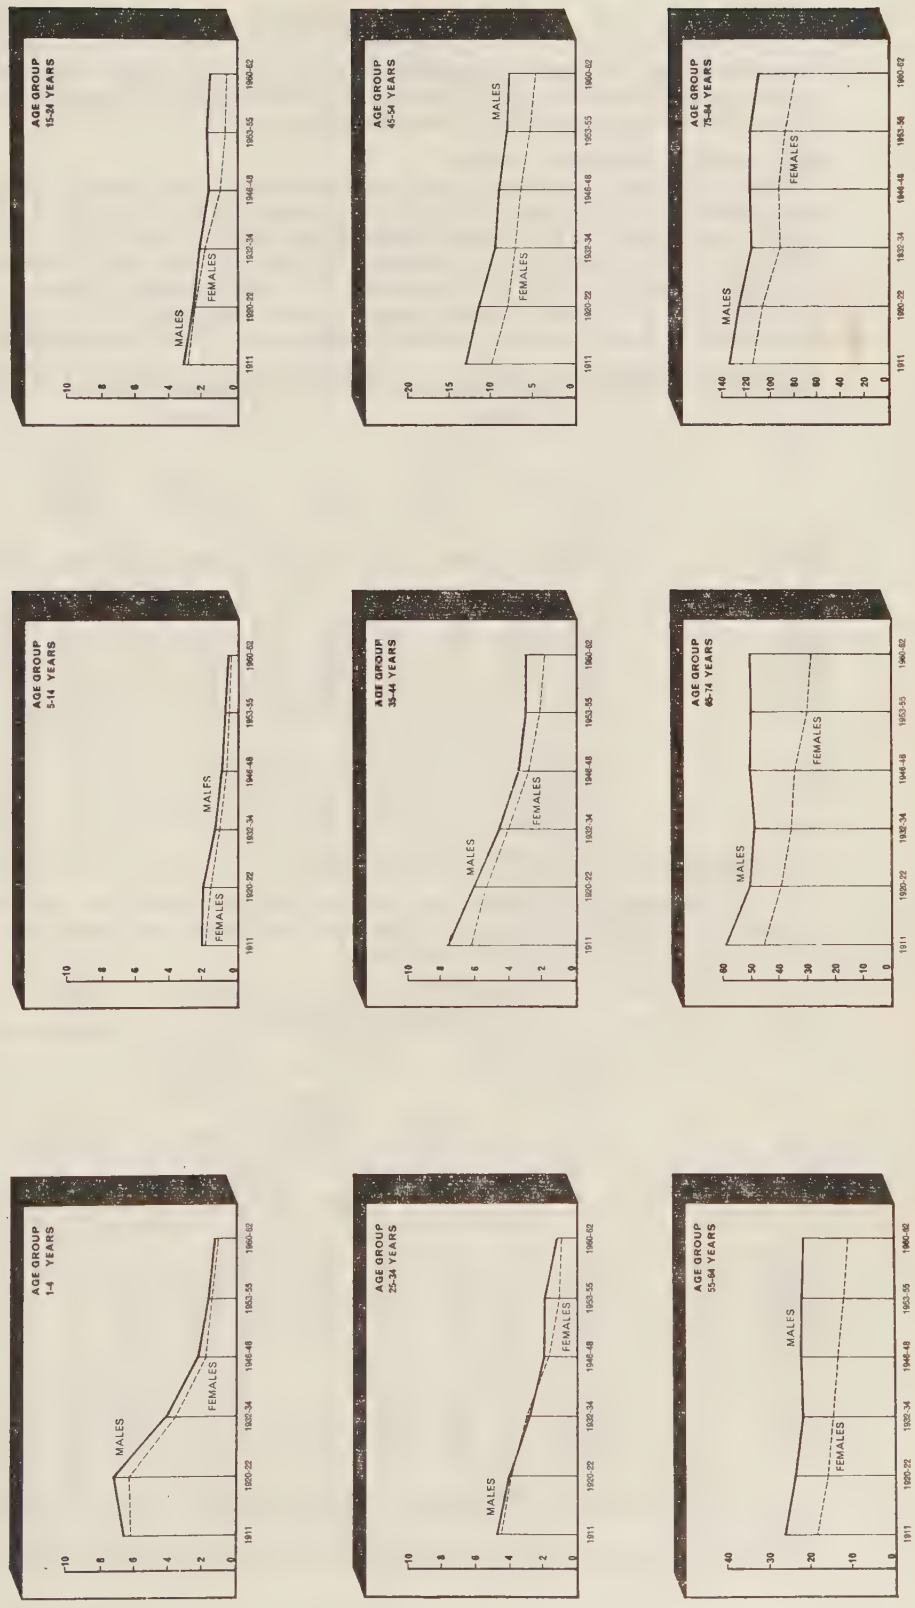

Period	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Annual average—

1966	19.2	17.4	17.7	17.5	19.3	14.6	(c)	19.8	18.17
1967(d)	18.4	16.8	19.5	17.0	17.4	17.2	63.5	18.3	18.26

(a) Includes Aborigines. (b) Number of deaths of children aged under one year per 1,000 live births registered. (c) Less than twenty events; rates not calculated. (d) Number of deaths (including deaths of Aborigines) per 1,000 of mean population (including Aborigines). For 1966 the corresponding rates (i.e. including deaths of Aborigines) are: New South Wales, 19.2; Victoria, 17.4; Queensland, 17.8; South Australia, 17.9; Western Australia, 19.9; Tasmania, 14.6; Northern Territory, 75.7; Australian Capital Territory, 19.8; Australia, 18.7.

AGE-SPECIFIC DEATH RATES

AUSTRALIA, 1911 TO 1960-62

NUMBER OF DEATHS PER 1,000 MALES OR FEMALES IN EACH AGE GROUP

Because of the smallness of the numbers of these deaths occurring in the Australian Capital Territory and the Northern Territory, the rates for these Territories (i.e. number of such deaths per thousand live births) are subject to considerable fluctuation.

Infant deaths and death rates—Australia

The fact that out of 590,304 male infants born from 1962 to 1966, 12,619 (21.38 per 1,000) died during the first year of life, while of 557,095 female infants only 9,357 (16.80 per 1,000) died during the first year, accords with the universal experience that during the first few years of life the higher death rate of male infants tends to counteract the excess of male births. Still-births, for which masculinity is also higher, are not included in any of the tables relating to deaths.

As shown by the following table, the disparity is greater during the first four weeks of life, termed the neonatal period, than during the remainder of the first year of life, or the post-neonatal period.

INFANT DEATHS AND MORTALITY RATES, BY SEX: AUSTRALIA, 1936 TO 1966(a)

(a) Excludes full-blood Aborigines.

(b) Number of deaths per 1,000 male or female live births registered.

From the following table, showing particulars of infant deaths in the first four weeks of life, or the neonatal period, it will be seen that for both males and females the risk of death is very much greater during the first day of life than subsequently.

INFANT DEATHS AND MORTALITY RATES—UNDER FOUR WEEKS, BY SEX

NOTE. FROM 1967 INCLUDES ABORIGINES

Causes of death—children under one year

Causes of death of children under one year of age should be considered in relation to age at death, because the emphasis on various causes changes rapidly as age at death varies. A summary for 1966 of deaths of children under one year of age, classified according to principal causes of death and age at death, is given in the following table.

DEATHS OF CHILDREN UNDER ONE YEAR OF AGE, BY CAUSE OF DEATH
AUSTRALIA, 1966(a)

Inter- national Classi- fication of Diseases number	Cause of death	Age at death											Total under one year
		Days		Total under one week	Weeks			Months

Causes of death

The classification of causes of death adopted for Australia by the Commonwealth Bureau of Census and Statistics at the inception of its mortality statistics in 1907 was that introduced by the International Institute of Statistics in 1893, reviewed by that Institute in 1899, and revised by an International Commission in 1900. This classification became known as the International List of Causes of Death, and further international revisions in 1909 (Second), 1920 (Third), 1929 (Fourth), 1938 (Fifth), 1948 (Sixth), and 1955 (Seventh), were successively adopted for use in Australian statistics.

The Sixth Revision of the International Statistical Classification of Diseases, Injuries and Causes of Death was used in Australia for deaths registered in 1950 to 1957. The Seventh Revision has been used for deaths registered in 1958 and subsequent years. The Sixth Revision, for the first time in connection with the International Classification, laid down rules for a uniform method of selecting the main cause to be tabulated if more than one cause is stated on the death certificate. These rules were maintained in the Seventh Revision, which was concerned mainly with certain essential changes and amendment of errors and inconsistencies in the previous classification. Prior to 1950 the rules adopted in Australia for the selection of the cause of death to be tabulated were those laid down in the United States Manual of Joint Causes of Death, first published in 1914 and revised to conform to successive revisions of the International Classification.

The adoption of the new method introduced with the Sixth Revision and maintained in the Seventh marked a fundamental change in Australian cause of death statistics, emphasis now being placed on the underlying cause of death as indicated by the certifying practitioner. This change in principle affects the comparability of the statistics for 1950 and subsequent years with those for earlier years. A complete detailed classification of causes of death for Australia for 1950 according to both the Fifth and Sixth Revisions was shown in *Demography*, Bulletin No. 68, 1950.

In order to facilitate the concise presentation of cause of death statistics, the present International Classification provides two special lists of causes for tabulation—the Intermediate List of 150 causes and the Abbreviated List of 50 causes. The latter has been used as the base of the cause of death tabulations for 1966 which follow. Some categories have been sub-divided to show additional particulars of interest in Australian statistics. Tables A and B show deaths of males and females, respectively, in age groups, and Table C shows the total numbers of males and females who died, the death rates per million of mean population, and the percentage of total deaths.

NOTE. Table excludes deaths of full-blood Aborigines.

Deaths from certain important causes

In the preceding tables, particulars have been given for each of the causes of death comprising the Abbreviated Classification according to the Seventh Revision of the International List. Certain important causes are treated in detail hereunder. The Abbreviated Classification numbers used in tables A to C (pages 208-11) are indicated in parentheses for each cause or group of causes.

All forms of tuberculosis (B1, B2). In comparing any of the figures for 1950 and subsequent years with those for 1949 and earlier years, consideration should be given to the effect of the change in basis from the Fifth to the Sixth Revision of the International List. This was discussed in Year Book No. 39, page 626. The following table shows the age groups of males and females who were classified as dying from tuberculosis in 1966, together with figures for 1931, 1941, 1951 and 1961.

**DEATHS FROM TUBERCULOSIS (ALL FORMS), BY AGE GROUP AND SEX
AUSTRALIA, 1931 TO 1966(a)**

Age group (years)	Males					Females				
	1931	1941	1951	1961	1966	1931	1941	1951	1961	1966
0-14	90	63	23	5	..	81	54	35	1	2
15-29	294	162	46	2	1	487	275	68	..	2
30-44	585	428	135	25	14	422	319	142	20	7
45-64	674	793	570	128	106	252	251	126	41	23
65 and over	193	279	306	175	143	89	110	86	50	23
Not stated	1
Total	1,836	1,725	1,080	335	264	1,331	1,009	458	112	57

(a) Excludes full-blood Aborigines.

The reduction in mortality from tuberculosis is shown by the decline in the crude death rate from tubercular diseases, which fell from 49 per 100,000 of mean population in 1931 to 18 in 1951, and to 3 in 1966. The reductions in the younger age groups are much greater, as can be seen from the table above. In making these comparisons, consideration of the effect of the change in basis from the Fifth to the Sixth Revision of the International List (*see above*) is particularly important.

Of the more developed countries, those with the lowest death rates from tuberculosis per 100,000 of population are: Netherlands, 1.9; Denmark, 2.4; Australia, 2.8; Canada, 3.5; Israel, 3.6; New Zealand, 3.7; and United States of America, 4.3. Rates for selected countries in each continent are:

Africa—South Africa (white population), 6.0; United Arab Republic, 14.7.

North America—Dominican Republic, 7.7; Mexico, 24.0; Guatemala, 29.1.

South America—Argentina, 19.9; Peru, 54.1; Brazil, 82.3.

Asia—Japan, 23.6; India, 82.7; Philippines, 81.7.

Europe—England and Wales, 5.3; Scotland, 7.2; Italy, 13.3; France, 15.6; Poland, 40.1.

Malignant neoplasms, including neoplasms of lymphatic and haematopoietic tissues (B18). Deaths classified under this heading according to the Sixth and Seventh Revisions of the International List (used in Australia for deaths registered since 1950) are not directly comparable in total with those on the Fifth Revision basis (*see Year Book No. 39, p. 628*).

A summary regarding seat of disease for 1966 is given on the next page.

**DEATHS FROM MALIGNANT NEOPLASMS AND NEOPLASMS OF LYMPHATIC AND
HAEMATOPOIETIC TISSUES, BY SEAT OF DISEASE AND SEX: AUSTRALIA, 1966(a)**

The ages of males and females who died from malignant neoplasms in 1966 are given below, together with figures for 1931, 1941, 1951, and 1961. The increase in the number of deaths from malignant neoplasms in the years since 1931 is due principally to the increase in the number of people in the higher age groups, at which ages the risks of cancer are much greater. While the total population increased by about 77 per cent between 1931 and 1966, the number of people aged 55 years and over increased by about 124 per cent. The increase in the number of deaths in the lower age groups from 1951 is due partly to the inclusion of neoplasms of lymphatic and haematopoietic tissues, and it is probable also that part of the increased number of deaths from cancer recorded in recent years has been due to improved diagnosis and certification on the part of the medical profession.

(a) Includes neoplasms of lymphatic and haematopoietic tissues. (b) Excludes full-blood Aborigines.

The death rates from malignant neoplasms have continued to rise over recent years. The rates are crude death rates representing the number of deaths from malignant neoplasms per 100,000 of mean population and do not take account of changes in the age constitution of the population, and to a substantial extent they reflect the increasing age of the population rather than the true change in mortality from malignant neoplasms (*see* previous paragraph). In 1931 the rate for Australia

was 101 (males, 105; females, 97); in 1941 it was 119 (males, 119; females, 120); and in 1951 it had risen to 126 (males, 130; females, 122). Figures for 1961 gave a rate of 130 (males, 139; females, 121), and for 1966 a rate of 136 (males, 149; females, 124).

Death rates from malignant neoplasms per 100,000 of mean population for Australia and for various other countries are as follows: Brazil, 94; Japan, 108; Israel, 112; Poland, 119; Canada, 133; South Africa (white population), 134; Australia, 136; United States of America, 151; Italy, 159; Netherlands, 183; France, 204; England and Wales, 223; Scotland, 229. The rates are for the latest available year in each case.

Diseases of the heart (B25 to B28). The number of deaths classified to diseases of the heart in 1966 was 39,102 (22,638 males and 16,464 females). This class is the largest among causes of death, the rate having increased from 112 per 100,000 of mean population in 1911-15 to 338 in 1966. The increase in the number of deaths recorded from heart diseases has been particularly pronounced during the past twenty years. The rapid increase in mortality is partly a reflection of the ageing of the population, but the figures have been influenced mainly by improved diagnosis and certification by medical practitioners.

The death rates from heart diseases per 100,000 of mean population for various years from 1931 were as follows: 1931, 159 (males, 178; females, 142); 1941, 269 (males, 306; females, 231); 1951, 314 (males, 367; females, 259); 1961, 304 (males, 356; females, 250); and 1966, 338 (males, 389; females, 287). Deaths from heart diseases in 1966 represented 38 per cent of the total deaths.

Puerperal causes (B40). It was shown in Year Book No. 39, page 634, that the changes introduced with the Sixth Revision of the International List did not significantly affect the comparability of the total number of deaths from puerperal causes. The Seventh Revision, introduced in 1958, did not affect comparability. The death rate from these causes has fallen rapidly during recent years and in 1966 the rate was 0.3 per 1,000 live births, compared with a rate of 6 per 1,000 in 1936. The 66 deaths in 1966 are equivalent to a death rate of 1.15 per 100,000 females. The death rate may be expressed in other terms by stating that for every 3,373 babies born alive in 1966 one woman died from puerperal causes. The death rate per 1,000 live births from puerperal causes in various countries for the latest available year is as follows: Denmark, Norway and Sweden, 0.2; Australia, Canada, France, Netherlands, New Zealand, United Kingdom and United States, 0.3; Finland, 0.4; Switzerland, 0.5; Italy, 0.8; Japan, 0.9.

Causes of infant mortality. See paragraphs devoted to causes of infant deaths on pages 206-7.

Accidents, poisonings and violence (BE47 to BE50). Deaths in this class are classified according to external cause and not according to nature of injury. The classification provides sub-groups for accidents, including adverse reactions to prophylactic inoculations, therapeutic misadventures and late effects of accidental injury; suicide; homicide and injuries purposely inflicted by other persons; and injury resulting from operations of war, including delayed effects.

The following table, showing the death rates in the main sub-groups per 100,000 of mean population, indicates that the death rate from violence is between two and three times as great for males as for females. The low level of the rates and proportions for the years 1941-45 is due largely to the exclusion of deaths of defence personnel from accidents, suicide and homicide, though the rates have been based on total mean population (including defence personnel). A further contributing factor is the decrease during this period in the number of automobile accidents. From July 1947 deaths of defence personnel from accidents, etc. have again been included.

ACCIDENTS, POISONINGS, AND VIOLENCE: DEATH RATES(a), BY SEX

(a) Number of deaths per 100,000 of mean population. (b) Excludes full-blood Aborigines. (c) Includes 'open verdict'. (d) Includes late effects of injuries due to operations of war.

In 1966 the total number of deaths from *accidental causes* (BE47, BE48) was 6,237 (4,270 males and 1,967 females). Over half of the accidental deaths were the result of transport accidents. Of these, the numbers attributable to the major causes, and the percentages of the total accidental deaths in each case, were as follows: Motor vehicle traffic accidents, 3,203 (51.35 per cent); motor vehicle non-traffic accidents, 63 (1.01 per cent); other road vehicle accidents, 38 (0.61 per cent); railway accidents, 92 (1.48 per cent); water transport accidents, 83 (1.33 per cent); aircraft accidents, 61 (0.98 per cent); a total of 3,540 (56.76 per cent). Other important causes were accidental falls, 1,011 (16.21 per cent); accidental drowning, 370 (5.93 per cent); and accidents caused by fire and explosion of combustible material, 210 (3.37 per cent).

Deaths from *suicide* (BE49) in 1966 numbered 1,624 (males, 1,017; females, 607). Poisoning, other than by gases, was used in 735 cases (45.26 per cent of total deaths by suicide). Other important modes adopted, together with the numbers and relevant percentages, were as follows: firearms and explosives, 340 (20.94 per cent); poisoning by gases, 230 (14.16 per cent); hanging or strangulation, 167 (10.28 per cent); submersion (drowning), 58 (3.57 per cent); other and unspecified modes, 94 (5.79 per cent). Of the 1,017 males who committed suicide, 311 (30.58 per cent) used firearms or explosives. For females the most common mode was poisoning (other than by gases). This was used in 407 cases (67.05 per cent). The following table shows the age of persons who committed suicide in 1966.

PERSONS WHO COMMITTED SUICIDE, BY AGE GROUP AND SEX
AUSTRALIA, 1966(a)

55-59	102	54	156				
				Total deaths	1,017	607	1,624

(a) Excludes full-blood Aborigines.

Of the 169 deaths recorded in 1966 from *homicide and operations of war* (BE50) there were 154 deaths from homicide and injury purposely inflicted by other persons (not in war), of which assault by firearms and explosives caused 63, assault by cutting and piercing instruments 19, and assault by other means 72. Deaths from injury resulting from the operations of war numbered 15, 14 of which were deaths from late effects of such injuries.

Age at death and average issue of deceased married males and females

Demography, Bulletin No. 84, contains a number of tables showing, in combination with the issue, the age at marriage, age at death and occupation of married (including widowed or divorced) persons who died in Australia in 1966. Deaths of married males in 1966 numbered 45,446, and those of married females, 37,836. The tables which follow deal, however, with only 44,781 males and 37,531 females, the information regarding issue in the remaining 970 cases being incomplete. The total number of children in the families of the 44,781 males was 127,752 and of the 37,531 females, 113,688. The average number of children is shown for various age groups in the following table.

Vital statistics of External Territories

The following table shows, for the year 1966, the number of marriages, births and deaths registered in the External Territories under the control of Australia. More detailed information will be found in a series of tables in *Demography*, Bulletin No. 84.

EXTERNAL TERRITORIES: VITAL STATISTICS, 1966

<i>Territory</i>	<i>Marriages</i>	<i>Births</i>	<i>Deaths</i>
Christmas Island(a)	1	59	5
Cocos (Keeling) Islands(a)	6	12	3
Norfolk Island(a)	4	17	17
Territory of Papua and New Guinea(b)	278	970	109
Trust Territory of Nauru(a)(c)	27	236	48

(a) Total population. (b) Non-indigenous population only. (c) Independent State from 31 January 1968.

International vital statistics

In the following table vital statistics rates for selected countries are shown. Crude marriage, birth, and death rates represent the number of 'events' reported for the year stated per 1,000 of the population. Infant mortality rates are the number of deaths which occurred under one year of age per 1,000 live births. The true death rates (reciprocals of the expectation of life at birth) have been computed from the life tables for the respective countries as published in the United Nations *Demographic Yearbook*, 1966 (see explanation of true death rates, pages 197-8).

In many instances the rates shown in the following table are estimates and the results of sample surveys only. Reference should be made to the detailed comments contained in the United Nations *Demographic Yearbook*, 1966 (see particularly Technical Notes on Statistical Tables and footnotes to the tables). The countries are arranged in the same order as in the table on pages 173-4 of the Population chapter.

(a) Crude marriage, birth and death rates, i.e. number of marriages, births and deaths per 1,000 of population. Infant mortality—number of deaths of children under one year of age per 1,000 live births. (b) Number of deaths per 1,000 males and 1,000 females respectively in stationary population (see explanation on pp. 197-8). (c) 1965. (d) African population only. (e) Estimated. (f) 1954. (g) 1950. (h) 1966. (i) 1964. (j) 1958. (k) 1951-61. (l) 1952. (m) Excludes live born infants dying before registration of birth. (n) Jewish population.

CHAPTER 9

HOUSING AND BUILDING

Pages 219–30 of this chapter give details of the *characteristics of dwellings as obtained from censuses*, pages 230–42 contain a *summary of building activities*, pages 242–52 outline *government activities in the field of housing*, and pages 252 on relate to *financial arrangements associated with the erection or purchase of homes*.

Further information on dwellings obtained from censuses is available in the detailed tables of the 1961 census and earlier censuses and in the mimeographed statements of the 1966 census (*see* the chapter Miscellaneous of this Year Book).

More detailed information on building activity is contained in the annual bulletin *Building and Construction* and the *Quarterly Bulletin of Building Statistics*, and current information is obtainable also in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, and the mimeographed statements *Building Statistics: Number of New Houses and Flats* (quarterly), and *Building Approvals* (monthly). Details for particular States are available from publications issued regularly by the Deputy Commonwealth Statisticians.

Commonwealth Government activities relate in the main to the provision of moneys to State Governments under Commonwealth-State Housing Agreements, to the assistance of ex-service personnel in the erection and purchase of homes, to assistance to young married couples under the Home Savings Grant Act, to the operation of the Housing Loans Insurance Corporation, and to the provision of homes in the Territories. Further details of activities of the Commonwealth and State Housing Authorities are shown in the reports issued by these authorities.

Census dwellings

At each census of the population, in addition to the questions relating to personal particulars, there have been a number of questions relating to dwellings. A 'dwelling' is defined as any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only part of a building, and includes, *in addition to houses and flats*, a great variety of dwellings ranging from a single-roomed shack to a multi-roomed hotel or institution. This section contains particulars of such information on dwellings as is yet available from the 1966 census, together with information from earlier censuses. All statistics in this section are exclusive of particulars of dwellings occupied solely by full-blood Aborigines.*

Number of dwellings

The following table shows the number of occupied and unoccupied dwellings in Australia at each census from 1911 to 1966. Occupied dwellings are classified into 'private' and 'other than private' dwellings (*see* page 221) for definitions of 'private' and 'other than private' dwellings). Unoccupied dwellings include dwellings whose occupants are temporarily absent, holiday homes, and other temporarily vacant dwellings (*see* page 230 for full explanation of the term 'unoccupied').

DWELLINGS: AUSTRALIA, CENSUSES, 1911 TO 1966

Census	Occupied			Un-occupied
	Private	Other than private	Total	
1911 . . .	894,389	29,070	923,459	33,473
1921 . . .	1,107,010	46,275	1,153,285	51,163

OCCUPIED DWELLINGS: AUSTRALIA

CENSUSES 1901 TO 1966

The following table shows the number of occupied and unoccupied dwellings in the urban and rural areas of Australia at the census of 30 June 1966. For definitions of 'urban' and 'rural' see this Year Book, page 123.

**DWELLINGS: URBAN AND RURAL, AUSTRALIA, CENSUS
30 JUNE 1966 p**

Division	Occupied				Unoccupied	
	Private	Other than private	Total		Number	Percentage of total
			Number	Percentage of total		
Urban—						
Metropolitan	1,885,998	14,285	1,900,283	59.65	86,828	32.91
Other	778,410	9,492	787,902	24.73	81,659	30.95
Rural	487,444	9,951	497,395	15.61	95,382	36.15
Total	3,151,852	33,728	3,185,580	100.00	263,869	100.00

The total numbers of occupied and unoccupied dwellings in each State and Territory at the censuses of 1961 and 1966 were as follows.

**DWELLINGS: STATES AND TERRITORIES, CENSUSES
1961 AND 1966 p**

State or Territory	Census 30 June 1961		Census 30 June 1966	
	Occupied	Un- occupied	Occupied	Un- occupied
New South Wales	1,061,609	72,432	1,189,471	101,545
Victoria	790,529	47,389	888,983	64,757
Queensland	398,233	33,969	449,168	41,818

Western Australia	194,317	13,705	224,659	17,962
Tasmania	91,258	8,582	99,365	10,800
Northern Territory	5,479	179	8,067	380
Australian Capital Territory	13,937	797	23,554	1,497
Australia	2,817,270	194,114	3,185,580	263,869

Class of dwelling (1961 and 1966)

The following table shows the numbers of the various classes of occupied dwellings in the metropolitan urban, other urban, and rural areas of Australia at the censuses of 1961 and 1966. The 1961 dwellings data in the following table have not been compiled for the separate divisions of State according to criteria adopted at the 1966 census (see page 123), and consequently accurate comparison between 1961 and 1966 figures for divisions of State cannot be made. The numbers of the various classes of dwelling for each State and Territory at the 1966 census are given in the table on page 222.

Private dwellings are classified into the following categories:

private house—includes houses, sheds, huts, garages, etc., used for dwelling purposes;

share of private house—portion of a shared private house which is occupied separately and for which portion a separate householder's schedule was received;

flat—part of a house or other building which can be completely closed off and which has its own cooking and bathing facilities;

other private dwelling—includes private dwellings such as rooms, apartments, etc., which are parts of buildings but are not self-contained units.

Other than private dwellings include hotels; motels; boarding houses, lodging houses and hostels; educational, religious and charitable institutions; hospitals; defence and penal establishments; police and fire stations; clubs; staff barracks and quarters, etc.

Total occupied dwellings	1,625,696	715,743	475,831	2,817,270	1,900,283	787,902	497,395	3,185,580	368,310

(a) See text on page 221 regarding comparability between censuses. (b) Represents 10,077 private houses in metropolitan areas, 1,803 in other urban areas, and 638 in rural areas. (c) At the 1961 Census, share of self-contained flat was not separately identified, and cases of more than one household group occupying a self-contained flat were treated as one household group occupying a self-contained flat. (d) Represents 464 self-contained flats in metropolitan areas, 95 in other urban areas, and 9 in rural areas. (e) Includes mental hospital.

The percentages of the various classes of occupied dwellings to the total for Australia at the 1966 census (1961 census in parentheses) are: private house, 84.18 (84.95); share of private house, 0.81 (2.82); self-contained flat, 10.89 (7.72); shed, hut, etc., 0.97 (1.49); other private dwellings, 2.09 (1.76); non-private dwellings, 1.06 (1.25).

Migratory(e)	23,369	0.26	..	25,286	0.24
Total population	8,986,530	100.00	..	10,508,186	100.00

(a) Includes shared private houses for which only one householder's schedule was received. (b) Portion of a shared private house which is occupied separately and for which portion a separate householder's schedule was received. (c) Before 1961 single self-contained dwellings attached to, or situated above, offices, shops, etc., were classified as private houses irrespective of the description stated in the householder's schedule. In 1961 such dwellings, if described as self-contained flats, were classified as flats. (d) Caretaker's quarters were included with private dwellings in 1961 and with other than private dwellings in 1954. (e) Shipping, railway, and air travellers.

Occupied private dwellings

The tables on pages 224-9 shows occupied private dwellings classified according to material of outer walls; number of rooms; number of inmates; nature of occupancy; date of building; facilities; and number of motor vehicles.

Material of outer walls (1961 and 1966)

**OCCUPIED PRIVATE DWELLINGS, BY MATERIAL OF OUTER WALLS: URBAN AND

(a) See text on page 221 for comparability between censuses. (b) At the 1961 census, dwellings with walls of brick veneer were not separately identified and for tabulation purposes were included with brick walled dwellings. (c) So described in individual census schedules. (d) In the small number of cases where material of outer walls was not stated a material was selected during processing of the 1966 census schedules. Selection was based upon the answer given for the geographically nearest dwelling of the same class as the dwelling for which material of outer walls was not stated. Minus sign (—) denotes decrease.

The percentages of occupied private dwellings of the various materials to the total for Australia at the 1966 census (1961 census in parentheses) are: brick and brick veneer, 38.99 (34.26); wood, 36.97 (41.43); fibro-cement, 17.08 (16.26); concrete, 2.80 (2.71); other and not stated, 4.15 (5.36).

(a) See text on page 221 regarding comparability between censuses.

At the 1961 census persons paying interest only on a mortgage on the dwelling were instructed to enter 'owner', but a person buying a house by regular payments including interest and principal was instructed to enter 'purchaser by instalment'. It is probable however, that some 'purchasers by instalment' described themselves on 1961 census schedules as 'owners' especially where they possessed the title to the property. However, the extent of such mis-statements has not been measured. At the 1966 census, as the two categories can be logically grouped, separate details for 'owners' and 'purchasers by instalment' were not collected.

The percentages of occupied private dwellings of the various types of occupancy to the total for Australia for the 1966 census (1961 census in parentheses) are: owner or purchaser by instalments, 70.81 (69.94); tenant of government authority, 5.13 (4.21); other tenant, 21.36 (23.21); other and not stated, 2.70 (2.65).

Date of building (1961)

The numbers of occupied private dwellings in Australia at the census of 30 June 1961, classified according to date of building, are shown next. This information was derived from replies of occupants of dwellings at 30 June 1961. For a number of reasons, the figures shown on the first line of the table do not agree with the number of dwellings by class recorded at the census of 30 June 1954, e.g. demolitions, conversion from one class of dwelling to another and errors of memory regarding date of building. Also, the figures are not precisely comparable with 1954 data because of changes in classification of dwellings adopted at the 1961 census.

NOTE. Dwellings for which electricity was not stated but which had television have been classified as having electricity and therefore included as such in this table.

Number of motor vehicles (1966)

At the 1966 census a question was asked regarding the number of motor vehicles parked or garaged at occupied private dwellings on census night. No information was collected on this topic at previous censuses.

OCCUPIED PRIVATE DWELLINGS, BY NUMBER OF MOTOR VEHICLES
URBAN AND RURAL, AUSTRALIA, CENSUS, 30 JUNE 1966 p

Number of vehicles per occupied private dwelling	Urban		Rural	Total
	Metropolitan	Other		
No vehicles	513,229	173,688	55,651	742,568
1 vehicle	947,699	429,216	231,408	1,608,323
2 vehicles	305,064	127,684	120,182	552,930
3 vehicles	51,161	22,807	46,532	120,500
4 or more vehicles	10,701	6,446	23,511	40,658
Not stated	58,144	18,569	10,160	86,873
Total occupied private dwellings	1,885,998	778,410	487,444	3,151,852
Total vehicles	1,757,434	781,910	717,838	3,257,182

Tenanted private dwellings—weekly rent (1954 and 1961)

Information tabulated from census results concerning rents has been restricted to the actual rent paid per week by tenants for unfurnished private dwellings. Particulars of rents shown in the following table are therefore on an *unfurnished* basis. Dwelling shown as rent 'Not stated' include those whose rents were shown on householders' schedules on a *furnished* basis, and those whose rents were not applicable (e.g. for shop and dwelling combined). In this section information on 'tenanted private dwellings' *excludes particulars of dwellings occupied by 'Tenants (Governmental Housing)' in each State*, i.e. those householders who at the 1954 Census furnished answers in response to the instruction on the census householder's schedule 'Tenant paying rent to a Government Authority to write 'Tenant (G)'' and those householders who at the 1961 Census furnished answers in response to the instruction on the census householder's schedule 'Tenant paying rent to the Governmental Housing Authority in their State to write 'Tenant (G)'. For the Australian Capital Territory and the Northern Territory particulars of all tenanted private dwellings are included.

(a) These figures exclude dwellings occupied by 'Tenants (Governmental housing)' except those in the Northern Territory and the Australian Capital Territory. (b) Includes houses, sheds, huts, etc., and shared private houses for which only one householder's schedule was received. (c) Portion of a shared private house which is occupied separately and for which portion a separate householder's schedule was received. (d) See footnote (c) to first table on page 224. (e) Includes tenanted dwellings which were rent-free, those rented on a furnished basis, and those for which the rents were not applicable (e.g. for shop and dwelling combined).

Unoccupied dwellings (1966)

The following tables classify unoccupied dwellings according to the reasons given by census collectors for the dwellings being unoccupied at the census date. Unoccupied dwellings include vacant dwellings available for sale or renting; dwellings such as 'week-ender', 'holiday home', 'second home', 'seasonal workers' quarters', which were not occupied on the night of the census; dwellings normally occupied, but whose usual occupants were temporarily absent on the night of the census; newly completed dwellings whose owners or tenants had not entered into occupation on the night of the census; dwellings described as 'to be demolished', 'condemned', 'deceased estate', 'exhibition home', etc. The total number of unoccupied dwellings shown for any area must not, therefore, be read as representing the number of vacant houses and flats available for sale or renting.

**UNOCCUPIED DWELLINGS, BY REASON FOR BEING UNOCCUPIED: URBAN AND RURAL,
AUSTRALIA, CENSUS, 30 JUNE 1966**

<i>Reason for being unoccupied</i>	<i>Urban</i>		<i>Rural p</i>	<i>Total</i>
	<i>Metropolitan</i>	<i>Other</i>		
For sale or for renting	28,329	14,318	7,807	50,454
Holiday home, week-ender, seasonal workers' quarters	4,065	29,907	40,355	74,327
Temporarily unoccupied	28,464	17,964	13,995	60,423
To be demolished, or condemned	1,671	1,192	1,939	4,802
Other and not stated	24,299	18,278	31,286	73,863
Total	86,828	81,659	95,382	263,869

The percentages of the various groups of unoccupied dwellings at the 1966 census are: for sale or renting, 19.12; holiday home, etc., 28.17; temporarily unoccupied, 22.90; to be demolished, etc., 1.82; other, etc., 27.99.

Building**Statistics of building approved**

Statistics of building approvals have been compiled since the year 1953-54 from (a) permits issued by local government authorities in the areas subject to building control by these authorities, and (b) contracts let or work commenced and day labour projects authorised by governmental authorities. *They relate only to approvals for buildings as distinct from the construction of roads, railways, bridges, earthworks, water storage, etc.* Values shown represent the estimated cost when completed (excluding cost of land) of new buildings and alterations and additions to existing buildings. Before 1 July 1966 additions of \$10,000 and over were included with new buildings in all States except New South Wales, where they were included in 'alterations and additions'. From 1 July 1966 alterations and or additions of \$10,000 and over are included with new buildings in all States.

Statistics of building commenced, completed and under construction

These relate to building by private contractors, government authorities and owner-builders. The following outlines the scope of the statistics: (a) *only the erection of new buildings as distinct from the construction of roads, railways, bridges, earthworks, water storages, etc., is covered*; (b) before 1 July 1966 major new additions to existing buildings in all States and major alterations in New South Wales were included with new buildings, while from 1 July 1966 alterations and or additions of \$10,000 and over are included with new buildings in all States; (c) minor additions, alterations, renovations and repairs are excluded because of the difficulty of obtaining details of this work; (d) temporary dwellings, sheds, huts, etc., are excluded; (e) figures for houses exclude flats and dwellings attached to other new buildings (the value of dwellings attached to other new buildings is included with the value of buildings to which they are attached); figures for flats include 'home units'; (f) imported prefabricated houses are included; (g) details obtained from government authorities and building contractors refer to all areas, whereas details for owner-builders cover only areas subject to building control by local government authorities.

The following definitions of terms used in this section are necessary for interpretation of the data presented.

Private or government ownership. A building is classified as 'private' or 'government' according to ownership at date of commencement. Thus 'government' includes buildings erected for Commonwealth and State Governments, semi-governmental and local government authorities, either by contractor or by day-labour, whether these buildings are for their own use or for rental or sale after completion. Houses erected for *particular persons* under government-sponsored home building schemes or with government financial assistance are classified as 'private'.

Owner-built. An 'owner-built' house is one actually erected or being erected by the owner or under the owner's direction without the services of a contractor who is responsible for the whole job.

Contract-built. Includes the operations of all building contractors and government authorities which undertake the erection of new buildings.

Commenced. A building is regarded as having been commenced when work on foundations has begun. Owing to the difficulty of defining the exact point that this represents in building operations, classifications made by informants may not be entirely uniform.

Completed. A building is regarded as having been completed when the contractor has fulfilled the terms of the contract. As with commencements, the classifications made may not be entirely uniform.

Under construction. A building is regarded as being under construction if it has been commenced but not completed, whether or not work on the building is actively proceeding.

Values. All values shown exclude the value of land and represent the estimated value of buildings on completion.

Values of work done. The values of work done during the period represent the estimated value of work actually carried out on buildings during the period. For any building the sum of these values obtained during its construction equals the value of the building on completion. Data relating to the value of work done on owner-built houses are not collected. However, the figures shown for the value of work done include a component relating to owner-built houses calculated on the basis of the figures collected for the value of owner-built houses commenced, completed and under construction.

Type of building. Classification is according to the function a building is intended to serve. A building which is ancillary to other buildings or forms part of a group of related buildings is classified according to the function of the group as a whole.

Persons working. Figures relate to persons working on the jobs of contractors who undertake the erection of new buildings and of government authorities which erect new buildings on their own account. They include persons working on alterations, additions, repairs and maintenance when these jobs are undertaken by such contractors and authorities. Contractors are asked to give details of all persons working on their jobs *on a specified day*, including working principals, men working as or for sub-contractors and men temporarily laid off on account of weather. Because of the intermittent employment of various types of sub-contractors on any particular job, it is sometimes difficult for contractors and authorities to provide precise particulars of the number of sub-contractors and the number of employees of sub-contractors working on their jobs on the specified day. This factor may cause some estimation by persons completing returns and some degree of understatement in figures shown in tables. On the other hand, because of frequent movement between jobs of some

types of tradesmen (such as electricians) who may work on several jobs on the one day, a small element of duplication may occur. The figures *exclude* persons working on owner-built houses, and employees of builders who undertake only alterations, additions, repairs and maintenance.

New houses approved, commenced, completed and under construction

The next table provides a summary for 1966-67 of the number of new houses approved, commenced, completed and under construction in each State and Territory. For a graph showing the number of new houses commenced, completed and under construction for the period 1957-58 to 1966-67 see plate 33, page 235.

New flats approved, commenced, completed and under construction

The figures in the foregoing tables do not include particulars of new flats, and in the following tables on pages 236-7 (*a*) the figures are additional to the numbers of houses shown in other tables, (*b*) each flat is counted as a separate unit, and the numbers shown therefore relate to individual flats, (*c*) new flats only are included, i.e. conversions of old buildings into flats are omitted, and (*d*) 'home units' are included as flats. The summary following shows the number of new flats approved, commenced, completed and under construction for the year 1966-67. For a graph showing the number of new flats commenced, completed and under construction for the period 1957-58 to 1966-67 *see* plate 34, page 238.

Government activities in the housing field

Housing Agreements between Commonwealth and State Governments

Under the Commonwealth-State Housing Agreements the Commonwealth Government makes substantial long-term loans to the States for the provision of housing.

The 1945 Agreement. In November 1945 the Commonwealth Government entered into an Agreement with the Governments of the States whereby the Commonwealth Government would provide finance for, and the State Governments would undertake the building of, housing projects. Between 1945-46 and 1955-56, under this Agreement, the Commonwealth Government advanced to the States a total of \$479,118,000.

Initially, dwellings constructed under the 1945 Agreement were only sold to tenants if the tenant was able to arrange payment of the full purchase price to the State immediately on sale. Subsequent amendments to the Agreement progressively eased conditions of sale. For information on the conditions of sale, etc., under the 1945 Agreement see Year Book No. 48, page 367.

The 1956 Agreement. In 1956 the Commonwealth and the States entered into a new Agreement under which added emphasis was placed on the construction of dwellings for private ownership. The Agreement provided that parts of the loans advanced to each State were to be advanced to building societies and other approved institutions for lending to private home builders and purchasers. The balance of the amounts advanced to each State was used by the States for the erection of dwellings for either rental or sale. The Commonwealth was entitled to specify that up to five per cent of the moneys allocated for the erection of dwellings by the State be set aside for the erection of dwellings for serving members of the defence forces. For features of the 1956 Commonwealth and State Housing Agreement see Year Book No. 48, pages 367-8.

The 1961 Agreement. The period during which Commonwealth advances to the States could be made under the 1956 Agreement terminated on 30 June 1961. A new Agreement was entered into which extended for a further five years the period during which advances could be made and also amended the 1956 Agreement in certain respects concerning funds for the erection of dwellings for rental to servicemen and the rate of interest payable on Commonwealth advances.

The 1966 Agreement. A new Agreement was entered into which extended for a further five years the period during which advances could be made, and also amended the 1956-1961 Agreement in certain respects concerning the definition of 'member of the forces', the erection by the States of blocks of flats in metropolitan areas, the erection of dwellings for rental to servicemen, and the provision of finance to home builders in rural areas.

For further information regarding the above Agreements see Year Book No. 53, pages 276-277.

Operations under the various Housing Agreements

The following tables show the operations under the various Housing Agreements during 1966-67 and to 30 June 1967. The earliest single year for which details are given in the tables is 1962-63; for earlier years see Year Book No. 53, pages 278-9.

COMMONWEALTH AND STATE HOUSING AGREEMENTS: SUMMARY, 1966-67

Sold under—							
1945 Agreement	427	600	101	7	313	(e)	(e) 1,448
1956 to 1966 Agreements	1,075	1,259	30	995	254	460	4,073

(a) Includes supplementary advances for Service Housing. (b) The maximum amount is 70 per cent of the Commonwealth advances, other than supplementary advances for Service Housing. (c) The minimum amount must be 30 per cent of the Commonwealth advances other than supplementary advances for Service Housing. (d) Also included in State Housing Programme above. (e) Tasmania did not operate under the 1945 Agreement after August 1950.

COMMONWEALTH AND STATE HOUSING AGREEMENTS: ADVANCES TO STATES(a)
1962-63 TO 1966-67 AND TO 30 JUNE 1967
 (\$'000)

<i>Year</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.(b)</i>	<i>Total</i>
1962-63	33,800	26,600	8,502	19,012	7,010	5,200	100,124
1963-64	34,164	27,628	10,020	19,400	7,052	6,000	104,264
1964-65	38,132	34,360	8,232	20,500	7,492	6,400	115,116
1965-66	44,375	33,566	8,950	21,057	8,846	7,448	124,242
1966-67	43,325	32,960	13,740	20,750	9,478	7,500	127,753
Total from 1 July 1945	529,420	460,236	139,691	190,179	132,036	64,551	1,516,162

(a) Includes supplementary advances (Service Housing) under the 1956 to 1966 Agreements. (b) Tasmania withdrew from the 1945 Agreement in August 1950 and repaid all advances made to it.

COMMONWEALTH AND STATE HOUSING AGREEMENTS: NUMBER OF DWELLINGS PROVIDED(a), STATES, 1962-63 TO 1966-67 AND TO 30 JUNE 1967

<i>Year</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.(b)</i>	<i>Total</i>
1962-63	5,654	3,921	1,239	3,560	1,519	804	16,697
1963-64	5,553	3,922	1,435	3,429	1,460	824	16,623
1964-65	6,342	4,431	1,121	3,637	1,022	895	17,448
1965-66	6,385	4,258	1,349	3,569	1,357	942	17,860
1966-67	5,866	5,156	1,252	4,029	1,128	1,026	18,457
Total from 1 July 1945(c)	95,262	74,633	23,742	36,983	25,522	9,410	265,552

(a) The total number of houses and flats completed under State Housing Programmes plus, since 30 June 1956, the numbers completed and purchased under the Home Builders' Account. (b) Tasmania withdrew from the 1945 Agreement in August 1950 and repaid all advances made to it. (c) Includes some dwellings erected before 1945-46 to which the 1945 Agreement applied and also 1,130 dwellings completed in Tasmania up to the time of that State's withdrawal from the 1945 Agreement in August 1950.

COMMONWEALTH AND STATE HOUSING AGREEMENTS: NUMBER OF HOUSES SOLD 1962-63 TO 1966-67 AND TO 30 JUNE 1967

<i>Year</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>Total</i>

War service homes

The *War Service Homes Act* 1918-1966 makes provision for assistance to be granted to persons who satisfy the eligibility conditions set out in the Act, to enable them to acquire on concessional terms a soundly constructed home that they would occupy as a residence.

Persons eligible for assistance under the Act include members of the Australian forces and nursing services enlisted or appointed for or employed on active service outside Australia or on a ship of war during the 1914-1918 and 1939-1945 Wars and persons who served in the warlike operations in Korea or Malaya or who have served on 'special service' as defined in the *Repatriation (Special Overseas Service) Act* 1962-1966. 'Special service' includes 'special duty' in an area which

by reason of warlike operations or a state of disturbance has been declared a 'special area' under the Repatriation (Special Overseas Service) Act. The areas declared as a 'special area' under the Act are:

- Vietnam (Southern Zone) from 31 July 1962;
- certain areas of Borneo, Sabah and Sarawak from 8 December 1962 to 30 September 1967;
- certain areas of Malaya from 28 May 1963;
- Malaysia (the remainder) and Singapore from 7 July 1965 to 30 September 1967.

The categories of eligible persons also include the widow and, in some circumstances, the widowed mother of an eligible person and persons domiciled in Australia and employed in certain sea-going service during the 1914-1918 and 1939-1945 Wars.

The Director of War Service Homes is responsible for the execution of the War Service Homes Act subject to the directions of the Minister for Housing.

Operations under the War Service Homes Act

The following tables give details of the operations under the War Service Homes Act in the year 1966-67 and from the inception of the scheme on 6 March 1919 to 30 June 1967. The earliest single year for which details are given in the tables is 1962-63; for earlier years *see* previous issues of the Year Book. The figures shown include operations in the Territories of Papua, New Guinea and Norfolk Island.

In addition to the homes provided under the War Service Homes Act and shown above, 2,297 homes, which had been provided originally under the Housing Agreements with the States, have been taken over in accordance with those Agreements.

Home Savings Grant Scheme

The administration of the Homes Savings Grant Scheme is a function of the Commonwealth Department of Housing. The purpose of the scheme is to assist young married persons to purchase or build their own homes. A further objective is to increase the proportion of total private savings available for housing purposes by encouraging young people to save with those institutions which provide the bulk of long-term housing finance.

The scheme is governed by the *Home Savings Grant Act 1964-1967*. Amendments made to the Act in May 1967 have extended the original scheme, which was introduced in 1964, to young widowed persons with dependent children, raised the limit on the value of a home that may attract a grant from \$14,000 to \$15,000, and have given the Department of Housing wider discretionary powers in certain cases. The Act authorises the payment of grants from the National Welfare Fund.

The scheme provides for the payment of grants of \$1 for every \$3 saved by eligible persons under 36 years of age for the first home they own after marriage. The savings must be made over a period of at least three years and held in an approved form. The maximum grant to a married couple, or to husband or wife if only one is eligible, or to a widowed person, is \$500 on savings of \$1,500 or more. Smaller grants down to a minimum of \$10 are payable on lesser amounts saved. To be eligible for the grant, a person must be married, or widowed with one or more dependent children, and must have—or must be married to a person who has—entered into a contract to buy a home or have one built, or begun to build a home as an owner-builder. The person must be under 36 years of age at the time of marriage and at the date of the contract to buy or build or the date building began, must have either been an Australian citizen or lived in Australia during the three years immediately preceding that date, and must also have saved in Australia in an approved form throughout that period. Those three years are known as the applicant's 'savings years'. The grant is payable in respect of existing homes and homes being built. Flats and home-units may also be eligible provided separate title can be obtained. The home, including the land, the house itself and any other improvements, must not cost more than \$15,000, or \$14,000, if the contract to buy or build the home was made, or the building of the home as an owner-builder began, before 28 November 1966. Most homes are eligible, the main exception being homes purchased from State housing authorities, which have been built with money advanced by the Commonwealth under the Commonwealth-State Housing Agreement at concessional rates of interest.

The main forms of savings acceptable under the scheme are Home Savings Accounts with savings banks, fixed deposits with trading banks designated Home Savings Accounts, and deposits with or shares in registered building or co-operative housing societies. Savings spent in connection with the purchase or construction of the home prior to the date of the contract to buy or build the home, or the date building began, are also acceptable. In addition, savings in certain other forms up to 31 December 1964 are acceptable up to 31 December 1967 if they remain in those forms. These forms are accounts with savings and trading banks other than Home Savings Accounts, and deposits with registered friendly societies and credit unions. However, all new and additional savings after 1 January 1965 must be in one or more of the forms mentioned earlier to be acceptable. The amount of savings that qualify for a grant is the sum of the amounts saved, in acceptable forms, in each savings year. However, the limit on the amount of savings in any savings year that can qualify for a grant is \$1,120 for savings years commencing before 1 January 1965, \$500 for savings years commencing on or after 1 January 1965, and \$600 for savings years commencing on or after 1 May 1966.

Full details of the scheme are set out in the official pamphlet *A Grant for Your Home* available from banks, building and housing societies, post offices, and offices of the Department of Housing throughout Australia. Additional statistical information is contained in the Annual Reports by the Secretary, Department of Housing, on the *Homes Savings Grant Act 1964-1967*, which are available from the Government Printer, Canberra.

Operations under the Home Savings Grant Scheme

Particulars of applications received and approved during 1966-67 and during the period from 20 July 1964, when the scheme commenced to operate, to 30 June 1967 are set out below.

Homes qualifying for grants

The two following tables contain particulars of homes in respect of which grants were approved during 1966-67. As grants are payable only to persons under 36 years of age and in respect of homes costing no more than \$15,000 (or \$14,000 if acquired before 28 November 1966), these statistics should not be regarded as being applicable to home owners in general.

(c) Includes Northern Territory. (d) Includes Municipality of Queanbeyan, N.S.W.

Housing loans insurance scheme

The Housing Loans Insurance Corporation was established by the *Housing Loans Insurance Act* 1965 to insure approved lenders against losses arising from the making of housing loans. The main purpose of the activities of the Corporation is to assist people to borrow, as a single loan and at a reasonable rate of interest, the money they need and can afford to repay to obtain a home suited to their requirements.

To encourage the making of high-ratio loans the Corporation will insure loans up to 95 per cent of valuation for houses valued at \$15,000 or less. Where the valuation of a home exceeds \$15,000 the maximum insurable amount is 95 per cent of the first \$15,000 of valuation plus 70 per cent of the balance, or \$20,000, whichever is the lesser. The minimum loan for the purchase of a home unit held under strata title is the lesser of \$20,000 or 80 per cent of valuation. A once-and-for-all premium of 2 per cent of the amount of the loan is charged by the Corporation. The premium is payable by the borrower, but lenders may agree to add it to the amount of the loan for repayment by the borrower over the duration of the loan. The maximum rate of interest that may be charged on insured loans is

7½ per cent (January 1968) per annum and the maximum period for repayment is thirty-five years. The maximum rate of interest is kept under continuing review and may be varied by the Corporation, with the concurrence of the Minister for Housing, whenever changes appear to be warranted by movements in interest rates generally or by other developments.

The Corporation insures loans that are made for a wide range of purposes in addition to the purchase or construction of a dwelling. The other purposes include alterations, extensions or improvements to a dwelling, and the provision or improvement of roads, kerbing and footpaths. An insured loan may be made only by an approved lender. Approved lenders are appointed by the Corporation from within approved classes of lenders specified by the Minister for Housing. The approved classes include banks, building societies, co-operative housing societies, friendly societies, life insurance companies, and trustee companies. The Corporation commenced its operations in November 1965.

State housing authorities

The following paragraphs describe briefly the organisation of the various State housing authorities and their activities in the fields of home construction and provision of homes on a rental basis (*see* pages 252–5 for their financial advances to persons wishing to purchase or build a home). For summarised figures of total government construction of houses and flats, *see* pages 232, 234, and 236–7. For a fuller description of the activities of State housing authorities and their financial advances to home purchasers or builders *see* Year Book No. 53, pages 283–291.

New South Wales—The Housing Commission of New South Wales. The Housing Commission of New South Wales was constituted in 1942, its principal function being the provision of low-cost housing for rental or sale to persons in the lower or moderate income groups.

Advances from the Commonwealth have provided most of the Housing Commission's capital funds. Of the \$507,554,942 total capital funds available to the Commission from its inception to 30 June 1967, \$433,376,414 (or 85.4 per cent) came from Commonwealth advances, \$11,604,048 (2.3 per cent) from Consolidated Revenue, \$13,991,900 (2.7 per cent) from General Loans Account, \$19,340,314 (3.8 per cent) from other State funds, and \$29,242,266 (5.8 per cent) from the Commission's own funds. During the year 1966–67 the Housing Commission's income and expenditure (other than capital transactions) was—total income, \$30,093,253 (consisting of rent \$20,822,877, interest \$7,242,995, other \$2,027,381); and total expenditure \$27,436,516.

Most of the permanent dwellings provided by the Commission have been erected under the Commonwealth-State Housing Agreements. In 1966, 4,529 houses and flats, valued at \$26,316,000, were completed for the Housing Commission by private builders on contract to the Commission.

Upon request by other State Departments the Housing Commission will erect houses for employees of those Departments, the Departments providing the necessary lands and funds. In addition, the Commission erects (with State funds) dwellings for employees of industries connected with decentralisation and development. Specially designed units are erected by the Housing Commission to provide dwellings for elderly persons at rentals within their means. The rents of these units are approximately \$2 a week for elderly single persons and \$3 a week for elderly couples, and 3,382 units had been completed at 30 June 1967.

Applicants for Commission housing may elect either to purchase or to rent the dwelling allocated to them. Terms of sale provide for a minimum deposit of \$100 with repayments spread over a maximum period of forty-five years. Further, those tenants who originally elect to rent may subsequently purchase the dwellings occupied by them on similar terms. Applicants may also apply to have a standard type of dwelling erected on their own block of land.

Victoria—Housing Commission, Victoria. The Housing Commission of Victoria was set up in 1938 as a result of the Housing Act of the previous year. The objects of the Commission as now laid down are the improvement of existing housing conditions; the provision of suitable rental housing for persons displaced by slum reclamation or living under unsatisfactory conditions, and for other eligible persons; the sale of houses to eligible persons and the making of advances to such persons to enable them to own their homes; the development of land for housing and related purposes; and the responsibility of maintaining housing standards. Since the signing of the 1945 Commonwealth-State Housing Agreement the construction of dwellings has been financed by the Commonwealth Government and Commission Funds.

At 30 June 1967 the Housing Commission had completed 1,328 dwellings units under the State Housing Scheme, and 58,478 dwelling units under Commonwealth-State Agreements. Specially designed dwelling units are erected by the Commission to provide dwellings for elderly persons at rentals within their means. To 30 June 1967, 3,459 units had been completed. Under the *Aborigines*

Act 1958, as amended by the *Aborigines (Houses) Act* 1959, the Aborigines Welfare Board is empowered to buy houses, or land on which to erect houses, for occupation as dwellings by Aborigines. To 30 June 1967, 123 units had been completed.

State Government Authorities provide to the Commission, from time to time, the necessary land and finance for the erection of dwellings for their employees. At 30 June 1967 a total of 3,322 houses had been erected by the Housing Commission on behalf of the Rural Finance and Settlement Commission for provision to ex-servicemen.

Queensland—The Queensland Housing Commission. The Queensland Housing Commission was established in 1945 to assist in meeting the housing shortage. In addition, the Commission was empowered to build houses itself, either for sale or for rental.

The Housing Commission finances its operations through two Treasury Trust Funds—the Queensland Housing Commission Fund and the Commonwealth-State Housing Fund. In addition, a Home Builders' Deposit Trust Fund is available to assist eligible persons to accumulate money to acquire land and erect a Commission dwelling thereon, or to purchase a dwelling under contract of sale conditions. Total disbursements by the Commission for the year 1966–67 amounted to \$27,794,275, representing \$8,655,173 from the Queensland Housing Commission Fund and \$19,139,102 from the Commonwealth-State Housing Fund, while the Home Builders' Deposit Fund had a balance of \$1,248 at 30 June 1967.

During 1966–67 the Commission completed 1,643 house units, bringing the total completions under all schemes since the revival of housing construction in 1944–45 to 34,889. Of this number, 20,843 houses, or 59.7 per cent, were for home ownership, and 14,046 or 40.3 per cent, were for rental.

In the field of rental housing the Commission administers and acts as the constructing authority under the Commonwealth-State Housing Agreements. Operating under the provisions of '*The State Housing Acts, 1945 to 1966*' the Commission, through its scheme of workers' dwellings, makes advances for the construction of dwellings to eligible persons who own a suitable building site. The number of workers' dwellings completed during 1966–67 amounted to 290, making a total of 30,063 completions since the inception of the scheme. The Commission also has power to make advances, secured by mortgage, to firms for housing of employees. The Commission has power to sell houses under contract of sale conditions. Contract of sale agreements were made to purchase 746 of the Commission's houses during 1966–67.

South Australia—The South Australian Housing Trust. The South Australian Housing Trust operates under the South Australian Housing Trust Act, 1936–1965 for the purpose of providing comfortable homes for workers in regular employment on the lower ranges of income and for tenants in serious financial straits. The Housing Trust builds houses for both rental and sale, and from July 1946 to 30 June 1967, 59,596 houses were erected by the Trust in both city and country areas. As at 30 June 1967 the rents of five-roomed (i.e. three bedrooms) double-unit houses ranged from \$4.25 a week for houses of an older type to \$8.00 a week for houses then being completed. Single unit rents ranged between \$4.75 and \$13.00. Two- and three-storey groups of flats with weekly rentals ranging from \$8.25 to \$15.50 per flat have been built in the Metropolitan Area and at Elizabeth. At 30 June 1967, 1,199 of these flats had been completed in the Metropolitan Area and 220 at Elizabeth. In 1953 the Trust began building cottage or pensioner flats for elderly people. At 30 June 1967 it had built 962 cottage flats for its own scheme and an additional 560 for charitable organisations, and in 1958 the State Government instituted the rental-grant scheme for the purpose of providing houses in the country towns for people who cannot afford to pay an economic rent.

More than 32,600 houses have been completed under the sales scheme inaugurated in 1946.

During 1962–63 the Trust commenced construction of rental-purchase houses. The aim of this scheme is to provide less expensive houses for the lower-middle income group, and it is expected that such houses will, as far as possible, replace the demand for the double-unit type rental houses. Upon request by State Government Departments the Trust will erect houses for purchase by those Departments for the accommodation of their employees. By 30 June 1967 the Trust had built 182 houses in country towns for the Department of Aboriginal Affairs. The houses are owned and managed by the Department and let by it to specially selected Aboriginal families. In order to assist primary producers the Trust will erect houses on the applicant's own land for his own use or that of his employees, either using local materials or transporting prefabricated houses to the site.

Western Australia—State Housing Commission of Western Australia. The State Housing Commission was established in January 1947, under the *State Housing Act, 1946*, to replace the Worker's Homes Board. The *State Housing Act, 1946–1964* has as its objects 'the improvement of existing housing conditions' and 'the provision of adequate and suitable housing accommodation for persons of limited means and certain other persons not adequately housed'. It provides for the erection of homes for workers, the making of advances to workers for the purchase of homes, the erection of

homes for letting on a weekly rental basis, the acquisition and development of land, the clearing of slums, the erection of hostels, and the planning of community facilities. The Commission builds houses for letting or sale and lends money for home building. The houses are built by private contract on land provided by the applicant or the Commission. The administration of the Commonwealth and State Housing Agreements and the War Service Homes Act is included in the functions of the Commission. The number of houses completed under the State Housing Act up to 30 June 1967 was: freehold, 4,839; leasehold, 3,585; assistance by second mortgage, 1,703.

The Commission also conducts certain other housing schemes and has completed or is currently engaged in other specific projects, details of which are given in previous Year Books. Included among current activities are the building and maintenance of houses for the Government Employees' Housing Authority, which has taken over 154 homes built in country areas under the former Government Employees' Housing Scheme and acquired 405 houses including 400 previously owned by various Government Departments; the construction of up to 100 houses to be built under the provisions of the *Laporte Industrial Factory Agreement Act, 1961-1965*; the building of up to 30 homes a year until 1969-70 as part of the Broken Hill Proprietary Company's Agreement with the State to establish an integrated steel industry; and the erection of 128 houses at Exmouth as part of the support town and for personnel employed on the United States Navy V.L.F. radio station. A third block of flats for the accommodation of elderly ladies was completed in May 1966 and the Commission is building a fourth block in the Fremantle area. The Commission also built during 1966-67 a block of flats for single working women to encourage the various organisations to undertake similar projects themselves.

The Commission administers building society legislation and the *Housing Loan Guarantee Act, 1957-1965*, under which the Government guarantees lenders of funds to building societies and other approved financial organisations making advances to families interested in owning their own home on low deposits, and at an interest rate not exceeding 6½ per cent per annum reducible.

Tasmania—The Housing Department. The Housing Department was established in July 1953 and is responsible for administering that portion of the *Homes Act 1935* which relates to the acquisition and development of land for housing purposes and the erection of homes for rental and ultimate sale, and the *Homes (Old Age Pensioners') Act 1940*.

During 1966-67, 595 dwellings were completed. Construction since 1944 has comprised 10,161 dwelling units, of which 9,623 were single units (8,166 of timber), 220 were elderly persons' flatettes, 22 were maisonettes, and 296 were multi-unit flats.

Flats, maisonettes and elderly persons' homes are for rental only. Allottees of single unit dwellings are encouraged to acquire properties on purchase contract, although some of these dwellings are occupied on a rental basis. The rental of a newly erected three-bedroom timber house in the Hobart metropolitan area approximated \$13.15 in the June quarter of 1967. In certain necessitous cases rental rebates are allowed. Under the current rental rebate formula a married couple whose only income is the age pension pay \$3.80, while a single person solely dependent on the pension pays \$2 a week.

Allotments are usually made on a no-deposit purchase contract basis, repayments being over a maximum term of fifty-three years. Purchase contracts are sometimes surrendered to the Department. Net of surrenders, 6,694 purchase contracts had been entered into by June 1967. The sale price, excluding land, of a new three-bedroom house in the Hobart metropolitan area was approximately \$7,340 in the June quarter of 1967.

Housing schemes in Commonwealth Territories

Northern Territory. In 1946 control of all government-owned residences in the Territory (excluding those belonging to the Defence Services or Commonwealth Railways, or attached to post offices) was vested in the Administration. The Northern Territory Housing Commission provides rental housing for persons of limited means who are not adequately housed and who are not officers of either the Commonwealth or the Northern Territory Public Service. The Commission was established in 1959 and operates under authority of the *Housing Ordinance 1959-1966*; to 30 June 1967 a total of 1,107 houses and flats had been completed; 735 of these are in Darwin (including 158 flats), 244 in Alice Springs (including 24 flats), 61 in Katherine, and 67 in Tennant Creek. A further 370 houses and 196 flats were under construction.

Australian Capital Territory. The Commonwealth Government provides houses and flats for rental to persons employed in the Australian Capital Territory. At 30 June 1967 the Department of the Interior controlled 7,389 houses and 2,018 flats for rental purposes. Government rental houses may be purchased by tenants. From 1 July 1950 to 30 June 1967, 6,022 houses had been sold to tenants.

Papua and New Guinea. In 1960 the Administration, through the Commissioner for Housing, commenced a scheme for providing low-cost houses for rental and eventual sale, where possible, to indigenes, mixed race peoples and Asians. To 30 June 1967, 290 houses had been completed.

A Housing Commission is to be established to improve existing housing conditions, to provide adequate and suitable housing for letting and sale to persons who are of limited means or unsatisfactorily housed, to make advances for home purchase, and to develop land for housing. The Housing Commission Ordinance 1967 received the Governor-General's assent on 1 June 1967. Active planning for the Commission's operations is under way.

Summary of rental activities of government authorities

The first of the two following tables shows the revenue from rental for dwellings under control of government housing authorities each year from 1962-63 to 1966-67, and the second the number of tenants paying rent for dwellings under control of government housing authorities at the end of each year 1962-63 to 1966-67.

GOVERNMENT HOUSING AUTHORITIES: REVENUE FROM RENTALS, STATES AND TERRITORIES, 1962-63 TO 1966-67 (\$'000)

Year	N.S.W.	Vic.	Qld (a)	S.A. (b)	W.A.	Tas.	N.T.	A.C.T.	Aust.
1962-63	14,232	11,410	3,966	7,504	4,384	1,122	500	3,480	46,598

(a) Excludes tenants of 'aged units'. (b) Excludes tenanted temporary dwellings. (c) Excludes temporary and emergency dwellings. (d) Number of occupied dwellings at 30 June.

Advances to home purchasers

Many prospective home purchasers wish to borrow for the purpose of constructing or purchasing their own homes. Usually the loan is covered by way of mortgage of the home to be constructed or bought. Such loans are provided from a number of private sources and from agencies owned or guaranteed by the State or Commonwealth Governments. The information in this section concerns the direct loans made to home purchasers by the more important institutional lenders. Loans to institutions which in turn lend moneys to home purchasers and loans to contract builders, etc. are excluded as far as possible. The loans may be for the construction of new dwellings, the purchase of existing dwellings, for additions, renovations, etc., as first or subsequent mortgages, overdrafts and so on. While figures of all loans to home purchasers are not available, the institutions mentioned account for a significant proportion of total loans. Details of the terms and conditions of lending are given, together with available information on the number and value of loans made.

State authorities and agencies

New South Wales

Rural Bank of New South Wales—Sale of Homes Agency. A Sale of Homes Agency was established in 1954 to arrange for the sale on terms of houses erected by the Housing Commission of New South Wales. The Agency's operations began with the sale to selected purchasers of 100 houses made available by the Commission during 1954–55 and 1955–56. The sales were made on the basis of 10 per cent deposit and repayment of the balance over a maximum period of forty years, with interest at 4½ per cent per annum. Total advances under that scheme amounted to \$646,648; at 30 June 1967 the advances outstanding amounted to \$393,950 in respect of 81 houses.

Since 1956 the Sale of Homes Agency has acted as the agent of the Housing Commission in arranging the sale on terms of houses erected under the Commonwealth-State Housing Agreements. The terms of sale provide for a minimum deposit of \$100 and repayment of the balance over a maximum period of forty-five years, with interest rates, since the inception of the scheme, ranging from 4¼ to 5½ per cent per annum. Particulars of the advances made by the Agency in connection with the sale of houses erected under the 1956 and 1961 Agreements are given in the following table.

**RURAL BANK OF NEW SOUTH WALES—SALE OF HOMES AGENCY
ADVANCES FOR HOMES SOLD UNDER THE 1956 AND 1961
COMMONWEALTH-STATE HOUSING AGREEMENT
1962-63 TO 1966-67**

Year	Advances during year		Advances outstanding at end of year(a)	
	Number of houses	Amount	Number of houses	Amount
		\$'000		\$'000
1962-63 . . .	1,825	13,504	13,830	88,974
1963-64 . . .	957	7,362	14,568	94,178
1964-65 . . .	1,777	14,356	16,042	105,648
1965-66 . . .	1,486	12,197	17,126	114,154
1966-67 . . .	1,125	9,417	18,181	121,710

(a) Comprises principal outstanding and loan charges due but not paid.

Rural Bank of New South Wales—other loans. The Rural Bank of New South Wales provides assistance to individuals for the erection or purchase of homes and for other approved purposes associated with homes. Advances are based on the bank's official valuation of the dwelling. The rate of interest on long-term loans for housing purposes is 5½ per cent per annum.

**RURAL BANK OF NEW SOUTH WALES: ADVANCES FOR HOMES
1962-63 TO 1966-67**

Year	Advances during year(a)		Advances outstanding at end of year(b)	
	Number of dwellings	Amount	Number of dwellings	Amount
		\$'000		\$'000
1962-63 . . .	2,014	13,084	18,017	62,762
1963-64 . . .	2,434	15,148	18,972	68,790
1964-65 . . .	2,613	18,250	19,936	76,450
1965-66 . . .	1,406	11,699	19,577	76,286
1966-67 . . .	1,578	13,256	19,398	77,587

(a) The number of advances during a year represents the number of dwellings in respect of which an advance was first made in the year, but the amount of advances includes subsequent advances made in respect of the dwellings. (b) The number of advances outstanding at the end of a year represents the number of dwellings on which a debt was still outstanding. The amounts shown comprise principal outstanding and loan charges due but not paid.

Victoria

Housing Commission, Victoria. Very few houses were sold by the Commission until 1954. The amendments to the Commonwealth-State Housing Agreement in 1955-56 have had the effect of substantially increasing the number of houses sold. Whereas between 1949 and 1954 only about 100 houses were sold, a total of 23,871 houses were sold on terms to 30 June 1967, the total value of terms sales exceeding \$190 million. Until 1964-65, houses were sold on a minimum deposit of \$200, but during that year provision was made to sell without deposit in very special circumstances. The maximum repayment term is forty-five years with interest currently at $4\frac{1}{2}$ per cent.

Home Finance Trust. In 1956 a Home Finance Trust was established with the object of receiving money from institutions and others in order to make loans for the erection or purchase of houses. Applicants for loans must declare that they intend to use the houses as homes for themselves, their families and dependants.

Loans granted are on the basis of a first mortgage over the house. Loans are not to exceed ninety-five per cent of the value of the security (house and land) and are not made if the value of the security exceeds \$11,600. The house must not have been erected more than two years before the date of mortgage. Repayment of loans may be made over a maximum period of thirty years, with interest charges determined by the Trust. At 30 June 1967, 3,284 loans totalling \$20,831,876 were outstanding.

In 1963 the Trust was empowered to make housing loans on the security of second mortgages subject to conditions similar to those applying to the first mortgage loans, except that the maximum term for repayment of a loan is ten years and no restriction is placed on the percentage of loan to valuation. At 30 June 1967, 1,643 second mortgage loans were outstanding, the amount involved being \$1,729,250.

(See Savings Banks, page 257, for activities of the State Savings Bank of Victoria.)

Queensland

Queensland Housing Commission. The present maximum advance allowable under the Acts is \$8,000 for a timber, brick veneer, brick, or concrete building. The rate of interest charged on new advances in 1966-67 was $5\frac{1}{2}$ per cent per annum. Repayment may be made at the option of the borrower over either a thirty year or a forty-five year period.

Workers' dwellings. From 4 October 1962 the maximum advance under this scheme was increased to \$7,000 for all types of workers' dwellings. This was increased to \$8,000 from 2 June 1966. Total advances made for dwellings since operations commenced in 1910 to 30 June 1967 amounted to \$64,891,061.

South Australia

South Australian Housing Trust Sales Scheme. A minimum deposit of \$100 is required for houses under the Rental-Purchase Scheme for a loan, repayable at an interest rate of $4\frac{3}{4}$ per cent per annum over a period not exceeding forty years. Prospective purchasers of Housing Trust houses (other than rental-purchase houses) can arrange or have arrangements made for a first mortgage to be granted by a lending institution of their choice. In cases where the deposit and the first mortgage so raised are insufficient, the Trust may advance the balance of the house price by way of a second mortgage, the repayment term of which is a maximum of thirty years, interest being at the rate of 6 per cent per annum. Principal is adjusted quarterly. During 1966-67 the Trust commenced 721 second mortgages valued at \$927,000. At 30 June 1967 second mortgages totalled 8,650, and the balance outstanding at that date was \$9,100,000.

State Bank of South Australia. The State Bank, together with the Housing Trust, is the principal agent of the State Government for the distribution through the Home Builders' Fund of moneys received under the Commonwealth-State Housing Agreement. During 1966-67 the Bank opened 1,773 new accounts worth \$12,049,361 in the Home Builders' Fund. The balance of loans in this Fund outstanding at 30 June 1967 totalled \$65,011,171. In addition, during 1966-67, \$761,148 was advanced to the public under the Advances for Homes Act, 1928-1958, which is administered by the Bank on behalf of the State Government. Under this Act 133 new accounts were opened during 1966-67, leaving a balance outstanding at 30 June 1967 of \$25,760,844. The present maximum housing loan under either of these schemes is \$7,000, repayable over a period not exceeding fifty years at a rate of interest of $5\frac{1}{2}$ to 6 per cent per annum calculated on monthly balances. Persons who have received benefit under either of these schemes are ineligible for another mortgage.

Western Australia

State Housing Commission of Western Australia. Under the State Housing Act and the Commonwealth-State Housing Agreement the maximum loan is \$6,000 by way of mortgage, while under contract of sale the maximum is \$5,800 on the building plus the value of the land in the metropolitan area, and greater amounts in rural areas, depending on the circumstances.

To proceed under the mortgage conditions, a deposit of not less than 10 per cent is required, but under contract of sale the deposit may be as low as \$200. The interest rate on all advances is $5\frac{3}{8}$ per cent per annum and the repayment period is forty-five years. The income eligibility figure varies according to the movement of the basic wage, and as at the basic wage adjustment on 24 October 1966 an applicant in the metropolitan area cannot have an income exceeding \$2,645 a year, plus \$50 for each dependent child under sixteen years of age. For the country the corresponding amount is \$3,158 per annum plus \$50 for each dependent child under sixteen years, and north of the twenty-sixth parallel the Minister may allow families with an income of up to \$4,225 to be given financial assistance. A second-mortgage scheme exists under the State Housing Act, which provides that assistance be limited to those applicants who are building or purchasing new homes, the cost of which, excluding land, does not exceed \$8,000. The Commission limits the second mortgage to a maximum of \$2,000.

(See Savings Banks, page 257, for activities of the Savings Bank Division of The Rural and Industries Bank of Western Australia.)

Tasmania

Housing Department. The interest rate on purchase contract loans from the Housing Department signed after 1 May 1965 is $4\frac{1}{2}$ per cent. To be eligible for a house on purchase contract terms an applicant must be married or about to be married, or have dependants for whom it is necessary to provide a home. The number of loans outstanding at 30 June 1967 was 6,163, and the amount outstanding \$40,583,000.

Agricultural Bank of Tasmania. The Agricultural Bank, as an approved institution under the Commonwealth-State Housing Agreement, receives part of those funds allocated for advances to home builders. To be eligible for a loan an applicant must be married or about to be married, be over the age of twenty-one, and own a block of land. The maximum amount of an advance to an applicant is \$8,000 for all types of houses in certain areas, provided that the total advance does not exceed ninety per cent of the Bank's valuation of land and dwelling. Advances to borrowers are repayable by equated instalments over thirty-one years. Advances made as from 1 July 1965 were at an interest rate of $5\frac{3}{4}$ per cent.

During 1966-67, 279 advances were approved, valued at \$2,159,000. Since November 1945 a total of 3,456 loans amounting to \$20,553,000 has been approved, of which 2,910 have been for erection of dwellings and 546 for the purchase of existing homes. Total advances outstanding at 30 June 1967 amounted to \$14,960,000. These figures exclude advances to building societies.

Commonwealth authorities and Territories

Department of Housing

In December 1963 the Department of Housing was created, and to it were transferred the functions and staff of the War Service Homes Division and the Housing and Building Industry Branch of the Department of National Development. Further details relating to the Department of Housing may be found on page 83 of Year Book No. 50.

War service homes

The maximum amount of loan or advance which may be granted under the *War Service Homes Act* 1918-1966 is \$7,000. The period of repayment may be up to forty-five years. In the case of a widow or widowed mother of an Australian ex-servicemen, the period may be extended to a maximum of fifty years.

The following table gives details of advances under the War Service Homes Act in each State and Territory of Australia, and the Territories of Papua, New Guinea and Norfolk Island, for the years 1962-63 to 1966-67. (See tables on pages 245-6 for the number of homes provided.)

Northern Territory

Loans Scheme. This scheme was commenced in 1953 and is administered by the Home Finance Trustee under the *Housing Loans Ordinance* 1949-1966. Advances may be made for the erection of a house, the purchase or enlargement of an existing house, the completion of a partially erected dwelling, or the discharge of a mortgage already existing. Loans are provided on a deposit of 5 per cent of the first \$4,000 and 10 per cent of the balance of the Trustee's valuation up to a maximum of \$7,000. The rate of interest charged is 6 per cent per annum reducible to 5 per cent per annum if instalment payments are made by the due date. The maximum period of repayment is forty-five years. Up to 30 June 1967, 1,193 loans totalling \$6,677,030 had been approved. These were for: erection, 738; purchase, 351; enlargement or completion, 52; discharge of mortgage, 52.

Sales Scheme. Tenants of government-owned houses under the control of the Administration may purchase the dwellings they occupy either for cash or on terms requiring a minimum deposit of 5 per cent of the first \$4,000 and 10 per cent of the balance of the purchase price with repayments over a maximum period of forty-five years including interest at 4½ per cent per annum.

Housing Commission Sales Scheme. Since the November 1963 amendment of the *Housing Ordinance* 1959-1966 the Housing Commission has been permitted to sell its houses to tenants in occupation. The terms require a minimum cash deposit of \$200 and repayment of the remainder of the loan over a period not exceeding forty-five years; there is no prescribed limit to the amount of the loan and the rate of interest is fixed by the Commission from time to time.

Australian Capital Territory

Loans may be granted by the Commissioner for Housing to enable persons to purchase or build a new house in the Australian Capital Territory. Where the Commissioner's valuation does not exceed \$4,000 the maximum loan may not exceed ninety-five per cent of the valuation. If the Commissioner's valuation exceeds \$4,000 the maximum loan is ninety-five per cent of the first \$4,000 and ninety per cent of the balance (but in no case can the amount lent exceed \$7,000). Repayment may be made over a maximum period of forty-five years. The current rate of interest is 5½ per cent per annum with a concession of 1 per cent for payments made on or before the due date. At 30 June 1967, 4,254 houses were under mortgage to the Commissioner.

Government rental houses may be purchased by tenants. The basis of the sale is a minimum deposit of 5 per cent of the purchase price fixed by the Department of the Interior with no limit to the amount which may be held on mortgage from the Department. Repayment of the amount covered by mortgage may be made over a maximum period of forty-five years. The interest rate is $5\frac{1}{2}$ per cent per annum with a concession of 1 per cent for payments made on or before the due date. To 30 June 1967, 6,022 houses had been sold to tenants.

Papua and New Guinea

Under authority of the *Housing Loans Ordinance* 1953–1963 the Commissioner for Housing may make advances to any member of the community for the erection of a house, the purchase or enlargement of an existing house, the completion of a partially erected dwelling, or the discharge of a mortgage already existing. The maximum loan is \$7,000. The maximum period of repayment is twenty-five years for timber and thirty-five years for brick dwellings. The Commissioner's responsibilities will be transferred to the Housing Commission when it commences operations. Minimum cash deposit is 5 per cent of the first \$4,000 plus 10 per cent of the remainder of the Commissioner's valuation. The effective rate of interest is 5 per cent per annum. Up to 30 June 1967, 382 loans totalling \$2,010,995 had been approved.

Savings banks

All savings banks lend funds for housing to both individuals and building societies. Separate figures of loans to individuals are not available for all savings banks. The amounts outstanding on housing loans of all savings banks (including loans to building societies) were \$1,186 million, \$1,359 million and \$1,549 million at the end of June 1965, 1966 and 1967 respectively. Some details in respect of three savings banks are shown below.

State Savings Bank of Victoria. The Bank grants long-term loans to depositors to enable them to build, purchase or improve homes. These loans are granted by both the Crédit Foncier and Savings Bank Departments.

The maximum proportion of valuation to be granted as Crédit Foncier loan is eighty per cent and the maximum loan is \$7,000. Interest is 5 per cent and the term of the loan is ten years, subject to renewal. The maximum proportion of valuation granted as Savings Bank Department loan is seventy-five per cent and the maximum loan is \$10,000. The interest rate is $5\frac{1}{2}$ per cent if the property is occupied by the borrower and $6\frac{1}{4}$ per cent in other cases. The term of the loan is three years, subject to renewal. During the year 1966–67 the Bank advanced \$58,623,493 to 9,034 borrowers in addition to \$397,969 to Co-operative Housing Societies and \$750,000 to the Home Finance Trust. At 30 June 1967 the total debt of 61,106 individual borrowers was \$294,450,029, while indebtedness of Co-operative Housing Societies and the Home Finance Trust amounted to \$16,431,208 and \$9,313,587 respectively.

Savings Bank of South Australia. The Bank grants mortgage loans for the building or purchase of houses for personal occupation, the maximum loan available being \$8,000 for all types of homes. Normally advances are made up to 85 per cent of the Bank's valuation but, if the loan is granted under the Homes Act, 1941–1962, 95 per cent of such valuation may be advanced (maximum loan, \$6,000). The maximum loan period is thirty years at a rate of interest of $5\frac{1}{4}$ per cent per annum; this rate is subject to review after five years. During 1966–67 the Bank advanced \$16,968,094 by way of housing loans, the number of new loans totalling 2,345. At 30 June 1967 there were 24,641 loans current with a balance outstanding of \$114,349,812.

Rural and Industries Bank of Western Australia (Savings Bank Division). The Rural and Industries Bank of Western Australia is authorised by the *Rural and Industries Bank Act, 1944–1966* to make loans from moneys on deposit with its Savings Bank Division to a person or body for the purchase or erection of a dwelling. It is the policy of the Bank to provide funds for housing primarily for occupancy by the borrower. There is no fixed limit on the amount of a loan. The average loan in the case of a brick or timber house is \$8,000. The rate of interest varies with the current bank rate and is usually $\frac{1}{2}$ per cent lower. The rate at 30 June 1967 was $5\frac{1}{2}$ per cent. The average term of housing loans is twenty-two years.

Trading banks

Apart from loans by certain State banks as Government agencies (*see* pages 253–5) advances for housing to individuals are also provided by the trading banks. Amounts outstanding in respect of advances to individuals for housing purposes made by the major trading banks were \$261 million on the second Wednesday of July 1967 (*see* the chapter Private Finance for further details).

Life insurance companies

The life insurance companies are another source of funds for housing. Details of new loans made during the twelve months ended June 1963 to 1967 are given in the following table.

**LIFE INSURANCE COMPANIES: HOUSING LOANS PAID OVER
STATES AND TERRITORIES, 1962-63 TO 1966-67**

State or Territory	Amount (\$'000)				
	1962-63	1963-64	1964-65	1965-66	1966-67
New South Wales	20,122	19,976	23,073	24,823	22,486
Victoria	12,276	14,742	17,788	17,113	16,843
Queensland(a)	3,972	3,510	5,665	5,538	4,856
South Australia(b)	3,228	3,334	4,686	4,809	4,371
Western Australia	2,090	2,488	3,561	3,564	4,157
Tasmania	1,486	1,530	1,396	1,526	1,321
Australian Capital Territory	242	396	827	870	945
Total	43,416	45,976	56,995	58,237	54,979

(a) Includes loans made in Papua and New Guinea.

(b) Includes loans made in Northern Territory.

Amounts outstanding at the end of June 1964, 1965, 1966 and 1967 in respect of housing loans made by insurance companies were \$323 million, \$339 million, \$356 million and \$366 million respectively.

Registered building societies

There are 3,776 registered building societies in Australia, of which 132 are permanent societies and the remainder terminating societies. The permanent societies are in the main investment societies which make loans for housing purposes, usually on *crédit foncier* terms, and obtain their funds from share capital deposits and borrowings from banks and other lending institutions. The terminating societies are co-operative societies which make loans to members from funds obtained from lending institutions (usually government guaranteed), members' subscriptions, and, since 1956, from moneys provided under the Commonwealth-State Housing Agreements. Details of new loans granted and net advances outstanding for each of the years ended June 1962 to 1966 are given in the following table (see also the chapter Private Finance).

REGISTERED BUILDING SOCIETIES: STATES, 1961-62 TO 1965-66

Year	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Total
LOANS GRANTED DURING YEAR (\$'000)							
1961-62	48,738	28,856	12,646	2,246	6,346	2,988	101,820
1962-63	53,446	29,843	13,164	2,833	7,270	4,049	110,605
1963-64	72,284	30,880	13,184	3,102	10,430	5,999	135,879
1964-65	82,329	37,007	16,550	3,819	13,091	6,728	159,524
1965-66	90,635	34,357	18,559	3,521	12,611	5,314	164,997

NET ADVANCES OUTSTANDING(a) AT END OF YEAR (\$'000)

1961-62	292,898	175,160	41,272	11,114	25,158	12,210	557,812
1962-63	317,221	189,466	48,776	12,530	28,216	14,464	610,673
1963-64	351,841	199,704	55,543	13,967	35,483	17,798	674,336
1964-65	393,343	214,288	64,449	15,790	44,171	21,413	753,454
1965-66	441,676	225,778	74,659	17,238	52,182	23,767	835,300

(a) Net of borrowing members' funds.

Other lenders

Little information is available on advances made by other lenders such as superannuation and other trust funds, private finance and investment companies, etc. In South Australia advances on first mortgage made by the South Australian Superannuation Fund are granted under the Homes Act, 1941–1962, by which the State Government guarantees up to 25 per cent of the value of the mortgage, thus raising the limit of the advance. Loans so made are limited to 95 per cent of the Superannuation Board's valuation to a maximum of \$6,000, or 85 per cent of the Board's valuation to a maximum of \$7,000. The rate of interest is 6 per cent per annum, calculated on quarterly balances, reducing to $5\frac{1}{2}$ per cent when payments are made within a prescribed period of twenty-one days from the end of the quarter. The term of the mortgage may run for thirty years on a stone or brick home or twenty years on a timber-framed construction. Trustee mortgages may be granted as an alternative to the foregoing. A maximum of 70 per cent of the Board's valuation may be granted for a trustee mortgage, other conditions being those applicable to mortgages granted under the Homes Act. At 30 June 1967 there were 5,678 loans current, the principal outstanding totalling \$24,142,994. During 1966–67 the value of advances made was \$3,649,424.

CHAPTER 10

LABOUR, WAGES AND PRICES

For particulars of the Farm Production Price Index, *see* the chapter Miscellaneous. For current information on the subjects dealt with in this chapter, *see* the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics* (monthly), and the *Quarterly Summary of Australian Statistics*, also the mimeographed statements *Wage Rates and Earnings*, *Consumer Price Index*, *Wholesale Price (Basic Materials and Foodstuffs) Index*, *Wholesale Prices—Price Index of Electrical Installation Materials*, and *Export Price Index*. For further information on these subjects, except the Export Price Index, *see* the *Labour Report* issued by this Bureau.

RETAIL PRICES AND PRICE INDEXES

Retail prices of food and groceries and average rentals of houses for years extending back to 1901 have been collected by the Commonwealth Statistician, and in some cases were recorded by the Statisticians of various States for earlier years.

Retail prices of a more extensive range of commodities (including clothing) and certain services in common demand have been ascertained at frequent and regular intervals since 1923, and comparable information was ascertained for the month of November in each year from 1914 to 1922. The range of items for which retail prices data are obtained was considerably expanded in 1948 and in later years. Average retail prices of certain food and grocery items in current periods are published in the annual *Labour Report*.

An explanation of the nature and purposes of retail price indexes is given in the various editions of the annual *Labour Report*, together with further particulars of indexes then current. Previous retail price indexes for Australia are briefly described below. The current retail price index, entitled the Consumer Price Index, was published for the first time in August 1960. It was compiled retrospectively to 1948–49. A description of the Consumer Price Index is given on pages 262–3.

Previous retail price indexes

Five series of retail price indexes had been compiled at various times for Australia by the Commonwealth Statistician prior to 1960. Each of these was continued until changed conditions required the compilation of indexes more directly relevant to current conditions. The respective indexes were as follows.

- (i) *The 'A' Series Index* (covering food, groceries and house rents) was first compiled in 1912 with the year 1911 as base = 1,000. It was discontinued in June 1938.
- (ii) *The 'B' Series Index* (covering food, groceries and rent of 4 and 5 roomed houses) was first compiled in 1925 and continued until December quarter 1953. It was the food and rent constituent of the 'C' Series Index and was designed to replace the 'A' Series Index for general statistical purposes.
- (iii) *The 'C' Series Index* (covering food and groceries, rent of 4 and 5 roomed houses, clothing, household drapery, household utensils, fuel, lighting, fares, smoking, and some other miscellaneous items) was first compiled in 1921. It was last issued on its original basis for December quarter 1960. For certain transitional purposes a 'C' Series Index was issued for some quarters after that. This was calculated by varying the index numbers of December quarter 1960 in proportion to movements shown by the Consumer Price Index.
- (iv) *The 'D' Series Index*, derived by combining the 'A' and 'C' Series Indexes, was used by the Commonwealth Court of Conciliation and Arbitration from May 1933 to May 1934 and then discontinued.
- (v) *The Interim Index* (covering food and groceries, rent of 4 and 5 roomed houses, clothing, household drapery, household utensils, fuel, lighting, fares, smoking, certain services and some miscellaneous items) was first compiled in 1954 with the year 1952–53 as base = 100. As its title indicated, it was constructed as a transitional index. Its compilation was discontinued following its replacement by the Consumer Price Index in June quarter 1960.

An index of retail price movements from 1901 to 1967 is shown on page 267 of this Year Book. It is derived by linking together successive indexes (the 'A' Series, the 'C' Series and the Consumer Price Index) available for that period.

In 1937 the Commonwealth Court of Conciliation and Arbitration introduced a 'Court' Index for the purpose of its system of making automatic quarterly adjustments to the basic wage within its jurisdiction. By decision of the Court the 'Court' Index ceased to be issued by the Industrial Registrar as at December quarter 1953. These 'Court' Index numbers were an arithmetical conversion of the 'C' Series Retail Price Index.

Consumer Price Index

This retail price index was first compiled in 1960, retrospectively to September quarter 1948. A full description of the index is given in *Labour Report* No. 52, 1965 and 1966.

Origin

The list of component items and the weighting pattern of the 'C' Series Retail Price Index, first adopted in 1921, were slightly revised by Conference of Statisticians in 1936, but otherwise continued almost unchanged until the index was discontinued in 1960. The reasons for this and the circumstances which led to the present Consumer Price Index appear from ensuing paragraphs.

From the outbreak of war in 1939 to late in 1948, periodic policy changes in regard to various war-time controls (including rationing) caused recurrent changes in consumption and in the pattern of expenditure. This rendered changes desirable, but made it impracticable either to produce a new index, or to revise the old one, on any basis that would render the index more representative than it already was of the changing pattern of household expenditure in those years.

When commodity rationing had virtually ceased in the latter part of 1948, action was taken by the Statistician to collect price data of about 100 additional items and to gather information about current consumption and expenditure patterns. This was done to facilitate review of the component items and weighting system of the 'C' Series Retail Price Index in the light of the new pattern of wage-earner expenditure and consumption that appeared to be emerging. But there supervened, in the next few years, conditions which caused wide price dispersion coupled with a very rapid rise in prices and a new sequence of changes in consumption and in the pattern of wage-earner expenditure. Under these conditions it was not possible to devise any new weighting pattern likely to be more continuously representative of conditions then current than was the existing 'C' Series Retail Price Index on the 1936 revision.

A Conference of Statisticians considered the matter in June 1953, and resolved (in part) as follows:

- '(a) that, in view of the persistence of recurrent changes in the pattern of consumer expenditure in the post-war period it is undesirable to make a general revision of the list of items and weighting system of the 'C' Series Retail Price Index at present, unless industrial tribunals expressly desire some revision for special purposes;
- '(b) that an Interim Retail Price Index be compiled with putative weights and components representative, as nearly as may be, of the post-war pattern of consumer usage and expenditure.'

The 'C' Series Index continued to be compiled on its pre-war basis without significant change in procedures. The Interim Retail Price Index was introduced in 1954 and continued until March quarter 1960.

The Interim Index was a transitional index designed to measure retail price variations on the 'C' Series model in terms of post-war consumption weights as emerging in the early 1950's. It embraced a wider range of commodities and services than did the 'C' Series Retail Price Index, but it did not take into account successive major changes in the pattern of expenditure and modes of living that began to occur early in 1950 and through to 1960. These changes could not in fact be detected and measured promptly and incorporated into an index concurrently with their happening. Nor was it envisaged as desirable to adopt fundamentally new procedures in price index construction until it was fully evident that far-reaching procedural changes were necessary to meet the situation that had developed between about 1950 and 1960.

In this period home-owning largely replaced house-renting, the use of the motor car greatly increased and partly replaced use of public transport, and various items of electrical household equipment and television came into widespread use. The impact of these (and other) changes in usage upon the pattern of household expenditure was heightened by disparate movements in prices. Together, they rendered nugatory the attempt to meet the situation by devising a single Interim Retail Price Index. As studies progressed and new data became available it was clear that no single

list of items and no single set of fixed weights would be adequately representative as a basis for measuring retail price changes at all times throughout the post-war period. In consequence, the situation was met by compiling the Consumer Price Index constructed as a chain of linked indexes with significant changes in composition and weighting effected at short intervals.

Purpose, scope and composition

The Consumer Price Index is a quarterly measure of variations in retail prices for goods and services representing a high proportion of the expenditure of wage-earner households. The weighting pattern relates to estimated aggregates of wage-earner household expenditures and not to estimated expenditures of an 'average' or individual household of specified size, type, or mode of living. In this way it is possible to give appropriate representation to owner-occupied houses as well as rented houses and to include motor cars, television sets, and other major expenditures which relate to some households and not to others.

Consumer (retail) price indexes are sometimes loosely called 'cost of living indexes' and are thought to measure changes in the 'cost of living'. Neither the Consumer Price Index nor any other retail price index measures those changes in the cost of living that result directly from changes in the mode or level of living. Changes of that kind are matters for consideration apart from price indexes, but the change in prices of goods and services is a very important part of the change in the cost of living and this part is measured by consumer (retail) price indexes.

The Consumer Price Index covers a wide range of commodities and services arranged in the following five major groups:

- Food;
- Clothing and drapery;
- Housing;
- Household supplies and equipment;
- Miscellaneous.

These groups do not include every item of household spending. It is both impracticable and unnecessary for them to do so. Prices are collected regularly for specified quantities and qualities of a large and representative selection of commodities and services. Movements in the prices of these items, when combined in suitable proportions, provide a representative measure of price change as affecting a high proportion of the expenditure of wage-earner households.

Structure—a chain of linked indexes

Substantial changes have occurred in consumer usage and patterns of expenditure since the 1939–45 War. In order to keep the weighting pattern representative of current expenditures it has been necessary to construct indexes with additional items and changes in the weighting pattern at intervals, rather than on the basis of a list of items and set of weights that remained unchanged throughout the whole period covered. For the six State capital cities five series for short periods (namely, from the September quarter of 1948 to the June quarter of 1952, from the June quarter of 1952 to the June quarter of 1956, from the June quarter of 1956 to the March quarter of 1960, from the March quarter of 1960 to the December quarter of 1963, and from the December quarter of 1963 onwards) have therefore been constructed and linked to form a continuous retail price index series known as the Consumer Price Index. (For information regarding these links for Canberra see *Labour Report* No. 52, 1965 and 1966.)

During each period between links the items and weighting remained unchanged. At times of linking the weighting pattern was altered, and new items (mainly ones that had become significant in household expenditure) were introduced. Under this method, in effect, average percentage price movements are assessed on one pattern up to the time of the link and on another pattern thereafter. The process of linking ensures that the series reflects only price variations and not differences in cost of the old and new lists of items. The introduction of new items and weights by linking does not, of itself, raise or lower the level of the index.

Tabular statements of Retail Price Index numbers

Consumer Price Index

The index has been compiled for each quarter from September quarter 1948 and for each year from 1948–49. 'All Groups' index numbers and 'Group' index numbers for each of the five major groups are compiled and published regularly for the six State capital cities separately and combined and for Canberra. The reference base for each of these indexes is: year 1952–53 = 100.0. Figures

appearing after the decimal point possess little significance for general statistical purposes. They are inserted to avoid distortions that would occur in rounding off the figures to the nearest whole number.

Index numbers for each quarter are first issued in mimeographed statistical bulletins available from the Commonwealth Statistician about three weeks after the end of the quarter. These bulletins contain comment on the index and on significant price movements in that quarter. Tables showing index numbers for preceding quarters and years are presented.

The following table shows Consumer Price Index Numbers (Total all groups) for the six State capital cities separately and combined and for Canberra, for periods from the year 1950-51.

CONSUMER PRICE INDEX: ALL GROUPS INDEX NUMBERS
SIX STATE CAPITAL CITIES AND CANBERRA, YEARS 1950-51 TO 1966-67 AND QUARTERS
MARCH 1965 TO DECEMBER 1967

(Base of each index: year 1952-53 = 100.0)(a)

The separate city indexes measure price movements within each city individually. They do not compare price levels as between cities.

(a) Figures appearing after the decimal point possess little significance for general statistical purposes. They are inserted to avoid distortions that would occur in rounding off the figures to the nearest whole number.

The following table shows Consumer Price Index Group Index numbers for each State capital city and for Canberra for recent years and quarters.

CONSUMER PRICE INDEX: GROUP INDEX NUMBERS
SIX STATE CAPITAL CITIES AND CANBERRA, YEARS 1948-49 TO 1966-67
AND QUARTERS MARCH TO DECEMBER 1967

(Base of each index: year 1952-53 = 100.0) (a)

The index numbers hereunder are designed to measure movements in retail prices of specified groups of items for specified cities individually. They measure variations from time to time and not differences in price level as between cities.

Retail Price Index Numbers, 1901 to 1967

The index numbers shown below are presented as a continuous series, but they give only a broad indication of long-term trends in retail price levels. They are derived by linking a number of indexes that differ greatly in scope. The successive indexes used are: from 1901 to 1914, the 'A' Series Retail Price Index; from 1914 to 1946-47, the 'C' Series Retail Price Index; from 1946-47 to 1948-49, a composite of Consumer Price Index Housing Group (partly estimated) and 'C' Series Index excluding Rent; and from 1948-49 onwards, the Consumer Price Index.

RETAIL PRICE INDEX NUMBERS: SIX STATE CAPITAL CITIES COMBINED, 1901 TO 1967

(Base: year 1911 = 100)

Year	Index number	Year	Index number	Year	Index number

International comparisons

The following table shows index numbers of consumer (retail) prices for various countries. Except where otherwise noted, the year 1958 is taken as base (= 100). The index numbers show fluctuations in prices in each country, and do not measure relative price levels as between countries.

(a) Consumer Price Index converted to base 1958 = 100 by Commonwealth Statistician. (b) Beginning 1963, new index—base: 1962 = 100. Before 1963, index for Paris. (c) Base: 1963 = 100. (d) Beginning 1964, base: 1963 = 100. (e) Index for Europeans only. (f) Beginning October 1966, new index—base: 1966 = 100.

NOTE. Symbol — on each side of an index number (e.g., -95-) indicates that two series have been linked during that period. Symbol — between two index numbers indicates that it is not possible to link two series (because of change in scope, etc.) and therefore the index numbers are not comparable with each other even though they are shown on the same base period.

WHOLESALE PRICES AND PRICE INDEXES

Two indexes of wholesale prices of basic materials have been compiled by the Commonwealth Bureau of Census and Statistics. These are:

- (i) the Melbourne Wholesale Price Index;
- (ii) the Wholesale Price (Basic Materials and Foodstuffs) Index.

Work is proceeding on the preparation of new series of wholesale price index numbers relating to materials used and articles produced by sectors of industry. The first of these new series will relate to materials used in the building industry and in manufacturing industry. To a considerable extent, these first series will constitute a currently representative replacement for the present Basic Materials and Foodstuffs Wholesale Price Index. In the interim the existing index will continue to be compiled and published mainly to meet the needs of those who require it for special purposes. The groups of the existing index relate primarily to a commodity type classification and have never purported to represent the materials used or articles produced by defined sectors of industry.

A special purpose index 'Wholesale Price Index of Electrical Installation Materials' is also published by the Bureau (*see* page 270).

A brief note on the Melbourne Wholesale Price Index, which is now obsolete, is given on page 270. The Wholesale Price (Basic Materials and Foodstuffs) Index is compiled monthly and extends back to 1928.

Wholesale Price (Basic Materials and Foodstuffs) Index

Price quotations

The prices used in the index have, in the main, been obtained directly from manufacturers and merchants, and, with a few important exceptions, from Melbourne sources. Apart from locally-produced building materials and one or two minor commodities, however, the price movements may be taken as representative of variations in wholesale prices of the selected items in most Australian markets.

Commodities in the index are priced in their primary or basic form wherever possible and in respect of imported materials as nearly as may be at the point where they first make effective impact on the local price structure. Thus the prices of imported goods are not taken at the time of import but rather on an ex-bond (or into factory) basis. Broadly, where home-consumption prices exist for local products, they have been used in this index. During the year 1950-51 wool for local manufacture was subsidised, and the home-consumption price for wool was used to calculate the index numbers shown in the table on pages 269-70.

Commodities and grouping

For purposes of this index, 'basic' materials (as opposed to certain of the foodstuffs) are commodities in the primary or basic forms in which they first enter into productive processes carried out in Australia. The list of items is divided into seven main groups, each of which is sub-divided into goods which are mainly imported and goods which are mainly home-produced. The percentage of the total aggregate in 1966-67 contributed by each group was as follows: metals and coal, 15.82; oils, fats and waxes, 7.50; textiles, 2.85; chemicals, 4.04; rubber and hides, 1.48; building materials, 11.38; foodstuffs and tobacco, 56.93. Goods principally imported comprised 21.83 per cent of the total aggregate in 1966-67, and goods principally home-produced 78.17. A full list of the commodities and the quantity-multipliers (weights) is published in *Labour Report* No. 52, 1965 and 1966, page 39.

Method of construction

The index is constructed on the simple aggregative fixed-weights formula. The weights (quantity-multipliers) are based on estimates of the average annual consumption of the commodities in Australia during the period 1928-29 to 1934-35 inclusive. The validity of the weighting and the representativeness of the index have become increasingly affected by changes in usage and in industrial structure.

Index numbers

Index numbers for each group of commodities, and for all groups combined, for the index of wholesale prices of basic materials and foodstuffs are given in the following table. Current index numbers on the base: average of three years ended June 1939 = 100 are published monthly in the mimeographed statement *Wholesale Price (Basic Materials and Foodstuffs) Index* and in the *Monthly Review of Business Statistics*. A table showing index numbers computed to the base: 1928 = 100 is published in the *Labour Report*.

WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX NUMBERS
YEARS 1928-29 TO 1966-67 AND MONTHS 1967-68

(Base of each index: average of 3 years ended June 1939 = 100)

Period	Basic materials							Basic materials and foodstuffs			
	Metals and coal	Oils, fats and waxes	Textiles	Chemicals	Rubber and hides	Building materials	Total	Foodstuffs and tobacco (a)	Goods principally imported (b)	Goods principally home produced (a)	Total, all groups (a)
1928-29	127	106	129	121	115	95	114	107	91	118	110
1929-30	126	111	99	116	87	94	107	110	94	118	111
1930-31	116	117	80	117	73	96	105	91	100	99	99
1931-32	108	113	77	119	74	95	101	86	100	92	95
1932-33	104	109	75	119	69	95	98	80	97	87	90

(a) Excludes potatoes and onions from 1936-37. (b) Represents only such imported commodities as are included in the Wholesale Price Index and does not measure changes in the prices of all imports.

Melbourne Wholesale Price Index

An index of Melbourne wholesale prices was first compiled in 1912. It related chiefly to basic materials and foods weighted in accordance with consumption in the years immediately preceding that year. Neither the list of items nor the weighting was varied, except for some changes in the building materials group in 1949. The series has some historical significance as a measure of changes, since the year 1861, in the prices of its component items combined in the proportions in which they were in common use about the year 1910. A description of the index and a list of the commodities included in it were published in *Labour Report* No. 38, 1949, pages 43-5. Index numbers up to the year 1961, the last period for which the index was compiled, were published in *Year Book* No. 48, 1962.

Wholesale Price Index of Electrical Installation Materials

This special purpose index was introduced in 1964, and index numbers have been published at quarterly intervals from August 1959 onwards. In addition to its use in connection with the Bureau's constant price estimates in the national accounting field, the index has a direct value as a measure of changes in aggregate cost of materials used in an important part of the building industry (other than house-building).

Commodities and grouping

The items in this index have been selected as representative of materials used in electrical installation in structures such as hospitals, schools, factories and multi-storied commercial buildings and flats. These items are divided into three main groups for which separate indexes are compiled in addition to the All Groups index. The combination of materials selected is fixed as to quantity and quality. A list of the components of the index is set out opposite with the percentage contribution of each to the All Groups index in the reference base year 1959-60.

Price quotations

The items are priced as at the middle of the month for which index numbers are published. The basis of pricing is the price to electrical contractors, delivered on site or into store, metropolitan area Sydney and Melbourne. The price series used relate to specific standards for each item and in some cases are combinations of prices for different makes, types, etc. The units of quantity specified as the basis for collecting prices are representative lots normally purchased by electrical contractors, inclusive of quantity discounts and packing and quantity extras, etc.

Method of construction

The index is a fixed-weights index with the reference base: year 1959-60 = 100. In general, the weights were derived from information relating to the values of materials used in selected representative projects in Sydney and Melbourne during the three years 1960-61 to 1962-63. The projects selected for this purpose had a minimum electrical materials and labour content of \$10,000. Selected representative items carry the weights of similar items not directly priced. The index is compiled by the method known as 'weighted average of price relatives'. Each quarter, base period percentage value weights are applied to indexes of price movement relative to 1959-60.

(a) The figures appearing after the decimal points are inserted to avoid the distortions that would sometimes occur in rounding off the figures to the nearest whole number.

EXPORT PRICES AND PRICE INDEXES

Previous export price indexes

1901 to 1917

An annual index of export prices has been published by the Bureau since its inception. The first index was compiled annually for the years 1901 to 1916-17. The method of computation was to select all articles of export which were recorded by units of quantity, and to apply to the quantities of these export commodities actually exported during any year the average price per unit ruling in the year 1901 (adopted as the base year). The 'total value' so obtained was divided into the total recorded value of these exports for the year concerned and the result (multiplied by 1,000) was the export price index number for that year.

1918 to 1930

The method was changed in 1918. Weights for all principal exports were calculated, based on the average quantities of exports for the nineteen and a half years from 1 January 1897 to 30 June 1916. To these weights were applied the 'average unit export values' of each export in successive years, and a weighted aggregative index of 'price' variations was derived. This index was published for the years 1897 to 1929-30. Particulars of this index were last published in Year Book No. 24, page 147.

1928 to 1962

After the 1914-18 War the relative importance of different exports changed considerably, and the pattern of exports varied considerably from year to year. For these reasons two new series of monthly export price indexes—one using fixed weights and the other using changing weights—were published in 1937, compiled back to 1928. The data on which both series were based differed from those used in the previous series of annual index numbers. The most important change was the use of actual (or calculated) export prices in place of the 'unit values' declared at the Customs. Brief notes on these two indexes are given below. A full description of both indexes was last published in Year Book No. 48, 1962, pages 500-4.

The Fixed Weights Index. This was a weighted aggregative index of price variations. It was compiled back to 1928, with that year taken as base. In later years it was published on the base: average of three years ended June 1939 = 100. The original weights (used for the period 1928 to 1936) were the average annual exports (production in the case of gold) during the five years 1928-29 to 1932-33. From July 1936 the weights were revised and were based on average annual exports (production in the case of gold) during the three years 1933-34 to 1935-36. This index was published from 1937 until July 1962, after which it was replaced by the current Export Price Index described below.

The Changing Weights Index. This index was designed for shorter period comparisons—from one or more months of the current year to the corresponding months of the previous year. In computing these index numbers the 'quantity multipliers' were the quantities actually exported (sold, in some cases) in the months (or periods) to which the index numbers related. This index was discontinued in 1962.

The current Export Price Index

The current Export Price Index was first published in October 1962, but index numbers were compiled back to July 1959. The reference base of this index is: year 1959-60 = 100. This index is a fixed-weights index, and its purpose (as was that of the previous fixed-weights index) is to provide comparisons monthly, over a limited number of years, of the level of export prices of the selected items, making no allowance for variations in quantities exported. The index numbers are thus measures of price change only. The price series used in the index relate to specified standards for each commodity and in most cases are combinations of prices for a number of representative grades, types, etc. For some commodities price movements in the predominant market, or markets, are used, while for other commodities average realisations in all export markets are used. As nearly as possible, prices used are on the basis f.o.b. at the main Australian ports of export. The index is compiled by the method known as 'weighted average of price relatives'.

Composition and weighting

There are twenty-nine items in the current index compared with twenty items in the previous index. These twenty-nine items have constituted approximately 83 per cent of the total value of Australian exports in recent years. The weights for the current index are based on average annual values of exports during the five years 1956-57 to 1960-61.

The following table sets out a list of the items, and groups of items, in the index, together with the percentage contribution of each item and group to the All Groups index in the reference base year 1959-60. The weights used for some of the items are adjusted to cover some related commodities which are not priced directly. The most important instances of this are wool, which includes wool exported on sheepskins, and copper, zinc, lead and silver, which include the estimated metallic content of ores and concentrates exported. In the previous index the weight for gold was derived from production instead of export figures. For the period 1956-57 to 1960-61 production and exports of gold were similar, and therefore in the current index the weight for gold (as for the other items) is based on average annual exports during the period.

EXPORT PRICE INDEX
LIST OF ITEMS AND PERCENTAGE CONTRIBUTION OF ITEMS AND GROUPS TO ALL
GROUPS INDEX IN 1959-60

<i>Group and item</i>	<i>Percentage contribution to All groups index in 1959-60</i>	<i>Group and item</i>	<i>Percentage contribution to All groups index in 1959-60</i>
<i>Wool</i>	50.73	<i>Canned—Pineapples</i>	0.20
<i>Meats—</i>		<i>Apricots</i>	0.11
<i>Beef</i>	6.71	<i>Peaches</i>	0.37
<i>Lamb</i>	0.76	<i>Pears</i>	0.68
<i>Mutton</i>	0.59	<i>Total, dried and canned fruits.</i>	2.54
<i>Canned—Beef</i>	1.65	<i>Sugar</i>	3.99
<i>Mutton</i>	0.21	<i>Hides and tallow—</i>	
<i>Total, meats</i>	9.92	<i>Cattle hides</i>	0.72

<i>Oats</i>	0.66	<i>Total, metals and coal</i>	10.54
<i>Total, cereals</i>	12.54	<i>Gold</i>	1.99
<i>Dried and canned fruits—</i>		Total	100.00
<i>Dried—Sultanas</i>	1.06		
<i>Currants</i>	0.12		

Index numbers

Index numbers for each of the groups and 'All groups' are shown in the table on page 275. The yearly index numbers are simple averages of the twelve monthly index numbers in each year.

Link between current and previous indexes

In order to show approximate movements in export prices over a long period, the 'All groups' indexes of the previous and current series have been linked together at the year 1959-60, the earliest year for which the new index has been compiled. The table on page 276 shows this linked series and a long-term price index for wool, which is the most important single component in the movement of the 'All groups' index.

WAGES, EARNINGS AND HOURS

Arbitration and Wages Boards Acts and associated legislation

Particulars regarding the operation of Commonwealth and State Laws for the regulation of wages, hours and other conditions of employment were first compiled for the year 1913, and revised particulars have appeared annually in the *Labour Report*. A summary of the Commonwealth legislation and brief particulars of Commonwealth and State industrial tribunals are given in the following paragraphs.

Commonwealth industrial legislation and tribunals

Under placitum (xxxv) of section 51 of the Commonwealth of Australia Constitution, the Commonwealth Parliament is empowered to make laws with respect to 'conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State'. The Parliament has made such a law, namely the *Conciliation and Arbitration Act 1904-1967*.

This Act defines an 'industrial dispute' as:

'(a) A dispute (including a threatened, impending or probable dispute) as to industrial matters which extends beyond the limits of any State; and (b) a situation which is likely to give rise to a dispute as to industrial matters which so extends; and includes—(c) such a dispute in relation to employment in an industry carried on by, or under the control of, a State or an authority of a State; (d) a dispute in relation to employment in an industry carried on by, or under the control of, the Commonwealth or an authority of the Commonwealth, whether or not the dispute extends beyond the limits of any one State; and (e) a claim which an organization is entitled to submit to the Commission under section eleven A of the *Public Service Arbitration Act 1920-1966* or an application or matter which the Public Service Arbitrator has refrained from hearing, or from further hearing, or from determining under section fourteen A of that Act, whether or not there exists in relation to the claim, application or matter a dispute as to industrial matters which extends beyond the limits of any one State.'

The Conciliation and Arbitration Act was extensively amended by an Act (No. 44 of 1956) assented to on 30 June 1956. This amendment altered the structure of the arbitration machinery by separating the judicial functions from the conciliation and arbitration functions. The Commonwealth Industrial Court was established to deal with judicial matters under the Act, and the Commonwealth Conciliation and Arbitration Commission to handle the functions of conciliation and arbitration. A summary of the provisions of the *Conciliation and Arbitration Act 1904-1967* is given in the following paragraphs.

The Commonwealth Industrial Court is at present composed of a Chief Judge and five other Judges. The jurisdiction of the Court shall be exercised by not less than two Judges, except in the following circumstances. A single Judge may exercise the jurisdiction of the Court with respect to the dismissal or injury of an employee on account of industrial action, interpretation of awards, questions concerning eligibility of membership of an organisation, disputes between an organisation and its members, and a prescribed matter of practice or procedure. A single Judge may refer a question of law for the opinion of the Court constituted by not less than two Judges. The Court is a Superior Court of Record with the same power to punish contempts of its power and authority as is possessed by the High Court. In general, decisions of the Industrial Court are final; however, an appeal lies to the High Court, but only when the latter grants leave to appeal. The Act provides for the registration of associations of employees and employers, and for inquiries to be held concerning disputed elections in organisations; and certain powers in connection therewith are, by the Act, given to the Industrial Court. Provision is also made for the Commission to exercise the powers of the Court with regard to an application for cancellation of registration of an organisation. Any such change of jurisdiction must be notified by proclamation. This provision could be used if the powers of the Court in this regard were declared, in whole or in part, to be invalid.

Special provision is made concerning the right of audience before the Commonwealth Industrial Court. Briefly, except in proceedings which, in general, involve questions of law or offences against the Act, parties are able to elect whether to appear personally or to be represented by lawyers or officials. Even in proceedings involving questions of law, except appeals from decisions by other Courts to the Industrial Court, on matters arising under this Act or the *Public Service Arbitration Act* 1920-1966, the parties may, if they wish and the Court grants leave, be represented by officials.

The Commonwealth Conciliation and Arbitration Commission at the end of 1967 was composed of a President, five Deputy Presidents, a Senior Commissioner, ten Commissioners and three Conciliators. The Commission is empowered to prevent or settle industrial disputes by conciliation or arbitration, and to make suggestions and to do such things as appear right and proper for (a) effecting a reconciliation between parties to industrial disputes; (b) preventing and settling industrial disputes by amicable agreement; and (c) preventing and settling, by conciliation or arbitration, industrial disputes not prevented or settled by amicable agreement. The Commission may exercise its powers of its own motion or on the application of a party.

The President may assign a Commissioner to deal with industrial disputes relating to particular industries, or members of the Commission to deal with a particular industrial dispute. However, subject to the approval of the President, it is the duty of the Senior Commissioner to organise and allocate the work of the Commissioners and Conciliators. When an industrial dispute occurs or is likely to occur, a Commissioner shall take steps for the prompt prevention or settlement of that dispute by conciliation or, if in his opinion conciliation is unlikely to succeed or has failed, by arbitration. A Commissioner may arrange with the Senior Commissioner for a Conciliator to assist the parties to reach an amicable agreement and shall do so if the parties so request. If an agreement is reached, a memorandum of its terms shall be made in writing, and may be certified by the Commission. A certified memorandum shall have the same effect as an award.

Only the Commission in Presidential Session, that is, the Commission constituted by at least three presidential members nominated by the President, has the power to make awards, or to certify agreements, concerning standard hours, basic wages and long-service leave. Upon application by a party to an industrial dispute, a Commissioner shall consult with the President as to whether in the public interest any matter in dispute should be dealt with by a Commission constituted by not less than three members nominated by the President, at least one of whom shall be a presidential member and one, where practicable, the Commissioner concerned. The President may direct the Commission to hear the matter in dispute; however, after consideration, the Commission may refer the matter in dispute back for determination to the Commissioner originally dealing with the dispute.

An appeal against the decision of a Commissioner shall be heard by not less than three members nominated by the President, of whom at least two shall be presidential members of the Commission. However, an appeal will not be heard unless the Commission considers it is necessary as a matter of public interest. The President, after taking account of the views of the parties to a dispute, may appoint a member of the Commission to take evidence on behalf of a presidential bench of the Commission, so that it may have this evidence before it when it commences its hearing.

Full benches of the Commission not constituted by the same persons may sit in joint session at the direction of the President when he considers it desirable and has the opinion that a question is common to the matters before those benches. A joint session may be held whether the benches concerned are constituted pursuant to the Conciliation and Arbitration Act or the Public Service Arbitration Act, and whether they are constituted to hear references or appeals. However, it is left to each appropriate full bench to determine any of the matters before it.

Provision is also made in the Act for a presidential member of the Commission to handle industrial matters in connection with the maritime industries, the Snowy Mountains Area and the stevedoring industry, except in those matters for which the Act requires that the Commission shall be constituted by more than one member. The Commonwealth Conciliation and Arbitration Commission also deals with disputes and industrial matters, interstate or intra-state, associated with undertakings or projects of the Commonwealth Government which have been declared by the Minister to be Commonwealth projects for the purposes of this Act. In effect, this places employees of Commonwealth projects, so declared, under the jurisdiction of the Commission. The Minister has the power to exempt certain persons or classes of persons working on these projects from the jurisdiction of the Commission.

The Commission may make an award in relation to an industrial dispute concerning employees of a Commonwealth project or when the Public Service Arbitrator refrains from dealing with claims made by a Public Service employee organisation or consents to the claims being presented to the Commission, though such an award may be inconsistent with a law of the Commonwealth relating to salaries, wages, rates of pay or terms or conditions of service of employees in the Public Service as defined by section three of the *Public Service Arbitration Act* 1920–1966, not being the *Commonwealth Employees' Compensation Act* 1930–1964, the *Commonwealth Employees' Furlough Act* 1943–1959, the *Superannuation Act* 1922–1966 or any other prescribed Act.

An amendment of the Conciliation and Arbitration Act operative from November 1967 provided for the appointment of a person to be the Flight Crew Officers Industrial Tribunal empowered to prevent or settle industrial disputes relating to pilots, navigators, or flight engineers of aircraft.

The Conciliation and Arbitration Act provides that where a State law, or an order, award, decision or determination of a State industrial authority is inconsistent with or deals with a matter dealt with in an award of the Commission, the latter shall prevail, and the former, to the extent of the inconsistency or in relation to the matter dealt with, shall be invalid.

For further particulars regarding Commonwealth arbitration legislation, see the annual *Labour Report*. For information concerning the Australian Stevedoring Industry Authority and the Coal Industry Tribunal see the Transport and Communication chapter and the Mineral Industry chapter respectively of this Year Book, and for further information on the Commonwealth Public Service Arbitrator see the *Labour Report*.

State industrial tribunals

New South Wales

The controlling authority is the Industrial Commission of New South Wales, consisting of a President and seven other Judges. Subsidiary tribunals are the Conciliation Commissioners, the Apprenticeship Commissioner, Conciliation Committees, and Apprenticeship Councils constituted for particular industries. Each Conciliation Committee consists of a Conciliation Commissioner as Chairman and equal numbers of representatives of employers and employees. The Apprenticeship Commissioner and the members of the Conciliation Committee for an industry constitute the Apprenticeship Council for the industry. These subsidiary tribunals may make awards binding on industries, but an appeal to the Industrial Commission may be made against any award. Special Commissioners with conciliatory powers and limited arbitration powers may be appointed. Compulsory control commenced in 1901, after the earlier Acts of 1892 and 1899 providing for voluntary submission of matters in dispute had proved abortive.

Victoria

The authorities are separate Wages Boards for the occupations and industries covered, each consisting of a chairman and equal numbers of representatives of employers and employees, and a Court of Industrial Appeals, the latter presided over by a Judge of the County Court. The system was instituted in the State in 1896, and represented the first example in Australia of legal regulation of wage rates.

Queensland

Legal control was first instituted in 1908 with the passing of the Wages Boards Act. 'The Industrial Conciliation and Arbitration Act of 1961' established the Industrial Conciliation and Arbitration Commission and preserved and continued in existence the Industrial Court. The Industrial Court is constituted by the President (a Judge of the Supreme Court of Queensland) sitting alone, and the Full Industrial Court by the President and two Commissioners. The Conciliation and Arbitration Commission is constituted by a Commissioner sitting alone; and the Full Bench of the Commission by at least three Commissioners. Not more than five Commissioners shall be appointed. A Commissioner shall not be capable of being a member of the Executive Council or of the Legislative Assembly, and shall not take part in the management of any business.

South Australia

In South Australia from July 1966 the system of control consists of an Industrial Commission, an Industrial Court and Conciliation Committees. The Industrial Commission is composed of a President and two Commissioners and has power to make awards. The President of the Commission is also Judge of the Industrial Court which deals with legal matters. The two Commissioners are chairmen of each of the Conciliation Committees consisting of an equal number of representatives of employers and employees. These committees issue awards. Where complete agreement cannot be reached in these committees the chairman sits as a Commissioner to determine the unresolved matters. Provision is made for references and appeals to the full Commission.

Western Australia

Legal control dates back to 1900. The present system of control comprises a four-man Western Australian Industrial Commission and an Industrial Appeal Court consisting of three Supreme Court Judges who are nominated by the Chief Justice of Western Australia. A Commissioner may, in relation to any dispute or other matter, refer such matters to the Commission in Court Session. Similarly, appeals from decisions of a single Commissioner are heard by the other three Commissioners acting as the Commission in Court Session, but such hearings are restricted to the evidence and matters raised in the proceedings before the single Commissioner. Up to December 1966 the Commission in Court Session fixed and adjusted the basic wage. In December 1966, however, legislation provided that the Western Australian basic wage rates should be the same as the Commonwealth Six Capitals rates as soon as these exceeded the State rates. Appeals from the Commission to the Industrial Appeal Court are limited to matters which are erroneous in law or in excess of jurisdiction. The Court has the power to impose penalties for disobedience of orders made by the Commission.

The Western Australian Coal Industry Tribunal, established under the *Mining Act, 1904-1965*, has power to determine any industrial matter in the coal mining industry. It consists of a chairman and four other members (two representatives each of employers and employees). Boards of reference may be appointed by the Tribunal, and decisions of the Tribunal may be reviewed by the Court of Arbitration on the application of a party subject to the decision.

Tasmania

The authority consists of Wages Boards for separate industries, comprising a Chairman (who is common to all Wages Boards) appointed by the Governor, and equal numbers of representatives of employers and employees appointed by the Minister administering the Act. The system was instituted in 1910.

Incidence of industrial awards, determinations and agreements

In May 1963 a survey was conducted to ascertain the approximate proportions of employees affected by awards, determinations and registered industrial agreements under the jurisdiction of Commonwealth and State industrial authorities. The proportions of employees not so affected by awards, etc. (including those affected by unregistered industrial agreements) were also obtained. The scope, results, etc. of this survey were published in *Labour Report* No. 51, 1964, and in a mimeographed statement (S.B. 383 of 11 February 1964).

Rates of wage and hours of work

This section contains indexes (with base: year 1954 = 100) of minimum weekly and hourly rates of wage and standard hours of work for adult males and adult females for Australia and each State. In the indexes there are fifteen industry groups for adult males and eight industry groups for adult females. For relevant periods these indexes replace cognate indexes (base: year 1911 = 1,000 for males and April 1914 = 1,000 for females) published in Year Books before No. 46, 1960. The current indexes are based on the occupation structure existing in 1954. Weights for each industry and each occupation were derived from two sample surveys made in that year. The first was the Survey of Awards in April 1954 which showed the number of employees covered by individual awards, determinations and agreements. This provided employee weights for each industry as well as a basis for the Survey of Award Occupations made in November 1954. This second survey showed the number of employees in each occupation within selected awards, etc. thereby providing occupation weights.

The industrial classification used in the current indexes, shown in the table on page 281, does not differ basically from the previous classification, the alterations being largely in the arrangement of classes. The former Pastoral, agricultural, etc. group and the domestic part of the Amusement, hotels, personal service, etc. group are excluded from the current indexes because of coverage difficulties.

The minimum wage rates and standard hours of work used in the current indexes are for representative occupations within each industry. They have been derived entirely from representative awards, determinations and agreements in force at the end of each month or quarter, commencing with March 1939 for adult males and March 1951 for adult females. Particulars have been available as at the end of each month for adult males from January 1957 and for adult females from July 1967. The index for adult males includes rates and hours for 3,415 award designations. However, as some of these designations are operative within more than one industry, or in more than one State, the total number of individual award occupations is 2,313. For adult females the corresponding numbers are 1,100 and 515. Using the industry and occupation weights derived from the surveys described above, these rates and hours were combined to give weighted averages for each industry group for each State and Australia.

Because the indexes are designed to measure movements in prescribed minimum rates of 'wages' as distinct from 'salaries', those awards, etc. which relate solely or mainly to salary earners are excluded.

A more detailed description of the current indexes of minimum rates of wage and standard hours of work is given in the *Labour Report*, which also contains an extensive tabular presentation of the minimum rates of wage for adult males and females in the principal occupations in the capital city of each State. Further particulars of wage rates and index numbers will be found in a mimeographed statement *Minimum Wage Rates, March 1939 to June 1965*. Current figures are published in the monthly bulletin *Wage Rates and Earnings*.

Weekly wage rates—adult males

The following table shows, for each State and Australia, the weighted average minimum weekly rates of wage payable to adult male workers for a full week's work and index numbers at the dates specified.

WEEKLY WAGE RATES: ADULT MALES, ALL GROUPS(a), STATES DECEMBER 1950 TO 1967

Adult males—components of total wage rate. A dissection of weighted average minimum weekly wage rates for adult males into three components of the total wage, i.e. basic wage, margin, and loading, with separate particulars for employees covered by awards etc. within Commonwealth and State jurisdictions, has been calculated for months to June 1967. Compilation of averages of components for months subsequent to June 1967 was not possible because of the decision of the Commonwealth Conciliation and Arbitration Commission to eliminate basic wages and margins from its awards (*see* page 308). For figures of components to December 1966 *see* previous issues of this Year Book. A detailed description of this dissection of weekly wage rates into components, and tables for each State and Australia according to jurisdiction, extending back to 1939, have been published in the mimeographed statement *Minimum Wage Rates, March 1939 to June 1965* and in *Wage Rates and Earnings* bulletins up to the October 1967 issue.

Adult males—jurisdiction. Weighted average minimum weekly wage rates for adult males covered by *Commonwealth Awards etc.* and for those covered by *State awards etc.* (as defined below) are shown separately in the following table. The averages shown in these tables were previously published in the relevant parts of the tables of components of wage rates which have been discontinued (*see* above). For the purposes of the index, *Commonwealth awards etc.* include awards of, or agreements registered with, the Commonwealth Conciliation and Arbitration Commission, and determinations of the Commonwealth Public Service Arbitrator. *State awards etc.* include awards or determinations of, or agreements registered with, State industrial tribunals, together with certain unregistered agreements when these are dominant in the particular industries to which they refer.

Standard hours of work

In the fixation of weekly wage rates most industrial tribunals prescribe the number of hours constituting a full week's work for the wage rates specified. The hours of work so prescribed form the basis of the compilation of the weighted averages and index numbers on page 286. The main features of the reduction of hours to forty-four and later to forty per week are summarised on pages 284-5. In considering such changes, it must be remembered that even within individual States the authority to alter conditions of work is divided between Commonwealth and State industrial tribunals and the various legislatures, and that the State legislation usually does not apply to employees covered by awards of the Commonwealth Conciliation and Arbitration Commission. However, it may do so in respect of matters not treated in Commonwealth awards.

The 44-hour week

No permanent reduction to a 44-hour week was effected until 1925, although temporary reductions had been achieved earlier. In 1920 the New South Wales legislature granted a 44-hour week to most industries, but in the following year this provision was withdrawn. Also in 1920 the President of the Commonwealth Court of Conciliation and Arbitration (Higgins J.), after inquiry, granted a 44-hour week to the Timber Workers' Union, and in the following year he extended the same privilege to the Amalgamated Society of Engineers. In 1921, however, a reconstituted Commonwealth Court of Conciliation and Arbitration unanimously rejected applications by five trade unions for the shorter standard week and re-introduced the 48-hour week in the case of the above-mentioned two unions then working forty-four hours. During 1924 the Queensland Parliament passed legislation to operate from 1 July 1925 granting the 44-hour standard week to employees whose conditions of work were regulated by awards and agreements of the Queensland State industrial authority. Similar legislative action in New South Wales led to the re-introduction of the 44-hour week in that State as from 4 January 1926.

In 1927, after an exhaustive inquiry, the Commonwealth Court of Conciliation and Arbitration granted a 44-hour week to the Amalgamated Engineering Union and intimated that this reduction in standard hours of work would be extended to industries operating under conditions similar to those in the engineering industry. Applications for the shorter hours by other unions were, however, treated

individually, the nature of the industry, the problem of production, the financial status, and the amount of foreign competition being fully investigated. The economic depression delayed the extension of the standard 44-hour week until the subsequent improvement in economic conditions made possible its general extension to employees under Commonwealth awards.

In States other than New South Wales and Queensland no legislation was passed to reduce the standard hours of work, so that, for employees not covered by Commonwealth awards, the change had to be effected by decisions of the appropriate industrial tribunals. In these cases the date on which the reduction to forty-four hours was implemented depended on the decision of the tribunals in particular industries, employees in some industries receiving the benefit of the reduced hours years ahead of those in others. In these States the change to the shorter week extended over the years from 1926 to 1941.

The 40-hour week

Standard Hours Inquiry, 1947. Soon after the end of the 1939–45 War applications were made to the Commonwealth Court of Conciliation and Arbitration for the introduction of a 40-hour week, and the hearing by the Court commenced in October 1945. Before the Court gave its decision the New South Wales Parliament passed legislation granting a 40-hour week, operative from 1 July 1947, to industries and trades regulated by State awards and agreements, and in Queensland similar legislation was introduced in Parliament providing for the 40-hour week to operate from 1 January 1948.

The Commonwealth Court of Conciliation and Arbitration, in its judgment of 8 September 1947, granted the reduction to the 40-hour week from the beginning of the first pay-period commencing in January 1948. The Queensland Act was passed, and was proclaimed on 10 October 1947. On 27 October 1947 the South Australian Industrial Court, after hearing applications by unions, approved the incorporation of the 40-hour standard week in awards of that State. The Court of Arbitration of Western Australia, on 6 November 1947, approved that, on application, provision for a 40-hour week could be incorporated in awards of the Court, commencing from 1 January 1948.

In Victoria and Tasmania the Wages Boards met and also incorporated the shorter working week in their determinations, so that from the beginning of 1948 practically all employees in Australia whose conditions of labour were regulated by industrial authorities had the advantages of a standard working week of forty hours or, in certain cases, less.

Basic Wage and Standard Hours Inquiry, 1952–53. In the 1952–53 Basic Wage and Standard Hours Inquiry the employers sought an increase in the standard hours of work per week, claiming that one of the chief causes of the high costs and inflation had been the loss of production due to the introduction of the 40-hour week. This claim was rejected by the Court, as it considered that the employers had not proved that the existing economic situation called for a reduction of general standards in the matter of the ordinary working week.

Basic Wage and Standard Hours Inquiry, 1961. The Commonwealth Conciliation and Arbitration Commission rejected an employers' claim for an increase in the number of ordinary working hours from 40 to 42 per week, with a concomitant increase in weekly wages by an amount equal to two hours' pay at ordinary rates. This was to be a temporary measure to have effect for four years, after which time hours would revert to 40 and the increased wage would remain.

Hourly wage rates

The average rates of wage in the preceding tables are based on the minimum rates prescribed for selected occupations in awards, etc. for a full week's work, excluding overtime. However, the number of hours constituting a full week's work differs in some instances between various occupations in each State, and between the same occupations in the several States. For some purposes a better comparison may be obtained by reducing the results in the preceding paragraphs to a common basis, namely the rate of wage per hour. The particulars of weighted average minimum hourly rates of wage given in the following tables relate to all industry groups except Rural, and Shipping and stevedoring. The Rural industry is not included in the index, and Shipping and stevedoring has been excluded because, for some of the occupations in this group, definite particulars for the computation of average working hours and hourly rates of wage are not available.

The following table shows the weighted average minimum hourly rates of wage payable to adult male workers and index numbers of hourly rates in each State.

HOURLY WAGE RATES(a): ADULT MALES STATES, DECEMBER 1950 TO 1967

(a) The amounts shown should not be regarded as actual current averages, but as an index expressed in money terms, indicative of trends.

Weighted average standard weekly hours of work

The 40-hour week has operated in Australia generally from 1 January 1948, and in New South Wales from 1 July 1947 (*see* page 285.) However, as stated on page 285, the number of hours constituting a full week's work (excluding overtime) differs between occupations and or between States. The weighted average standard hours of work (excluding overtime) prescribed in awards, determinations and agreements for a full working week, in respect of adult male workers in all industry groups except Rural, and Shipping and stevedoring, at 31 December 1967, were: New South Wales, 39.95; Victoria, 39.97; Queensland, 39.98; South Australia, 39.96; Western Australia, 39.89; Tasmania, 39.97; Australia, 39.96. Corresponding figures for adult female workers at 31 December 1967 were: New South Wales, 39.53; Victoria, 39.81; Queensland, 39.70; South Australia, 39.77; Western Australia, 39.78; Tasmania, 39.63; Australia, 39.67.

Average weekly earnings

The figures in this section are derived from particulars of employment and of wages and salaries recorded on pay-roll tax returns, from other direct collections, and from estimates of the unrecorded balance. The figures relate to civilians only.

Particulars of wages and salaries paid are not available for males and females separately from these sources; average weekly earnings have therefore been calculated in terms of male units, i.e. total male employees plus fifty-five per cent of female employees. This proportion is derived from the estimated ratio of female to male earnings in Australia. As it was not possible to estimate the ratio of female to male earnings in the several States the same ratio has been used in each State. Because the actual ratio may vary between States precise comparisons between average earnings in different States cannot be made on the basis of the figures shown in the following table. Quarterly figures corresponding to those shown in the table are published in the monthly bulletin *Wage Rates and Earnings* and in the *Monthly Review of Business Statistics*.

Particulars of average weekly earnings per employed male unit are shown in the following table for each of the years 1957-58 to 1966-67.

AVERAGE WEEKLY EARNINGS PER EMPLOYED MALE UNIT^(a)
STATES, 1957-58 TO 1966-67
(\$)

1966-67	62.40	63.00	55.60	56.90	58.30	57.40	60.70

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, payments made in advance or retrospectively during the periods specified, etc. *See* explanatory notes above. (b) Includes Australian Capital Territory. (c) Includes Northern Territory.

The following table shows, for 'All industries' and for 'Manufacturing', the movement in average weekly earnings from 1957-58 to December quarter 1967. The 'All industries' index is based on pay-roll tax returns and other data. It relates to average weekly earnings per employed male unit. The index for manufacturing industries for the years to 1966-67 is based on the average earnings of male wage and salary earners employed in factories as disclosed by annual factory censuses (*see* the chapter *Manufacturing Industry*); figures for quarters subsequent to June quarter 1967 are preliminary estimates based on pay-roll tax returns.

The index numbers for 'All industries' and 'Manufacturing' show the movement in average earnings for each group over a period of time. However, they do not give, at any point of time, a comparison of actual earnings in the two groups. The base of each series is: year 1953-54 = 100, and both series have been seasonally adjusted.

(b) Average earnings per employed male unit.

Surveys of wage rates, earnings and hours, 1960 to 1967

Since 1960 a number of statistical surveys of wages and hours of work in Australia have been undertaken by this Bureau. The object of these surveys has been to obtain information on wage rates, actual weekly earnings and hours of work on a more comprehensive scale than previously available in Australia. A summary of the scope and coverage of each of these surveys is shown on the following pages.

Survey of Wage Rates and Earnings, September 1960

This survey, relating to the last pay-period in September 1960, obtained information about marginal rates of wage and the dissection and distribution of actual weekly earnings of adult male employees (excluding part-time and casual employees). In addition to the exclusion of government and semi-government employees, and private employees in rural industry and in private domestic service, the survey did not cover the following—shipping and stevedoring industries; the motion picture industry; certain businesses such as those of accountants, consultant engineers, etc.; and trade associations, etc. The survey was based on a stratified random sample of private employers in other industries who were subject to pay-roll tax (that is, employers paying more than \$400 a week in wages and salaries). For information on the results of the survey see Year Book No. 51, pages 439 to 442.

Survey of Weekly Earnings, October 1961

This survey was conducted for the last pay-period in October 1961 and provided information about the distribution of actual weekly earnings for adult male employees (excluding part-time and casual employees). The survey did not cover government or semi-government employees, private employees in rural industry and in private domestic service, or employees not covered by pay-roll tax returns. The survey was based on a stratified random sample of private employers in other industries who were subject to pay-roll tax (that is, employers paying more than \$400 a week in wages and salaries). The results of the survey were published in Year Book No. 51, pages 442-4.

Surveys of Weekly Earnings and Hours, October 1962, 1963 and 1964

For details of these surveys see pages 296 to 305.

Survey of Weekly Earnings, October 1965

A survey of weekly earnings of male employees was conducted for the last pay-period in October 1965. The survey was conducted by means of: (i) a sample of private employers subject to pay-roll tax (that is those paying more than \$400 a week in wages and salaries); (ii) a complete coverage of Commonwealth and State government departments and semi-government authorities; and (iii) a sample of local government authorities. It related to certain specified industry groups only.

The industry groups excluded from this survey were: primary production; finance and property; public authority activities, n.e.i. (e.g. Commonwealth, State and local government administration); community and business services; amusement, hotels, cafés, personal service, etc. The survey also excluded waterside workers employed on a casual basis, and all employees in the Northern Territory and the Australian Capital Territory. The industry classification adopted was that used for the 1961 population census.

The object of the survey was to obtain estimates of the numbers and proportions of full-time adult male employees in various weekly earnings groups and a dissection of total weekly earnings paid to full-time adult males into: (i) overtime earnings; (ii) ordinary time earnings at 'award, etc. rates'; and (iii) ordinary time earnings in excess of those at 'award, etc. rates' (divided into (a) payment by measured result and (b) other) as defined on page 291. The survey also provided figures of average weekly earnings for full-time adult male and junior male employees. Separate details were obtained for (i) managerial, executive, professional and higher supervisory staff, and (ii) other full-time male employees. The results of the survey are shown in broad detail only. Averages for each State were published in the previous issue of the Year Book. For further details see *Labour Report* No. 52, 1965 and 1966.

Information of a similar type was obtained in respect of September 1960 from a sample survey of private employers only. However, the 1965 survey, as well as adopting the standard industry classification used for the 1961 population census, differs from the 1960 survey also in the range of industries included. In addition, the 1965 survey was on a more comprehensive basis than that in 1960. For these reasons, and also because of the possible effects of sampling variability, no comparison has been attempted.

Coverage

The 1965 survey related to private and government employees in the specified industry groups.

Private employers were surveyed by means of a stratified random sample of those employers subject to pay-roll tax. Approximately 3,000 private employers were included in the survey, and completed returns were received from over 99.9 per cent of them. The results of the survey of private employers were representative of the experience of an estimated 1,181,000 full-time adult male employees. In the government (i.e. Commonwealth, State and local) sector the survey covered 409,000 full-time male employees.

The sample of private employers had to be restricted to those subject to pay-roll tax. The industry classification of these employers was generally according to major activity. Mainly for these reasons, the survey estimates of total numbers of private and government employees do not correspond to totals of employment of all adult males in the specified industries.

Results of the survey

As the private employer part of the survey was based on a sample, the resultant estimates are subject to sampling variability, that is, variations which might occur by chance because only a sample of employers was surveyed.

The estimates are shown for adult males classified by industry group, by State, and by government or private employment. Therefore, reflected in these estimates will be the effects of differences in amounts paid for the various occupations; of differences in amounts paid for the same occupations; of differences in occupational structure within industries; and of differences in industry structure, both as between States and as between government and private employment.

Employers (private and government) were asked to comment on any full-time adult male employees shown as earning *less than* \$30, or \$30 and *less than* \$32 in the survey week. From these comments it was possible to omit from these two weekly earnings groups those adult males who were not paid for a full week. Those who were confirmed as full-time adult males being paid for a full week and earning less than \$32 represented a total of approximately 300. They were reported by respondents as being 'persons on the basic wage', 'adult messengers', 'elderly persons', 'persons on training rate', 'salesmen earning retainer only in the specified week', etc. Similarly it is probable that in completed

returns there were a number of employees who earned \$32 and over in the specified pay-period even though they were not paid for a full week. It has not been possible to ensure that all such employees have been omitted from these estimates for 'full-time' adult males.

On the return forms the categories *managerial, executive, professional and higher supervisory staff, and all other full-time employees* were defined. However, the allocation of employees between these categories depended on the judgment of the individual employers (both private and government) completing the returns.

The tables on pages 293-5 show estimates of the average amounts and of the relative importance of the components of total weekly earnings (i.e. overtime earnings, ordinary time earnings at 'award, etc. rates', and ordinary time earnings in excess of those at 'award, etc. rates'). These details were obtained from each employer in the form of totals for each component part in respect of all his full-time adult male employees. Details were not sought of the number of employees receiving various amounts of these components, and thus no information is available about the distribution of employees about the averages. The averages shown for these components relate to the total of all employees in the survey, not just to the numbers of employees who received payment in these categories.

In the tables showing estimates of average earnings (or dissections of average earnings) the estimates have been rounded to the nearest 10 cents.

When using the estimates of *ordinary time earnings at award, etc. rates* it should be borne in mind that, in addition to minimum award rates specified for particular occupations, this category was defined to include all loadings, allowances, etc. prescribed in the awards, etc. In addition, for employees not covered by an award, etc. the normal (or agreed) rates of pay for normal hours of work were defined as coming within the scope of *ordinary time earnings at award, etc. rates*.

Definitions

The following definitions refer to terms used in the survey and in the following tables.

Adult males includes all male employees over twenty-one years of age and those males who, although under twenty-one years of age, are paid at the adult rate for their occupation. *Junior males* includes all other males under twenty-one years of age.

Full-time male employees was defined as those who ordinarily work thirty hours or more a week. Employees on 'short-time' or those who began or ceased work during the specified week and part-time employees were excluded from this survey. Instructions were also given that employees who were not paid for a full week's work because of absenteeism, sickness, accident, etc. were to be excluded.

Other than managerial, etc. staff includes minor supervisory staff, leading hands, clerical and office staff as well as ordinary wages employees. It excludes *managerial, executive, professional, and higher supervisory staff* which were not further defined.

Private employees represents employees of private employers.

Government employees represents employees of Commonwealth and State government departments and semi-government authorities and of local government bodies.

Total weekly earnings refers to gross earnings of male employees for the last pay-period in October 1965 before taxation and other deductions. It includes payments directly attributable to work performed during the week for which payment was made (or to sick leave taken), e.g. ordinary time, overtime, shift allowances, penalty rates, commission (if paid weekly), and similar payments. For payments made other than on a weekly basis only one week's proportion is included, for example, salaries paid fortnightly or monthly; payment for those on annual leave; periodical payments under incentive, piecework, commission, profit sharing schemes, etc.; annual or other periodical bonuses, etc. Retrospective payments are excluded.

Overtime earnings represents that part of total weekly earnings of full-time adult male employees for the last pay-period in October 1965 for time worked in excess of award hours, or, in the case of those employees not affected by awards, etc. in excess of standard, or agreed, hours of work.

Awards or registered agreements refers to awards or determinations of, or agreements registered with, Commonwealth or State industrial tribunals.

Ordinary time earnings at award, etc. rates comprises:

- (i) where there was an appropriate award or registered agreement operating, the rates specified in the award for the hours of work paid for (up to the award hours) plus any other payments (excepting overtime), e.g. dirt money; height money; penalty rates; shift work, confined spaces, tool, leading hand, camping, etc., allowances; lead bonus and other loadings provided for in the award or registered agreement and at the rates specified in the award or registered agreement;

- (ii) where there was no appropriate award or registered agreement operating (including the case of managerial, executive, professional and higher supervisory staff not covered by awards), the rates of pay for hours of work covered by an unregistered agreement (if one existed) plus other payments (excepting overtime) similar to those specified in (i) above, if provided for in the agreement; otherwise the terms of employment as agreed for each person for wages, salaries, retainers, hours of work, etc. (excluding commission, and annual or half-yearly, etc. bonuses) relating to a normal working week were used;
- (iii) for employees under incentive, piecework, etc. schemes, only that part of their ordinary time earnings such as retainers, base rates or award minima.

Ordinary time earnings in excess of those at award, etc. rates:

- (i) *Based on payment by measured result* includes that part of earnings in excess of award or agreed base rate earnings, which is variable from one period to another depending on measured performance of the employees, e.g. incentive payment schemes, piecework, task bonus, commission, etc;
- (ii) *Other* includes all ordinary time earnings in excess of those at 'award, etc. rates' not described in (i) above; included were special attendance or good time-keeping bonuses, proportion of annual or other periodical bonuses, profit sharing scheme earnings and any other forms of over-award payments.

(a) Includes managerial, executive, professional and higher supervisory staff. For definitions and particulars of coverage of the survey, etc., see pages 289-91. (b) Excludes Northern Territory and Australian Capital Territory. (c) Last pay-period in October 1965. (d) Excludes primary production; finance and property; public authority activities (n.e.c.); community and business services; and amusement, hotels, cafés, personal services, etc.

Surveys of weekly earnings and hours, October 1962, 1963, 1964, and 1966

Sample surveys in respect of most private employers subject to pay-roll tax (i.e. those paying more than \$400 per week in wages and salaries) have been conducted as at the last pay-period in October during recent years. Some results of the 1966 survey and comparisons with earlier surveys are contained in the following tables. Further particulars including averages for each State were published in *Labour Report* No. 52, 1965 and 1966.

In addition to obtaining data for the calculation of average weekly earnings, average weekly hours paid for, and average hourly earnings, the October 1966 survey obtained information on overtime and ordinary time earnings and hours for full-time employees (other than managerial, etc. staff). The figures of average overtime earnings and average overtime hours are the averages for *all* employees (in the specified category) represented in the survey whether or not they worked overtime. The survey figures do not show the average overtime earnings or hours of only those employees who worked overtime.

Figures for average weekly earnings, average weekly hours paid for, and average hourly earnings as at the selected pay-periods are presented for males and females (adult and junior) separately by industry groups and by States. They reflect the effects of differences (and of changes between points of time) in amounts paid for the various occupations; in amounts paid for the same occupations; in occupational structures within industries; in industry structure; in degrees of business activity (incidence of overtime, etc.); and in the incidence of incentive schemes, piece-work and profit-sharing scheme payments, etc.

The figures of average weekly earnings and hours shown in the following tables have been rounded to the first decimal place.

In general, where an establishment was closed down for part or whole of the last pay-period in October, or operations were seriously curtailed by an industrial dispute, breakdown, fire, etc., the employer was asked to supply particulars of wages and hours for the nearest normal pay-period.

Coverage

The results of the surveys are based on returns from stratified random samples of private employers subject to pay-roll tax. Employees in rural industry and in private domestic service are excluded because most employers in these two industries are not subject to pay-roll tax. Also excluded from the surveys are: employees of government and semi-government authorities; employees of religious, benevolent and other similar organisations exempt from pay-roll tax; and all employees in the Northern Territory and the Australian Capital Territory. The earnings and hours of waterside workers employed on a casual basis are excluded because they are subject to wide fluctuations for short periods such as those covered by these surveys.

Approximately 3,950 employers were included in the October 1966 survey and the sample represented 1,519,000 male and 663,000 female wage and salary earners.

As the survey was based on a sample, the resultant estimates are subject to sampling variability, that is, variations which might occur by chance because only a sample of employers was surveyed. The extent of the detail published has been determined after considering estimated measures of sampling variability.

Comparability of results

In addition to affecting the results of each sample survey, sampling variability also affects comparison between each year's results.

The industry classification adopted for the 1966 and previous earnings and hours surveys from 1963 onwards (including the 1965 survey) is that used for the 1961 population census. Because the October 1962 survey was based on a different industry classification only broad comparison with more recent surveys is possible (*see* tables on pages 302 and 305). Some comparison of the results of the surveys of 1963, 1964 and 1966 are shown in the tables on pages 299 to 301 and 304.

The October 1965 Survey of Weekly Earnings was a special purpose survey on a different basis from the surveys compared in this section and, therefore, its results are not shown herein, but appear on pages 291-5. Results of the 1965 survey were published in detail in *Labour Report* No. 52, 1965 and 1966.

In the surveys of October 1962, 1963 and 1964 employees 'whose hours of work were not known' were reported with managerial, etc. staff. In the October 1966 survey employers were asked to report these employees in their correct classification, and if necessary estimate their hours of work. It is considered that any reporting differences will have had only a slight effect on comparability of the surveys.

The allocation of employees between 'Managerial, executive, professional and higher supervisory staff' and 'All other full-time employees' (as defined) depends upon the employers' interpretation of the definitions (*see below*).

Definitions

The following definitions refer to terms used in the surveys and in the tables in this section.

Employees refers to male and female employees on the pay-roll and who received pay for the last pay-period in October.

Adults includes all employees 21 years of age and over and those employees who, although under 21 years of age, are paid at the adult rate for their occupation.

Juniors refers to those employees under 21 years of age who are not paid at the adult rate for their occupation.

Full-time employees refers to those employees who ordinarily work 30 hours or more a week and who received pay for the last pay-period in October. Included are 'full-time' employees on short-time; 'full-time' employees who began or ceased work during the pay-period; and 'full-time' employees on paid annual leave, paid sick leave, long service leave and paid holidays taken during the pay-period.

Part-time employees refers to employees who ordinarily work less than 30 hours a week. Employees on short-time who normally work 30 hours or more a week are classified as full-time employees.

Other than managerial, etc. staff includes minor supervisory employees, leading hands, clerical and office staff as well as ordinary wages employees. It excludes *managerial, executive, professional and higher supervisory staff* who were not further defined.

Weekly earnings refers to gross earnings for the last pay-period in October before taxation and other deductions have been made. It includes ordinary time earnings, overtime earnings, shift allowances, penalty rates, commission and similar payments; and that part of paid annual leave, paid sick leave, long service leave and paid holidays taken during the pay-period. It includes one week's proportion of payments made other than on a weekly basis, e.g. salary paid fortnightly or monthly; paid annual or other leave taken during the pay-period; periodical payments under incentive, piecework, profit sharing schemes, etc.; commissions; annual or periodical bonuses, etc. Retrospective payments are excluded.

Overtime earnings refers to that part of gross earnings for hours paid for in excess of award, standard or agreed hours of work. Overtime earnings were not reported for managerial, etc. staff.

Ordinary time earnings refers to that part of gross earnings for award, standard or agreed hours of work.

Weekly man-hours paid for refers to the sum of man-hours for which payment was made. It includes ordinary time hours, overtime hours, paid stand-by or reporting time; and paid annual leave, paid sick leave, long service leave and paid holidays taken during the specified pay-period. For employees paid other than weekly, hours are converted to a weekly basis. Hours of work were not reported for managerial, etc. staff.

Overtime hours refers to hours in excess of award, standard or agreed hours of work.

Ordinary time hours refers to award, standard or agreed hours of work.

Survey of weekly earnings and hours, October 1967

The results of this survey were first published in a mimeographed statement *Survey of Weekly Earnings and Hours, October 1967* (dated 12 June 1968) which also contains comparisons with the surveys of October 1962, 1963, 1964, and 1966.

Determination of wage rates in Australia

Before June 1967, when the Commonwealth Conciliation and Arbitration Commission decided to eliminate basic wages and margins from Commonwealth awards and to introduce total wages (see page 306), the concept of a basic or living wage was common to wage rates determined by industrial authorities in Australia. Initially, the concept of a basic wage (for adult males) was interpreted as the wage necessary to maintain an average employee and his family in a reasonable state of comfort. However, it was later generally accepted that the basic wage should be fixed at the highest amount which the economy could sustain and that the dominant factor was the capacity of the community to carry the resultant wage levels. Basic wages were determined for adult females as well as for adult males.

In addition to the basic wage, secondary wage payments, including margins for skill, etc. and various kinds of loadings peculiar to the occupation or industry, were determined by industrial authorities. The basic wage and the secondary wage made up the minimum wage rate for a particular occupation.

In the following paragraphs is set out a brief history of the determination of wage rates in Australia by Commonwealth and State industrial authorities. For more detailed information including the history of basic wage determination in Australia *see* previous issues of the Year Book and the annual *Labour Report*.

Commonwealth Basic Wage

Basic wages were a feature of awards of the Commonwealth Conciliation and Arbitration Commission (and the Commonwealth Court of Conciliation and Arbitration) over the period 1907 to 1967.

In 1907 the first declaration of a basic wage (\$4.20 a week for Melbourne) was made by Mr Justice Higgins, President of the Commonwealth Court of Conciliation and Arbitration. The wage was known as the 'Harvester' wage and the amount was considered reasonable 'for a family of about five'. From this date onwards basic wages became incorporated into Commonwealth awards.

In 1913 the Commonwealth Court of Conciliation and Arbitration took cognisance of the 'A' Series retail price index numbers for the thirty more important towns of Australia published by the Commonwealth Statistician, and as awards came up for review the Court usually revised the basic wage rate of the award in proportion to variations in the retail price index. In 1921 the system of making automatic quarterly adjustments to the basic wage in direct ratio to variations in 'A' Series retail price index numbers was first introduced. The practice of making automatic quarterly adjustments to the basic wage in proportion to variations in retail price index numbers continued until September 1953.

In addition to the automatic adjustments to the basic wage described in the previous paragraph, basic wage rates in Commonwealth awards were varied as a result of basic wage or national wage inquiries. The last time basic wages were varied in this way was in July 1966, when, as a result of the Basic Wage, Margins and Total Wage Cases of 1966, rates were increased by \$2 a week for adult males and \$1.50 a week for adult females. At that time Commonwealth basic wage rates for capital cities ranged from \$31 to \$33.50 a week for adult males and from \$23.25 to \$25.10 a week for adult females. These rates continued to operate until the decision of the Commonwealth Conciliation and Arbitration Commission in the National Wage Cases of 1967 to eliminate basic wages and margins from Commonwealth awards and introduce total wages to operate from the beginning of the first pay-period to commence on or after 1 July 1967 (*see* page 308).

For tables showing Commonwealth basic wage rates for adult males and adult females *see* previous issues of the Year Book and the Appendix to *Labour Report* No. 52, 1965 and 1966.

Basic wage rates for females

As a result of the 1949-50 Basic Wage Inquiry the Commonwealth Court of Conciliation and Arbitration fixed the basic weekly wage for adult females at 75 per cent of the corresponding male rate from the beginning of the first pay-period commencing in December 1950. This percentage continued to be prescribed in subsequent inquiries and operated until the basic wage was eliminated from Commonwealth Awards in July 1967 (*see* above). Prior to December 1950 the relationship of female basic wages to male basic wages varied from award to award, but was generally between 54 and 56 per cent.

For further particulars regarding female basic wage rates *see* *Labour Report* No. 46, pages 75-81. Tables of rates are published in the Appendix to *Labour Report* No. 52, 1965 and 1966.

Basic wage rates, Australian Territories

The determination of basic wage rates in the Northern Territory and the Australian Capital Territory came within the jurisdiction of the Commonwealth Conciliation and Arbitration Commission. Basic wage rates were eliminated from awards operating in these Territories in July 1967 (*see* above), and total wages were introduced. For tables of basic wages in the Northern Territory and the Australian Capital Territory *see* Appendix to *Labour Report* No. 52, 1965 and 1966. For further information on the determination of basic wages in the Territories *see* previous issues of the Year Book and the annual *Labour Report*.

Commonwealth wage margins

In addition to basic wage rates, awards of Commonwealth and State industrial tribunals specified secondary wage payments consisting of margins and loadings. Margins have been defined as 'minimum amounts awarded above the basic wage to particular classifications of employees for the features attaching to their work which justify payments above the basic wage, whether those features are skill or experience required for the performance of that work, its particularly laborious nature, or the disabilities attached to its performance.'

In the Commonwealth jurisdiction prior to 1954 the Commonwealth Court of Conciliation and Arbitration had not made any general determination in respect of wage margins, but general principles of marginal rate fixation had been enunciated by the Court in the Engineers Case of 1924, the Merchant Service Guild Case in 1942, and the Printing Trades Case of 1947. Major decisions of the Commonwealth Court of Conciliation and Arbitration, and later the Commonwealth Conciliation and Arbitration Commission, affecting margins in Commonwealth awards were made in 1954, 1959, 1963, 1965, and 1966. Details of these decisions can be found in earlier issues of the Year Book and the annual *Labour Report*.

As a result of a decision of the Commonwealth Conciliation and Arbitration Commission in the National Wage Cases of 1967, basic wages and margins were eliminated from Commonwealth awards and total wages were introduced with effect from the beginning of the first pay-period to commence on or after 1 July 1967.

Commonwealth work value inquiries

In addition to variations of wage margins in Commonwealth awards as a result of the general inquiries in 1954 to 1966 (*see above*), variations of margins for various occupations were made by the Commission as individual awards came up for review or upon application by trade unions. Similar procedures existed in regard to awards of State industrial tribunals.

As a result of its decision in the Basic Wage, Margins and Total Wage Cases of 1966, the Commonwealth Conciliation and Arbitration Commission undertook a work value inquiry concerning classifications appearing in the Metal Trades award. The inquiry proceeded by way of detailed inspections of the work in factories performed by various classifications specified in the award, visits to training schools, and a formal hearing at which there were taken the sworn evidence and submissions called or made on behalf of the respective parties and interveners. The inspections and visits to training schools took place over the period September 1966 to September 1967. Formal hearing commenced on 21 September 1967 and concluded on 17 November 1967. On 11 December 1967 the Commission issued a majority decision (Gallagher *J.* and Commissioner Winter, with Moore *J.* dissenting).

On behalf of the majority Gallagher *J.* made an announcement which included the following:

'In this Inquiry the Commissioner and I would determine that:—

- (1) 'Wage increases where granted for adult male employees working under clause 4 of the Metal Trades Award 1952 (as varied) should be awarded on a work value basis, not otherwise, and should be those as set out in the schedule marked A which is now handed down.
- (2) 'Wage increases where granted for adult female employees should be 75 per cent of the appropriate increase for adult males with a flat rate for employees at the third class machinist level or below.
- (3) 'The claim for retrospectivity should be refused.
- (4) 'The appropriate variation should come into operation from the beginning of the first pay period to commence on or after 22 January 1968 and should remain in force for three years thereafter with liberty to apply to the Commissioner in the metal trades industry reserved to the parties.

'Upon reference to the schedule marked A, it will be seen that it has been found practicable to determine rates for classifications generally, that is to say for 320 classifications. Of these it will be seen that for 18 classifications there would be no increase in wage rates, that for 178 classifications there would be an increase of \$1.00 per week, that for 9 classifications there would be an increase of \$1.30 per week, that for 27 classifications there would be an increase of \$2.75 per week, that for 16 classifications there would be an increase of \$3.75 per week, that for 47 tradesmen classifications there would be an increase of \$7.40 per week and that for the remaining 25 classifications there would be increases of varying amounts ranging between 10 cents and \$10.05 per week.' . . .

'We explain that the rates shown in schedule A are those appropriate for Victoria—elsewhere. The equivalent award rates for the principal localities named below are to be ascertained by adjusting the Victoria—elsewhere rates as follows: Sydney add \$0.80, Brisbane deduct \$1.70, Adelaide deduct \$0.40, Hobart add \$0.70.

'With regard to over award payments we direct particular attention to the reasons of Mr Commissioner Winter commencing at page 63 and to [the reasons of Gallagher *J.*] commencing at page 151. We emphasise that the increases which we would grant would apply to existing award wages and it should not be assumed by employees that over award payments cannot or will not be offset against them. We also emphasise that this is not a case in which increases in wage rates for the metal trades set a pattern for wages in other industries. The increases which we would grant reached as they have been on a work value basis relate solely to employees working under clause 4 of the Metal Trades Award and do not constitute a reason for awarding wage increases to employees covered by other awards or working in other industries.'

Following applications by employers concerning the question of absorption in over-award payments of the increases granted to the metal trades in December 1967, the Commonwealth Conciliation and Arbitration Commission, consisting of Kirby *C.J.*, Gallagher and Moore *JJ.*, Senior Commissioner Taylor and Commissioner Winter, heard submissions by employers and trade unions on 14 to 16 February 1968.

The pronouncement of the majority of the Commission (Gallagher *J.* dissenting) was made on 21 February 1968. The Commission said it appeared that substantial absorption of over-award payments had not been practicable in the existing circumstances and that had this been known at the time of the decision, the burden of the increased rates should not have been imposed without deferment of some portion of the increases. The Commission agreed that this was a changed circumstance since December 1967 and that it required positive action by the bench.

The Commission, in its pronouncement, made the following decisions. The work value decisions of the Commission in December 1967 (*see* page 307) in regard to its amounts should stand. However it was decided that 70 per cent of the prescribed increases should be payable in accordance with the decision of 11 December and that 30 per cent should be deferred. But where the increase was \$1.60 or less per week, the full amount should be paid without deferment, and where the increase was more than \$1.60 the increase payable without deferment should be at least \$1.60. The decision applied to increases granted to adult males and adult females. Adjustments to rates would be in multiples of 5 cents.

The bench of the Commission which would deal with the economic wage case expected to commence on 6 August 1968 should decide when the deferred portion of the increases should be payable. The Commission again stated that the increases in wage rates in the metal trades award did not set a pattern for wages in other awards. Benches dealing with work value cases in other awards were not bound in any way to follow what had happened in the Metal Trades Award. The Commission appealed to all in industry to co-operate with each other and with the Commission to make these decisions work and to end the industrial disputes and stoppages.

Commonwealth total wages

In the national wage cases of 1964 and 1965 applications by employers that basic wages and margins should be deleted from Commonwealth awards and total wages introduced were rejected by the Commonwealth Conciliation and Arbitration Commission. However, in its decisions in the Basic Wage, Margins and Total Wage Cases of 1966 the Commission decided to defer the conversion of the wage structure to the basis of a single wage pending further consideration of the present structure of marginal rates (*see* page 306) and further argument. As a result of the National Wage Cases of 1967, in which the employers again applied for a total wage, the Commonwealth Conciliation and Arbitration Commission announced the elimination of basic wages and margins from Commonwealth awards and the introduction of total wages. The total wages were arrived at by adding an amount of \$1 a week to the weekly award wages for each adult male and adult female classification to operate from the beginning of the first pay-period to commence on or after 1 July 1967.

Trade unions unsuccessfully challenged in the High Court the abolition of basic wages and the adoption of total wages by the Commonwealth Commission.

Commonwealth minimum wages

In July 1966 the Commonwealth Conciliation and Arbitration Commission, in its decisions in the Basic Wage, Margins and Total Wage Cases of 1966, inserted in Commonwealth awards provisions for minimum wages for adult males. The Commission said that it had given detailed consideration to lower paid classifications in the Metal Trades award and had decided to grant some immediate relief to low wage earners. The Commission in its judgment said that it intended to insert a new provision in awards by which it would be prescribed that no adult male employee should be paid as a weekly wage for working the standard hours of work an amount less than the minimum wage, i.e. his appropriate basic wage rate plus \$3.75 a week. The minimum wage was prescribed for adult male employees only and was applied for all purposes of the award, for example, in calculation of overtime and other penalty rates, piece-work, casual employment, sick leave and annual leave. The Commission stated that the provision for a minimum wage for adult male employees was designed to meet the circumstances of employees in the lowest classifications who were in receipt of award rates and no more. It was not intended to affect the wage of any employee who was already receiving the prescribed minimum through over-award payment. The provision for minimum wages for adult males operated from the beginning of the first pay-period to commence on or after 11 July 1966. The minimum wages for adult males inserted in Commonwealth awards ranged from \$34.75 to \$37.25 a week for capital cities. These rates were increased by \$1 a week as a result of the decision of the Commonwealth Conciliation and Arbitration Commission in the National Wage Cases of 1967, the increases to operate from the beginning of the first pay-period commencing on or after 1 July 1967.

Determination of wage rates in State Awards, etc.

New South Wales

The first determination of a standard living wage for adult male employees under New South Wales State awards operated from 16 February 1914, when the Court of Arbitration fixed the rate at \$4.80 a week for the metropolitan area. The first living wage for adult females (\$3.00 a week) was declared by the Board of Trade to operate from 17 December 1918.

From 1926 to 1937 basic wage rates were determined by the Industrial Commission of New South Wales. From July 1927 a State scheme of child endowment became operative in New South Wales, and this continued until superseded by the Commonwealth Government scheme in July 1941.

From October 1937 to October 1955 the State adult male basic wage for Sydney was the same as the Commonwealth basic wage for Sydney. From the beginning of the first pay-period in November 1955 the State basic wage was automatically adjusted each quarter in accordance with movements in retail price index numbers. (Automatic adjustment of Commonwealth basic wages was discontinued in September 1953.) These automatic adjustments continued until October 1964, when legislation provided that the Commonwealth basic wage for Sydney should apply in State awards and industrial agreements to operate from the beginning of the first pay-period which commenced on or after 19 June 1964.

Between October 1937 and November 1950 the State adult female basic wage for Sydney was 54 per cent of the adult male rate. In December 1950 the adult female rate became 75 per cent of the adult male rate. From January 1963 for male and female employees performing work of the same or like nature and of equal value, the Industrial Commission may prescribe in State awards the same basic wage and secondary wage. In March 1967 the Industrial Commission in Court Session, when considering the adoption of Commonwealth marginal increases for State awards, stated that the general principle in future would be to inject Commonwealth wage increases on economic grounds into the State award structure.

Following the increase of \$1 a week in total wages in Commonwealth awards in July 1967, the Industrial Commission increased award rates of wages and salaries for adult males and adult females by the addition of a fixed loading of \$1 per week, described as 'July 1967 economic loading', to take effect from the beginning of the first pay period to commence on or after 1 July 1967. Subsequently legislation increased the basic wage for adult males from \$33.50 to \$34.50 per week and for adult females from \$25.10 to \$26.10 per week to operate from 1 January 1968. The increase of \$1 per week in each basic wage absorbed the 'July 1967 economic loading', which was omitted from State awards and agreements. The legislation also provided for the adjustment of wage rates in State awards by the Industrial Commission subsequent to a decision of the Commonwealth Conciliation and Arbitration Commission to vary Commonwealth wage rates wholly or partly on economic grounds. Changes in the State basic wage for adult males shall not be more than the amount of increase in Commonwealth minimum wages for adult males, and the increase in the adult female basic wage not less than 75 per cent of the increase in the male basic wage. The Industrial Commission and Conciliation Committees were given power to include provisions for minimum wages for adult males or adult females in State awards.

Further information on New South Wales basic wages is published in previous issues of the Year Book and the annual *Labour Report*. State basic wage rates for Sydney are published in the Appendix to *Labour Report* No. 52, 1965 and 1966.

Victoria

In Victoria, Wages Boards constituted for each industry group or calling from representatives of employers and employees with an independent chairman determine rates of wage and conditions of work.

Except for the period November 1953 to August 1956, when automatic quarterly adjustments to the basic wage in Wages Board determinations operated, Wages Boards in determining wage rates had adopted Commonwealth basic wage rates. The basic wage rates of August 1956 continued to operate until June or July 1959 when the Commonwealth rates for Melbourne, determined as a result of the 1959 Basic Wage Inquiry, were incorporated into Wages Board determinations.

Subsequently to the decisions of the Commonwealth Conciliation and Arbitration Commission in the National Wage Cases of 1967 (see page 308), the Industrial Appeals Court decided that basic wages and margins for adult males and adult females should be deleted from Wages Board determinations and that wage rates expressed as total wages should operate from the beginning of the first pay-period in July 1967. At the same time total wages for both adult males and females were increased by \$1 a week.

For further information on basic wages in Victorian Wages Board determinations *see* previous issues of the Year Book and the annual *Labour Report*. Rates for adult males and adult females from November 1953 are published in the Appendix to *Labour Report* No. 52, 1965 and 1966.

Queensland

The first formal declaration of a basic wage in Queensland determined a basic wage of \$8.50 for adult males and \$4.30 for adult females to operate from 1 March 1921. Prior to this declaration the rate of \$7.70 a week for adult males had been generally recognised in awards as the 'basic' or 'living' wage.

Since 1961 the full bench of the Industrial Conciliation and Arbitration Commission, consisting of not less than three Commissioners, has power to make declarations concerning the basic wage for males and females and the standard hours of work. The basic wage for adult males must be sufficient to maintain an employee, his wife, and family of three children in a fair and average standard of comfort. The basic wage for adult females should be not less than is sufficient to enable an employee to support herself in a fair and average standard of comfort. All persons interested must be given an opportunity to be heard before any general declaration regarding the basic wage is made, and the Commission must take into consideration any probable economic effect of such declaration. From 1 May 1961 the basic wage for adult females has been 75 per cent of the male rate.

In March 1965 the Commission stated that it had been decided as a matter of policy, that in the future, it did not propose to deal with an application to vary the basic wage solely because of a change in the Consumer Price Index, unless such a change warranted an alteration of 40 cents or more in the basic wage for adult males.

The basic wage rates payable in the Southern Division (Eastern District) including Brisbane were \$33.20 for adult males and \$24.90 for adult females operative from 10 April 1967. For basic wages in other areas of the State district allowances are added to these rates (*see* previous issues of the Year Book and the annual *Labour Report*).

Following the decision of the Commonwealth Conciliation and Arbitration Commission to increase total wages by \$1 a week in July 1967, the Industrial Commission increased all award rates of pay for both adult males and adult females by \$1 per week to operate from 3 July 1967.

For further particulars of basic wage determination in Queensland *see* previous issues of the Year Book and the annual *Labour Report*. Tables of basic wages are published in the Appendix to *Labour Report* No. 52, 1965 and 1966.

South Australia

The first declaration of a living wage for adult male employees in the metropolitan area was \$7.95 a week operative from 4 August 1921. The first adult female living wage of \$3.50 a week operated from 1 September 1921.

Before July 1966 the Board of Industry had power to declare after public inquiry living wages to be paid to adult males and adult females. Since that date the power has been vested in the Industrial Commission constituted by the President and two Commissioners. However, the South Australian Industrial Code also provides for the declaration of living wages by proclamation to prevent unjustifiable differences between State and Commonwealth rates of wages. This latter method has been used in recent years to declare living wages.

The State living wage for adult males was the same as the Commonwealth basic wage for Adelaide from February 1950 to July 1967, when basic wages were deleted from Commonwealth awards and total wages introduced. The State living wage for adult females was the same as the Commonwealth basic wage for Adelaide from December 1950 to July 1967 and was 75 per cent of the adult male rate.

Following the increase of \$1 a week in total wages in Commonwealth awards in July 1967 (*see* page 308), by proclamation the State living wages for both adult males and adult females were increased by \$1 a week to operate from 3 July 1967. The rates then became \$33.30 for adult males and \$25.20 for adult females.

For further information on South Australian living wages *see* previous issues of the Year Book and the annual *Labour Report*. Tables of living wages are published in the Appendix to *Labour Report* No. 52, 1965 and 1966.

Western Australia

The first declaration of the basic wage by the Court of Arbitration operated from 1 July 1926, when rates of \$8.50 for adult males and \$4.59 for adult females were fixed.

Before December 1966 the Western Australian Industrial Commission in Court Session consisting of three Commissioners (previously the Court of Arbitration) could declare a basic wage at any time on its own motion and must do so when requested by a majority of industrial unions or by the Western Australian Employers' Federation, with the limitation that no new determination should be made within twelve months of the preceding inquiry. Legislation also provided that the Commission (or the Court) might make adjustments to the basic wage each quarter after considering retail price index numbers.

From August 1931 to September 1964 separate basic wages were declared for three areas of the State, namely (a) the metropolitan area, (b) south-west land division, and (c) goldfields areas and other parts of the State. In September 1964, when the Commission increased the basic wage after an inquiry, one rate was declared for the whole of the State.

In December 1951 the basic wages for adult females became 65 per cent of the corresponding male rate, and in January 1960 this proportion was increased to 75 per cent. In each case marginal rates of pay for females were reduced or deleted to offset the increase in the female basic wage.

In December 1966 legislation provided that the Western Australian basic wage rates should be the same as the Commonwealth Six Capitals rates as soon as these exceeded the State rates (\$33.50 a week for adult males and \$25.13 a week for adult females) operative from 24 October 1966.

Following the decision of the Commonwealth Conciliation and Arbitration Commission to increase total wages by \$1 a week from July 1967 (*see* page 308), the Industrial Commission made the following decisions. Wage rates for adult males, not in receipt of the minimum weekly wage, and for adult females were increased by 60 cents a week by way of a special loading. The minimum weekly wage for adult males (*see* page 308) payable under certain awards was increased from \$36.55 to \$37.55 a week. These increases operated from the beginning of the first pay-period commencing on or after 1 July 1967.

More detailed information on State basic wages in Western Australia appear in earlier issues of the Year Book and the annual *Labour Report*. Basic wage rates for the metropolitan area are published in the Appendix to *Labour Report* No. 52, 1965 and 1966.

Tasmania

Wages Boards are constituted for a number of industries from representatives of employers and employees with an independent chairman (common to all Wages Boards) with power to determine rates of wage in each industry.

Except for the period February 1956 to August 1956, when Wages Boards adjusted basic wages in accordance with movements in retail price index numbers, Wages Boards generally adopted Commonwealth basic wage rates. From August 1956 the basic wages in determinations remained unchanged until July 1959, when the rates were made the same as the Commonwealth basic wages.

In January 1961 Wages Boards adopted the basic wage for Hobart as the uniform rate applicable throughout the State. During 1962 a number of Wages Boards provided in their determinations for the automatic adoption of Commonwealth basic wages as and when they varied.

In July and August 1967, subsequently to the increase of \$1 in total wages in Commonwealth awards, Wages Boards varied their determinations by increasing basic wages for adult males and adult females by \$1 a week. The rates then became \$34.40 for adult males and \$26.05 for adult females.

Further details of basic wages in Tasmanian Wages Board determinations are published in earlier issues of the Year Book and the annual *Labour Report*. Hobart basic wage rates adopted by Wages Boards from February 1956 are published in the Appendix to *Labour Report* No. 52, 1965 and 1966.

Annual leave

At present the majority of employees in Australia receive at least three weeks' paid annual leave. The following paragraphs outline the position under Commonwealth and State awards and industrial legislation.

Commonwealth

The first statement in the Commonwealth jurisdiction of the principles involved in deciding whether or not annual leave should be awarded was the judgment of the Commonwealth Conciliation and Arbitration Commission in the Commercial Printing Case of 1936, when one week's paid annual leave was granted. Over a period of time annual leave was introduced industry by industry when and if the Judge responsible for the industry considered it proper. In 1945 the Commission set out principles to be applied for the extension of paid annual leave to fourteen calendar days. Alteration of particular awards was left to the discretion of single judges.

Since 1960 three inquiries have been held following union claims to increased paid annual leave from two to three weeks in Commonwealth awards. These were the Three Weeks' Annual Leave Inquiries of 1960, 1962, and 1963, reports of which appear in earlier issues of the Year Book and the annual *Labour Reports*.

In its judgment in the 1963 inquiry (*see above*), the Commonwealth Conciliation and Arbitration Commission said that it would implement its intention of granting three weeks' annual leave generally in secondary industry, subject to special cases. A period of twenty-one consecutive days' leave would be allowed to employees who had completed twelve months' continuous service by or after 20 November 1963.

New South Wales

Employees in New South Wales in private industry, other than those covered by Federal awards, were granted three weeks' annual leave by an amendment to the Annual Holidays Act passed in 1958. In 1964 the State Government granted its employees four weeks' annual leave effective from 1 January 1964. From 29 September 1964 annual holiday pay for employees covered by provisions of the Annual Holidays Act has been calculated on the basis of the employee's current weekly earnings instead of current award rates.

Victoria

Following the decision of the Commonwealth Conciliation and Arbitration Commission in 1963 (*see above*) individual Wages Boards commenced to alter provisions of their determinations to grant employees an extra week of leave. By September 1963 the majority of Boards had included three weeks' annual leave in their determinations.

Queensland

In June 1963 the Full Bench of the Industrial Conciliation and Arbitration Commission granted an extra week of annual leave to employees with twelve months' continuous service on or after 30 November 1963. This move implemented a previous decision of the Commission in which it was decided, as a matter of policy, to grant increased leave to persons already enjoying two weeks' leave.

The decision applied to day workers and non-continuous shift workers receiving two weeks' leave; continuous shift workers receiving three weeks' leave; and day workers and shift workers receiving additional leave in lieu of extra payment for working on statutory holidays. The order became effective as from 1 June 1963.

The terms of the decision of the Commonwealth Conciliation and Arbitration Commission, as handed down in 1963 (*see above*) were to apply to awards of the Industrial Conciliation and Arbitration Commission of Queensland with the exception that, in the State awards, *pro rata* payment for leave not taken at the termination of employment was to be expressed as hours per month. The decision did not apply to employees in primary industry—apart from the sugar industry—or those in western areas. Extra leave for these employees was granted as a result of separate applications.

South Australia

The Full Bench of the South Australian Industrial Court in May 1963 announced an increased standard of annual leave in the State, adopting three weeks as the standard as fixed by the Commonwealth Conciliation and Arbitration Commission (*see above*).

The Court, as a general indication as to its attitude, expressed the view that annual leave should be taken at a time fixed either by agreement or, if this is not possible, at a time fixed by the employer. The leave should be allowed in two parts and one part must be of at least two weeks' duration. These, however, were factors which could vary from award to award, and their determination would depend on the needs of the particular industry.

Western Australia

Following a general inquiry concerning Annual Leave and Public Holidays the Court of Arbitration in June 1963 adopted three weeks as the new standard for the normal period of annual leave in State awards, with four weeks for seven-day shift workers. The date of operation was the same as that decided by the Commonwealth Conciliation and Arbitration Commission (*see above*). Existing awards and agreements which already provided annual leave in excess of the Court's standard were to be examined separately to ascertain whether special circumstances existed to justify leave greater than the normal standard. The standard number of public holidays was retained at ten a year.

In November 1963 the Court refused an application by employers for the right to split the annual leave into two parts, since it decided to follow the decision of most other State tribunals and allow the additional leave in conformity with conditions similar to those prescribed by the Commonwealth

Conciliation and Arbitration Commission. The right to split the leave would be allowed by the Court only in exceptional circumstances, unless all the parties concerned agreed to the inclusion of such a provision.

Tasmania

Following an amendment to the Wages Board Act in 1961, Wages Boards were permitted to grant employees up to three weeks' paid recreational leave. Between June 1962 and early 1963 determinations of Wages Boards were amended to provide for three weeks annual leave for employees, to operate from 1 January 1963.

Generally, most Wages Boards adopted provisions to enable leave to be taken in one consecutive period within six months from the end of the preceding year of employment or, if the employer and employee agree, in two separate periods, the lesser of which shall be of not less than seven consecutive days.

Long service leave

Paid long service leave, i.e. leave granted to workers who remain with the one employer over an extended period of time, has been included in the provisions of Commonwealth and State industrial legislation and industrial awards, and a brief summary is given in the following paragraphs. After fifteen years' continuous employment with the one employer, most employees in Australia are now entitled to at least thirteen weeks' paid long service leave. In all cases the transfer of ownership of a business does not constitute a break in continuity of service with the same employer.

Commonwealth

Until May 1964 the Commonwealth Conciliation and Arbitration Commission had not included provision for long service leave in its awards, and had refrained from determining disputes relating to this subject except in the case of the Northern Territory and the Australian Capital Territory (*see below*). Consequently, until then, the provisions of the various State Acts relating to long service leave applied to workers covered by awards of the Commonwealth. The applicability of long service leave provisions under State law to workers under Commonwealth awards had been tested before the High Court and the Privy Council, and such provisions had been held to be valid.

The Commission's position was set out in its decision, issued on 16 September 1959, regarding disputes on the inclusion, in the Graphic Arts (Interim) Award, 1957, of provisions for long service leave. It stated that it should refrain until further order from determining the disputes so far as they concerned long service leave and that if in future the Commission decided that long service leave on a national basis was desirable, it was open to proceed to the making of an award on the matter.

Following the hearing of claims for long service leave provisions by employers in the graphic arts and metal trades industries in August 1963, the Full Bench of the Commonwealth Conciliation and Arbitration Commission on 11 May 1964 announced its decision that long service leave entitlement would be calculated on the basis of thirteen weeks for twenty years of unbroken employment, in respect of employment before 11 May 1964 (or, in New South Wales, 1 April 1963), and at the rate of thirteen weeks for fifteen years in respect of service after 11 May 1964 (or, in New South Wales, 1 April 1963). After further periods of ten years, employees would be entitled to an additional *pro rata* period of leave calculated on the same basis. Those employees who completed an unbroken contract of employment of ten years but less than fifteen years, and whose employment was terminated by death or by the employer for any cause other than serious and wilful misconduct, or by the employee on account of illness, incapacity or domestic or other pressing necessity, would be entitled to *pro rata* payment. The rate of payment while on leave would be current award rates which would be subject to basic wage changes and marginal adjustments which occurred during the leave period.

Following applications by employers in the metal trades and printing industries, the Full Bench of the Commission in a judgment delivered on 23 December 1964 extended the provisions of the awards to cover non-unionist employees. The decision rejected the unions' argument that the Commission had no jurisdiction to make long service leave awards binding in respect of non-unionists. The Commission, in a separate decision, varied the provisions of the award so that an employer would not be required to grant an employee long service leave until the entitlement equalled thirteen weeks for the first period of entitlement and eight and two-thirds weeks in respect of any subsequent period of entitlement. These variations would be effective on and from 1 December 1964.

Australian Territories. Long service leave codes for employees covered by Northern Territory and Australian Capital Territory awards were originally prescribed on 4 December 1961 by the Commonwealth Conciliation and Arbitration Commission in Presidential Session. The Commission decided that employees should be granted three months' long service leave after twenty years' service with one employer, even if part of this service was outside the Territory. In addition, the Australian

Capital Territory code prescribed that employees presently employed might 'go back for a period of 25 years in regard to the calculation of their present or future entitlement of long service leave'. In December 1964 the Commission amended the majority of awards covering employees in the Northern Territory and the Australian Capital Territory by granting long service leave on the basis of thirteen weeks after fifteen years' service.

Stevedoring Industry. The *Stevedoring Industry Act* 1962, which came into force on 19 November 1962, amended the *Stevedoring Industry Act* 1956-1961 by extending the eligibility and qualifying periods of the long service leave provisions of the Act. No changes were made to the entitlement for long service leave, which remained at thirteen weeks after twenty years' qualifying service and six and a half weeks for each subsequent ten years' qualifying service. The *Stevedoring Industry Act* 1966, which operated from 29 October 1966, reduced the qualifying period for thirteen weeks leave from twenty years to fifteen years.

New South Wales

Long service leave was first introduced for the majority of workers by the Industrial Arbitration Act, 1951, which provided such leave for workers under State awards. This Act was replaced by the Long Service Leave Act, 1955, which extended the benefits to any worker within the State. An amendment to the Act in April 1963 provided for three months' long service leave for fifteen years' continuous service with the same employer and proportionate amounts on the basis after a minimum of five years' service. The *Long Service Leave (Metalliferous Mining Industry) Act*, 1963 conferred on certain workers in the metalliferous mining industry the right to three months' long service leave after ten years' service. This Act operated from 1 January 1964.

Victoria

The *Factories and Shops (Long Service Leave) Act* 1953 first provided for long service leave for workers in Victoria, the provisions of this Act being subsequently incorporated in the Labour and Industry Act. Leave provided for was thirteen weeks for twenty years' continuous service with the same employer. Contributions by employers to retirement schemes were to be taken into consideration in dealing with exemptions from the Act.

An amendment to the Labour and Industry Act in December 1964 granted employees, from 1 January 1965, thirteen weeks' leave after fifteen years' continuous service. Workers who terminated their employment after ten years but less than the qualifying fifteen years would be able to obtain a *pro rata* entitlement subject to the existing special conditions of the Act. Following amendment to the Public Service Act in 1964, public servants became entitled to four and a half months' leave after fifteen years' service instead of six months after twenty years.

Queensland

In 1952 the Industrial Conciliation and Arbitration Acts were amended to include long service leave provision for employees within the jurisdiction of the Industrial Court, and the Acts were amended again in 1955 to extend these provisions to any employee in respect of whose employment there was not in force an award or industrial agreement under the Act and to seasonal workers in sugar mills and meat works. Leave provided for was thirteen weeks for twenty years' continuous service with the same employer.

An amendment to The Industrial Conciliation and Arbitration Acts was passed and assented to in December 1964, granting employees long service leave of thirteen weeks after fifteen years' continuous service. The amendment retained *pro rata* leave entitlement after ten years' service and operated on and from 11 May 1964.

South Australia

The Long Service Leave Act, 1967 provides for thirteen calendar weeks' leave after fifteen years' service with the same employer and for eight and two-thirds weeks' leave for each subsequent complete period of ten years' service. After seven and before fifteen completed years of service the worker is entitled on termination of employment to proportionate payment in lieu of leave for the period worked, except in certain specified circumstances. Entitlement for qualifying service prior to January 1966 is to be calculated at the rate of thirteen weeks' leave for twenty years' service, and an employer shall not be required to grant leave until the worker's total entitlement is thirteen weeks.

An employer may be exempted by the Industrial Commission from the leave entitlement provisions of the Act provided that the employees are entitled under some other scheme to long service leave benefits no less favourable than those provided by the Act.

Western Australia

The Long Service Leave Act was passed in 1958, but it did not apply to employees whose conditions of work were regulated under the Western Australian Industrial Arbitration Act. The Court of Arbitration of Western Australia in an order dated 1 April 1958 incorporated in most of the awards

and agreements within its jurisdiction provisions similar to those in the Long Service Leave Act. Leave provided for was thirteen weeks for twenty years' continuous service with the same employer. Contributions by employers to retirement schemes can be taken into consideration in dealing with exemptions from the Act.

In September 1964 the Industrial Commission began to amend the long service leave provisions of its awards and industrial agreements to provide for thirteen weeks' leave after fifteen years' service on or from 1 October 1964. *Pro rata* entitlement would accrue after ten years' service. The *Long Service Leave Amendment Act (No. 2) 1964*, introduced in October 1964, was in the same terms as the amendments made by the Commission to the various awards and agreements.

Tasmania

The Long Service Leave Act, which was passed in 1956, provided for thirteen weeks' leave for twenty years' continuous service with the same employer. Contributions by employers to retirement schemes could be taken into consideration in dealing with exemptions from the Act. An amendment to the Long Service Leave Act, assented to on 17 December 1964, granted thirteen weeks' leave after fifteen years' continuous service. The amendment operated on and from 11 May 1964.

INDUSTRIAL DISPUTES

Detailed information regarding industrial disputes involving stoppage of work is given in the *Labour Report*. A table showing statistics of industrial disputes for each year from 1913 is contained in the Appendix to *Labour Report* No. 52, 1965 and 1966.

Particulars of all disputes in progress during the year are included in the annual figures, whether the dispute commenced in that year or was in progress at the beginning of the year. Consequently, details of 'the number of disputes' and 'workers involved' in disputes which commenced in any year, and were still in progress during the following year, are included in the figures for both years.

The following table gives, for Australia as a whole, particulars of industrial disputes which were in progress during 1967, classified according to industry groups.

INDUSTRIAL DISPUTES(a): INDUSTRY GROUPS, AUSTRALIA, 1967

Industry group	Number	Workers involved			Working days lost	Estimated loss in wages (\$'000)
		Directly	Indirectly (b)	Total		
Agriculture, grazing, etc.	1	180	..	180	900	9.0
Coal mining	192	40,918	..	40,918	48,352	494.9
Other mining and quarrying	32	7,109	60	7,169	10,591	127.8
Engineering, metals, vehicles, etc.	448	233,676	8,389	242,065	259,258	2,585.0
Textiles, clothing and footwear	2	1,670	..	1,670	5,489	51.2
Food, drink and tobacco	84	14,931	1,862	16,793	48,061	511.3
Sawmilling, furniture, etc.
Paper, printing, etc.	28	11,399	..	11,399	62,020	758.1
Other manufacturing	117	19,791	181	19,972	42,147	432.5
Building and construction	185	26,308	338	26,646	84,479	961.8
Railway and tramway services	24	40,382	..	40,382	61,058	551.9
Road and air transport	38	7,617	85	7,702	9,264	99.4
Shipping	9	279	..	279	311	2.7
Stevedoring	103	28,264	..	28,264	17,886	195.3
Amusement, hotels, personal service, etc.	25	20,936	105	21,041	40,224	338.3
Other industries(c)	52	18,709	85	18,794	15,275	143.8
Total	1,340	472,169	11,105	483,274	705,315	7,263.1

(a) Refers only to disputes involving a stoppage of work of ten man-days or more. (b) Persons thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute. (c) Includes communication; finance and property; wholesale and retail trade; public authority (n.e.i.); and community and business services.

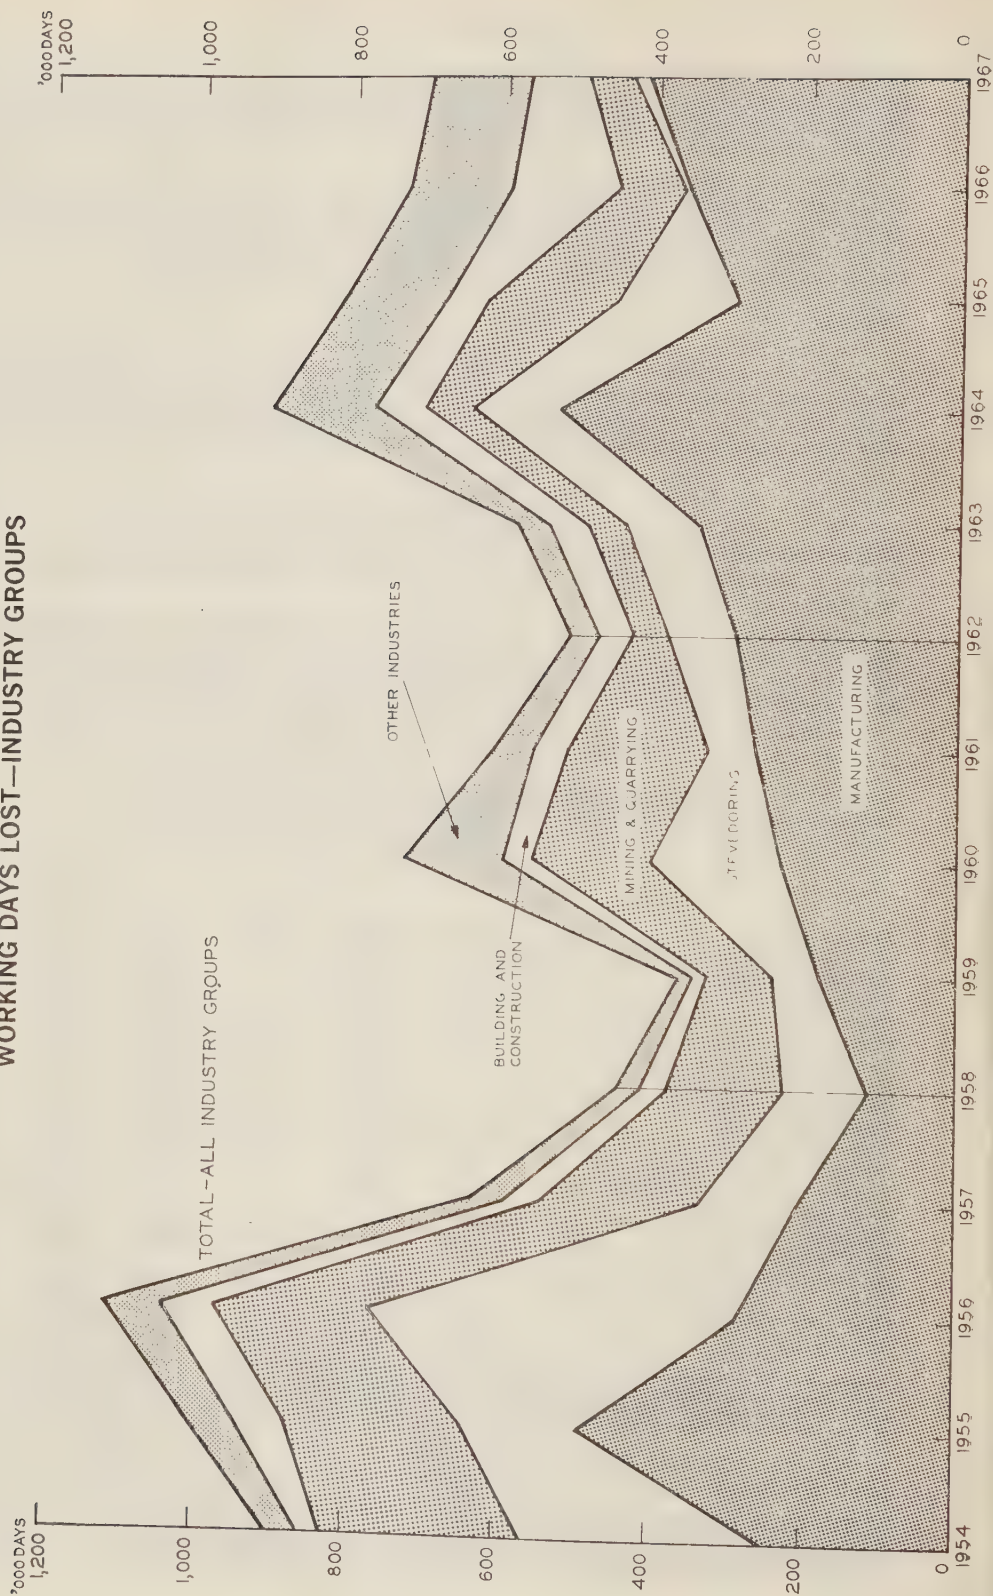

A graph on plate 35, page 316 shows, for the years 1954 to 1967, the working days lost as a result of industrial disputes in the main industry groups.

The following table gives particulars of the number of industrial disputes in each State and Territory, together with the number of workers involved and the losses in working days and wages caused by disputes which were current during each of the years 1963 to 1967.

INDUSTRIAL DISPUTES: AUSTRALIA

1954 TO 1967

WORKING DAYS LOST—INDUSTRY GROUPS

INDUSTRIAL DISPUTES(a): STATES AND TERRITORIES, 1963 TO 1967

State or Territory	Year	Number	Workers involved			Working days lost	Estimated loss in wages (\$'000)
			Directly	Indirectly (b)	Total		
New South Wales	1963	817	214,643	4,333	218,976	307,440	2,629.5
	1964	828	221,510	7,566	229,076	320,568	2,996.2

(a) Refers only to disputes involving a stoppage of work of ten man-days or more. (b) Persons thrown out of work at the establishments where the stoppage occurred but not themselves parties to the dispute.

Duration of disputes

The duration of each industrial dispute involving a loss of work, i.e. the time between the cessation and resumption of work, has been calculated in working days, exclusive of Saturdays, Sundays and holidays, except where the establishment involved carries on a continuous process (e.g. metal smelting and cement manufacture).

The following table shows, for the year 1967, industrial disputes in coal mining, stevedoring and other industries classified according to duration.

INDUSTRIAL DISPUTES(a): DURATION, BY INDUSTRY GROUP, AUSTRALIA, 1967

Duration (working days)	Workers involved(b)			Working days lost		Estimated loss in wages (\$'000)
	Number	Number	Proportion of total (per cent)	Number	Proportion of total (per cent)	
COAL MINING						
1 day and less	128	31,351	76.6	24,047	49.7	244.4
2 days and more than 1 day	38	6,645	16.2	11,668	24.1	117.7

(a) Refers only to disputes involving a stoppage of work of ten man-days or more. involved. See footnote (b) to table on page 317.

(b) Includes workers indirectly

Causes of disputes

Stoppages are analysed in three separate groups, 'Coal mining', 'Stevedoring', and 'Other industries'. Causes have been grouped under four main headings: (1) Wages, hours and leave; (2) Physical working conditions and managerial policy; (3) Trade unionism; (4) Other causes. The first group is restricted to disputes involving general principles relating to wages, hours and leave; minor questions regarding the claims to pay or leave by individual employees are included under managerial policy. The second group comprises disputes regarding physical working conditions and general questions of managerial policy, including disciplinary action, the promotion of employees, the employment of particular individuals, personal disagreements between employees and supervisory staff, and disputes arising from the computation of wages, leave, etc., in individual cases. The third group includes stoppages over employment of non-unionists, inter-union and intra-union disputes, disputes over recognition of union activities, and sympathy stoppages in support of employees in another industry. The last group comprises disputes by way of protest against situations not arising from the usual relationship of employer and employee, e.g. political matters, and cases (occurring mainly in the coal mining industry) where the cause of the stoppage is not officially made known to the management.

The following tables show particulars of industrial disputes classified according to cause, in three industry groups for 1967, and according to cause for the years 1963 to 1967.

INDUSTRIAL DISPUTES(a): CAUSES, INDUSTRY GROUPS, AUSTRALIA, 1967

<i>Cause of dispute</i>	<i>Coal mining</i>	<i>Steve- doring</i>	<i>Other industries</i>	<i>All industries</i>

WORKERS' COMPENSATION LEGISLATION

A conspectus of the principal provisions of Workers' Compensation Acts and Ordinances in force in Australia at 31 December 1966 is included in *Labour Report* No. 52, pages 231-43.

LABOUR ORGANISATIONS

Labour organisations in Australia

The figures shown in this section are prepared from a special collection of membership of labour organisations at 31 December each year. The affairs of single unions are not disclosed in the published results and this has assisted in securing complete information. The Bureau is indebted to the secretaries of trade unions for their co-operation in supplying information. More detailed statistics appear in the annual *Labour Report*.

Trade unions

The trade unions in Australia are very diverse in character, and range from the small independent association to the large interstate organisation, which, in its turn, may be a branch of an international body. Broadly speaking, there are four distinct classes of labour organisations: (a) the local independent, (b) the State, (c) the interstate, and (d) the Australasian or international; but a number of variations occur from each of these classes. The schemes of organisation of interstate or federated unions vary greatly in character. In some unions the State organisations are bound together under a system of unification with centralised control, while in others the State units are practically independent and self-governing, the federal bond being loose and existing only for one or two specified purposes. Statistics relating to interstate or federated trade unions are shown in a table on page 324.

Returns showing membership by States and Territories at 31 December each year are obtained for all trade unions and employee organisations. The following table shows the position at the end of each of the years 1965 to 1967.

TRADE UNIONS: NUMBER AND MEMBERSHIP, STATES AND TERRITORIES
1965 TO 1967

State or Territory	Number of separate unions			Number of members ('000)			Percentage increase in membership(a)		
	1965	1966	1967	1965	1966	1967	1965	1966	1967
New South Wales	222	220	213	825.8	817.3	832.8	3.9	-1.0	1.9
Victoria	156	154	152	537.8	539.4	545.5	2.3	0.3	1.1
Queensland	140	140	138	353.3	351.6	344.0	0.8	-0.5	-2.2
South Australia	137	136	133	174.0	178.5	182.2	4.2	2.6	2.1
Western Australia	155	157	155	139.2	146.6	152.3	3.1	5.3	3.9
Tasmania	109	110	107	63.4	65.5	68.1	6.0	3.3	4.0
Northern Territory(b)	33	38	40	3.5	4.1	4.5	(b)	(b)	(b)
Australian Capital Territory(b)	64	66	65	19.1	20.7	22.0	(b)	(b)	(b)
Australia	(c) 334	(c) 330	(c) 324	2,116.2	2,123.5	2,151.3	3.0	0.3	1.3

(a) On preceding year. (b) In some cases union members in the Territories associated with State organisations are reported under the heading of that State. The annual figures reflect, in part, more accurate reporting, and the comparability of totals for the Territories is affected by this aspect. (c) Without interstate duplication. See below.

Minus sign (—) denotes decrease.

In the preceding table, under the heading 'Number of separate unions', a union reporting members in a State or Territory is counted as one union within that State or Territory. The figures do not add to the Australian total (shown in the last line) because a union represented in more than one State or Territory is included in the figure for each State or Territory in which it is represented, but is counted only once in the Australian total.

A table showing the number and membership of trade unions in Australia for the years 1912 to 1966 is included in Appendix XII to *Labour Report* No. 52.

The following table shows the number of unions and members thereof in Australia at the end of each of the years 1965 to 1967 classified according to industry group. The table does not supply a precise classification of trade union members by industry, because where the members of a union are employed in a number of industries they have been classified to the predominant industry for the union concerned.

TRADE UNIONS: INDUSTRY GROUPS, AUSTRALIA, 1965 TO 1967

Industry group	1965		1966		1967	
	No. of unions (a)	No. of members	No. of unions (a)	No. of members	No. of unions (a)	No. of members

(a) Without interstate duplication. See page 322.

(b) Includes communication, municipal, etc.

(c) Includes community and business services.

Number of trade union members and proportion of wage and salary earners. The following table shows the estimated percentages of wage and salary earners in employment who are members of trade unions. As estimates of wage and salary earners in employment do not include employees engaged in rural industry or in private domestic service, the percentages have been calculated on figures obtained by adding to the end of year estimates the number of employees in rural industry and in private domestic service recorded at the nearest available population census. For this reason, and also because the membership of trade unions includes some persons not in employment, the percentages shown in the table must be regarded as approximations.

TRADE UNIONS: NUMBER OF MEMBERS AND PROPORTION OF TOTAL WAGE AND SALARY EARNERS, AUSTRALIA, 1954 TO 1967

Year	Number of members (‘000)			Proportion of total wage and salary earners(a) (Per cent)		
	Males	Females	Persons	Males	Females	Persons
1954 . . .	1,448.2	339.3	1,787.5	66	45	61
1961 . . .	1,521.9	372.7	1,894.6	63	41	57
1965 . . .	1,663.4	452.8	2,116.2	62	41	56
1966 . . .	1,657.5	466.0	2,123.5	60	40	54
1967 . . .	1,663.7	487.6	2,151.3	59	40	54

(a) See text above.

Interstate or federated trade unions. The following table gives particulars of the number and membership of interstate or federated trade unions in 1967.

INTERSTATE OR FEDERATED TRADE UNIONS(a): AUSTRALIA, 1967

	Unions operating in—					Total
	2 States	3 States	4 States	5 States	6 States	
Number of unions . . .	11	3	22	27	77	140
„ „ members ('000) . .	22.2	20.4	184.9	281.8	1,447.7	1,957.0

(a) Certain unions in this group have, in addition to branches in the States, branches in the Northern Territory or the Australian Capital Territory or both.

Organisations registered under the (Commonwealth) Conciliation and Arbitration Act

Under Part VIII. of the *Conciliation and Arbitration Act* 1904-1966 any association of employers in an industry who have, or any employer who has, employed, on an average taken per month, not less than 100 employees during the six months preceding application for registration, and any association of not less than 100 employees in any industry, may be registered. However, the Public Service Arbitration Act provides that an association of less than 100 employees may be registered as an organisation under the Conciliation and Arbitration Act if its members comprise at least three-fifths of all persons engaged in that industry in the Public Service. Such organisations are included in the following figures. Registered unions include both interstate associations and associations operating within one State only. Registration under Commonwealth legislation began in 1906. At the end of 1967 the number of employers' organisations registered under the provisions of the Act was 73. The number of unions registered at the end of 1967 was 149, with membership of 1,800,863, representing 84 per cent of the total membership of all trade unions in Australia. Lists of organisations of employees and of employers registered under this Act are contained in the *Industrial Information Bulletin*, Vol. 23, No. 1, January 1968 published by the Department of Labour and National Service.

Central labour organisations

Trades and Labour Councils. Delegate organisations, usually known as Trades Hall Councils or Labour Councils and consisting of representatives of a number of trade unions, have been established in the capital cities and in a number of other centres in each State. In the centres where these councils exist most unions or local branches operating in the district are affiliated. The district councils obtain their finance by means of a *per capita* tax on members of affiliated unions. In States other than Western Australia the district councils are generally independent bodies, although provision usually exists in the rules of the central council in the capital city for the organisation of district councils, or for their representation on the central council. In Western Australia there was until 1962 a unified system or organisation with a central council and district councils within the framework of the Australian Labor Party. In 1962 this organisation was abolished and a separate Trades and Labour Council, with provincial councils, was to be established outside the political organisation. At the end of 1963 only the central council (the Trades and Labour Council of Western Australia) was operating, but a number of provincial councils were established from 1964.

The following table shows, for each State and Territory, the number of trades and labour councils and the number of affiliated unions or branches of unions at the end of 1967. The figures for the number of unions do not necessarily represent separate unions, since the branches of a large union may be affiliated with the local trades councils in the several towns in which they are represented.

CENTRAL LABOUR ORGANISATIONS: NUMBER, AND UNIONS AND BRANCH UNIONS AFFILIATED, STATES AND TERRITORIES, 1967

	N.S.W.	Vic.	Qld	S.A.	W.A. (a)	Tas.	N.T.	A.C.T.	Total
Number of councils . . .	11	9	13	5	3	5	..	1	47
Number of unions and branch unions affiliated	348	279	187	147	137	125	..	27	1,250

(a) See explanation in text above.

As well as trades and labour councils there are councils organised on trade lines and composed of delegates from separate unions whose members' interests are closely connected by reason of their occupations. Delegate councils of bakers, bread carters and mill employees, or of unions connected directly or indirectly with the metal trades, or with the building trades, are examples of such organisations.

Australian Council of Trade Unions. A central labour organisation, now called the Australian Council of Trade Unions, came into being during 1927. The Council was created to function on behalf of the trade unions of Australia, and was founded at an All-Australian Trade Union Congress held in Melbourne in May 1927. The A.C.T.U. consists of affiliated unions and affiliated Metropolitan and or State Labour Councils and Provincial Councils. The Metropolitan or State Labour Council in each State is the State Branch of the A.C.T.U. and has the right to appoint one representative to act on the executive of the Council. In addition to the representatives of the State Branches of the A.C.T.U., six delegates are elected by and from Congress, one from each of the following industry groups: Building, Food and distributive services, Manufacturing, Metal, Services, and Transport. To this executive are added the four officers, namely, President, two Vice-Presidents, and Secretary, who are elected by and from the Australian Congress of Trade Unions.

The ordinary meetings of Congress are held in alternate years. The 1965 Biennial Congress was held in September 1965, and was attended by 573 delegates from affiliated organisations, State branches of the A.C.T.U., and provincial councils. Special meetings of Congress are held whenever deemed advisable by decision of the executive, as approved by the majority of its branches, or by resolution of unions representing one-third of the total membership of the A.C.T.U.

The objectives of the A.C.T.U. are the socialisation of industry, i.e. production, distribution and exchange, and the utilisation of the resources of Australia for the benefit of the people—ensuring full employment, with rising standards of living, real security, and full cultural opportunities for all. The methods to be adopted are: the closer organisation of the workers by the transformation of the Australian trade union movement from the craft to an industrial basis, by grouping of unions in their respective industries and by the establishment of one union in each industry; the consolidation of the Australian labour movement with the object of unified control, administration, and action; the centralised control of industrial disputes, educational propaganda among unions; and political action to secure satisfactory working-class legislation.

The A.C.T.U. was the first interstate body in Australia with authority to deal with industrial matters of an interstate character affecting the trade union movement generally. It is also the body responsible for submitting to the Commonwealth Government the names of persons suitable for selection as the Australian workers' delegate to the annual International Labour Conference. All major unions are affiliated with the A.C.T.U.

International Labour Organisation

The International Labour Organisation (I.L.O.) was established on 11 April 1919 as an autonomous institution associated with the League of Nations. Its original constitution was adopted as Part XIII of the Treaty of Versailles and formed part of other treaties of peace. During the years between its establishment and the outbreak of the 1939–45 War the I.L.O., with headquarters at Geneva, played a leading role in promoting the improvement of labour conditions throughout the world.

In 1940, in order to ensure that the I.L.O. should be able to continue to function freely, a working centre was established at Montreal, Canada. In 1946 the Organisation became the first of the specialised agencies of the United Nations. Under the terms of agreement the United Nations recognises the I.L.O. as a specialised agency having responsibility in the field defined by its constitution, which embraces labour conditions, industrial relations, employment organisations, social security and other aspects of social policy. The Organisation has three basic parts. These are the International Labour Conference, its highest authority, which as a rule meets annually; the Governing Body, its executive council, which usually meets three times each year; and the International Labour Office, which provides the secretariat of the Organisation. The Conference is composed of delegations from the Member States of the Organisation. At the end of 1965 there were 115 Member States, each of which is entitled to be represented by four delegates—two government, one representing employers and one representing workers together with their advisers. Each delegate speaks and votes independently, so that all points of view in each country are fully expressed. The Governing Body consists of the representatives of twenty-four governments and twelve employers' and twelve workers' representatives. Of the twenty-four government representatives, ten are from the ten countries of major industrial importance and fourteen are elected by the remaining governments. These latter fourteen government representatives and the twelve employers' and twelve workers' titular delegates and the deputy members of the three groups are elected by their groups at the Conference every three years. Particulars are given in *Labour Report* No. 52 of the proceedings of International Labour Conferences up to the 50th Session, held in Geneva in June 1966. For details of I.L.O. conventions ratified by Australia, see *Labour Report* No. 52, pages 254–5.

CHAPTER 11

OVERSEAS TRANSACTIONS

This chapter includes statistics of overseas trade, balance of payments, and overseas investment by private investors, but through limitations of space the statistics are, in the main, restricted to summarised form. For detailed information see the *Annual Bulletin of Overseas Investment, Australia*; and the other annual bulletins *Overseas Trade* (preliminary and final), *Australian Exports*, *Australian Imports*, *Imports Cleared for Home Consumption*, and the *Supplement to Imports Cleared for Home Consumption—Descriptions of Tariff Items and Statistical Key Codes*; and the half-yearly bulletin *Balance of Payments*. Preliminary information is available in summary form in the statements *Balance of Payments—Quarterly Summary*, *Overseas Investment—Preliminary Bulletin* (annual), *Australian Overseas Trade—Exports and Imports* (monthly), *Overseas Trade—Exports by Commodity Divisions* (monthly), and *Overseas Trade—Imports by Commodity Divisions* (monthly). Current information is included in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, and in more detail in the *Monthly Bulletin of Overseas Trade Statistics*. There are also the following additional mimeographed statements: *Exports of Wool* (monthly), *Imports of Assembled New Motor Cars* (monthly), *Overseas Trade with Major Groups of Countries* (quarterly), and *Trade of Australia with Eastern Countries* (annually). Additional unpublished details of exports and imports can be supplied on request.

A subscription service is available from this Bureau to provide for the detailed requirements of individual users of overseas trade statistics. These special periodical returns are obtainable monthly or quarterly and show trade according to items of the Australian Export and Import Commodity Classifications or statistical key code dissections of Australian Customs Tariff items.

OVERSEAS TRADE

Constitutional provisions and legislation

Constitutional provisions

By the Commonwealth of Australia Constitution Act, section 51 (1), the power to make laws with respect to trade and commerce with other countries was conferred on the Commonwealth Parliament. Under section 86 of the Constitution, the collection and control of duties of customs and excise passed to the Executive Government of the Commonwealth on 1 January 1901. Other references to trade and commerce are contained in sections 87 to 95 of the Constitution (see pages 17–18).

Commonwealth legislation

Commonwealth legislation affecting overseas trade includes: the Customs Act, the Customs Tariff and the Customs Tariff (Dumping and Subsidies) Act. The Customs Act is the administrative Act under which the Department of Customs and Excise operates. The Customs Tariff provides the statutory authority for imposing the actual rates of duty operative from time to time, while the Customs Tariff (Dumping and Subsidies) Act provides protection for Australian industry against various forms of unfair trading.

The Customs Tariff

The first Commonwealth Customs Tariff was introduced by Resolution on 8 October 1901, from which date uniform duties came into effect throughout Australia. The Australian Customs Tariff has been developed in conformity with the policy of protecting economic and efficient Australian industries and of granting preferential treatment to certain imports from countries of the Commonwealth. Duties are imposed on some goods, generally of a luxury nature, for revenue purposes. Customs collections are a major source of revenue, but in its protective character the tariff has an important influence on the Australian economy.

The present tariff provides for general and preferential rates of duty, and its structure is based on the 'Brussels Nomenclature' which has its origins in the Convention on Nomenclature for the Classification of Goods in Customs Tariffs, signed in Brussels on 15 December 1950. Australia has operated a 'Brussels-type' tariff since 1 July 1965.

Preferential rates. Preferential rates apply to goods the produce or manufacture of the United Kingdom, Ireland, Canada, New Zealand, Papua, and New Guinea, and certain goods the produce or manufacture of specified countries, provided that such goods comply with the laws in force at the time affecting the grant of preference.

The following are the rules of origin for preference purposes.

'151.—(1.) For the purposes of this Act and the *Customs Tariff* 1966–1967 (other than section twenty of the last-mentioned Act), goods shall be treated as the produce of a country if they are unmanufactured raw products of the country.

(2.) For the purposes of this Act and the *Customs Tariff* 1966–1967 (other than section twenty or a direction under section twenty-two of the last-mentioned Act), goods shall be treated as the manufacture of a country—

- (a) if the goods were wholly manufactured in the country from materials of one or more of the following classes:—
 - (i) unmanufactured raw products;
 - (ii) materials wholly manufactured in the country or in Australia, or in the country and in Australia; and
 - (iii) imported materials that the Minister has, in relation to the country, determined, by notice published in the *Gazette*, to be manufactured raw materials; or
- (b) if the goods were partly manufactured in the country, the process last performed in the manufacture of the goods was performed in the country and—
 - (i) not less than three-quarters, or, in a case where the country is New Zealand, one-half, of the factory or works cost of the goods is represented by the value of labour or materials, or of labour and materials, of the country or of the country and Australia;
 - (ii) in a case where the goods are goods of a class or kind not commercially manufactured in Australia, not less than one-quarter of the factory or works cost of the goods is represented by the value of labour or materials, or of labour and materials, of the country or of the country and Australia; or
 - (iii) in a case where the country is New Zealand, not less than three-quarters of the factory or works cost of the goods is represented by the value of labour or materials, or of labour and materials, of New Zealand and the United Kingdom or of New Zealand, Australia and the United Kingdom.

(3.) For the purposes of a direction under section twenty-two of the *Customs Tariff* 1966–1967 goods shall be treated as the manufacture of a country if—

- (a) the process last performed in the manufacture of the goods was performed in the country; and
- (b) not less than one-half of the factory or works cost of the goods is represented by the value of labour or materials, or of labour and materials, of the country or of the country and one or more of the following countries, that is to say, Australia and countries that, at the time the goods are entered for home consumption, are less developed countries, other than a country that, by virtue of a direction under sub-section (2) of section eleven of the *Customs Tariff* 1966–1967 is not to be treated as a less developed country in relation to the class of goods in which the goods are included.

'151A.—(1.) For the purposes of this Act and the *Customs Tariff* 1966–1967 (other than section twenty or a direction under section twenty-two of the last-mentioned Act), goods shall not be treated as the produce or manufacture of the United Kingdom, Canada, New Zealand, Ireland, Malawi, Southern Rhodesia, Zambia, the Territory of Papua or the Territory of New Guinea unless they have been shipped from that country to Australia and, except where the Collector is satisfied that the intended destination of the goods when originally shipped from that country was Australia, have not been transhipped.

(2.) The last preceding sub-section does not apply—

- (a) to goods the produce or manufacture of a country other than New Zealand that are imported into Australia from New Zealand; or
- (b) to goods the produce or manufacture of a country other than the Territory of Papua or the Territory of New Guinea that are imported into Australia from the Territory of Papua or the Territory of New Guinea.

(3.) For the purposes of a direction under section twenty-two of the *Customs Tariff* 1966–1967, goods shall not be treated as the produce or manufacture of a country unless they have been shipped from that country to Australia and, except where the collector is satisfied that the intended destination of the goods when originally shipped from that country was Australia, have not been transhipped.

(4.) For the purposes of this section—

- (a) goods may be treated as having been shipped from the Territory of Papua or the Territory of New Guinea if they have been shipped from either of those territories; and
- (b) goods may be treated as having been shipped from Malawi, Rhodesia or Zambia if they have been shipped from any of those countries or from Lourenco Marques or Beira in Mozambique'.

Declared preference countries. 10.—(1.) The Minister may, by order published in the *Gazette*, declare that a country specified in the order is a declared preference country for the purposes of this Act.

(2.) An order under the last preceding sub-section has effect, or shall be deemed to have had effect, from and including such date (which may be a date earlier than the date of publication of the order in the *Gazette*) as is specified in the order.

(3.) The Minister may, by order published in the *Gazette*, revoke an order under sub-section (1.) of this section.

(4.) An order under the last preceding sub-section has effect from and including such date (which shall not be a date earlier than the date of publication of the order in the *Gazette*) as is specified in the order.

(5.) Goods shall not be treated as the produce or manufacture of a declared preference country for the purposes of this Act unless, at the time the goods are entered for home consumption, the order under sub-section (1.) of this section in which the declared preference country is specified has effect or is deemed to have had effect.

Declared preference countries comprise:

Bahama Islands	Ghana	Republic of Cyprus
Barbados	Gibraltar	Republic of Singapore
Bermuda	Gilbert and Ellice Islands	St Helena and Ascension
British Honduras	Colony	Seychelles and Dependencies
British Solomon Islands	Guyana	Sierra Leone
Protectorate	Hong Kong	Tanzania
Brunei	Jamaica and Dependencies	Tonga
Ceylon	Kenya	Trinidad and Tobago
Falkland Island and	Leeward Islands	Uganda
Dependencies	Maldives Islands	Virgin Islands of the United
Federation of Malaysia	Malta	Kingdom
Fiji	Mauritius and Dependencies	Windward Island
Gambia	Nigeria	

General rates. General rates apply to goods from all countries which do not qualify for preferential rates of duty under a particular tariff classification.

By-law provisions. Customs By-laws and Ministerial Determinations are instruments made by the Minister for Customs and Excise under the authority of sections 271 to 273D of the Customs Act by which goods may be admitted free of duty or at rates of duty lower than those normally applicable. By-laws and determinations may only be made under a by-law classification, which is a tariff classification containing the words 'as prescribed by by-law'. Such a classification sets out the by-law duty rates which will apply to goods only when such goods are included in a by-law or determination made under that classification. By-law admission of goods is in general guided by the use to which the goods are to be put, e.g. the goods must be for a use which will assist economic or industrial development. A prerequisite for by-law admission is that suitably equivalent goods be not reasonably available from Australian production. A by-law covers goods by general description with no limit on quantity and may be used by any importer of the goods. A determination covers a specific quantity of particular goods and may be used only by the importer mentioned in the determination.

Primage duties. In addition to the ordinary duties of customs imposed by the Customs Tariff, *ad valorem* primage duties at rates of five per cent or ten per cent are charged on some goods according to the types of goods and origin thereof. Other goods are exempt from primage duty. Goods the produce or manufacture of New Zealand, Norfolk Island, Fiji, Cocos (Keeling) Islands, Christmas Island, Papua, and New Guinea are exempt from primage duty.

Anti-dumping duties. The *Customs Tariff (Dumping and Subsidies) Act 1961–1965* provides protection for Australian industry against various forms of unfair trading. Under this Act dumping duty may be imposed on goods that are sold to Australian importers at a price which is less than the normal value of the goods, where this causes or threatens material injury to an Australian industry. 'Normal value' under the Act means:

- (a) fair market value in the country of export;
- (b) price in the country of export to a third country;
- (c) fair market value in a third country; or
- (d) cost of production, plus f.o.b. charges, plus selling costs and profit.

Countervailing duty may be levied on goods in respect of which any subsidy, bounty, reduction or remission of freight, or other financial assistance has been, or is being, paid or granted directly or indirectly upon the production, manufacture, carriage or export of those goods. The amount of the countervailing duty in respect of any goods is a sum equal to the amount of the subsidy, bounty, reduction or remission of freight or other financial assistance.

Import controls—Customs (Import Licensing) Regulations

A comprehensive system of import licensing was introduced in Australia at the beginning of the second World War under the authority of the Customs (Import Licensing) Regulations. Following the gradual relaxation of the restrictions from the end of the War, import licensing was reimposed on 8 March 1952 and continued in force until 18 October 1962. From that date restrictions were removed from all commodities with the exception of some goods retained under control for reasons associated with the protection of Australian industry. Further information on import controls is given in Year Book No. 51, page 492.

Export controls and incentives

Commodity control. Section 112 of the Customs Act provides that the Governor-General may, by regulation, prohibit the exportation of goods from Australia and that this power may be exercised by: (a) prohibiting the exportation of goods absolutely; (b) prohibiting the exportation of goods to a specified place; and (c) prohibiting the exportation of goods unless prescribed conditions or restrictions are complied with. Goods subject to this export control are listed in the Customs (Prohibited Exports) Regulations.

Exchange control—Banking Act 1959–1967. As an integral part of the framework of exchange control, a control over goods exported from Australia is maintained under the provisions of Part III of the Banking (Foreign Exchange) Regulations, to ensure that the full proceeds of such goods are received into the Australian banking system and that these proceeds are received in the currency and in the manner prescribed by the Reserve Bank of Australia. This action is complementary to that taken under other parts of the Banking (Foreign Exchange) Regulations and under Part IV of the Banking Act to control the movement out of Australia of capital in the form of securities, currency and gold.

Export licences are issued subject to terms and conditions specified in the Banking (Foreign Exchange) Regulations, and may be subject to such further terms and conditions as are determined, or may be free from terms and conditions. On the receipt in Australia by the Reserve Bank, or by a bank acting as agent for that Bank, of advice that the foreign currency has been paid to the Reserve Bank or to an agent of the Bank in payment for goods exported in accordance with a licence granted under the regulations, the Bank, or an agent of the Bank, pays the licensee, or such other person as is entitled to receive it, an amount in Australian currency equivalent to the foreign currency received. In addition to commercial transactions involving exports, movements of personal effects are also controlled. Persons leaving Australia for overseas are required to obtain licences to cover their bona fide baggage, personal effects and household effects in any individual case where the gold content thereof exceeds \$250, or where jewellery and other articles of high intrinsic worth either exceed \$2,000 in value and those goods have not been the personal property of the passenger for at least twelve months.

Export incentives. The Commonwealth Government provides taxation concessions as financial incentives to export. A special income tax allowance for export market development expenditure is designed to encourage firms to incur promotion expenditure in advance of export sales and to assist exporters and potential exporters to expand sales in the existing markets and to enter new overseas markets. The allowance is in the form of a special deduction equal and additional to the ordinary deduction allowable in respect of specified expenses allowable in determining taxable income. Rebates of pay-roll tax are also granted to employers whose export sales of goods or property rights have increased above their average annual level in a base period. The rebate is available in the first place to employers who are producers for export, but a producer for export may issue an export certificate to an employer who has supplied components embodied in the final product.

Trade descriptions

The *Commerce (Trade Descriptions) Act* 1905–1966 gives power to require the application of a proper trade description to certain prescribed goods imported into or exported from Australia. Goods which must bear a prescribed trade description upon importation into Australia are specified in the *Commerce (Imports) Regulations*. As regards exports from Australia, marking requirements are prescribed in regulations issued under the Act and relating to specified export commodities.

Government authorities

Tariff Board

The *Tariff Board Act* 1921–1966 provides for the appointment of a Tariff Board consisting of eight members. Of these, two must, and three may, be members of the Commonwealth Public Service at the time of their appointment (or first appointments in the case of re-appointments). Members of the Board are appointed for terms of not less than one year and not more than five years. The purpose of the Tariff Board is to advise the Government on matters relating to the protection and encouragement of Australian industry.

The Minister of State for Trade and Industry is required to refer to the Board for inquiry and report the following matters: the necessity for new, increased, or reduced duties; the necessity for granting bounties and the effect of existing bounties; and any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff or by the restriction of the importation of any goods by charging unnecessarily high prices for his goods or acting in restraint of trade. In addition, the Minister may refer the following matters to the Tariff Board for inquiry and report: the general effect of the working of the Customs Tariff and the Excise Tariff; the fiscal and industrial effects of the Customs laws on the Commonwealth; the incidence between the rates of duty on raw materials and on finished or partly finished products; and other matters affecting the encouragement of primary and secondary industries in relation to the Tariff. The Minister of State for Customs and Excise may refer to the Tariff Board for inquiry and report the following matters: the classification of goods in the Customs Tariff or Excise Tariff and matters in connection with the interpretation of these Tariffs; the question of the value for duty of goods; whether goods not prescribed in departmental by-laws should be so prescribed; and any matters in respect of which action may be taken under the *Customs Tariff (Dumping and Subsidies) Act* 1961–1965.

Where a matter of the necessity for new or increased duties on any goods has been referred to the Board for inquiry and report, the Board may, in its report, recommend the restriction of the importation of those goods for such period as is specified in the report.

Inquiries conducted by the Board relating to a revision of the Tariff, a proposal for a bounty, a question under the Customs Tariff (Dumping and Subsidies) Act, or any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff or by the restriction of the importation of any goods, are held in public, and evidence in such inquiries is taken in public on oath, unless the Board accepts evidence as confidential or in the form of a written statement by a witness on oath. The Board is required to make available to the public the contents of any such written statement except any matter which it accepts as confidential.

Special Advisory Authority

The Minister for Trade and Industry may also request a Special Advisory Authority to inquire into cases where urgent action appears necessary to protect an Australian industry against import competition pending receipt and consideration of a full report by the Tariff Board. The Special Advisory Authority's report must be submitted to the Minister within thirty days of the making of the request. Temporary protection recommended by a Special Advisory Authority may be imposed, but may only operate for a period of up to three months after the date of receipt of the final report by the Tariff Board on the goods concerned.

Trade agreements

Multilateral—General Agreement on Tariffs and Trade

The General Agreement on Tariffs and Trade (G.A.T.T.), which came into force on 1 January 1948, is a multilateral trade treaty designed to facilitate trading relations between participating countries by reducing tariff and other barriers to the free interchange of goods. The Agreement provides a framework within which negotiations can be held to reduce barriers to trade, and a

structure for embodying the results of such negotiations in a legal instrument. Features of the Agreement are the schedules of tariff concessions participating countries have negotiated with each other, the application of most-favoured-nation treatment among the participants, the avoidance of trade discrimination, and a code of agreed commercial policy rules for international trading. Each participating country retains the right (a) to impose new or increased duties for protective purposes, except in respect of particular products where rates of duty have been bound against increase in negotiations under the Agreement; (b) by negotiation to modify or withdraw concessions formerly agreed; (c) to impose import restrictions to protect the balance of payments; and (d) to take emergency action where any industry is endangered by reason of any obligation incurred under the Agreement.

There have been six main tariff negotiations under the provisions of the Agreement, and a number of smaller scale negotiations preceding the accession of individual countries. As a result the tariff rates for a great many items entering into world commerce have been reduced and or bound against increase. Australia has obtained tariff concessions from individual countries on a number of her principal or potential exports to them, as a result both of direct negotiation by Australia and of negotiation by other countries. In the latter case the benefits occurred through the operation under the Agreement of the most-favoured-nation principle. The latest series of trade negotiations, the Kennedy Round, was based on a plan for linear tariff cuts by industrial countries on all industrial products, with a minimum of exceptions, and on the reduction of non-tariff barriers to trade and the creation of acceptable conditions of access to world markets for agricultural products. It concluded in June 1967 after three years of negotiations. Concessions were negotiated on trade valued at over \$36,000 million. The average reductions in tariffs on industrial goods was roughly one-third, while in agriculture the most important item was the agreement reached on the basis for a new world grains arrangement. Overall results were substantial, but were unevenly spread in that efforts to reduce trade barriers were very much more successful for manufactures than for primary products. In the post-Kennedy Round period, therefore, Australia is placing particular emphasis on the work of the Committee on Agriculture, created in November 1967, to examine the problems in the agricultural sector.

Up to the end of 1967 the contracting parties had held twenty-four sessions, nearly all in Geneva, to deal with matters arising from the administration of the Agreement. As a general rule the contracting parties meet once a year, although in a few instances they have met twice. In 1960 a Council of Representatives was established to undertake work, both of an urgent and of a routine character, between the regular sessions of the contracting parties. Some of the provisions of the Agreement were revised in 1954 and 1955. The revised Agreement contains tighter provisions on non-tariff barriers to trade, and allows more freedom for countries to revise individual tariff items which had been bound against an increase in tariff negotiations under the Agreement.

Since G.A.T.T. has not been accepted definitively by any country except Haiti, the Agreement is at present being applied provisionally pursuant to a Protocol of Provisional Application. At the end of January 1968 seventy-five countries, whose foreign trade represents over eighty per cent of the total volume of world trade, were full contracting parties to the Agreement, three had acceded provisionally, eight applied the Agreement on a *de facto* basis, and one participated under special arrangements.

Increasing attention has been focused in G.A.T.T. on specific trade and development problems of developing countries, and in February 1965 a new Part IV of G.A.T.T., aimed at helping developing countries solve these problems, was introduced on a *de facto* basis coming legally into force in June 1966. The new Part IV embodies commitments by individual and joint action by contracting parties, aimed at ensuring that the less developing countries can increasingly find the means to raise standards of living and promote rapid economic development through participating in international trade and achieving sustained growth of their export earnings.

As a means of helping to offset the competitive disadvantages faced by the new industries of the developing countries, and of putting these countries in a better position to compete with major industrial countries in the Australian market, Australia formulated in 1965 a system of tariff preferences on a range of manufactured and semi-manufactured products, all of which had been nominated by developing countries as being of export interest to them. It was recognised that Australia's initiative might well give a lead to other countries which might wish to use preferences to assist developing countries, and so lead to a compounding of the benefits to the developing countries. Before the Australian system could be introduced, it was necessary to obtain a waiver from the G.A.T.T. 'no-new-preference' provisions. Such a waiver was granted at the end of March 1966 and the first preferences for developing countries became effective in April 1966. The Australian system has been extended in scope from time to time and is successfully stimulating imports of the products

concerned from developing countries. Features of the system are that it is non-reciprocal (in that Australia seeks nothing in return), that it contains safeguards for Australian industries and for the interests of third countries, and that it is subject to international supervision through the G.A.T.T.

Bilateral agreements

The United Kingdom. The original United Kingdom and Australia Trade Agreement (Ottawa Agreement) was signed on 20 August 1932. The provisions and history of the agreement were published in Year Book No. 43, page 329. A new Trade Agreement designed to replace the original agreement and correct the imbalance in benefits which had emerged in the twenty-five years of its operation came into effect on 9 November 1956. Briefly, this agreement preserves security for Australian exports in the United Kingdom market, but lowers the obligatory margins of preference which Australia extends to the United Kingdom. The agreement provides for re-negotiation after the initial five-year period, but by arrangement between the two Governments this re-negotiation has been postponed. In the meantime the agreement continues subject to six months notice of termination by either country. Further details of the 1956 Agreement may be obtained from Year Book No. 51, page 495.

Canada. The existing agreement between Australia and Canada came into force on 30 June 1960, replacing an agreement signed on 3 August 1931. The agreement provides for Australian goods to receive British Preferential Tariff rates, or better, upon entry into Canada, and for Canada to maintain margins of preference in favour of Australia on a range of commodities. The agreement specifies that Canadian goods, with some exceptions, shall receive the benefit of the British Preferential Tariff upon importation into Australia and that Australia shall maintain margins of preference in favour of Canada on a range of commodities. The agreement continues subject to six months notice.

New Zealand. The New Zealand-Australia Free Trade Agreement came into force on 1 January 1966. The agreement provides for free trade in certain scheduled goods. Provision is made for the addition of items to the schedule. The provision of the 1933 Trade Agreement between Australia and New Zealand continues in force as part of the Free Trade Agreement, except as superseded or modified by it.

Rhodesia. A trade agreement was negotiated with the Federation of Rhodesia and Nyasaland in June 1955. This agreement consisted mainly of an exchange of preferential tariff treatment over a range of items. The Federation was dissolved on 31 December 1963, but application of the Agreement was continued on a provisional basis between Australia and each of the three constituent territories Zambia (Northern Rhodesia), Rhodesia (Southern Rhodesia) and Malawi (Nyasaland). Zambia terminated the Trade Agreement with Australia on 30 June 1966 and the Agreement between Malawi and Australia lapsed on 1 January 1967. Following the unilateral declaration of independence by the Rhodesian Government in November 1965 tariff preferences between Australia and Rhodesia were suspended by both countries. Hence the trade agreement between Australia and Rhodesia is inoperative at the present time.

Malaysia. A trade agreement with the then Federation of Malaya became effective in August 1958. Under the agreement Malaya undertook to protect Australian wheat and flour from dumped or subsidised competition and to extend to Australia any tariff preferences it accords. Australia guaranteed free entry for natural rubber so long as the Papua-New Guinea crop was absorbed, and assured the Federation that natural rubber would not be at a disadvantage compared with synthetic rubber in respect of tariff or import licensing treatment. The Agreement continues to apply between Australia and that portion of Malaysia known previously as the Federation of Malaya.

Japan. An Agreement on Commerce between the Commonwealth of Australia and Japan was signed on 6 July 1957, and formally ratified on 4 December 1957. It was provided that the Agreement would remain in force until 5 July 1960, and thereafter unless prior notice of termination should be given by either Government. The agreement provides that each country shall extend most-favoured-nation treatment to the other in respect of customs duties and similar charges, and import and export licensing. Japan is not entitled to claim the benefit of preferences accorded by Australia to Commonwealth countries and dependent territories. Japan also gave certain specific commitments on some important Australian export commodities.

Following a review of the agreement, a Protocol of Amendment was signed on 5 August 1963 and formally ratified on 27 May 1964. Under the Protocol Australia agreed to withdraw action against Japan under Article XXXV of the General Agreement on Tariffs and Trade, and thus a full G.A.T.T. relationship was established between the two countries.

The specific undertakings agreed in 1957 have now lapsed and the following commitments have been entered into.

Japan has:

- (a) undertaken not to accord less favourable import treatment (apart from tariff) for raw wool than for raw cotton,
- (b) stated that it has no present intention of imposing a duty on wool,
- (c) undertaken to continue imports of Australian soft wheat at a stabilised level, and to purchase Australian hard wheat when necessary requirements are met,*
- (d) stated that it will endeavour to expand opportunities for imports into Japan of Australian sugar, canned meat, leather, motor vehicles, butter, and cheese.

Australia has:

- (a) undertaken to consult Japan on temporary protection cases affecting Japanese products (in such consultations Japan will consider whether the need for temporary protection can be obviated by measures taken in Japan),
- (b) stated that equal opportunities of fair and equal competition are accorded to Japanese products in Australian Government purchases overseas.

The new agreement will be effective for three years from the date of ratification and thereafter subject to three months' notice of termination by either Government. There is provision for consultations to take place at least annually.

Indonesia. This agreement came into operation on 1 July 1959. It records the desirability of expanding trade between Australia and Indonesia. It also gives special recognition to the importance of the flour trade from Australia to Indonesia. Australia recognises the importance to Indonesia of its traditional exports to Australia. The agreement is subject to review and renewal annually.

Philippines. A trade agreement with the Philippines was signed in Manila on 16 June 1965. The agreement provides for an exchange of non-discriminatory treatment† while recognising existing preferences. The agreement is to operate for one year initially and continue thereafter unless one Government gives ninety days' notice of its intention to terminate it. The Philippines is not a member of G.A.T.T.

U.S.S.R. A trade agreement between Australia and the U.S.S.R. was signed in Moscow on 15 October 1965. The agreement provides for the exchange of non-discriminatory treatment between the two countries while recognising existing preferences. It operates initially for a period of four years. There is provision for consultation on request about any matter affecting the operation of the agreement.

Korea. On 21 September 1965 a trade agreement was signed in Seoul between Australia and South Korea. Basically the agreement provides for an exchange of non-discriminatory treatment with allowances for existing preferences. The agreement, to run for one year with provision for automatic extension, also provides for non-discrimination by State trading enterprises. Both Governments undertake to use their best endeavours to increase the volume of trade between the two countries.

Poland. A trade agreement between Australia and Poland was signed in Warsaw on 20 June 1966. The agreement provides for the exchange of non-discriminatory treatment between the two countries, while recognising existing preferences. It operates initially for a period of four years. There is provision for consultation on request about any matter affecting the operation of the agreement.

Bulgaria. A trade agreement between Australia and Bulgaria was signed in Sofia on 22 June 1966. The agreement provides for the exchange of non-discriminatory treatment between the two countries, while recognising existing preferences. It operates initially for a period of four years. There is provision for consultation on request about any matter affecting the operation of the agreement.

Rumania. A trade agreement between Australia and Rumania was signed in Bucharest on 18 May 1967. The agreement provides for the exchange of non-discriminatory treatment between the two countries, while recognising existing preferences. It operates initially for a period of four years. There is provision for consultation on request about any matter affecting the operation of the agreement.

Hungary. A trade agreement between Australia and Hungary was signed in Budapest on 5 December 1967. The agreement provides for the exchange of non-discriminatory treatment between the two countries, while recognising existing preferences. It operates initially for a period of four years. There is provision for consultation on request about any matter affecting the operation of the agreement.

* 'Soft' wheat is fair average quality wheat; 'hard' wheat is premium grade wheat similar to that grown in North America.
† An agreement, with reservations, not to discriminate against each other with tariff or non-tariff barriers.

Trade services

Trade Commissioner Service

The stimulation of interest abroad in Australia's exports is an important government activity in which the Australian Trade Commissioner Service plays a prominent part. A brief account of the establishment and growth of the Trade Commissioner Service before the Second World War is available in Year Book No. 51, page 496. Since the War the service has increased steadily, and by early 1968 there were over 100 Trade Commissioners and Assistant Trade Commissioners in forty-four posts in thirty-four countries. In 1957 Australia's official commercial representation overseas was extended by the introduction of a system of government Trade Correspondents. These correspondents, who as a rule already reside in particular centres overseas, are engaged on a part-time basis to carry out market research, arrange introductions between buyer and seller, and generally promote Australia's trade interests in the same way as Trade Commissioners. Each Trade Correspondent operates under the general direction of the nearest Trade Commissioner.

Trade Commissioners and, to a lesser extent, Trade Correspondents, are responsible for commercial intelligence in their territories. Particular facilities provided for Australian exporters and export organisations include: surveys of market prospects; advice on selling and advertising methods; arranging introductions with buyers and agents; providing reports on the standing of overseas firms; advice and assistance to business visitors; helping to organise and carry through trade missions, trade displays, newspaper supplements, and other promotion and publicity media; providing information on import duties, import licensing, economic conditions, quarantine and sanitary requirements, and other factors affecting the entry and sale of goods; helping to attract desirable investment.

In some countries Trade Commissioners also participate in inter-governmental negotiations in the economic and commercial fields. In certain countries where there is no diplomatic or consular mission he is called upon to act as the Australian representative.

Trade Commissioners usually enter the Service from either private enterprise or the public service, and applications for entry into the Service are called for periodically by public advertisement. In the more important posts the Trade Commissioner is supported by an Assistant Trade Commissioner, who normally qualifies at a later stage for appointment as a Trade Commissioner.

The Trade Commissioner Service is administered by the Commonwealth Department of Trade and Industry (as distinct from the diplomatic and consular services administered by the Department of External Affairs), but in countries where there is an Australian diplomatic or consular mission it is the practice for Trade Commissioners to be attached to the mission and to hold an appropriate diplomatic or consular rank (Commercial Counsellor, Commercial Secretary or Commercial Attaché).

The overseas trade representation is shown in the chapter International Relations.

Trade Missions

Since 1954 the Australian Government has sent a number of trade missions abroad as part of the campaign to increase exports. The experience acquired has indicated the need for flexibility in techniques to suit particular products or markets. At present the following types of trade missions are in use.

Survey missions. These are organised to obtain precise knowledge about the export trade potential for specific products in an overseas market. Such methods are used to explore export prospects in new or developing areas where commercial intelligence is not readily available or where a complex industry is involved and the industry requires special export knowledge.

Specialised and general trade missions. Arrangements are made for specific industries or groups of firms representing a number of industries to participate in a planned selling campaign in overseas markets with known sales potential. The mission visits the market, publicises its products and negotiates sales.

Since 1954 Australia has sent overseas thirty-five trade and survey missions and five trade ships. Further details on trade missions are included in Year Book No. 49, page 544.

Export Payments Insurance Corporation

The *Export Payments Insurance Corporation Act 1956* established the Corporation with the objective of encouraging Australian manufacturers to export by protecting their exports against risks of loss arising from the non-payment of their overseas accounts. The Corporation is charged to be self-supporting, i.e. over a period its income should be adequate to cover the expenses of operation and any payments of claims which may be incurred.

The main risks of loss against which the Corporation insures are the 'commercial' risks of the insolvency or protracted default of the buyer and 'political' risks. The latter include exchange transfer difficulties; the imposition of government regulations which prevent the import of the goods into the buyer's country; war, revolution or civil disturbance in the buyer's country. For most 'political' risks insurance cover is available to a maximum of 90 per cent of the amount of loss in the pre-shipment period and a maximum of 95 per cent in the post-shipment period. The rate of cover for 'commercial' risks is fixed at 85 per cent.

The Corporation may submit to the Government, for consideration in the national interest, applications for payment insurance which are commercially unacceptable to the Corporation on its normal credit account. In considering such applications the Government takes account of both political and economic factors.

An amendment to the Act in November 1964 gave E.P.I.C. the authority to issue guarantees of payment to banks on money raised at banks for the purpose of financing exports. The existence of E.P.I.C. bank guarantees has considerably facilitated the raising of finance by exporters.

In addition to providing the above facilities, the Corporation insures, on behalf of the Commonwealth Government, eligible Australian investments in overseas countries against the three main 'political' risks, namely expropriation, exchange transfer difficulties, and war damage. For an investment to be eligible it must confer benefits on both Australia and the investment host country.

Since the first policy was issued in September 1957, Australian exporters have made increasing use of the facilities of E.P.I.C. At 31 December 1967 the Corporation had 653 policies current on its commercial account (i.e. not including Government business) with a face value of over \$254 million. The Corporation has issued policies covering exports to 142 countries and has insured a wide range of Australian exports.

A Consultative Council, composed of eight leading figures in the fields of banking, commerce, and industry, and two Government members advises the Corporation on its activities. The council meets two or three times a year and is appointed for a term of three years.

Further information on the Corporation is contained in Year Book No. 49, page 544. For particulars of its operations see Chapter 18, Private Finance.

Collection and presentation of statistics

Basic documents

Overseas trade statistics are derived from documents obtained under the Customs Act by the Department of Customs and Excise and compiled by the Commonwealth Bureau of Census and Statistics. These documents are duplicate copies of export and import entries submitted by exporters and importers or their agents to the Department of Customs and Excise. Certain items for which customs entries are not required are excluded from the statistics. Export entries show date and port of shipment, country of consignment and the description, quantity (where required) and value of the goods. Prior to July 1966 the statistical item number was inserted and verified by officers of the Department of Customs and Excise in Canberra. As from July 1966 the statistical item number has been inserted by the exporter or his agent and verified by officers of the Department of Customs and Excise in the local offices of the Collectors of Customs. Import entries show date and port of entry, country of origin, description of goods, quantity (where required), value of the goods, and amount of duty paid thereon. The tariff item number under which the goods are admitted and the statistical key code are inserted by the importer or his agent, and these are verified by officers of the Department of Customs and Excise in the local offices of the Collectors of Customs.

Scope of the statistics

All goods moving into or out of Australia are recorded in overseas trade statistics (except those exclusions listed on page 337). The statistics are not confined to goods which are the subject of a commercial transaction. The area to which all overseas trade statistics issued by this Bureau apply is the whole of the Commonwealth of Australia, comprising the States of New South Wales, Victoria, Queensland, South Australia, Western Australia and Tasmania, the Northern Territory and the Australian Capital Territory. Non-contiguous territories under Australian administration are treated as outside countries, and trade transactions between Australia and those non-contiguous territories are part of the overseas trade of Australia. Such transactions are shown separately, i.e. the trade of Australia with each particular area is separately recorded and tabulated.

Inclusions and exclusions

- (a) Imports and exports on government account including defence equipment are treated as normal transactions and are an integral part of overseas trade statistics.
- (b) Direct transit trade, i.e. goods being transhipped or moved through Australia for purposes of transport only, is not recorded.
- (c) Outside packages (containers, crates, etc.) are included as a separate item in the tabulation of imports, but they have only been fully classified by country of origin since 1950-51. For exports, however, the value recorded for each item includes the value of the outside package.
- (d) Bunkers and stores supplied to vessels and aircraft have been excluded from statistics of exports since 1906. The value of these stores loaded during the years 1964-65 to 1966-67 is shown in the table on page 374.
- (e) Those migrants' and passengers' effects for which a customs entry is not received are excluded from imports and exports.
- (f) Those parcel post imports and exports of small value for which customs entries are not received are excluded from overseas trade statistics.
- (g) Certain materials for inter-governmental defence projects for which customs entries are not required are excluded from imports.
- (h) The value of ores and concentrates imported and exported includes the value of the gold content and the latter is not included in imports and exports of gold.
- (i) Vessels and aircraft engaged in the transport of passengers or goods between Australia and other countries are excluded from imports and exports.
- (j) Vessels and aircraft purchased for use on overseas routes are excluded from imports and any subsequent overseas sales of such vessels and aircraft from exports.
- (k) Fish and other sea products landed abroad directly from the high seas by Australian vessels are excluded from exports.

Period covered by statistics

Exports. These are recorded statistically in the month in which the export entries are passed by the Department of Customs and Excise. Normally this is within a few days of shipment, although delays sometimes occur in the lodging of entries. Shipments are at times delayed by abnormal factors affecting sales, deliveries for export and the loading of ships. When such delays occur, exports during the affected period are diminished, and when the delays are overtaken, shipments include substantial quantities of accumulated stocks as well as current disposals. Wool shipments in any trade year may be materially affected by the time spread of wool auctions which normally end in July. The carry-over for shipments varies from year to year. New season's wheat normally becomes available for shipment from December onwards, and the quantity shipped in any trade year (ending June) depends on the size of the crop, the time spread on sales for export, and physical factors affecting the scheduling of deliveries.

Imports. Imports are recorded statistically in the month in which import entries are passed by the Department of Customs and Excise. Normally this is within a few days of discharge of cargoes.

Year of compilation. Since July 1914, detailed trade statistics have been compiled for financial years (July to June). Prior to that details were compiled on a calendar year basis.

Valuation

Imports into Australia prior to 15 November 1947 were recorded in British currency values, and full explanatory notes on the methods of recording import values before and since 15 November 1947 were included in Year Book No. 37, page 396.

All values in overseas trade statistics are determined on a 'free on board (f.o.b.) port of shipment' basis. This means that all charges, in particular the cost of freight and insurance, incurred after the goods have been exported from the port of shipment are excluded. Only transport and service charges incurred, or usually incurred, prior to export are included in the determination of trade values.

The procedure adopted to value imports and exports is as follows.

Exports. The recorded value of goods exported includes the cost of containers and outside packages and has been determined, since July 1937, as follows.

- (a) Goods sold to overseas buyers before export are valued at the Australian f.o.b. port of shipment equivalent of the actual price at which the goods were sold.
- (b) Goods shipped on consignment are valued at the Australian f.o.b. port of shipment equivalent of the price paid for similar goods of Australian origin in the principal markets of the country to which they are dispatched for sale.

An account of the bases of valuation in operation prior to July 1937 is given on page 469 of Year Book No. 39.

Imports. The recorded value of goods imported is the amount on which duty is payable or would be payable if the duty were *ad valorem*. Value for duty is the f.o.b. port of shipment equivalent of either:

- (a) the actual price paid or to be paid by the Australian importer plus any special deduction (transactions value); or
- (b) 'the current domestic value' of the goods; whichever is the higher.
'Current domestic value' is defined as 'the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of those goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country.'

The cost of containers and outside packages is excluded from the value of individual import items but is included as a separate item in the tabulation of imports.

Quantity data

Where quantities are shown they are generally but not invariably expressed in terms of the normal trade unit. Where 'cental' is used, the unit is equivalent to 100 lb avoirdupois. Quantities are not tabulated in respect of statistical items for which there is no appropriate unit of quantity (for example, a statistical item which covers a number of commodities that cannot be recorded under a uniform unit of quantity).

Statistical concepts of trade

Trade systems. There are two generally accepted systems of recording overseas trade statistics, namely (a) special trade and (b) general trade. The Statistical Office of the United Nations defines the two systems as follows.

'*System of Trade.* Two systems of recording trade are in common use, differing mainly in the way warehoused and re-exported goods are recorded.

- (a) *Special Trade.* Special imports are the combined total of imports directly for domestic consumption (including transformation and repair) and withdrawals from bonded warehouses or free zones for domestic consumption. Special exports comprise exports of national merchandise, namely, goods wholly or partly produced or manufactured in the country, together with exports of nationalised goods. (Nationalised goods are goods which, having been included in special imports, are then exported without transformation.)
- (b) *General Trade.* General imports are the combined total of imports directly for domestic consumption and imports into bonded warehouse or free zone. General exports are the combined total of national exports and re-exports. Re-exports, in the general trade system, consist of the outward movement of nationalised goods plus goods which, after importation, move outward from bonded warehouse or free zone without having been transformed.

Direct transit trade, i.e. goods merely being transhipped or moving through the country for purposes of transport only, is excluded from the statistics of both special and general trade.'

Statistics in this volume are compiled on the 'general trade' basis; imports on a 'special trade' basis are published in the bulletin *Imports Cleared for Home Consumption*, issued annually.

Australian produce (national produce) is defined as goods, materials or articles which have been produced, manufactured or partly manufactured in Australia, except goods which were originally imported and have undergone only repair or minor operations which leave them essentially unchanged.

Re-exports are defined as goods, materials or articles originally imported which are exported in the same condition in which they were imported, and goods, materials or articles originally imported which are exported after undergoing repair or minor operations which leave them essentially unchanged. 'Minor operations' include blending, packaging, bottling, cleaning, sorting, husking, and shelling.

Merchandise and non-merchandise trade. Total trade is divided into merchandise and non-merchandise trade. Merchandise trade is the equivalent of total exports and imports less certain items specified as non-merchandise. Prior to July 1965 non-merchandise trade consisted of exports and imports of specie and gold and silver. In July 1965 merchandise and non-merchandise trade were redefined in accordance with international standards recommended by the United Nations, and since that date non-merchandise items include commodities such as gold, legal tender, decorations, trophies, samples, passengers' personal effects, military equipment and stores for Australian Forces abroad, goods for the use of diplomatic and consular representatives, goods imported with the

intention of being re-exported, goods exported with the intention of being re-imported, etc. A complete description of these commodities is contained in the Australian Export and Import Commodity Classifications published by the Bureau.

Balance of payments basis. Statistics of exports and imports for Balance of Payments purposes are derived by making certain adjustments, relating both to scope and valuation to statistics of merchandise exports and imports. Statistics on the adjusted basis are published in statistical bulletins relating to the Balance of Payments. The adjustments include the following: imports are adjusted for the overall excess of recorded value for duty over the actual selling price to the importer; exports and imports of goods for repair and return and the value of repairs are deducted from merchandise trade; exports and imports of ships and aircraft for use on overseas routes, certain imports of defence equipment, and other trade items for which customs entries are not required are added. Adjustments are also made for timing differences between the change of ownership and the lodgment of import entries in the case of certain large items of equipment (e.g. warships).

The balance of trade is derived by comparing statistics of exports on a balance of payments basis with statistics of imports on that basis.

Balance of payments

Estimates of the balance of trade do not, however, measure Australia's total balance of payments which includes other transactions such as freight and insurance charges on imports, shipping expenditure in Australian ports, overseas travel, payments of profits and interest, and private and government borrowing overseas.

Country of consignment or origin

'Country of consignment' referred to in exports tables means the country to which goods were consigned at the time of export. Where the country of consignment is not determined at the time of export the goods are recorded as exported 'For orders'. 'Country of origin' referred to in import tables means the country of production. Classification of imports according to country of shipment was discontinued after the year 1920-21. A brief account of the dual system of import classification by country operating prior to the year 1921-22 is given on page 500 of Year Book No. 51.

Throughout this chapter, countries listed are shown in alphabetical order.

Commodity classifications

Overseas trade statistics for years up to and including 1964-65 were compiled according to the Statistical Classification of Imports and Exports. From July 1965 imports have been classified according to the new Australian Import Commodity Classification. This classification is based on the Standard International Trade Classification, Revised (S.I.T.C.), which is closely related to the Brussels Tariff Nomenclature used in the new Australian Customs Tariff introduced in July 1965. In accordance with the principles of the S.I.T.C., imports of defence equipment by the Australian Services are normally classified according to the commodity imported, e.g. warships are classified under 'ships and boats'.

Although the basis of the classification of exports remained unchanged for 1965-66, the export section of the Statistical Classification of Imports and Exports was published separately, with some minor revisions, as the Australian Export Commodity Classification, 1965-66. A new Australian Export Commodity Classification based on the S.I.T.C. was introduced in July 1966.

Pre-federation records

In the years preceding federation each State recorded its trade independently and in so doing did not distinguish other Australian States from external countries. The aggregation of the records of the several States is necessarily the only available means of ascertaining the trade of Australia for comparison with later years, but the results obtained may be subject to error, since past records of values and the direction of exports and imports were not on uniform lines. Exports and imports for years prior to federation may be found in early issues of the Year Book, particularly Year Book No. 2. On the introduction of the *Customs Act* 1901 the methods of recording values were made uniform throughout the States.

Total overseas trade

The following table shows the total trade of Australia with overseas countries from 1901 to 1966-67. The period 1901 to 1960-61 has been divided into five-year periods, and the figures shown represent the annual averages for the periods specified. Figures for the individual years were published in earlier issues, but figures for imports in issues prior to No. 37 were expressed in British currency.

OVERSEA TRADE: AUSTRALIA

1947-48 TO 1966-67

OVERSEAS TRADE: AUSTRALIA, 1901 TO 1966-67
(f.o.b.)

Period	Exports	Imports	Total	Excess of exports (+) or imports (-)	Value per head of population		
					Exports	Imports	Total
Annual average—	\$m	\$m	\$m	\$m	\$	\$	\$
1901 to 1905	102	71	174	+ 31	26.2	18.2	44.4
1906 to 1910	(a)139	94	232	+ 45	32.6	22.0	54.6
1911 to 1915-16	149	133	282	+ 16	30.8	27.6	58.4
1916-17 to 1920-21	230	183	413	+ 47	43.8	34.8	78.6
1921-22 to 1925-26	269	249	518	+ 20	45.8	42.2	88.0
1926-27 to 1930-31	263	239	501	+ 24	41.0	37.2	78.2
1931-32 to 1935-36	242	148	390	+ 94	36.2	22.2	58.4
1936-37 to 1940-41	315	247	562	+ 68	45.4	35.6	81.0
1941-42 to 1945-46	328	423	751	- 95	44.8	58.2	103.0
1946-47 to 1950-51	1,143	899	2,041	+244	145.4	114.3	259.7
1951-52 to 1955-56	1,572	1,566	3,138	+ 6	176.4	175.6	352.0

(a) Prior to 1906, ships' stores were included in exports. For value of such goods loaded on overseas vessels and aircraft during each of the years 1964-65 to 1966-67, see page 374.

Plate 36 opposite shows the overseas trade of Australia from 1947-48 to 1966-67.

The following table shows particulars of merchandise and non-merchandise trade for each of the years 1962-63 to 1966-67.

MERCHANDISE AND NON-MERCHANDISE TRADE: AUSTRALIA, 1962-63 TO 1966-67
(\$'000 f.o.b.)

(a) Figures for 1964-65 and 1965-66 for exports and 1964-65 for imports are estimates. Estimates for those divisions which have been grouped are not available. (b) Included with Divisions 58 and 59. (c) Includes Divisions 51 and 52.

Exports, by industrial group

The following table provides an analysis of Australian exports for the years 1964-65 to 1966-67. This analysis is designed to show fluctuations in exports of Australian produce dissected according to the main industry of their origin, although any such classification is necessarily somewhat conventional.

EXPORTS OF AUSTRALIAN PRODUCE, BY INDUSTRIAL GROUP
1964-65 TO 1966-67

<i>Industrial group</i>	<i>Value (\$'000 f.o.b.)</i>			<i>Proportion of value of exports of Australian produce (excluding gold) (per cent)</i>		
	<i>1964-65</i>	<i>1965-66</i>	<i>1966-67</i>	<i>1964-65</i>	<i>1965-66</i>	<i>1966-67</i>
Agriculture, horticulture and viticulture—						
Unprocessed	375,404	339,334	452,580	14.6	13.0	15.5

Re-exports (excluding gold)	69,536	82,856	87,674
Gold exports	18,404	24,418	18,096
Total value of recorded exports	2,651,449	2,720,953	3,023,925

In the year 1966-67 Australian produce (other than gold) exported amounted to approximately \$2,918 million. Of this, \$2,372 million or 81 per cent was mainly the produce of primary industries, comprising \$1,769 million of unprocessed produce and \$602 million of goods which had been processed to some degree before export. The values of the principal individual items of processed Australian primary produce exported were (\$'000): raw sugar, 98,168; flour, etc., 23,074; canned fruit, 40,760; dried fruit, 23,185; wool (scoured, tops, etc.), 79,648; canned meats, 18,452; butter, 64,841;

milk (condensed, dried, etc.), 29,531; pig lead, 32,943; lead bullion, 20,445; zinc bars, blocks, etc., 28,608; copper ingots, 27,399; and undressed timber, 4,138. The value of manufactures exported as classified on page 344 was \$456 million, approximately 16 per cent of Australian produce (other than gold) exported in 1966-67. The values of principal individual items here included were (\$'000): manufactures of metal, 140,269; implements and machinery, 54,870; drugs and chemicals, 31,421; and paper and stationery, 14,824. Refined petroleum oils exported are shown separately, as they consist largely of imported crude oils refined in Australia and re-exported in the refined form. The values of principal individual items shown as 'unclassified' in 1966-67 were (\$'000): individual consignments of less than \$100 in value, 14,815; and military equipment and stores and supplies for Australian projects overseas, 15,124.

The items enumerated indicate how arbitrary is the line necessarily drawn between primary produce and manufactures in any classification of this kind. The value of processed primary products exported includes some element of value added by the simpler processes of manufacture, while the value shown for manufactures exported necessarily includes the value of raw materials (primary produce) used in those manufactures.

Imports of merchandise, by economic class

The following table shows imports of merchandise into Australia during the years 1964-65 to 1965-67 classified according to economic classes of (i) purpose and (ii) degree of manufacture.

IMPORTS OF MERCHANDISE, BY ECONOMIC CLASS: AUSTRALIA 1964-65 TO 1966-67

	Value (\$'000 f.o.b.)			Proportion of value of imports of merchandise (per cent)		
	1964-65	1965-66	1966-67	1964-65	1965-66	1966-67
PURPOSE						
Producers' materials for use in—						
Building and construction . . .	100,102	93,680	86,742	3.5	3.2	2.9
Rural industries	41,130	40,360	54,706	1.4	1.4	1.8

For footnotes see next page.

IMPORTS OF MERCHANDISE, BY ECONOMIC CLASS: AUSTRALIA
1964-65 TO 1966-67—*continued*

	Value (\$'000 f.o.b.)			Proportion of value of imports of merchandise (per cent)		
	1964-65	1965-66	1966-67	1964-65	1965-66	1966-67
DEGREE OF MANUFACTURE(g)						
Producers' materials—						
Crude	374,632	376,196	405,565	13.2	13.0	13.5
Simply transformed	256,470	202,959	212,270	9.0	7.0	7.1
Elaborately transformed	824,570	778,555	772,633	29.0	26.9	25.7
Finished consumer goods—						
Crude	26,568	29,796	28,444	0.9	1.0	0.9
Simply transformed	43,404	43,982	42,469	1.5	1.5	1.4
Elaborately transformed	375,788	401,494	446,996	13.3	13.8	14.9
Total imports—						
Crude	401,200	405,992	434,009	14.1	14.0	14.4
Simply transformed	402,286	343,023	335,716	14.2	11.8	11.2
Elaborately transformed	2,037,840	2,149,265	2,234,248	71.7	74.2	74.4
Grand total	2,841,326	2,898,280	3,003,973	100.0	100.0	100.0

(a) Owing to insufficient information, it is not possible to treat unassembled tractors and other machinery in a similar manner to motor vehicles, and all such machinery and replacement parts therefor are treated as capital equipment whether imported in an assembled or unassembled condition. (b) Excludes a percentage for piece goods to be sold by retail, and paper to be used solely for wrapping, which are recorded in Finished consumer goods, All other, and Auxiliary aids to production, respectively. (c) See footnote (a). (d) Includes a percentage for piece goods to be sold at retail; see footnote (b). (e) Excludes crude petroleum, which is included in Producers' materials, Manufacturing—Other. (f) Includes a percentage for paper to be used solely for wrapping; see footnote (b). (g) The class Fuels and lubricants consists of goods 'simply transformed', and the classes Capital equipment and Munitions and war stores entirely of goods 'more elaborately transformed'. The class Auxiliary aids to production is about equally divided between goods 'simply transformed' and 'elaborately transformed'.

External trade of Australia and other countries

Essentials of comparison

Direct comparison of the external trade statistics of countries is possible only when the general conditions prevailing therein and the system of record are more or less identical. For example, in one country the value of imports may be the value at the port of shipment, while in another the cost of freight, insurance and charges may be added thereto. Again, the values of exports and imports in one may be based on transaction values, whereas in another they may be based on the official prices fixed from time to time by a commission constituted for the purpose. In later years, moreover, a very substantial difference in the value of imports would result from the different methods of converting the moneys of foreign countries, i.e. from the application of current rates of exchange or of the mint par. Finally, the external trade statistics of any country are also affected in varying degree by the extent to which they include transit or re-export trade. This class of trade represents a much greater proportion of the trade of Switzerland and Belgium-Luxembourg than that of other countries. France and the United Kingdom also have substantial re-exports, whereas in Canada, Australia and New Zealand re-exports account for a comparatively small proportion of trade.

Direction of overseas trade

Exports and imports, by country of consignment or of origin

The following two tables show the value of Australian exports and imports during each of the years 1964-65 to 1966-67 according to principal country of consignment or origin respectively, the second table in percentages. The proportions of Australian exports and imports by country of origin or consignment are shown graphically on plate 37 on page 349.

Trade with the United Kingdom

Since 1908, permanent resident Commissioners appointed by the British Board of Trade have been located in Australia for the purpose of advising manufacturers and merchants in Britain about Australian trade affairs. Particulars of British trade representation in Australia are given in the chapter International Relations. From 8 August 1907 the Commonwealth Customs Tariffs have provided preferential rates of customs duties on certain goods the produce or manufacture of the United Kingdom, with the object of assisting the British manufacturer to retain or improve his position in this market in relation to other countries. The main provisions in these Acts relating to preference are dealt with on pages 328-9 in this chapter. For details of exports to and imports from the United Kingdom, by divisions of the Australian Export and Import Commodity Classifications, see tables on pages 358 and 369 respectively.

Trade with eastern countries

Details of exports to and imports from eastern countries are shown in the following table. Further information for principal eastern countries, by divisions of the Australian Export and Import Commodity Classifications, is shown in the tables on pages 350-9 and 360-9 respectively.

TRADE OF AUSTRALIA WITH EASTERN COUNTRIES, BY COUNTRY OF CONSIGNMENT OR ORIGIN, 1964-65 TO 1966-67

(\$'000 f.o.b.)

Ratio of duties collected to dutiable clearances 21.8	21.8	21.2	21.6	21.9

Overseas trade in calendar years

For the purpose of comparison with countries which record overseas trade in calendar years, the following table has been compiled to show estimates of Australian exports and imports for each of the calendar years 1965 to 1967.

OVERSEAS TRADE IN CALENDAR YEARS, AUSTRALIA, 1965, 1966, AND 1967
(\$'000 f.o.b.)

Year	Merchandise		Non-merchandise		Total	
	Exports	Imports	Exports	Imports	Exports	Imports
1965	2,603,723	2,959,404	79,513	55,789	2,683,236	3,015,193
1966	2,744,164	2,853,901	88,959	41,197	2,833,123	2,895,098
1967	3,004,814	3,085,679	102,820	46,402	3,107,634	3,132,081

Excise

Although excise goods have no immediate bearing on overseas trade, the rate of excise duty is in some cases related to the import duty on similar goods. Moreover, as the Excise Acts are administered by the Department of Customs and Excise, it is convenient to publish here the quantities of Australian produce on which excise duty has been paid. Particulars of customs and excise revenue are shown in the chapter Public Finance. The following table shows the quantities of spirits, beer, tobacco, etc., on which excise duty was paid in Australia during the years 1965-66 and 1966-67.

QUANTITY OF SPIRITS, BEER, TOBACCO, ETC. ON WHICH EXCISE DUTY
WAS PAID: AUSTRALIA, 1965-66 AND 1966-67

Article	1965-66	1966-67	Article	1965-66	1966-67
	'000 gallons	'000 gallons		'000 lb	'000 lb

Cigars	130	133			

(a) Includes supplies to Commonwealth Government on which excise was paid. During the years 1965-66 and 1966-67 refunds were made on 40,714,000 and 42,638,000 gallons, respectively.

OVERSEAS INVESTMENT BY PRIVATE INVESTORS

Surveys of overseas investment have been conducted since 1947-48 to obtain particulars of certain types of private capital flows to and from Australia. The surveys, when supplemented by other information, provide statistics of overseas investment in companies in Australia and in Australian public authority securities repayable in Australian currency, as well as statistics of Australian investment in companies overseas and in foreign government securities. Particulars of investment income from most of those classes of investment are also obtained from the surveys.

Certain types of private overseas investment are not included in the statistics which follow. Investment in real estate (except when made through companies) and loans between Australian individuals and non-resident individuals are not covered. Nor are changes in short-term liabilities between exporters and importers in Australia and overseas covered, except in so far as they arise from exports and imports between branches or subsidiaries and their home offices—in this case they are included in the figures of investment in branches or subsidiaries.

In the tables which classify investment in Australia according to country of origin, the investment is shown as an inflow from the country which is the immediate source of the capital. Income payable overseas is classified on a similar basis, i.e. it is classified to the country to which it is directly payable.

Remittances between Australia and overseas by Australian life insurance companies are regarded as capital transactions made to bring assets located in overseas countries into line with commitments in those countries, and are included as a flow of investment between Australia and overseas. Similar considerations apply to overseas life insurance companies with branches in Australia.

The following are explanatory notes relating to some of the terms used in the tables.

Companies. In these statistics the term 'companies' relates to both incorporated and unincorporated businesses.

Overseas. For the purpose of these statistics, Papua and New Guinea and the other external territories under the control of Australia are regarded as overseas countries.

Portfolio investment and institutional loans. Investment other than direct investment, including loans raised overseas from financial institutions and other companies which have no direct investment in the borrowing company.

Subsidiaries. For the purpose of these statistics this term is applied to all companies in which there is a 'direct' overseas holding of ordinary shares (or voting stock). A holding is treated as 'direct' when there is ownership of twenty-five per cent or more of a company's ordinary shares (or voting stock) by one company or a number of companies incorporated in one country, or ownership of fifty per cent or more of a company's ordinary shares (or voting stock) by individuals or companies in one country.

Undistributed profits. This term refers, in the case of Australian subsidiaries, to the equity of the overseas parent in the net earnings for taxation purposes of the Australian company, less tax (or tax provision) and less dividends declared. In the case of overseas subsidiaries of Australian companies, this term represents the equity of the Australian parent in the book value of the net earnings of the subsidiary after tax, less dividends paid or payable.

Unremitted profits. For these statistics this represents the net earnings of branches during the year, after tax, less remittances by the branches to their home offices during the year of net earnings and interest (irrespective of the period to which the earnings and interest relate). 'Net earnings' of Australian branches of overseas companies are, in general, based on the value of their income for taxation purposes.

The annual bulletin *Insurance and Other Private Finance* and the *Annual Bulletin of Overseas Investment: Australia* contain additional figures relating to overseas investment, including a longer range of years covered, and also a more detailed description of the figures.

Private overseas investment in companies in Australia and investment income payable overseas by companies in Australia

The inflow of private overseas investment in Australia since 1962-63 is shown in the next three tables.

BALANCE OF PAYMENTS

Estimates of a country's balance of payments are prepared for the purpose of providing a systematic record in money terms of the economic transactions which take place over a period between that country and all other countries. Such records are essential to the examination of influences which external factors have on the domestic economy. The Australian economy is subject to fairly large fluctuations in export income, and it is also affected in important respects by variations in the level of foreign investment and the demand for imports. Consequently, these estimates have always assumed particular importance in this country.

Official estimates of Australia's balance of payments covering the period 1928–29 to 1930–31 were included in the Appendix to Year Book No. 24, 1931. Except for the war years (1939 to 1945), estimates have since been published annually. Detailed estimates are currently provided twice yearly in the form of a mimeographed publication *Balance of Payments*. This publication brings the estimates forward to the end of the most recent financial year or half-year and, together with a printed volume *The Australian Balance of Payments, 1928–29 to 1950–51*, provides also a description of the various items included and the sources from which the information is obtained. A summarised statement of the principal current account items and capital movements is prepared and issued on a quarterly basis in the *Balance of Payments—Quarterly Summary*.

The form of presentation of the Australian estimates has recently been revised in order to bring it more closely into line with the recommendations of the Balance of Payments Manual of the International Monetary Fund (I.M.F.). The basic distinction remains, however, between 'current account' and 'capital account' transactions. Current account transactions may be defined as those involving changes in the ownership of goods or the rendering of services between residents of Australia and the rest of the world and include such items as exports, imports, shipping freights, dividends, profits and interest, travel, and government expenditure. The current account also includes the value of transfers in the form of gifts in cash or kind made or received by residents of Australia, both private and government, to or from the rest of the world. Capital account transactions may be defined as those involving claims to money and titles of investment between residents of one country and those of another country and include government loan-raising operations overseas, investment by overseas residents in Australian companies, the investment of Australian residents in companies overseas, and transactions involving changes in the overseas assets and liabilities of certain Australian marketing authorities.

By definition, the balance of payments on current account and the balance of payments on capital account during a given period must exactly offset one another. Errors and omissions, however, occur in the estimation of the amounts involved in various items in both the current and capital accounts, and, in addition, there are differences in timing between the statistical recording of trade and invisible transactions and the relevant foreign exchange transactions. It is therefore necessary to introduce into the estimates a 'balancing item' which allows the identity between the current and capital account balances to be preserved. The 'balancing item' is included in the capital account, but, as mentioned above, it includes discrepancies in the current account and does not, as is frequently supposed, include only errors, omissions and timing differences related to capital transactions.

Details of the estimates are assembled from a variety of sources of which the following are the more important: (i) statistics of exports and imports obtained from Australian trade statistics; (ii) details of the import valuation adjustment obtained from a sample of the invoices submitted to the Department of Customs and Excise in respect of imports into Australia; (iii) information on particular invisible current account items and capital movements obtained by regular inquiry from private organisations and government departments; (iv) details of receipts and payments of foreign exchange provided by the banking system; (v) information on dividends remitted, undistributed income and private investment in companies provided by statistics of overseas investment collected by this Bureau; (vi) information on freight on imports and other items concerned with overseas shipping obtained from a sample of the invoices submitted to the Department of Customs and Excise in respect of imports into Australia and a survey of shipping operations conducted by this Bureau; and (vii) information on international reserves supplied by the Reserve Bank of Australia.

Current account

The balance of payments on current account is arranged to show a series of credit items and a corresponding series of debit items. Primarily, entries on the credit side include all current transactions which result in receipts of foreign exchange (for goods and services, property income or transfers), and on the debit side the similar transactions which result in payments of foreign exchange. The principal exceptions to this rule are the amounts shown for undistributed income and where debts incurred for current account items, principally goods, are subsequently capitalised. In respect

of these amounts no movement of foreign exchange takes place, the amounts concerned being treated as credits or debits in the relevant sections of the current account, and as corresponding outflows or inflows in the relevant sections of the capital account. A further exception occurs in the case of transfers in kind where no foreign exchange movement takes place. The values of transfers received or provided in kind are shown as credits or debits respectively.

The largest items shown in the current account are exports and imports, and the difference between them represents the balance of trade. This is the most important, and usually the most variable, relationship in the balance of payments. *For balance of payments purposes, certain adjustments are made to the recorded trade statistics.* Briefly, these adjustments are made to exclude those transactions for which there is no change of ownership between residents and non-residents of Australia and to include certain transactions for which there has been a change of ownership but for which customs entries are not required. In addition, a valuation adjustment is made to the recorded import statistics in order to remove the overstatement which results from the basis of valuation for customs duty. A full description of the adjustments is provided in Appendix V. of the publication *Balance of Payments, 1960-61 to 1964-65*. A full evaluation of the overall position on current account, however, occurs only after the invisible items have been taken into account. The most important of these are the transportation items. Entries appear on both the debit and credit sides, the principal component on the debit side being freight payable overseas on imports into Australia. The principal component on the credit side is expenditure by overseas carriers, which represents mainly overseas ships' expenditure for stevedoring, port charges, etc. incurred in loading and discharging goods at Australian ports, and stores purchased in Australia. The items next in importance are those concerning income from property. Debit entries under this heading include dividends, profits, interest and royalties payable overseas, while the credit entries include similar details of amounts receivable by Australian residents. These items include undistributed income for which, as mentioned above, no monetary payments occur. The remaining items are smaller than those mentioned above, and include travel, government transactions, transfers (including foreign aid made available by the Australian Government), and, on the credit side, the net value of Australian gold production.

Capital account

The capital account is also arranged to show a series of net credits and debits. Entries on the credit side represent a net increase in non-residents' assets in Australia or a net decrease in Australian assets overseas, while debit entries represent a net decrease in non-residents' assets in Australia or a net increase in Australian assets overseas.

Capital account transactions are also grouped according to the sector of the Australian party to the transactions. The government sector, therefore, includes all capital transactions of central, State, and local governments with the exception of transactions of monetary institutions (which are included in the monetary sector), while the private sector covers transactions of all resident individuals and private institutions (again, excepting monetary institutions). The monetary sector covers all banking institutions, including government-owned banks. Transactions of the monetary sector are further sub-divided into official and non-official transactions. Official transactions of Australian monetary institutions are those which cause changes in international reserves and in Australia's net I.M.F. position and transactions between the Reserve Bank of Australia and foreign central monetary institutions. Non-official transactions include all other transactions of Australian monetary institutions.

In the government sector the most important items are transactions by non-residents in government securities domiciled overseas and in Australia and transactions involving changes in Australia's assets with and liabilities to international non-monetary institutions such as the International Bank for Reconstruction and Development and the Asian Development Bank. Other government transactions are largely a reflection of the net effect on the balance of payments of leads and lags between payments made overseas for items of equipment for the defence services or government airlines and the delivery of the equipment. In periods where payments exceed the value of deliveries a net debit results; in periods where the value of deliveries exceeds payments a net credit is recorded.

In the private sector the most important items are overseas investment in Australian companies, Australian investment in companies overseas, and the transactions of marketing authorities. The figures for marketing authorities represent changes in the estimated value of commodity stocks held overseas by, or in amounts owed by overseas debtors to, the principal Australian marketing authorities.

In the monetary sector the most important item is that which shows the net change in Australia's international reserves. Also important are transactions involving changes in Australia's position with the I.M.F.

The balancing item includes errors and omissions and timing differences, referred to on page 383.

Tables—Balance of payments

The following tables show, for the three years 1964-65 to 1966-67, particulars of:

- (i) the balance of payments; and
(ii) the balance of payments on current account, by major groups of countries.

CHAPTER 12

TRANSPORT, COMMUNICATION AND TRAVEL

The statistics in this chapter relate in the main to the year 1966-67, with comparisons restricted to a few recent years. More detailed figures and particulars for earlier years are included in the annual bulletins, *Transport and Communication*, *Commonwealth Finance*, and *State, Territory and Local Government Authorities' Finance and Government Securities*, and in the annual mimeographed statement *Motor Vehicle Registrations*. Current information on subjects dealt with in this chapter appears in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, the *Digest of Current Economic Statistics*, *Overseas Shipping Cargo* (quarterly), *Motor Vehicle Registrations* (monthly) and two preliminary monthly statements *Registrations of New Motor Vehicles*, *Road Traffic Accidents involving Casualties* (quarterly), and *Overseas Arrivals and Departures* (monthly and quarterly)—see page 451. Greater detail on the latter subject is contained in the annual bulletin *Demography*.

Information additional to that contained in Bureau publications is available in the annual reports and other statements of the Department of Shipping and Transport, the various harbour boards and trusts, the several Government railways authorities, the Department of Civil Aviation, the Postmaster-General's Department, the Overseas Telecommunications Commission, the Australian Broadcasting Control Board, and the Australian Broadcasting Commission.

THE AUSTRALIAN TRANSPORT ADVISORY COUNCIL AND ITS STANDING COMMITTEES

The Australian Transport Advisory Council, established April 1946, comprises the Commonwealth Minister for Shipping and Transport as Chairman, the Commonwealth Ministers for the Interior and Territories, and each State Minister for Transport. The administration of the Council and the standing committees it has established is the responsibility of the Commonwealth Department of Shipping and Transport. The general practice is that the Council convenes at least once a year, the annual meetings moving successively from one capital city to another. The Council primarily considers policy matters relating to transport operation, co-ordination and development.

The regulation of, and the executive responsibility for, transport is shared concurrently between the Commonwealth and State Governments. The Australian Transport Advisory Council is the meeting ground of Commonwealth and States at a ministerial level and provides an effective means for inviting discussion and reaching by way of mutual consent and understanding a uniformity of approach towards transport administrative procedures and policy. It also provides a means for reviewing and discussing proposals for the national solution of pressing transport problems and the rectification of transport deficiencies generally.

Some of the Council's most useful work has been accomplished through the agency of committees established by the Council from time to time. Some committees are of a semi-permanent nature. They were established to initiate discussion and action on transport problems referred by member Ministers and other authorities and to undertake specialised work. Most of these committees meet at regular intervals and report annually on their progress to the Australian Transport Advisory Council. These committees are: The Australian Motor Vehicle Standards Committee, The Australian Road Safety Council, The Australian Road Traffic Code Committee, The Committee of Transport Economic Research, The Australian Dangerous Goods Transport Committee, and The Australian Motor Vehicle Design Advisory Panel.

Further details of the work of the Australian Transport Advisory Council and its standing committees are given in Year Book No. 53, 1967, pages 421-4.

SHIPPING

Control of shipping

Commonwealth navigation and shipping legislation

Section 51 (i) of the Commonwealth Constitution empowers the Parliament of the Commonwealth to make laws in respect of 'Trade and commerce with other countries, and among the States'. By Section 98 this power is further defined as extending to navigation and shipping.

Legislation before 1914-18 War. The first essay in the way of legislation in this direction was made in March 1904, when a Bill for a Navigation and Shipping Act was introduced in the Senate by the Attorney-General of the first Deakin Administration. This Bill was withdrawn at an early stage for further consideration and redrafting. The Deakin Ministry resigned in April 1904, and the succeeding Watson Government, in view of the far-reaching and important nature of the Bill, decided to refer it to a Royal Commission for consideration and report. In 1905 the Commission presented a draft Bill, the main principles of which, in so far as they affected overseas shipping, were then, at the invitation of the Imperial Government, considered at an Imperial Shipping Conference held in London in 1907, at which representatives of Great Britain, Australia, and New Zealand were present. The Conference considered, *inter alia*, the following recommendation of the Royal Commission: 'That the coastal trade of the Commonwealth be reserved for ships on the Australian Register, or ships conforming to Australian conditions, and licensed to trade on the Australian coast'; and recommended: 'That the vessels to which the conditions imposed by the law of Australia or New Zealand are applicable should be (i) vessels registered in the colony, while trading therein, and (ii) vessels wherever registered, while trading on the coast of the colony'. The Royal Commission made further modifications of the draft to conform with the resolutions of the Conference, and the resultant Bill was re-introduced in the Senate in September 1907 by the second Deakin Administration. Owing to pressure of other business, however, it lapsed. The Bill was again introduced in the Senate in September 1908, but again it lapsed; proceedings were resumed in 1909, but again the Bill lapsed. It was brought in again in 1910 by the second Fisher Administration, revived in 1911, lapsed again, and finally became, under the last-mentioned Government, the *Navigation Act* 1912. While preparations were being made to bring it into operation, the war broke out, and action was postponed.

Navigation Act 1919 and amending Acts

At the conclusion of the 1914-18 War the proclamation of the 1912 Act could no longer be delayed, and in 1919 the Government introduced another Bill to give power to proclaim different portions of the Act to commence at different times. In order to make the change as gradual as possible, groups of sections were brought into operation from time to time, the first group, which commenced on 1 July 1921, comprising the coasting trade provisions. Other parts of the Act deal with the subjects of masters and seamen, foreign seamen, surveys of ships, unseaworthy ships, passengers, wrecks and salvage, limitation of liability in respect of Government ships, Courts of Marine Inquiry, legal proceedings, and other miscellaneous matters.

Soon after the coasting trade provisions commenced, the owners of a number of intra-State ships took steps to have tested the validity of the application to their ships of the manning and accommodation provisions of the Act. The judgment of the High Court was to the effect that those provisions did not apply to vessels engaged solely in the domestic trade of a State. In consequence of this judgment the Government decided not to enforce the provisions of the Act then in force on any intra-State ship, and similarly other sections since brought into force have not in general been applied to such ships.

Although a considerable amount of shipping has thereby been left to the control of the various State Governments, for all ships trading beyond one State there is uniform procedure in regard to such matters as: (i) the engagement and discharge of seamen; (ii) the standard of accommodation provided for crews; (iii) scales of medicines; (iv) the survey of hulls, machinery and gear; (v) the carriage and stowage of cargo; (vi) loadlines; (vii) the adjustment of compasses; and (viii) the examination of masters, mates, and engineers for certificates of competency.

The Act provides for the granting of licences to ships to engage in the coasting trade if they meet the requirements of Section 288 in relation to Australian manning scales and the payment of wages in accordance with Australian award conditions. Non-Australian vessels are not excluded from engaging in the coasting trade under licence, but because of the high standard of pay and accommodation on Australian licensed vessels, virtually no non-Australian shipowner seeks a licence. Section 286(1.) of the Act provides that if no licensed ship is available for a service between ports, or if the service carried out is inadequate, the Minister may, if satisfied it is in the public interest to do so, grant permits to unlicensed ships to engage in the trade. In addition, foreign ships have occasionally been permitted to trade under exemptions granted under section 422A of the Act.

The 1919 Act also extended the coasting trade provisions of the Act to the Territories under the authority of the Commonwealth, and to those governed under a Mandate. In 1925, however, it was found necessary in the interest of the development of the Territories to issue an Order in Council directing that trade with and in the Territories of Papua and New Guinea should not be deemed to be engaging in the coasting trade. Another amending Act, passed in 1920, enabled the Commonwealth to give effect to provisions of the International Convention for the Safety of Life at Sea, and to grant permits to British ships to trade on the coast in special circumstances. A 1934 amendment brought the Act into line with a new International Convention for the Safety of Life at Sea (1929) and with an International Load Line Convention (1930). Further amendments were made in 1942 and by the *Statute Law Revision Act* 1950.

During the 1939–45 War a Maritime Industry Commission was established under National Security Regulations to deal with a limited number of industrial questions, and many of its Orders extended or modified provisions of the Navigation Act in regard to officers and seamen. Following serious postwar hold-ups in the shipping industry, the Act was amended in 1952, establishing machinery thereunder which replaced the Commission and dealt with industrial questions in the industry and with the allied problems of seamen and crew accommodation. Two Committees were set up under the Act to deal with the matters of the disciplining of seamen and with crew accommodation. Each Committee was made up of four members representative of shipowners, one of deck officers, one of engine-room officers and two of seamen other than officers, with an officer of the Department of Shipping and Transport as Chairman. Any question regarding administration or the making of regulations, etc. may be referred to the Marine Council, which is the disciplining Committee, but it is obligatory on the Minister to seek the Council's advice upon all proposed regulations with respect to the scales of officers, crew and provisions.

In 1956 the provisions relating to arbitration machinery, which had been inserted into the framework of the Act by the 1952 amendments, were repealed when the Arbitration Court was reconstituted as the Conciliation and Arbitration Commission.

The 1953 amending Navigation Act, which was brought into operation in 1959, amended the Principal Act to enable the Commonwealth to accept a further Safety of Life at Sea Convention (that of 1948), and in 1958, 1961, and 1965 further substantial amendments were made as the result of a series of general reviews of the provisions of the Act; these amendments corrected anomalies which had arisen or had been discovered, and brought the legislation into line with the developing shipping practices of other maritime nations. In 1966 the Statute Law Revision (Decimal Currency) Act provided for the conversion of all monetary references in the Act to decimal currency, and in 1967 a new amending Act was passed to enable Australia to accept still another Safety of Life at Sea Convention which had been drawn up in 1960. (This Act came into force on 20 March 1968.)

Other Commonwealth Acts connected with shipping. Other Commonwealth Acts connected with shipping are the *Sea Carriage of Goods Act* 1924, the *Seamen's Compensation Act* 1911–1967, the *Seamen's War Pensions and Allowances Act* 1940–1967, the *Pollution of the Sea by Oil Act* 1960–1965, the *Australian Coastal Shipping Commission Act* 1956–1966, the *Australian Coastal Shipping Agreement Act* 1956, the *Stevedoring Industry Act* 1956–1966, the *Beaches, Fishing Grounds and Sea Routes Protection Act* 1932–1966, the *Submarine Cables and Pipelines Protection Act* 1963–1966, and the *Lighthouses Act* 1911–1966, the last-mentioned being made under Section 51 (vii) of the Constitution, which provides power in respect of 'lighthouses, lightships, beacons and buoys'.

Australian Coastal Shipping Commission

This Commission was established in 1956 for the purpose of maintaining and operating interstate, overseas, and territorial shipping services, and replaced the Australian Shipping Board. It operates the Australian National Line, a Commonwealth-owned merchant shipping service, which at 30 June 1967 comprised thirty-seven vessels totalling 224,224 gross tons. These vessels included eight with a gross tonnage of 500 to 3,000, twelve with a gross tonnage of 3,000 to 5,000, and eleven with a gross tonnage of 5,000 to 8,000; the passenger vehicle deck vessels *Empress of Australia*, 12,037 gross tons and *Princess of Tasmania*, 3,981 gross tons; the bulk ore carriers *Mount Keira*, 10,229 gross tons, *Mount Kembla*, 10,112 gross tons, *Musgrave Range*, 14,467 gross tons; and the *Darling River*, 33,774 gross tons.

At 30 June 1967 vessels on order at Australian shipyards for the Commission included three 4,000 tons deadweight vehicle deck cargo vessels, a 55,000 tons deadweight bulk carrier, and an additional passenger vehicle deck vessel to operate between Melbourne and Tasmania.

Six terminals have been established in Melbourne, Sydney and Tasmania to service the Line's vehicle deck vessels.

During 1966–67 the passenger vessels 'Empress of Australia' and 'Princess of Tasmania' and the vehicle deck cargo vessel 'Bass Trader' carried a total of 113,587 passengers, 33,156 passengers' and trade vehicles, and 985,526 tons of commercial cargo between the mainland and Tasmania. Over the same period a total of 7,236,487 tons of cargo was carried by Australian National Line vessels.

Australian Shipbuilding Board

Established in March 1941 as a wartime measure under the National Security (Shipbuilding) Regulations and constituted in 1948 under the *Supply and Development Act* 1939–1948, the Board now operates under the control of the Minister for Shipping and Transport. In November 1963 the Commonwealth Public Service Board approved its permanent establishment as a branch of the Department of Shipping and Transport. The membership of the Board consists of a Chairman, a Finance Member, and three other members, one of whom is also a member of the Naval Board.

The functions of the Board are set out in detail in Regulation 22 (4) of the Supply and Development Regulations and in the exercise of those functions the Board is responsible for, briefly:

- (a) recommending to the Minister for Shipping and Transport the price at which vessels may be purchased and disposed of by him on behalf of the Commonwealth;
- (b) the design and inspection of construction of merchant ships;
- (c) research into all matters connected with or incidental to shipbuilding;
- (d) advice to the Minister on developments in the shipbuilding industry;
- (e) rendering assistance to all sections of the industry.

To 31 January 1968 the Board had arranged for the construction of 117 merchant vessels, and in addition one semi-submersible oil drilling rig, a suction hopper dredger, and a survey vessel. The deadweight tonnage of these vessels (not including the drilling rig and the dredger) was approximately 802,500 tons, at a cost of \$255 million. There were thirty-five smaller vessels to which the shipbuilding subsidy did not apply.

Current orders held by the Board at 31 January 1968 included nineteen vessels totalling 140,000 tons deadweight, and in addition two large dredgers and a 250-ton capacity floating crane. (These vessels are not classified in tons deadweight.)

The orders held include three bulk carriers ranging to 55,000 tons deadweight, two tankers, two dredgers, the floating crane, two specialised container vessels, one passenger cargo vessel, three roll-on roll-off vessels, one off-shore drilling rig supply vessel, a passenger ferry for Sydney Harbour, and a number of tugs.

Vessels under negotiation include tugs, three more off-shore oil rig supply vessels, and eight specialised vessels for gas or oil pipelines.

There are five major Australian shipyards building merchant vessels—two in Queensland, two in South Australia, and one in New South Wales; and two shipyards engaged principally in naval shipbuilding—one in New South Wales and one in Victoria. There are also numerous smaller yards, situated in every State, building smaller steel and wooden working and pleasure craft.

Shipbuilding subsidy. The Australian shipbuilding industry has been subsidised since 1947, and following the 1963 Tariff Board inquiry into measures of assistance to the Australian shipbuilding industry, the Government decided to extend the shipbuilding subsidy at its existing rate of up to one-third of the cost of construction to include all types of vessels of 200 tons gross and over built in recognised shipyards and intended for use in Australian coastal or inland waterways. This came into effect on 20 May 1964. In respect of vessels of less than 200 tons gross Australian shipbuilders are afforded protection under the Customs Tariff.

Australian Stevedoring Industry Authority

In March 1947 legislation established a permanent Stevedoring Industry Commission to continue in peace-time the functions performed during the war by the Commission established under National Security legislation. In June 1949 legislation was enacted to abolish the Stevedoring Industry Commission, on which employers and employees were represented, and establish in its place a Stevedoring Industry Board of three members, to attend to administrative matters formerly under the control of the Commission, such as the operation of labour bureaux at ports, payment of attendance money and provision of amenities. The industrial functions which previously came within the province of the Commission were assigned to a single Judge of the Commonwealth Court of Conciliation and Arbitration. In August 1956, following a Committee of Inquiry into the stevedoring industry, the Stevedoring Industry Board was replaced by the Australian Stevedoring Industry Authority of three members, including a representative of the management side of industry and a representative of the trade union movement. At the same time the judicial and non-judicial functions formerly exercised by the Commonwealth Court of Conciliation and Arbitration were divided between the Commonwealth Industrial Court and the Commonwealth Conciliation and Arbitration Commission respectively. Awards of the Conciliation and Arbitration Commission subsequently placed payment of sick pay, public holiday pay and annual leave under the administration of the Authority. Under amending legislation, which operated from 6 June 1961, the Authority became responsible for payment of long service leave to registered waterside workers, and its disciplinary powers were strengthened to reduce the time lost through unauthorised stoppages. Further amending legislation which operated from 8 October 1965 made the Authority responsible for the recruitment of waterside workers.

In October 1965 the Government invited the Australian Council of Trade Unions, the Waterside Workers' Federation of Australia, the Association of Employers of Waterside Labour, the Australian Stevedoring Industry Authority, and the Department of Labour and National Service to confer under the chairmanship of Mr A. E. Woodward, Q.C., with the overall objective of improving the long-term conditions in the stevedoring industry. Following a series of meetings, the Conference, known

as the National Stevedoring Industry Conference, published a General Report in April 1967 recording agreement between the parties on a number of matters. These included *inter alia* weekly hire for all registered waterside workers in major ports, together with a pension scheme and provision for reducing the statutory retirement age progressively from seventy to sixty-five years of age. Special arrangements have been agreed to cover any prospective redundancy problems. Following adoption of the Report by all the parties, including the Government, enabling legislation was introduced to allow the changes to be implemented. Permanent employment was commenced in Sydney on 27 November 1967. Other appropriate ports will follow progressively.

The statutory provisions relating to the industry are now contained in the *Stevedoring Industry (Temporary Provisions) Act 1967* (and Regulations made thereunder), the *Stevedoring Industry Act 1956–1966*, and Division 4 of Part III of the *Conciliation and Arbitration Act 1904–1967*.

Trade Practices Act 1965–1967 (Part XA)

The Trade Practices Act Part XA (Overseas Cargo Shipping) came into force on 1 September 1967. The Part is administered by the Minister for Trade and Industry.

The Act provides for the filing, with the Clerk of Shipping Agreements, of certain agreements of a specified character between shipowners operating in the outward trades from Australia. A shipowner who is a party to such an agreement may be called upon to negotiate with a 'shipper body' with regard to arrangements for, and the terms and conditions that are to be applicable to, the cargo shipping to which the agreement relates. A 'shipper body' is an association, designated by the Minister, that represents the interests of producers and shippers of Australian export goods. Whether a shipowner has failed so to negotiate, or whether the services provided pursuant to the agreement are adequate, efficient or economical, are matters that may be referred by the Minister for inquiry and report by the Trade Practices Tribunal. Certain powers are vested in the Governor-General to disapprove an agreement after consideration of a report to the Minister by the Tribunal. A probable effect of such a disapproval would be to force the shipowners to carry on business as individuals, and not as members of a 'conference'. ('Conferences' are the associations into which shipowners traditionally combine in the cargo liner trades). The Governor-General may, however, in his discretion approve such a shipowner entering into another similar agreement.

In addition to the provisions relating to conferences the Act also makes similar provisions for trades where only one line is operating. Such a line may, as a result of a declaration by the Governor-General, be prohibited from engaging in certain specified activities in carrying on that business, e.g. engaging in freight-cutting with the object of substantially damaging the business of another shipowner.

The Act also contains provisions which secure rights for Australian flag vessels to operate in the trades from Australia.

System of record of shipping

In the system of recording statistics of overseas shipping, Australia is considered as a unit, and therefore only one entry and one clearance are counted for each voyage, without regard to the number of States visited (*see also* pages 395–6). For the purpose of these statistics all external territories are treated as overseas countries.

Returns are submitted by shipping companies or their representatives to Customs Houses at each port throughout Australia. A return is submitted for each movement of a vessel into and out of a port except for (i) naval vessels; (ii) yachts and other craft used for pleasure; (iii) foreign fishing vessels that neither load nor discharge cargo; and (iv) vessels of 200 net tons and under.

Cargo is recorded on returns either in terms of units of weight or in terms of units of measurement (a ton measurement is a unit of 40 cubic feet). Statistics show separate figures for cargo recorded in tons weight and cargo recorded in tons measurement. Type of vessel is shown on returns, and on the basis of this information separate cargo statistics are compiled for two groups—liner services; and tramps, bulkships, and tankers.

Returns for vessels arriving at an Australian port show cargo classified by the ports at which it was loaded. Similarly, cargo loaded at an Australian port is shown according to the ports at which it will be discharged. Overseas ports shown are not necessarily ports of origin or ultimate discharge because previous or subsequent transshipments overseas are not taken into account. Domestic transshipments can take place in Australian ports before overseas cargo is loaded or after it is discharged by reporting vessels, and for these movements the cargo is treated in the statistics as inter-state (or intra-state) cargo. Statistics for coastal cargo also do not take into account ports of origin or ultimate discharge of transhipped cargo.

The size of a vessel may be expressed in a number of ways. A vessel's gross tonnage, expressed in tons of 100 cubic feet, represents the total volume of the enclosed space, i.e. a ship of 25,000 tons has a total enclosed capacity of 2,500,000 cubic feet. Its net tonnage, expressed in tons of 100 cubic feet, represents the volume of enclosed space that can be used for cargo or passengers. Its displacement is its total weight and is expressed in tons of 2,240 lb. Its deadweight tonnage is the difference between the displacement of the vessel loaded to its summer loadline and the displacement light, i.e. it is the weight the vessel can carry, including the weight of bunkers and stores. Net tonnage is the concept generally used in the tables in this chapter, but since it can give a misleading impression of the size of ships which have a function other than carrying passengers and cargo (e.g. a tug has no net tonnage), some figures are given for deadweight tons and tons gross also.

Except in Shipping at principal ports (pages 398-9), intrastate (coastal) movements, including those of vessels engaged solely in trade within State limits, are excluded from the statistics in the following pages.

Overseas shipping

Total movement

The following table shows the number of entrances and clearances combined of overseas vessels at Australian ports, and the aggregate net tonnage, during each of the years 1962-63 to 1966-67.

OVERSEAS SHIPPING: ENTRANCES AND CLEARANCES
(COMBINED) OF VESSELS DIRECT, AUSTRALIA
1962-63 TO 1966-67

		1962-63	1963-64	1964-65	1965-66	1966-67 (a)
Number of vessels	.	6,762	7,477	7,601	7,958	7,994
Net tonnage	'000 tons	37,584	41,640	43,295	46,382	55,062

(a) Excludes vessels of 200 net tons and under.

Particulars of the total overseas movement of shipping for each year from 1822 to 1920-21 were published in Year Book No. 15, page 507, and those for each year from 1921-22 to 1950-51 in Year Book No. 40, page 97.

Total overseas shipping, States, etc.

The following table shows, for each State and the Northern Territory, the number of entrances and clearances of vessels direct from and to overseas countries, and the aggregate net tonnage, during the year 1966-67.

58 during 1966–67).

(b) Includes New Caledonia (40 during 1964–65, 27 during 1965–66,

Australian registered tonnage which entered Australian ports from overseas during the year 1966–67 represented 1.3 per cent of the total tonnage entered and was confined mainly to the New Zealand and Pacific Islands trade.

Interstate shipping

System of record

Interstate shipping comprises two elements: (a) vessels engaged solely in interstate trade; and (b) vessels trading between Australia and overseas countries and in the course of their voyages proceeding from one State to another. (Overseas vessels may obtain Single Voyage Permits under section 286 of the Navigation Act to perform certain tasks on the Australian coast in cases where no 'licensed' vessel is available. At the present time orders in Council exist exempting certain trades from the provisions of the Navigation Act and it is not necessary for 'unlicensed' vessels to obtain a permit to engage in those trades.*) No complexity enters into the record of those in category (a), but with regard to the method of recording the movements of the overseas vessels (b), some explanation is necessary. Each State desires that its shipping statistics should show in full its shipping communications with overseas countries, but at the same time it is necessary to avoid any duplication in the statistics of Australia as a whole. In order to meet these dual requirements, a vessel arriving in any State from an overseas country—say the United Kingdom—via another State, is recorded in the second State as from the United Kingdom 'Overseas via States', thus distinguishing the movement from a direct overseas entry. Continuing the voyage, the vessel is again recorded for the statistics of the third State as from the United Kingdom 'Overseas via States'. On an inward voyage, the clearance from the first State to the second State is a *clearance* interstate, and is included with interstate tonnage in conformity with the pre-federation practice of the States, and to preserve the continuity of State statistics. Thus, movements of ships which are, from the standpoint of Australia as a whole, purely coastal movements, must for the individual States be recorded as 'Overseas via States' or 'Interstate' according to the direction of the movement. The significance of the record of these movements will be seen more clearly from the following tabular presentation of the inward and outward voyages to and from Australia of an overseas vessel which, it is presumed, reaches Fremantle (Western Australia) and then proceeds to the terminal port of the voyage—Sydney (New South Wales)—via South Australia and Victoria. From the terminal port the vessel will commence the outward voyage, in this case retracing its inward track.

* *Australian Shipping and Shipbuilding Statistics* published by the Department of Shipping and Transport. See also page 390 of this Year Book.

ITINERARY OF AN OVERSEAS VESSEL ON THE AUSTRALIAN COAST

	Recorded as—		
	For the State and for Australia		For the States
	1.	2.	3.
Inward voyage—			
Enters Fremantle from United Kingdom . . .	Overseas direct		
Clears Fremantle for Adelaide . . .		Interstate direct	
Enters Adelaide from United Kingdom via Fremantle . . .			Overseas via States
Clears Adelaide for Melbourne . . .		Interstate direct	
Enters Melbourne from United Kingdom via Adelaide . . .			Overseas via States
Clears Melbourne for Sydney . . .		Interstate direct	
Enters Sydney from United Kingdom via Mel- bourne . . .			Overseas via States
Outward voyage—			
Clears Sydney for United Kingdom via Melbourne			Overseas via States
Enters Melbourne from Sydney . . .		Interstate direct	
Clears Melbourne for United Kingdom via Adelaide . . .			Overseas via States
Enters Adelaide from Melbourne . . .		Interstate direct	
Clears Adelaide for United Kingdom via Fremantle			Overseas via States
Enters Fremantle from Adelaide . . .		Interstate direct	
Clears Fremantle for United Kingdom . . .	Overseas direct		

From the method outlined above the requirements for Australia and for the individual States are ascertained as follows. (a) The aggregate of all ships recorded for each State as 'Overseas direct' gives the overseas shipping for Australia as a whole; (b) the aggregate for all ships recorded in any State as 'Overseas direct' plus those recorded as 'Overseas via States' gives the total *oversea shipping* for that State; and (c) the aggregate for all ships recorded as 'Overseas via States' may also be used, together with those recorded as 'Interstate direct' (including those engaged solely in interstate movement) to furnish figures showing the total *interstate movement* of shipping.

Interstate movement

Interstate direct. The following table shows the number of entrances and the net tonnage of vessels recorded into each State and the Northern Territory from any other State (including overseas vessels on interstate direct voyages as in column 2 above) during each of the years 1964-65 to 1966-67.

INTERSTATE MOVEMENT: ENTRANCES OF VESSELS INTERSTATE DIRECT, STATES AND NORTHERN TERRITORY, 1964-65 TO 1966-67

State or Territory	Number			Net tons ('000)		
	1964-65	1965-66	1966-67 (a)	1964-65	1965-66	1966-67 (a)
New South Wales . . .	2,154	1,976	1,757	7,388	7,889	7,626

Shipping cargo

Overseas and interstate cargo

The table on page 400 shows the aggregate tonnage of overseas and interstate cargo discharged and shipped at Australian ports. Most cargo is recorded in terms of tons of 2,240 lb; the remainder, mainly bulky commodities, is shipped and recorded on the basis of forty cubic feet representing one ton measurement.

CARGO DISCHARGED AND SHIPPED: AUSTRALIA, 1962-63 TO 1966-67

('000 tons)

OVERSEAS AND INTERSTATE SHIPPING CARGO: AUSTRALIA

1921-22 TO 1966-67

Overseas cargo according to major trade areas and type of service

The tables on pages 402-5 show for the year 1966-67 particulars of the cargo loaded in Australia for discharge overseas, and of the cargo discharged in Australia from overseas, for each State and the Northern Territory, classified according to the major trade areas of the world, by type of shipping service (i.e. liner, or tramp, bulkship, and tanker). The year 1966-67 is the first for which this information is available. For information about the scope and nature of those statistics see System of record of shipping, page 393.

World shipping tonnage

At 1 July 1967 the total number of steamships and motorships 100 gross tons and upwards throughout the world was 44,375 with a gross tonnage of 182,099,644. Of those totals, steamships numbered 9,800 for 74,811,671 gross tons, and motorships 34,575 for 107,287,973 gross tons. This includes 5,527 oil tankers of 100 gross tons and upwards with a gross tonnage of 64,197,988. Australian steamships and motorships, 307 for 803,027 gross tons, constituted 0.69 per cent and 0.44 per cent respectively of the total number and tonnage. This information has been derived from *Lloyd's Register of Shipping*.

Vessels registered in Australia

The following table shows the number and gross tonnage of trading vessels of 200 tons and over registered in Australia at 30 June 1967, classified according to: (i) year of construction, 1964 to 1967 and 1963 and earlier years, (ii) type of trade in which the vessels were engaged, and (iii) vessels built in Australian or in overseas shipyards.

Interstate rates per ton weight or measurement for general cargo at 31 December 1967 (expressed in Australian dollars) were: Sydney-Melbourne, \$16.20; Sydney-Brisbane, \$15.20; Sydney-Adelaide, \$21.40; Sydney-Fremantle, \$30.20; Sydney-Hobart, \$17.35; Sydney-Darwin, \$25.85.

Shipping casualties

Courts of Marine Inquiry are constituted by a magistrate assisted by skilled assessors, and, when necessary, are held at the principal port in each State and at Launceston (Tasmania). Such courts have power to deal with the certificates of officers who are found at fault. Particulars of shipping losses and casualties reported on or near the coast during each of the years 1962-63 to 1966-67 are shown in the table below.

Lighthouses; distances by sea; depth of water and tides at main ports; ferry passenger services

A list of the principal lighthouses on the coast of Australia, giving details of the location, number, colour, character, period, candle-power and visibility of each light so far as particulars are available, will be found in *Transport and Communication*, Bulletin No. 46.

The distances by sea between principal ports of Australia and some important ports in other countries which trade with Australia were published in Year Book No. 48, page 525.

A table showing the depths of water available and tides at principal ports of Australia is published in the annual bulletin, *Transport and Communication*. For some major ports information is given in the chapter Local Government.

RAILWAYS

Government railways

Government railways in Australia operate in all States and Territories and provide an important means of transportation. In 1966-67 a total of 68.5 million tons of freight were carried, an increase of 81.2 per cent over the 37.8 million tons carried in 1946-47. However, in the same twenty-year period the number of passengers carried (mostly within the suburban areas of Sydney and Melbourne) declined by 9.6 per cent from 503.2 millions in 1946-47 to 454.7 millions in 1966-67. The number of train miles run during 1966-67 (93.7 million) was only 9.6 per cent greater than in 1946-47, which is an indication of the trend towards heavier train loads with the more powerful motive power now available. Since the introduction of the first mainline diesel-electric locomotives in 1950 their numbers have increased greatly until at 30 June 1967 there were 975 throughout Australia. Diesel-electric locomotives during 1966-67 hauled 49 million train-miles, while steam locomotives hauled only 10 million train-miles.

Railway development

The first steam-operated railway in Australia ran between Melbourne and Port Melbourne, a distance of two miles, and was opened on 12 September 1854. It was owned and operated by the Melbourne and Hobson's Bay Railway. Within a short time privately-owned railways opened in other States, but owing to the small volume of traffic available they were soon in financial difficulties and all were taken over by the respective State Governments. Under the policy of Government ownership and control the railway networks expanded until at 30 June 1941 there were 27,234 route-miles open for traffic in Australia. This was the greatest mileage ever recorded. Since the 1939-45 War many uneconomic branch lines have been closed. From 1 July 1947 to 30 June 1967, 2,954 miles have been closed, the greatest lengths being in Western Australia (997 miles), Queensland (842 miles), and Victoria (556 miles). During this same period 792 miles of new railway were added to the networks. The following table sets out the route-miles of government railways in each State and Territory at various dates since 1855.

GOVERNMENT RAILWAYS: ROUTE-MILEAGE OPEN, STATES AND TERRITORIES
1855 TO 1967

	(Miles)

1967	6,259	4,027	5,730	3,779	4,269	500	490	5	25,059

(a) At 31 December.

One feature of the Australian government railways is the variety of gauges to which they are built. There are three principal gauges, 'broad' (5ft 3in), 'standard' (4ft 8½in), and 'narrow' (3ft 6in). Extensive route-mileages of 3ft 6in gauge railway were built in areas where traffic volumes were initially known to be small and where it was imperative to minimise the costs of construction. The following table shows the mileages open in each State and Territory at 30 June 1967 according to gauge.

**GOVERNMENT RAILWAYS: ROUTE-MILEAGE OPEN, BY GAUGE
STATES AND TERRITORIES, 30 JUNE 1967
(Miles)**

(a) Portion of Victorian Railway system. (b) Excludes 202 route-miles of 5ft 3in gauge which almost parallel the 4ft 8½in gauge line between Melbourne and the Murray River. (c) Comprises 654 miles of Trans-Australian and 217 miles of the Central Australia Railway systems. (d) Includes 454 miles of the Trans-Australian Railway system. (e) Australian Capital Territory Railway system. (f) Includes 428 miles of the Central Australia Railway system. (g) Excludes 192 miles of 3ft 6in gauge line which parallel the 4ft 8½in gauge line and 66 miles of 3ft 6in/4ft 8½in dual gauge line which are included in the 4ft 8½in gauge line. (h) Comprises 173 miles of the Central Australia and 317 miles of the North Australia Railway systems.

Government railway systems

There are six separate State Government railway systems and one Commonwealth railway system. As the Commonwealth system includes mileages in South Australia and Western Australia, and the Victorian system extends into New South Wales, the system route-mileages shown in the following table do not represent mileages within each State and Territory. These are shown in the previous table. The route-mileage of each system open for traffic, according to gauge, at 30 June 1967 is shown in the following table.

**GOVERNMENT RAILWAYS: ROUTE-MILEAGE OPEN, BY GAUGE AND SYSTEM
30 JUNE 1967
(Miles)**

<i>System</i>	<i>Gauge</i>					<i>Total</i>
	<i>5ft 3in</i>	<i>4ft 8½in</i>	<i>3ft 6in</i>	<i>2ft 6in</i>	<i>2ft 0in</i>	
New South Wales	(a)6,055	6,055
Victoria	(b)4,020	202	..	9	..	4,231
Queensland	69	5,631	..	30	5,730
South Australia	1,651	..	829	2,480
Western Australia	313	(c)3,502	3,815
Tasmania	500	500
Commonwealth	1,330	918	2,248
Australia	5,671	7,969	11,380	9	30	25,059

(a) Includes 234 route-miles which are electrified. (b) Excludes 202 route-miles of 5ft 3in gauge line which almost parallel the 4ft 8½in gauge line between Melbourne and the Murray River. Includes 263 route-miles which are electrified. (c) Excludes 192 miles of 3ft 6in gauge line which parallel the 4ft 8½in gauge line and 66 miles of 3ft 6in/4ft 8½in dual gauge line which are included in the 4ft 8½in gauge line.

The New South Wales system is based on Sydney and extends throughout the State. The Victorian system based on Melbourne radiates throughout the State, extending into areas of southern New South Wales. The Queensland system extends along the coast from Brisbane to Cairns in the north, while branch lines extend inland from Brisbane and the larger coastal cities of Rockhampton and Townsville. The main South Australian system is in the south-east of the State, but an isolated narrow-gauge system operates in the Eyre Peninsula area. The railway system in Western Australia is established in the south-western section of the State, but extends north to Meekathara and east to Kalgoorlie and Esperance. In Tasmania the main line connects Hobart and Launceston, and there are branch lines along the northern coast.

GOVERNMENT RAILWAYS: AUSTRALIA, 1870 TO 1966-67

ROUTE MILEAGE AND TRAFFIC

The Commonwealth Railways comprises four separate railways. The Trans-Australian Railway, extending from Port Pirie to Kalgoorlie, is of 4ft 8½in gauge, as is that part of the Central Australia Railway from Port Augusta (Sterling North) to Maree. A further extension of this railway from Maree to Alice Springs is of 3ft 6in gauge, as is the North Australia Railway from Darwin to Birdum. The Australian Capital Territory Railway from Queanbeyan to Canberra is of 4ft 8½in gauge. In this chapter particulars of the four Commonwealth railways are combined; however, particulars for each railway are shown separately in the annual bulletin *Transport and Communication*.

A graph showing the route-mileages and traffic of all Government railways from 1870 to 1967 appears on plate 39 opposite.

Standardisation of railway gauges

A number of specific programmes for the standardisation of railways in Australia have been arranged on the basis of mutual agreement and collaboration between the Commonwealth and State Governments with the ratification of the Parliaments concerned. Under various Commonwealth-State Standardisation Agreements approximately 730 route-miles of standard (4ft 8½in) gauge track have been completed since 1956, and a further 380 route-miles are expected to be completed early in 1969. A special article setting out the history of rail standardisation in Australia is given in Year Book No. 53, pages 440-445.

The first step towards standardisation of existing broken gauge lines between capital cities was effected in 1930 with the construction of a 4ft 8½in gauge line from Kyogle (New South Wales) to Brisbane. In 1957 a new standard gauge railway between Port Augusta and Maree was completed. This line replaced the former narrow-gauge line and followed a new alignment between Port Augusta and Brachina (87 miles) whence it followed the old route to Maree. The narrow-gauge line from Port Augusta to Hawker was retained and that from Hawker to Brachina was demolished. In 1962 the opening of a standard gauge line between Albury and Melbourne completed the standard gauge link between Melbourne and Brisbane. Bogie exchange facilities have been installed at Melbourne and Port Pirie (South Australia) to eliminate much of the physical transfer of goods between the rolling stock of the standard gauge and that of the 5ft 3in gauge systems serving Victoria and a large part of South Australia.

Standardisation projects (4ft 8½in) gauge now proceeding are designed to link Sydney with Perth and Fremantle through Broken Hill, Port Pirie, and Kalgoorlie. At present, lines of this gauge exist between Sydney and Broken Hill (New South Wales Government Railways) and between Port Pirie and Kalgoorlie (Commonwealth Railways). The replacement of existing 3ft 6in gauge lines with new standard gauge construction is now proceeding on the Western Australian Government Railways' line between Fremantle and Kalgoorlie and the South Australian Government Railways' line between Port Pirie and Cockburn on the New South Wales-South Australian border. Construction of a new line between Cockburn and Broken Hill to replace the existing Silverton Tramway Company's line between these centres will begin shortly. The overall length of the Sydney-Perth railway, to be opened towards the end of 1969, is 2,442 miles. The total cost of the new work, including new rolling stock and substantial new facilities, is expected to be about \$210 million.

Private railways

In addition to the Government railway systems there are a number of important private railways in Australia. Most of these were constructed for the prime purpose of hauling minerals, although some of them also carry passengers and general traffic. Private railways hauling iron ore operate from Iron Knob and Iron Baron to Whyalla (South Australia), from Mount Tom Price to Dampier (Western Australia), and from Mount Goldsworthy to Finucane Island, near Port Hedland. Lines from Yallourn to Morwell (Victoria) and from Maitland to Cessnock (New South Wales) carry coal, while lines from Broken Hill to Cockburn on the South Australian border (New South Wales) and from Rosebery to Burnie (Tasmania) carry base metal concentrates. There are numerous other short lengths of private railways in Australia. Many of these are narrow-gauge lines, mainly on the Queensland coast, which carry sugar cane to the mills during the crushing season.

Operations of Government railway systems

Particulars of train-mileages, passenger-journeys, passenger-miles, freight tons carried, and freight ton-miles included in this section refer only to operations for which revenue is received.

Summary of operations

(a) One train (i.e. a complete unit of locomotive and vehicles, electric train set, or rail motor) travelling one mile for revenue purposes. (b) Includes mixed train-mileage. (c) Based on ticket sales making allowances for periodical tickets. Tickets sold at concession rates are counted as full journeys. (d) Inter-system traffic is included in the total for each system (including each Commonwealth railway) over which it passes. (e) One passenger travelling one mile. (f) One ton carried one mile.

TRAMWAY, TROLLEY-BUS, OMNIBUS, AND FERRY SERVICES

Systems in operation

Tramway and trolley-bus. Since 1 April 1947 all systems have been operated by government or municipal authorities. During the year 1966-67, tramway systems were in operation in the following cities: Melbourne, Bendigo, and Ballarat, Victoria; Brisbane, Queensland; and Adelaide, South Australia. Trolley-bus services operated in Brisbane, Queensland; Perth, Western Australia; and Hobart and Launceston, Tasmania. All systems were electric.

In many parts of Australia private lines used for special purposes in connection with the timber, mining, sugar, or other industries are often called tramways, but they are more properly railways, and the traffic on them has nothing in common with that of the street tramways used for the conveyance of passengers, which are dealt with in this section.

Motor omnibus. Services are operated by government or municipal authorities and private operators. Statistics are collected for government and municipal omnibus services located in all State capital cities; Canberra, Australian Capital Territory; Newcastle, New South Wales; Maryborough and Rockhampton, Queensland; Fremantle and the Eastern Goldfields area, Western Australia; Launceston and Burnie, Tasmania; Darwin, Northern Territory; and for country road services operated by the Western Australian Government Railways and the Tasmanian Transport Commission. In Sydney the Government tramway system has been replaced by omnibus services, and in Perth the Metropolitan (Perth) Passenger Transport Trust has replaced privately owned services in the metropolitan area. In Hobart the Government trolley-bus and omnibus services have replaced the Government tramway service. Particulars of motor omnibus services under the control of private operators for the States of New South Wales, Victoria, Queensland, South Australia, and Western Australia are given in previous issues of this Year Book and in the annual bulletin *Transport and Communication*.

Ferry. Ferry passenger services are operated in the following States: New South Wales, at Sydney and Newcastle; Western Australia, on the Swan River at Perth; Tasmania, on the Mersey River at Devonport. Control is exercised by both governmental authorities and private operators. Particulars of the operations of these services are given in previous issues of this Year Book and in the annual bulletin *Transport and Communication*. In Victoria and Queensland the services operated are not extensive. There are no ferry passenger services in South Australia.

Government and municipal tramway, trolley-bus and omnibus services

Because of the development in recent years of the various forms of public road transport under the control of single authorities, and the gradual replacement of tramway services by motor omnibus services, it is not possible to obtain separate statistics for all phases of the activities of each form of transport, particularly financial operations. The two following tables present combined statistics of public tramway, trolley-bus and motor omnibus services with separate details shown for each form of transport where possible.

TRAMWAY, TROLLEY-BUS AND OMNIBUS SERVICES: GOVERNMENT AND MUNICIPAL, STATES AND TERRITORIES, 1966-67

(b) Includes provision of reserves for depreciation, etc., where possible.

Minus sign (—) denotes deficit.

MOTOR VEHICLES

The arrangements for the registration of motor vehicles and the licensing of drivers and riders are not uniform throughout Australia, since they are the function of a separate authority, or authorities, in each State and Territory. Particulars of registration, licences, fees payable, etc., in each State and Territory at 30 June 1960 were given in Year Book No. 47, pages 553-6, and at 30 June 1963 in *Transport and Communication*, Bulletin No. 54, 1962-63.

Tables in this section include vehicles owned by private individuals, local government authorities, State Governments, and the Commonwealth Government (excluding those belonging to the defence services).

Motor vehicles on register

Details of motor vehicles on the register are compiled by up-dating motor vehicle census data from information made available by the various motor vehicle registration authorities in the States and Territories. Censuses of motor vehicles are taken periodically, and at these census dates considerably greater information concerning the particulars shown in the tables following is available. Particulars of the 1962 Census are shown in Year Book No. 53, 1967, *Transport and Communication*, Bulletin No. 54, 1962-63, and in special census publications.

Registrations of new motor vehicles

Particulars of registrations of new motor vehicles are shown by type and make of vehicle in the annual bulletin *Transport and Communication*, and by type, make, and horsepower of vehicle in monthly and annual bulletins of New Motor Vehicle Registrations.

In these statistics 'registrations' means registrations processed by the motor vehicle registration authorities in the States and Territories during the period.

(c) Includes parked vehicles.

ROADS

Summary of roads used for general traffic

Proclaimed or declared roads. The table following is a summary of the roads proclaimed or declared under the Acts of the several States relative to the operations of the central road authorities, and shows the lengths of various classes proclaimed or declared as at 30 June 1967. The central road authority in each State assumes responsibility under the Act for the whole, or a proportion, of the cost of construction and or maintenance of these roads, the extent varying from State to State and with the class and locality of the roads. Before proclamation of a main road, consideration is given, in general, to the following points: availability of funds; whether the road is, or will be, within one of several classes of main trunk routes; the value of the roads as connecting links between centres of population or business; whether the district is, or will be, sufficiently served by railways. Provision is also made in some States for the declaration of roads other than main roads. The absence of a particular class in any State does not necessarily imply that there are no roads within that State that might be so classified; the classes are restricted only to roads proclaimed or declared under the Acts. A further point to make is that, through various causes, e.g. insufficiency of funds, man-power or materials, etc., construction or maintenance may not keep pace with gazettals of mileages, and, therefore, the condition of a road may not match its status.

PROCLAIMED OR DECLARED ROADS: LENGTHS, STATES, 30 JUNE 1967

Grand total . . .	25,498	14,499	24,629	8,193	55,397	2,252	130,468

(a) Metropolitan only. (b) Includes mining access roads, farmers' roads and tourist tracks. (c) Maintenance of these roads is the responsibility of the several local authorities. (d) Forest roads and by-pass roads. (e) Gazetted as controlled access roadway but not constructed. (f) Subsidised roads.

Total roads. The following table represents an attempt to classify all the roads open for general traffic in Australia, at the latest dates available, according to States and Territories and to certain broad surface groups. The figures in the table for the States are obtained from the Deputy Commonwealth Statistician in each State, and are derived mainly from local government sources.

'Total' figures and 'cleared only' figures for South Australia in the table show considerable reductions compared with those for previous years. This is due to the results of a recent investigation of road mileages by the Commissioner of Highways.

(a) 30 June 1966.

Further information on roads, including financial particulars, is included in Chapter 20, Local Government.

Australian Road Research Board

The Australian Road Research Board was established by the road authorities of the Commonwealth and State Governments in 1960 as a national centre for road research. The Board was incorporated in January 1965 as a public company by guarantee, memorandums and articles of association being drafted in general conformity with the constitution which had been accepted in 1960. The company members are the Commonwealth of Australia, the commissioners of the central road authorities in New South Wales, Queensland, South Australia, and Western Australia, the Department of Public Works, Tasmania, and the Country Roads Board, Victoria. The Director-General of the Commonwealth Department of Public Works and the departmental heads of the other road authorities constitute the Board, which controls all policy and activities. Finance for all activities has been provided by the company members on an agreed basis.

The objectives of A.R.R.B. include planning an adequate programme of research and development, arranging for individual projects to be carried out directly and by co-operating organisations, and providing conferences and publications to bring these and other advances to everyone interested in roads. The following list of possible subjects indicates the range of studies provided for in the original constitution: road planning, location, design, safety, materials, construction, maintenance, structures, equipment, traffic and transport, economics, administration, financing, management, accounting, and any other matters affecting the provision, upkeep, use, protection, and development of roads. In planning a creative programme the Board continues to look for those subjects which seem to offer the highest profit to road engineers and the community.

The work on research projects is carried out either directly by the Board's own staff, in many cases acting in co-operation with the road authorities of the various governments, or through co-operative projects established with departments of universities in Adelaide, Brisbane, Melbourne, Perth, and Sydney. The Board has endeavoured to provide or sustain the additional staff required for these external projects, but university staff members furnish advice and co-operation in all parts of these studies.

As with most research organisations, the Board has made very full use of systematic consultation through various advisory groups. Members of these groups have been recruited from persons with the ability to contribute, who were prepared to serve as individuals and not as representatives of particular organisations. In an attempt to secure completely unfettered counsel, most of the members of the advisory groups were drawn from outside the Board and its staff. The various committees include a general Advisory Council and several particular types of specialist committees. In addition, the technical committees of the National Association of Australian State Road Authorities have, from the initiation of A.R.R.B., been a continuing and valuable source of advice and consultation. In this way, therefore, exceedingly valuable advice has been obtained from individuals drawn from the State road authorities, local authorities, C.S.I.R.O., Australian universities, several Commonwealth departments, and from private companies and consultants.

CIVIL AVIATION

Department of Civil Aviation

Control of civil aviation in Australia is exercised by the Department of Civil Aviation, which was established in 1939 to take over from the Civil Aviation Board the regulation of civil aviation in Australia. The Department's jurisdiction covers not only Australia but also Papua, New Guinea and areas of the Indian and Pacific Oceans. Year Books Nos 16, 19 and 38 trace the establishment of civil aviation control in Australia and the appropriate Acts of Parliament and Regulations under which this control is exercised. The present functions of the Department are shown in Year Book No. 51, pages 578-9, and further details about its operations are given in the annual reports to the Commonwealth Parliament by the Minister for Civil Aviation.

Regular air services within Australia

Interstate services. Scheduled interstate services with passenger and all-freight aircraft are provided by two airlines only, the private enterprise airline Ansett-A.N.A. (a subsidiary of Ansett Transport Industries) and the Commonwealth-owned Trans-Australia Airlines. All principal routes are competitive, with both airlines providing equal capacities in accord with legislation passed by the Commonwealth Parliament. The two principal Acts which establish the legislative basis of this controlled competition are the *Airlines Agreement Act* 1952-1961 and the *Airlines Equipment Act* 1958. The Airlines Equipment Act established the machinery for the achievement and maintenance of comparable, but not necessarily identical, aircraft fleets between T.A.A. and Ansett-A.N.A., and is

designed to prevent the provision of excess aircraft capacity. The Airlines Agreement Act established the basis of control of the two-airline competitive system and extended this machinery to 1977.

In addition to purely interstate services, both Ansett-A.N.A. and Trans-Australia Airlines operate routes to New Guinea and non-competitive intra-state routes in Australia. The Ansett-A.N.A. non-competitive routes radiate mainly from Melbourne, while those of Trans-Australia Airlines are located mainly within Queensland and Tasmania. In addition, Trans-Australia Airlines operate services within Papua-New Guinea in competition with another Ansett subsidiary, Ansett-M.A.L., and the independent Papuan Airlines.

At 30 October 1967 the Ansett-A.N.A. fleet included four Boeing 727's, three DC-9's, three Electras, seven Viscounts, nine Friendships, two Carvairs, a number of DC-4's and DC-3's, nine helicopters, and smaller aircraft. At the same date Trans-Australia Airlines operated a fleet of four Boeing 727's, three DC-9's, three Electras, nine Viscounts, eight Friendships, a number of DC-4's and DC-3's, one helicopter, and smaller aircraft.

Intra-state services. In addition to the intra-state services operated by Ansett-A.N.A. and Trans-Australia Airlines there are a number of smaller regional airlines operating from Sydney (Airlines of New South Wales and East-West Airlines), Adelaide (Airlines of South Australia), Perth (Mac-Robertson Miller Airlines), and Alice Springs (Connellan Airways). With the exception of Connellan Airways, which provides regular service to outback homesteads and communities, all of these are concerned primarily with traffic moving to and from the respective capital city. With the exception of the independently owned East-West Airlines and Connellan Airways, all regional airlines are subsidiaries of Ansett Transport Industries. The largest aircraft used by these regional airlines are DC-4's, Convairst and Friendships, supported by DC-3's. Connellan Airways uses smaller aircraft types.

Commuter services. These are not airline services but regular flights by charter firms with small single and twin-engined aircraft operating to fixed and published timetables. They provide regular air links between many centres, towns and country areas which are either not served by the major airlines or have no direct air service with their capital or nearest major provincial city. The first commuter service approved was for Opal Air Pty Ltd, of Coober Pedy (S.A.), to operate between Adelaide and the South Australian opal fields. At 30 November 1967 twelve charter operators were authorised to operate commuter services. Details of the operations of these commuter services are excluded from the statistics shown in this section.

Internal operations. Particulars of the revenue operations of all regular internal air services during each of the years 1962-63 to 1966-67 are set out in the next table.

**CIVIL AVIATION: OPERATIONS OF REGULAR INTERNAL SERVICES
AUSTRALIA(a), 1962-63 TO 1966-67**

		1962-63 (b)	1963-64 (b)	1964-65 (b)	1965-66	1966-67
Hours flown	number	217,897	244,517	256,231	261,535	255,510
Miles flown	'000	43,700	48,971	52,323	55,020	56,759
Passengers—						
Embarkations	number	2,832,934	3,256,937	3,763,936	4,157,873	4,424,652
Passenger-miles	'000	1,221,178	1,408,317	1,639,087	1,831,360	1,972,469
Freight—						
Tons uplifted	short tons	59,373	63,161	69,959	76,079	82,056
Ton-miles(c)	'000	28,270	30,491	33,891	37,577	40,148
Mail—						
Tons uplifted	short tons	6,467	7,082	7,736	8,633	9,587
Ton-miles(c)	'000	3,324	3,741	4,074	4,587	5,144

(a) Includes flights of all Australian-owned airlines with the exception of those of Qantas Airways Limited between airports located within the Commonwealth. (b) Excludes, for flights between Australia and Papua-New Guinea, operations between airports located within the Commonwealth. (c) In terms of short tons.

Internal passenger embarkations and disembarkations

The figures in the following table show embarkations on, and disembarkations from, each airline flight at the airports specified. Movements to and from Papua and New Guinea and Norfolk Island are included.

**INTERNAL AIRWAYS PASSENGER EMBARKATIONS AND DISEMBARKATIONS AT
PRINCIPAL AUSTRALIAN AIRPORTS, 1962-63 TO 1966-67**

<i>Airport</i>	<i>1962-63</i>	<i>1963-64</i>	<i>1964-65</i>	<i>1965-66</i>	<i>1966-67</i>

International activity

International organisations. A full report of the formation of the International Civil Aviation Organization, the Commonwealth Air Transport Council, and the South Pacific Air Transport Council appeared in Year Book No. 37, and particulars of subsequent activity in the international field were included in No. 38. The International Civil Aviation Organization had a membership of 114 nations in June 1967. Australia has continued its position as a member of the Council, which it had held since I.C.A.O. was established in 1947. Further details will be found in Year Book No. 40 and earlier issues.

International agreements. Australia had air services agreements with twenty-one countries by 30 June 1967. They were Austria, Britain, Canada, Ceylon, France, Federal Republic of Germany, India, Iran, Ireland, Italy, Japan, Lebanon, Malaysia, Netherlands, New Zealand, Pakistan, Singapore, South Africa, Thailand, United Arab Republic, and the United States of America. Under these agreements Australia is granted rights to operate services between Australia to and through the countries in question. These rights are exercised by Australia's international airline Qantas. The designated airline of the signatory country is also granted reciprocal rights. Australia also had air services arrangements with thirteen other countries at 30 June 1967. These were Burma, the Republic of China, Greece, Indonesia, Iraq, Laos, Mexico, the Philippines, Portugal, Saudi Arabia, Turkey, the Republic of Vietnam, and Yugoslavia. Qantas also operates services to and through most of these countries under these arrangements.

International air services. In November 1967 fourteen overseas international airlines were operating regular scheduled services to Australia. These included: Air-India (India), Air New Zealand (New Zealand), Alitalia (Italy), British Overseas Airways Corporation (United Kingdom), Canadian Pacific Air Lines (Canada), Deutsche Lufthansa (Federal Republic of Germany), K.L.M. Royal Dutch Airlines (Netherlands), Malaysia-Singapore Airlines (Malaysia and Singapore), Pan-American World Airways (United States of America), Philippine Air Lines (Philippines), South African Airways (South Africa), and Union de Transports Aeriens (France). The Indonesian airline, P.N. Merpati Nusantara, operates services between Sukarnapura in West Irian and Lae in New Guinea, and Trans-Australia Airlines operates between Darwin and Portuguese Timor under charter to Transportes Aereos de Timor. In November 1967 Qantas, Australia's international airline, was

operating nine Boeing 707-138B jet aircraft, eleven larger Boeing 707-338C jet aircraft, and one Lockheed Electra aircraft. Qantas has on order another ten Boeing 707-338C aircraft for delivery between December 1967 and September 1968, and intends disposing of its nine smaller Boeing 707-138B's, giving it a fleet of twenty-one Boeing 707-338C's. All the shares in Qantas Airways Limited are owned by the Commonwealth Government. The name of the Company was changed on 1 August 1967 from Qantas Empire Airways to Qantas Airways Limited.

International operations. The table following shows particulars of international airline traffic during 1966-67 moving into and out of an area which embraces the Commonwealth of Australia, Papua-New Guinea, and Norfolk Island. These figures do not include traffic between Australia and Papua-New Guinea and Norfolk Island.

**CIVIL AVIATION: INTERNATIONAL AIRLINE TRAFFIC
TO AND FROM AUSTRALIA(a), 1966-67**

Type of traffic	Aircraft movements	Passengers	Freight	Mail
			short tons	short tons
Traffic to Australia—				
Qantas Airways Limited	2,281	140,661	4,825	1,077
Other airlines	2,832	177,822	4,122	1,367
<i>All airlines</i>	<i>5,113</i>	<i>318,483</i>	<i>8,947</i>	<i>2,444</i>
Traffic from Australia—				
Qantas Airways Limited	2,279	129,966	3,270	762
Other airlines	2,840	166,589	2,679	851
<i>All airlines</i>	<i>5,119</i>	<i>296,555</i>	<i>5,949</i>	<i>1,613</i>

(a) Australian mainland and adjacent Territories (Papua-New Guinea and Norfolk Island).

Particulars of revenue operations of Australian regular overseas services are shown in the following table. These operations include all stages of Qantas flights linking Australia with external territories and overseas countries, and stages external to the Commonwealth for flights of other Australian-owned airlines; they exclude flights over stages located within Papua-New Guinea (see footnote (a) to table following for years prior to 1965-66).

**CIVIL AVIATION: OPERATIONS OF AUSTRALIAN REGULAR OVERSEAS SERVICES
1962-63 TO 1966-67**

	1962-63 (a)	1963-64 (a)	1964-65 (a)	1965-66	1966-67
Hours flown number	48,669	53,792	68,028	68,405	66,840
Miles flown '000	20,343	22,357	28,126	29,635	29,201
Passengers—					
Embarkations number	294,908	352,442	443,665	448,623	466,849
Passenger-miles '000	1,014,867	1,185,981	1,527,039	1,569,513	1,608,868
Freight—					
Tons uplifted short tons	6,756	8,071	10,293	11,451	12,259
Ton-miles(b) '000	33,135	38,633	51,826	61,836	62,939
Mail—					
Tons uplifted short tons	2,468	2,654	3,124	3,252	2,697
Ton-miles(b) '000	15,191	16,057	19,891	20,914	16,500

(a) Includes, for flights between Australia and Papua-New Guinea, operations over stages located within the Commonwealth and within Papua-New Guinea. (b) In terms of short tons.

General aviation

General aviation activity, which covers all non-airline operations such as charter, aerial work and private flying, has grown rapidly throughout Australia in the post-war period so that now it is an important sector of the Australian aviation industry. In 1966, hours flown totalled 844,960 compared with 345,975 hours flown by Australian airline aircraft. At 30 June 1967, aircraft employed in general aviation numbered 2,737.

Government aid to flying training

The Commonwealth Government has subsidised flying training in Australia since 1926. The aid is distributed through the aero clubs and, in more recent years, the commercial flying training schools. In 1966 the Government reviewed the level of its assistance to the Australian flying training movement and decided to:

- continue the Australian Flying Scholarship Scheme for another five years with a subsidy of \$100,000 a year;
- propose a partnership with commercial airlines in subsidising additional scholarships on a dollar for dollar basis up to \$75,000 a year;
- grant another \$150,000 in subsidies to the aero clubs and commercial flying schools for 1966-67;
- assist country aero clubs to buy new training aircraft;
- make secretariat grants of \$18,000 and \$3,000 respectively to the Aero Club Federation and the Association of Commercial Flying Organisations; and
- make an annual grant of \$15,000 to the Gliding Federation for each of the next five years.

The Australian Flying Scholarship Scheme is designed to help young Australians train as career pilots for Australia's rapidly expanding commercial aviation industry. The scholarships provide financial aid in much the same way as Commonwealth scholarships provide for students undertaking other professions. They enable scholarship winners to train as commercial pilots, instructors and agricultural pilots. Since the scheme started in 1962, 1,077 scholarships have been awarded.

During 1966-67, pupils of the Australian flying training organisations (aero clubs and commercial flying schools) received 525 private licences, 255 commercial licences and 105 instructor ratings. Subsidised hours flown by aero clubs and flying schools totalled 211,095 hours out of a total of 270,487 hours flown, and their subsidy earnings totalled \$283,169. A limit placed on the subsidy restricted the total payment to \$150,000. During the year clubs were also assisted with the purchase of thirty-two aircraft. The value of this assistance under the Aircraft Replacement Fund was \$20,000. The permanent secretariats of the Royal Federation of Aero Clubs and the Commercial Flying Schools also received \$18,000 and \$3,000 respectively during 1966-67 as additional financial assistance.

Fifty-seven clubs were affiliated with the Gliding Federation of Australia in 1966-67 and there were more than 1,800 members. During 1966-67 the Commonwealth assisted gliding clubs to the extent of \$15,000. The total of all subsidy payments and financial assistance to flying training organisations and the gliding movement during 1966-67 was \$381,000.

Aerodromes

The number of aerodromes throughout Australia and its Territories at 30 June 1967 was 649. One hundred and eighteen were owned by the Commonwealth Government and 531 by local authorities and private interests. Capital expenditure on aerodrome construction increased from \$14.7 million in 1965-66 to \$20.3 million in 1966-67. Maintenance expenditure on Commonwealth-owned aerodromes during 1966-67 was \$5.4 million, and development grants to licensed aerodromes participating in the Local Ownership Plan totalled \$920,000. The two major projects at Melbourne and Sydney included in the current five-year airports programme, which ends in 1967-68, are proceeding satisfactorily. The work at Sydney, which involves a major runway extension and a new international terminal, is estimated to cost \$50 million. The new Melbourne airport is to cost \$50 million including site acquisition. The projects as a whole are expected to be completed in 1970, but progressive use is being made of the facilities as they become available. Total estimated cost of the Commonwealth's current airport expansion programme is \$125 million.

Airways facilities

Concurrently with the five-year aerodrome development programme, the Commonwealth Government has approved major extensions and improvements to Australia's air navigation and communications system. New long-range radar units have been installed at Sydney, Melbourne, Brisbane and Adelaide to assist air traffic control, and other units are being established at Perth, Canberra and in northern New South Wales. Total cost of this radar programme is approximately \$8 million.

Further progress has been made with the programme, started in 1961, of increasing the number of laterally spaced air routes in heavy traffic areas throughout Australia and improving the network of radio navigational aids defining them. A further twelve navigational aids were put into operation during 1966-67. The number of navigational aids operating throughout the Commonwealth at 30 June 1967 totalled 309. These included 86 distance measuring equipment (DME) beacons, 28 visual aural ranges (VAR), 168 non-directional beacons (NDB), 14 VHF omni radio ranges (VOR), and 13 instrument landing systems (ILS).

Aircraft on the Australian register

CIVIL AVIATION: AIRCRAFT ON AUSTRALIAN REGISTER, 30 JUNE 1967

Type of aircraft	Number of engines				Total aircraft
	One	Two	Three	Four	
Fixed-wing powered aircraft—					
Turbo-jet	7	8	19	34
Turbo-prop	2	46	..	30	78

(a) Aircraft on Australian register and gliders irrespective of location of accident.

(b) Includes parachutists killed.

POSTS; INTERNAL AND OVERSEAS TELECOMMUNICATION SERVICES; RADIOCOMMUNICATION STATIONS

In this division particulars for the Australian Capital Territory are included with those for New South Wales, and the South Australian figures include particulars for the Northern Territory, unless otherwise indicated. The Central Office of the Postmaster-General's Department is located in Melbourne, Victoria.

Postmaster-General's Department—General

Under the provisions of the *Post and Telegraph Act* 1901-1966 the Postmaster-General's Department is responsible for the control and operation of postal, telegraphic and telephonic services throughout Australia. The Postmaster-General's Department is also responsible for the provision and operation of the transmitters and technical facilities required for broadcasting and television services by the Australian Broadcasting Commission (*see* pages 447-9), and, in conjunction with the Overseas Telecommunications Commission (*see* pages 445-6), with whom there is close co-operation, provides facilities for communication with overseas countries. Subsidiary to its major activities, the Postmaster-General's Department performs a number of important functions for other Commonwealth and State departments, including the payment of pensions, child endowment and military allotments, the provision of banking facilities on behalf of the Commonwealth Savings Bank, the sale of tax and duty stamps, and the collection of land tax.

Postal facilities

The following table shows the number of post offices, the area in square miles and the number of inhabitants to each post office (including non-official offices), and the number of inhabitants to each 100 square miles in each State and in Australia at 30 June 1967.

POSTAL FACILITIES: RELATION TO AREA AND POPULATION, STATES

Cash expenditure, Postmaster-General's Department

The following tables show, as far as possible, the distribution of cash expenditure (actual payments during each year as recorded for Treasury purposes) in each State and Central Office. The tables must not be regarded as statements of the working expenses of the Department, since items relating to new works, etc., are included therein.

1966-67 .	2,232,881	417,980	19,196	13,097	2,683,154

For footnotes see previous table.

During 1966-67 the total amounts paid for the carriage of mails, as disclosed by the Profit and Loss Account of the Postal Service, were as follows: road, \$10,054,873; railway, \$3,959,423; sea, \$679,088; air—internal, \$3,878,041, overseas, \$13,823,973; grand total, \$32,395,398.

Money orders and postal orders

The issue of money orders and postal orders is regulated by sections 74-9 of the *Post and Telegraph Act* 1901-1966. The maximum amount for which a single money order payable within Australia may be obtained is \$80, but additional orders will be issued upon request when larger amounts are to be remitted. The maximum amount permitted to be sent by any one person to a person or persons outside Australia is \$50 a week. A postal order is not available for a sum larger than four dollars. The following table shows the number and value of money orders and postal orders issued in Australia in each of the years 1962-63 to 1966-67 and the income therefrom which has accrued to the Post Office.

MONEY ORDERS AND POSTAL ORDERS(a): TRANSACTIONS, AUSTRALIA
1962-63 TO 1966-67

Year	Money orders(b)			Postal orders(a)		
	Issued(c)		Total commission received	Issued		Fee
	Number	Value		Number	Value	
	'000	\$'000	\$'000	'000	\$'000	\$'000
1962-63 . .	11,076	306,866	1,858	16,330	17,240	642
1963-64 . .	11,838	338,674	2,004	15,987	17,234	634
1964-65 . .	12,176	376,356	2,103	15,338	16,737	618
1965-66 . .	12,634	407,275	2,200	15,010	16,184	604
1966-67 . .	12,594	434,942	2,332	13,499	18,454	629

(a) Postal orders replaced postal notes on 1 June 1966. (b) Money orders issued for payment in Australia and Papua and New Guinea. (c) Includes official money orders used in bringing to account telephone accounts and collections on War Service Homes repayments.

Of the total money orders issued in Australia during 1966-67, 12,106,884 valued at \$431,713,947 were payable in Australia, and 487,216 valued at \$3,227,959 were payable overseas. Of the total money orders paid in Australia during 1966-67, 12,070,351 (\$431,523,787) were issued in Australia, and 208,214 (\$3,378,661) were issued overseas.

Of the total postal orders paid in Australia during 1966-67 (13,761,620 valued at \$18,809,517), 9,278,815 (\$13,520,492) were paid in the State in which issued, and 4,482,805 (\$5,289,025) were paid in States other than those in which issued.

Internal telecommunication services

A review of the development of telegraph services in Australia up to 1921 appeared in Year Book No. 15, page 625, and subsequent developments of importance have been dealt with in later issues. Internal telecommunication operations now comprise telephone, telegraph, and telegraph exchange (telex) services.

Wire and pole mileages

At 30 June 1967 there were 16,975,000 single wire miles of cable and 1,251,000 miles of aerial wire used for telecommunication purposes in Australia. The aerial wires were mounted on 116,652 miles of pole routes, and joint use is made of these poles for both power and telecommunication reticulation.

Telephone services in operation

The following table shows the number of services in operation in each State at 30 June 1967 classified according to type of service, type of exchange to which connected, and location. Telephone services connected to exchanges located within fifteen miles of the Sydney and Melbourne and ten miles of the Brisbane, Adelaide, Perth, and Hobart General Post Offices are defined as being within a metropolitan area.

Year	Effective paid local calls		Trunk line calls		Total calls '000
	Total '000	Per service number	Total '000	Per service number	
1962-63	1,809,000	998	84,500	47	1,893,500
1963-64	1,958,000	1,020	95,700	50	2,053,700
1964-65	2,043,000	1,016	106,500	53	2,149,500
1965-66	2,103,000	992	116,600	55	2,219,600
1966-67	2,179,000	1,001	134,200	62	2,313,200

Subscriber trunk dialling (S.T.D.) facilities were introduced during the year 1961-62 from Canberra to the Sydney network and from Warragul (Victoria) to Melbourne. At the end of June 1967 subscriber trunk dialling was in operation at 268 exchanges, connected to approximately 686,000 services.

Internal telegraphs

Telegrams can be lodged at any post office, telephone office or from any public telephone equipped for multi-coin operation. In addition, telegrams can be despatched from any subscriber's telephone or telegraph exchange (telex) equipment. The number of telegrams of various types transmitted within the Commonwealth during the years 1962-63 to 1966-67 is set out hereunder.

INTERNAL TELEGRAPH TRAFFIC: AUSTRALIA, 1962-63 TO 1966-67
(^{'000})

Year	Ordinary (a)	Urgent	Press	Letter- grams	Meteoro- logical service	Service	Total telegrams
1962-63	16,663	492	148	91	948	582	18,924

Overseas telecommunication services

The Overseas Telecommunications Commission (Australia) is the authority responsible for the establishment, maintenance, operation and development of Australia's overseas public telegraph, phototelegraph and telex services by cable and by radio, and the provision, maintenance, and development of cable and radio facilities for the conduct of Australia's overseas telephone services and of the facilities for services with ships at sea.

The Commission was established under the *Overseas Telecommunications Act* 1946-1966. This Act implemented, in Australia, a recommendation of the 1945 Commonwealth Telecommunications Conference for national ownership of the external telecommunication services of the British Commonwealth countries concerned and for the establishment of a representative advisory board, the Commonwealth Telecommunications Board, to co-ordinate their development.

The Commission provides telegraph, telex, phototelegraph, and, in conjunction with the Postmaster-General's Department, telephone services with overseas countries and Australian Territories. Leased one- and two-way circuits are also provided for large commercial users. In addition, it operates the Australian coastal radio services for communication with ships at sea in Australian waters and high frequency radio services for communication with ships in any part of the world. The Commission's coastal radio stations also provide certain services to a number of remote stations within Australia and its Territories.

Details of overseas communication systems operating in Australia prior to 1946 and developments leading to the establishment of the Commission were published in Year Book No. 37, pages 220-4.

To meet Australia's increasing demand for overseas communication channels, and because of limitations to performance and capacity inherent in current forms of telegraph cables and high frequency radio systems, the Commission, in partnership with the overseas telecommunications authorities of Britain, Canada, and New Zealand, installed a large capacity telephone cable across the Pacific Ocean, connecting Australia, New Zealand and Canada via Suva and Honolulu. The cable (COMPAC) was opened in December 1963 and forms part of a British Commonwealth large capacity cable scheme, in which a complementary cable between Britain and Canada (CANTAT) was officially opened in December 1961. The two cable connections are linked across Canada by a microwave system. The Commonwealth cable system feeds into the United States of America network at Hawaii and into the European network at London.

The last stage, the south-east Asia cable project (SEACOM), extends the large capacity telephone cable system from Sydney to Singapore and Kuala Lumpur via Cairns, Madang, Guam, Hong Kong, and Jesselton. It was opened for service on 30 March 1967.

The Commonwealth Cable Management Committee, comprising representatives of the partner Governments, Britain, Canada, Australia, New Zealand, Malaysia and Singapore, administers COMPAC and SEACOM.

Two years of international discussion and negotiations were concluded by the signing in August 1964 by a number of countries, including Australia, of agreements to establish the first global commercial communications satellite system, of which the 'space segment' is estimated to cost \$US200 million. 'Space segment' is a broad description of the communications satellites and the tracking,

control, command, and related facilities required to support operation of the satellites. An earth station, owned and operated by the Commission, at Carnarvon, Western Australia, operates into communications satellite INTELSAT II launched in January 1967 and positioned in geo-stationary orbit 22,300 miles above the equator at longitude 175°E. A second satellite earth station which also works into INTELSAT II has been established in Moree, New South Wales, with necessary staff residences, at a cost estimated at \$4 million, and commenced operations during March 1968.

International telecommunication traffic

Particulars of the volume of international telegram business, originating and terminating in Australia, transacted over the cable and radio services during 1966-67 are shown in the following table.

INTERNATIONAL TELEGRAPHIC TRAFFIC: AUSTRALIA, 1966-67(a)
(⁰000 words)

(a) Year ended 31 March. (b) Excludes 92,848 paid telephone minutes and 23,199 paid telex minutes transmitted to Australian External Territories. (c) Excludes 129,440 paid telephone minutes and 17,405 paid telex minutes transmitted from Australian External Territories.

Coast stations

The Overseas Telecommunications Commission operates fifteen coastal radio stations at points around the Australian coast, three on the Papua-New Guinea coast, and one at Norfolk Island. During the year ended 31 March 1967 the coastal radio service handled 5,067,890 paid words to ships and 3,026,567 words from ships. Ship calls over the radiotelephone service extended over 51,740 paid minutes.

Radiocommunication stations authorised

The following table shows particulars of the different classes of radiocommunication stations authorised in Australia at 30 June 1967. Figures relate to radiocommunication (radio telegraph and radiotelephone) stations only; particulars of broadcasting stations and of broadcast listeners' licences are shown on pages 448 and 450 respectively.

(e) Equipment installed in aircraft (aeronautical), motor vehicles (land mobile services), harbour vessels (harbour mobile services) and ocean-going vessels (ships), and mobile equipment of organisations such as the Royal Flying Doctor Service. (f) Includes 164 stations which cannot be classified according to State or Territory.

BROADCASTING AND TELEVISION

Broadcasting and television services in Australia operate under the *Broadcasting and Television Act* 1942–1967 and comprise the National Broadcasting Service, the National Television Service, the Commercial Broadcasting Service, and the Commercial Television Service. General control of these services is a function of the Australian Broadcasting Control Board. Licence fees for commercial broadcasting and television stations are payable under the *Broadcasting Stations Licence Fees Act* 1964–1966 and the *Television Stations Licence Fees Act* 1964–1966 respectively.

Particulars of the composition, functions and responsibilities of the Australian Broadcasting Control Board are shown in Year Book No. 51, pages 594–5. The functions of the Board as shown therein were subsequently amended by repealing the Board's power to regulate the establishment and operation of networks. Pursuant to the *Broadcasting and Television Act* 1942–1967, the Australian Broadcasting Commission now consists of nine members, one of whom shall be a woman.

Broadcasting services

The National Broadcasting Service

In sound broadcasting the programmes of the National Broadcasting Service are provided by the Australian Broadcasting Commission through transmitters operated by the Postmaster-General's Department.

Technical facilities. At 30 June 1967 the National Broadcasting Service comprised seventy-six transmitting stations, of which sixty-eight were medium frequency and eight high frequency.

The medium-frequency transmitters operate in the broadcast band 525 to 1,605 kilocycles a second. The high-frequency stations, using frequencies within the band three to thirty megacycles a second, provide services to listeners in sparsely populated parts of Australia such as the north-west of Western Australia, the Northern Territory, and northern and central Queensland.

Many of the programmes provided by country stations are relayed from the capital cities, high-quality programme transmission lines being used for the purpose. A number of programme channels are utilised to link national broadcasting stations in the capital cities of Australia, and, when necessary, this system is extended to connect both the national and commercial broadcasting stations.

At 30 June 1967 fifty-six of the Australian medium-frequency stations were situated outside the six State capital cities. Additional country stations are to be established, and, when these additions are complete, the medium-frequency and high-frequency stations together will provide for clear reception of the programmes of the National Broadcasting Service in practically every part of Australia.

Programme facilities. The programmes of the Australian Broadcasting Commission cover a wide range of activities. The proportion of broadcasting time allocated to the various types of programme during 1966-67 was as follows: classical music, 25.4 per cent; light entertainment, 9.4 per cent; news, 8.5 per cent; sporting, 5.0 per cent; light music, 2.4 per cent; talks, 6.7 per cent; drama and features, 3.6 per cent; education, 3.9 per cent; Parliament, 3.6 per cent; religious, 3.0 per cent; children's programmes, 2.5 per cent; rural, 1.7 per cent; and non-departmental and special programmes, 24.3 per cent. Further particulars of the operations of the Australian Broadcasting Commission in respect of music, drama and features, youth education, talks, rural broadcasts, news, and other activities are shown in Year Book No. 51, pages 596-7.

The Commercial Broadcasting Service

Commercial broadcasting stations are operated under licences granted and renewed by the Postmaster-General after taking into consideration any recommendations which have been made by the Broadcasting Control Board. The initial period of a licence is five years and renewals are granted for a period of one year. The fee payable for a licence is \$50 on the grant of the licence, and thereafter \$50 a year plus an amount ascertained by applying the following rates to 'gross earnings', within the meaning of the *Broadcasting Stations Licence Fees Act 1964-1966*, during the preceding financial year—1 per cent up to \$1,000,000; 2 per cent \$1,000,001 to \$2,000,000; 3 per cent \$2,000,001 to \$4,000,000; and 4 per cent over \$4,000,000.

Overseas Broadcasting Service

There are seven high-frequency stations at Shepparton and two at Lyndhurst, Victoria, which provide the overseas service known as 'Radio Australia'. As in the case of the National Broadcasting Service, these stations are maintained and operated by the Postmaster-General's Department, and their programmes are arranged by the A.B.C. The programmes, which give news and information about Australia presented objectively, as well as entertainment, are directed mainly to south-east Asia and the Pacific. The overseas audience has grown very substantially in recent years, as evidenced by a large and increasing number of letters from listeners abroad.

Broadcasting stations

Tables showing the call sign, location, frequency, and aerial power of national and commercial broadcasting stations in operation at 30 June 1967 are shown in *Transport and Communication*, Bulletin No. 58.

Television services

The National Television Service

The National Television Service is provided by the Australian Broadcasting Commission through transmitters operated by the Postmaster-General's Department. The first national station (ABN Sydney) commenced regular transmissions on 5 November 1956. At 30 June 1967 thirty-eight stations were operating, excluding nine translator stations. One additional national television station had been authorised but had not commenced to operate by that date.

The television programmes provided by the Australian Broadcasting Commission cover a wide range of activities. The proportion of television time allocated among the A.B.C.'s various departments to 30 June 1967 was as follows: drama, 25.1 per cent; talks, 12.2 per cent; sporting, 9.2 per cent; children's session, 14.1 per cent; news, 6.2 per cent; light entertainment, 10.2 per cent; education, 14.1 per cent; music, 1.4 per cent; religious, 2.1 per cent; rural services, 1.5 per cent; non-departmental, 3.9 per cent. Further particulars of the operation of the National Television Service in respect of talks, drama and features, music, rural services, education, news and other activities are shown in Year Book No. 51, pages 598-9. Transmission time for the year ended 30 June 1967 totalled 172,573 hours.

The Commercial Television Service

Commercial television stations are operated under licences granted and renewed by the Postmaster-General. The first commercial station (TCN Sydney) commenced regular transmission on 16 September 1956. At 30 June 1967 forty-one television stations were operating.

The initial grant of a licence is for a period of five years and thereafter the licence is renewable annually. The fee payable is \$200 for the first year and thereafter \$200 a year plus an amount ascertained by applying the following rates to 'gross earnings', within the meaning of the *Television Stations Licence Fees Act 1964-1966*, during the preceding financial year—1 per cent up to \$1,000,000; 2 per cent \$1,000,001 to \$2,000,000; 3 per cent \$2,000,001 to \$4,000,000; and 4 per cent over \$4,000,000.

Television stations

During the year ended 30 June 1967 the following national television stations commenced regular transmissions: **New South Wales**—ABGN Channel 7, Murrumbidgee Irrigation Areas; **ABQN** Channel 5, Central Western Slopes area; **Queensland**—ABNQ Channel 9, Cairns area (temporary station); **ABSQ** Channel 1, Southern Downs area. The following commercial television stations also commenced regular transmissions during the year: **Queensland**—FNQ Channel 10, Cairns area (temporary station); **Western Australia**—BTW Channel 3, Bunbury area. Particulars of all television stations in operation at 31 December 1964 are shown in Year Book No. 51, pages 598-9. The following table shows the number of television stations in operation at 30 June 1967.

Tables showing the call sign, location, frequencies, polarisation, aerial power, and weekly hours of transmission of National and Commercial television stations in operation at 30 June 1967 are shown in *Transport and Communication*, Bulletin No. 58.

Broadcast listeners' and television viewers' licences

Broadcast listeners', television viewers', and combined receiving licences are issued at post offices in accordance with the provisions of the *Broadcasting and Television Act 1942-1967*, which stipulates that, except as prescribed, a person shall not use, maintain or have in his possession a broadcast or television receiver unless there is in force a licence which applies to that receiver. A broadcast listener's licence or a television viewer's licence, whichever is appropriate, authorises the operation of any broadcast receiver or any television receiver, which is: (a) in the possession of the holder of a licence, or of a member of his family, at the address specified in the licence and is ordinarily kept at that address; (b) installed in a vehicle which is ordinarily in the possession of the holder, or a member of his family, and is ordinarily kept at that address when not in use. A person who has both broadcast and television receivers at the one address is required to take out a combined receiving licence, provision for which was introduced by legislation effective from 1 April 1965.

A licence may be granted free of charge to a blind person over 16 years of age or to a person or authority conducting a school, and at a concession rate to certain classes of pensioners. Receivers provided for the use of inmates of an approved institution (including a hospital) are covered by an appropriate licence held by the institution. Persons residing in Zone 2 may also be granted a broadcast listener's licence at a reduced rate. Zone 1 is the areas within 250 miles of specified broadcasting stations and Zone 2 is the remainder of Australia.

Each broadcast or television receiver let out on hire (except under a hire purchase agreement) must be covered by a hirer's licence held by the person or firm from whom the receiver is hired. The keeper of a lodging house (which includes a hotel, motel, boarding house, or any other premises where lodging or sleeping accommodation is provided for reward) must take out a lodging house licence for each broadcast or television receiver provided by the proprietor in any room or part of the lodging house occupied or available for occupation by lodgers.

The fees payable for the various classes of licence are as follows.

BROADCAST LISTENERS' AND TELEVISION VIEWERS' LICENCES: RATES

Licence		Ordinary rate	Pensioner rate
		\$	\$
Broadcast listener's licence and hirer's licence for a broadcast receiver	Zone 1	5.50	1.00
	Zone 2	2.80	0.70

1967(c)	927,038	690,857	302,575	254,504	159,048	71,113	2,405,135

(a) Includes short-term hirers' licences. (b) Includes Australian Capital Territory. (c) Includes combined broadcast listeners' and television viewers' licences.

The numbers of combined receiving licences included in both of the foregoing tables as at 30 June 1967 are: New South Wales, 753,205; Victoria, 598,035; Queensland, 243,285; South Australia, 203,993; Western Australia, 129,403; Tasmania, 60,405; Australia, 1,988,326.

Of 2,405,135 television viewers' including combined licences in force at 30 June 1967, 170,958 were held by short-term hirers, and could not be separated into metropolitan licences or country licences. Persons living in the metropolitan area held 1,447,132 or 65 per cent of the remainder. Short-term hirers' licences (included above) at 30 June 1967 were: New South Wales, 75,522; Victoria, 23,949; Queensland, 21,741; South Australia, 31,219; Western Australia, 15,059; and Tasmania, 3,468.

Revenue received from broadcast and television licence fees

The following table shows the revenue received from broadcast listeners' licence fees and television viewers' licence fees during the years 1962-63 to 1966-67. Figures for 1964-65 and later years include revenue from fees for combined licences which took effect on 1 April 1965.

REVENUE RECEIVED FROM BROADCAST AND TELEVISION LICENCE FEES
STATES, 1962-63 TO 1966-67
(\$'000)

Year	N.S.W. (a)	Vic.	Qld	S.A. (b)	W.A.	Tas.	Aust.
1962-63. . . .	9,860	7,968	3,239	2,837	1,737	784	26,425
1963-64. . . .	10,560	8,474	3,590	3,063	1,843	865	28,395
1964-65. . . .	12,400	9,811	4,230	3,586	2,124	1,006	33,157
1965-66. . . .	13,401	10,335	4,545	3,832	2,285	1,047	35,445
1966-67. . . .	14,244	10,840	4,951	4,101	2,571	1,127	37,835

(a) Includes Australian Capital Territory. (b) Includes Northern Territory in respect of broadcast licence fees.

TRAVEL

An article outlining the history and growth of travel and the structure of tourist organisations in Australia, prepared by the Australian National Travel Association, appeared in Year Book No. 52, pages 1158-84. The following pages contain statistics of travel to and from Australia, together with some revised descriptive matter. Current statistics on overseas travel are published in monthly and quarterly (mimeographed) statements *Overseas Arrivals and Departures*.

Overseas travel

Statistics of overseas arrivals in, and departures from, Australia are classified into three categories, namely: *permanent movement* (i.e. settlers arriving and Australian residents departing permanently); *long-term movement* (i.e. Australian residents returning to Australia after a stay in a country abroad of one year or longer, or departing from Australia with the intention of staying in a country abroad for one year or more, and overseas visitors arriving with the intention of staying in Australia for a year or more or departing after a stay in Australia of a year or more); and *short-term movement* (i.e. all other movements). Statistics relating to permanent movement are included in Chapter 7, Population. The statistics presented in this section on travel relate mainly to overseas arrivals and departures of visitors and Australian residents classified as short-term, but, for completeness, statistics of those classified as long-term also are shown on pages 458-9 of this section.

Short-term movement, overseas visitors and Australian residents

Short-term refers basically to travellers, (Australian residents and visitors from overseas) who intend to, or actually do, spend a period of less than twelve months in a country abroad or in Australia. This classification includes Australian troops, regardless of length of their stay abroad, and persons who come to Australia or go abroad for paid work or to study (as long as their intended or actual length of stay is less than one year). It excludes visitors to Australia and residents on visits abroad if their stay in Australia or in a country abroad is one year or more, all crew, and persons who arrive in and depart from Australia on the same ship's voyage or on the same flight; but includes persons who, on arrival, declare their purpose of visiting Australia to be 'in transit', as long as a change of ship or flight takes place. Australian residents visiting abroad may be away from Australia for more than a year but still be included as short-term as long as their *stay in any one country abroad* is not for a year or more. As from October 1967, when United States troops commenced coming to Australia on rest and recreation leave, their movements have also been included with short-term. For statistical purposes they are classified as short-term visitors travelling by air for holiday purposes and their country of residence and country of embarkation or disembarkation is shown as 'Asia—other'. During the period October to December 1967, 6,750 United States troops arrived in Australia on rest and recreation leave. (See Chapter 7, Population, pages 153-4 for further information on the classification of overseas travellers.)

OVERSEAS VISITORS ARRIVING IN AND DEPARTING FROM AUSTRALIA, BY MODE OF TRAVEL, 1963 TO 1967

SHORT-TERM

Year	Arriving			Departing		
	By sea	By air	Total	By sea	By air	Total
1963	18,066	107,311	125,377	22,358	106,973	129,331
1964	18,916	128,962	147,878	22,147	128,494	150,641
1965	20,291	153,037	173,328	24,491	154,442	178,933
1966	19,547	167,715	187,262	25,541	169,335	194,876
1967	19,141	202,680	221,821	24,803	206,959	231,762

Over the period covered by this table departures exceeded arrivals substantially. The reason lies broadly in the difference between the period of intended stay, as stated on the arrival of the visitor, and the period actually spent in Australia, as stated on his departure, resulting in a different classification on arrival from that on departure.

The following table shows corresponding figures in respect of Australian residents on visits abroad.

AUSTRALIAN RESIDENTS DEPARTING FROM AND RETURNING TO AUSTRALIA, BY MODE OF TRAVEL, 1963 TO 1967

SHORT-TERM

Year	Departing			Returning		
	By sea	By air	Total	By sea	By air	Total
1963	41,053	71,374	112,427	34,205	76,977	111,182
1964	43,785	89,463	133,248	36,430	94,924	131,354
1965	51,138	110,554	161,692	43,382	117,162	160,544
1966	54,348	128,813	183,161	46,024	135,746	181,770
1967	52,979	164,767	217,746	48,539	174,499	223,038

In the next table short-term visitors arriving in, and Australian residents departing from, Australia are shown by countries of embarkation and disembarkation respectively. Country of embarkation refers to the country in which the passenger embarked on the particular ship or aircraft which brought him to Australia and country of disembarkation refers to the intended country of disembarkation from the particular ship or aircraft which took the passenger from Australia. Thus, these statistics do not necessarily indicate the country of origin of visitors nor the country of destination of residents going abroad.

Long-term movement, overseas visitors and Australian residents

In addition to those arrivals and departures of overseas visitors and the overseas travel of Australian residents classified as short-term, there is similar travel classified as 'long-term movement' (see explanation on page 451). Particulars of this travel, where the stay in Australia (for overseas visitors) or in a country abroad (for Australian residents) is for a year or more are given below.

The following two tables show the stated purpose of journey of overseas visitors to Australia and of Australian residents visiting abroad from 1963 to 1967 who were classified as long-term. When comparing the numbers of arrivals and departures changes in classification due to the factor mentioned on page 452 must be kept in mind.

Direct transit travellers

As indicated on page 452, all the preceding figures in this section exclude persons who arrive in and depart from Australia on the same ship's journey or on the same flight. Persons thus excluded are not all normally considered visitors to Australia. For instance, settlers or other persons going to New Zealand, Papua and New Guinea, or other neighbouring countries, or leaving such countries may travel through Australia on their way. On the other hand, all persons visiting Australia on cruise vessels, which may remain in Australian waters for a considerable time, are also treated as direct transit travellers and are thus excluded from the figures shown on previous pages. Information regarding direct transit passengers on ships calling at Australian ports is given in the next table.

OVERSEAS SHIPPING PASSENGERS IN DIRECT TRANSIT(a)
AUSTRALIA, 1966 AND 1967

(a) Persons who arrived in and departed from Australia on the same ship's voyage.

Sea cruises from Australia

Excluded from the foregoing tables are passengers on short pleasure cruises in the south-west Pacific, commencing and finishing in Australia on ships not then engaged in regular voyages. During 1967 twenty such cruises, carrying 18,922 passengers, were completed.

Tourist organisation

The Australian Tourist Commission was established by the Commonwealth Government under the *Australian Tourist Commission Act 1967*. Its objectives are the encouragement of visits to Australia, and travel in Australia, by people from other countries. The Commission comprises a Chairman appointed by the Commonwealth Government; a representative of each of two Commonwealth Departments; two appointees to represent private industry, selected by the Commonwealth Government from a panel of names put forward by the Australian National Travel Association; and two non-voting representatives nominated by the State Governments.

For 1967-68 the Commonwealth Government provided \$1,550,000 to the Commission, to be spent on advertising campaigns and in associated promotional activities in overseas countries, particularly in New Zealand, North America, the United Kingdom, and Western Europe. The Commission brings to Australia travel agents, writers, photographers and other publicists to see at first hand what the country has to offer visitors. It takes no part in the detailed organisation of tourist activities in Australia. It has its Head Office in Melbourne and branch offices in London, New York, San Francisco, Auckland, Tokyo, and Sydney.

The Australian National Travel Association, which is described on pages 1161-2 of the special article Travel and Tourism in Year Book No. 52, was formerly responsible, *inter alia*, for the promotion overseas of Australia as a tourist destination. Following the creation of the Australian Tourist Commission, the Association now concentrates on the encouragement of the growth and development of travel and tourism within Australia, and the improvement of the standard and variety of facilities and services provided by private enterprise for the use of overseas visitors. It acts as a co-ordinating body for its members, provides a clearing house for information, and conducts surveys into aspects of local tourist activity. The Association is governed by a Board representative of travel and tourist interests. The Commonwealth Government is no longer represented on the Board. The Association's office is now located in Sydney.

CHAPTER 13

WELFARE SERVICES

This chapter relates to welfare services other than those concerned specifically with education, health and repatriation. The latter are dealt with, in the main, in the relevant chapters of this Year Book. Apart from a summary of government expenditure on welfare services and short descriptions of certain interstate organisations providing welfare services, the chapter is devoted to a description in some detail of the services provided by the Commonwealth. For information on the many important welfare services provided by State and local governments, especially in the fields of child and Aboriginal welfare, reference should be made to the Year Books or Statistical Registers of the States and the annual reports of the State departments concerned. Information on pension and superannuation schemes provided for government and semi-government employees, mine workers, parliamentarians, and employees of private business is included in the chapter Private Finance.

In addition, there are numerous services of this nature provided by charitable and other non-government institutions and organisations. There are institutions providing shelter and or caring for needy, aged, infirm or handicapped persons, neglected children, destitute persons, wayward boys and girls, and the like. Many organisations, too, provide aid in kind (food, clothing, etc.), auxiliary medical and nursing services, and other assistance to relieve suffering and hardship. Considerable work is also done by such organisations in the rehabilitation or establishment in the community of various types of people, such as prisoners and migrants, and in the prevention and alleviation of cruelty and maltreatment of any sort. Comprehensive information regarding the activities of such organisations is not available.

Further information on subjects dealt with in this chapter is included in the annual bulletins *Australian National Accounts*, *Commonwealth Finance*, and *State, Territory and Local Government Authorities' Finance and Government Securities*. Current and summarised information on Commonwealth social services is contained in the *Quarterly Summary of Australian Statistics* and the *Monthly Review of Business Statistics*.

Expenditure on welfare services

This section deals with various government payments for the relief of the aged, indigent, infirm, widowed and unemployed, assistance to families, Aboriginal welfare, etc. For summary statements of cash payments to persons made by public authorities under various functional heads, see *Australian National Accounts* and the other annual bulletins mentioned above.

Commonwealth expenditure on welfare services

Information concerning the cost of administering each Commonwealth benefit separately is not compiled. However, the chapter Public Finance, and, in more detail, the annual bulletin *Commonwealth Finance*, present an analysis of Commonwealth expenditure by function and economic type, from which some estimates of administrative costs can be derived. Commonwealth expenditure on Aboriginal welfare is included on page 464 and that on grants for the construction of homes for the aged and for accommodation for disabled persons on pages 477 and 478 respectively.

The National Welfare Fund

The National Welfare Fund was established by the *National Welfare Fund Act 1943* to finance a scheme of national welfare and has operated from 1 July 1943. At its commencement it was used to finance funeral benefits and maternity allowances, but other social and health benefits were made a charge on the fund from time to time, and at present expenditure on all benefits except repatriation, telephone rental concessions and a few minor social and health benefits is met from the fund. The fund is used only to finance the benefits themselves; it is not used to finance the cost of administering the benefits, or of capital works associated with the benefits.

State expenditure on certain welfare services

The following table shows net expenditure from State government funds on certain welfare services. The figures exclude expenditure on unemployment, bush fire, flood, etc., relief, Aboriginal welfare, and some other items which are excluded because information cannot be obtained for all States. Loan fund expenditure is excluded also. Because of differences in organisation and accounting methods, the information shown for some classes is not on exactly the same basis for all States; it may also be incomplete because particulars of some activities are not separately recorded and are therefore excluded. The expenditure shown is 'net' in the sense that receipts for services rendered have been deducted from gross expenditure.

Commonwealth social services

Under the provisions of section 51 of the Constitution, the Commonwealth Government is empowered to legislate on:

'(xxiii) Invalid and old age pensions:

'(xxiiiA) The provision of maternity allowances, widows' pensions, child endowment, un-employment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances'.

The latter paragraph was inserted in the Constitution after being accepted by the electors at a referendum on 28 September 1946. The enabling Act was assented to on 19 December 1946.

Before 1947, Commonwealth social service benefits were paid under various Acts. On 1 July 1947, with the passage of the *Social Services Consolidation Act* 1947, all Acts providing social service benefits were amalgamated. This Act eliminated certain anomalies and obsolete provisions, and changed the title 'old-age pension' to 'age pension'. The word 'Consolidation' was dropped from the short title of the Act in 1954. The Act is at present styled the *Social Services Act* 1947-1967.

Social service benefits provided

The social service benefits provided by the Commonwealth Government under the *Social Services Act* 1947-1967, and the date on which each came into operation, are:

Age pension	1 July 1909
Child endowment	1 July 1941
Child endowment—student children	14 January 1964
Commonwealth Rehabilitation Service	10 December 1948
Funeral benefit	1 July 1943
Guardians' allowances for widowers and other unmarried age and invalid pensioners with children in their care	14 October 1965
Invalid pension	15 December 1910
Maternity allowance	10 October 1912
Sheltered employment allowances	30 June 1967
Sickness benefit	1 July 1945
Special benefit	1 July 1945
Supplementary assistance (age, invalid and widows' pensions)	15 October 1958
Unemployment benefit	1 July 1945
Widows' pensions	30 June 1942
Widows' pensions—children's allowances	2 October 1956
Wives' and children's allowances for pensioners who are invalids	8 July 1943
Wives' and children's allowances for age pensioners	14 October 1965

Age and invalid pensions

Age pensions are payable to men, sixty-five years of age and over, and women, sixty years of age and over, who have lived in Australia continuously for at least ten years, which need not be immediately prior to the date of claim for a pension. If a person has completed five years', but not ten years',

continuous residence, and has lived in Australia for periods which exceed a total of ten years, the period of continuous residence otherwise required is reduced by the total of his periods of residence in Australia in excess of ten years. Any periods of absence during which a person's home remains in Australia, and absences in certain other circumstances, are counted as residence, and any absence in an external Territory of the Commonwealth, while not counting as residence, does not interrupt continuity of residence in Australia. Residence in New Zealand or the United Kingdom may be treated as residence in Australia.

Invalid pensions are payable to persons, sixteen years of age and over, who have lived in Australia for a continuous period of five years (including certain absences) at any time, and who are permanently incapacitated for work to the extent of at least eighty-five per cent, or permanently blind. If the incapacity or blindness first occurred outside Australia, except during a temporary absence, a period of ten years' continuous residence is necessary, but if a person has completed five years', but not ten years', continuous residence and has lived in Australia for periods which exceed a total of ten years, the period of continuous residence otherwise required is reduced by the total of his periods of residence in Australia in excess of ten years. Residence in New Zealand or the United Kingdom may be treated as residence in Australia. Certain absences do not affect eligibility.

Current rates of pension. The maximum standard rate was increased to \$676 per annum (\$13 a week) from 30 September 1966. This is payable to a single, widowed, or divorced pensioner, a married man whose wife receives a wife's allowance, or a married pensioner whose spouse is not receiving an age or invalid pension, an unemployment, sickness or special benefit, a tuberculosis allowance, or a service pension. The maximum married rate was also increased from 30 September 1966, and is \$1,222 per annum (\$23.50 a week) for a married couple, both pensioners, i.e. \$611 per annum (\$11.75 a week) each. For a married person whose spouse receives an unemployment, sickness or special benefit, a tuberculosis allowance, or a service pension, the maximum rate is also \$611 per annum (\$11.75 a week).

A wife's allowance may be granted, subject to the means test, to the wife of an invalid pensioner or of an age pensioner permanently incapacitated, blind, or who has the care of a child, if she is not receiving an age or invalid pension, or a service pension under the *Repatriation Act 1920-1967* (see Chapter 5, Repatriation). The maximum annual rate of a wife's allowance is \$312 per annum (\$6 a week). A child's allowance of \$78 per annum (\$1.50 a week), free of the means test, is payable for the first child under sixteen years, and the pension may also be increased by \$78 per annum (\$1.50 a week), subject to the means test, for each other child under sixteen years. A guardian's allowance of up to \$4 a week is payable to widowers and other unmarried age or invalid pensioners who have one or more children in their care.

Eligibility for a child's allowance and the additional pension for children is extended to include a child over sixteen years until he reaches twenty-one years, provided he is wholly or substantially dependent on the pensioner and is receiving full-time education at a school, college or university. Supplementary assistance of up to \$2 a week, subject to a means test, is available to pensioners receiving the maximum standard rate pension if they pay rent or pay for board and lodging or for lodging. From 1958 to October 1965 the rate was \$1 a week, and supplementary assistance was available only to maximum standard rate pensioners paying rent who were considered to depend entirely on the pension. At 30 June 1967, 587,228 age pensioners (ninety per cent of all age pensioners) and 106,805 invalid pensioners (95 per cent of all invalid pensioners) were receiving the maximum pension.

If the pensioner is an inmate of a benevolent home, the maximum payable to him is \$4.50 a week if he is eligible for the standard rate pension, or \$4.20 a week otherwise. The rest is paid to the home for his maintenance. The balance is not paid to the home if the pensioner is in an infirmary ward, as payments under the Commonwealth Hospital Benefits Scheme are made in that case. The maximum payable to a standard rate pensioner is increased if supplementary assistance is also payable.

A table showing the maximum rates of pension operating since 1 July 1909 at dates prior to 14 October 1965 is included on page 608 of Year Book No. 51. Details of increased allowances payable from 14 October 1965 to 30 September 1966, when the current rates of pensions and allowances became operative, are included on page 505 of Year Book No. 52.

Means test. Age and invalid pensions (other than pensions paid to blind persons) and allowances paid to wives (but not a child's allowance of \$1.50 a week) are subject to a means test which applies to income and property. From March 1961 the means tests which previously applied separately on income and property were merged into one composite means test. The rate of pension payable depends on the claimant's *means as assessed*. These consist of his annual rate of income plus a property component equal to \$2 for each complete \$20 of his net property above \$400. A person's *means as assessed* may consist entirely of income, entirely of the property component, or of various combinations of income and property component. From 27 April 1967 the pension payable is calculated

by deducting from the applicable maximum annual rate of pension, plus, where applicable, guardian's allowance, and or additional pension for children, the amount by which *means as assessed* exceed \$442 where the pensioner is married or \$520 where the pensioner is single, widowed, or divorced. Where the standard rate applies, no pension is payable where the value of property is \$12,360 or more (\$14,440 or more if qualified for a guardian's allowance) if the pensioner is single, widowed or divorced; or \$11,580 if the pensioner is married. Where the married rate applies, no pension is payable where the value of property is \$10,940 or more. The wife's allowance is affected by income and property on the same basis as the pension, i.e. it is reduced by the amount of *means as assessed* over \$442. Supplementary assistance is reduced by the amount by which *means as assessed* exceed \$52.

Certain types of income are excepted. The main exceptions are: income from property; gifts or allowances from children, parents, brothers, or sisters; benefits (other than annuities) from friendly societies; child endowment or other payments for children; Commonwealth health benefits and amounts received from registered benefit organisations. A pensioner's income may also be reduced by up to \$156 per annum (\$3 a week) for each dependent child under sixteen years (twenty-one years if a full-time student).

Certain types of property are disregarded. They include the permanent home of the pensioner, his furniture and personal effects, the surrender value (up to \$1,500) of life insurance policies, the capital value of annuities or contingent interests, and the value of any reversionary interests.

For the purposes of the means test the income and property of a married person are considered to be half the total income and property of the husband and wife unless they are legally separated or in other special circumstances.

1966-67	.	651,363	(d)532	112,314	763,677	481,840	12.38	13.30	12.52

(a) Number of pensioners per 1,000 persons of pensionable age (males aged 65 years and over and females aged 60 years and over). (b) Includes allowances and supplementary assistance. (c) Includes supplementary assistance. (d) For earlier years persons of pensionable age—see footnote (a)—exclude Aborigines, while the number of pensioners includes Aborigines throughout.

The sum paid in age and invalid pensions in 1966-67, including the amount paid to homes for the maintenance of pensioners and allowances to wives of invalid pensioners, represented an expenditure of \$41.15 per head of population, compared with \$38.64 in 1965-66.

Sheltered employment allowance

This allowance, which reduces on a graduated scale as earnings from a sheltered workshop increase, was introduced on 30 June 1967 to provide an incentive for invalid pensioners and certain other disabled people to engage in approved sheltered employment. The allowance is paid to invalid pensioners so engaged in lieu of invalid pension and to disabled people who are not receiving a pension but would be likely to become permanently incapacitated to a pensionable degree if not provided with sheltered employment and are otherwise qualified to receive an invalid pension.

The maximum rate of the allowance is the same as the maximum rate of invalid pension. Additional benefits such as wife's and child's allowances that would be paid if the person were an invalid pensioner are added to the sheltered employment allowance to form one composite payment.

The means test is the same as for invalid pensions except that, in relation to earnings from sheltered employment, half the amount by which a single person's earnings exceed \$10 a week is disregarded; in the case of a married person, half the amount by which his earnings exceed \$17 but not \$25 a week is disregarded.

Child endowment

A person who is resident in Australia and has the custody, care and control of one or more children under the age of sixteen years or of a student child over sixteen but under twenty-one years, or an approved institution of which children are inmates, is qualified to receive an endowment in respect of each such child. There are provisions to meet cases of families divided because of divorce, separation, unemployment or death of a parent. There is no means test.

Twelve months' residence in Australia is required if the claimant and the child were not born here, but this requirement is waived if the Department of Social Services is satisfied that they are likely to remain in Australia permanently. Where the child's father is not a British subject, endowment is payable if the child was born in Australia, if the mother is a British subject, or if the Department is satisfied that the child is likely to remain permanently in Australia. Under certain conditions, endowment may be paid to Australians who are temporarily absent overseas.

Rates of endowment. From 1 July 1941 the rate of endowment was 50c a week for each child under sixteen in excess of one in a family, and for each child under sixteen in an approved institution. The rate was increased to 75c a week in June 1945, and to \$1.00 a week in November 1948. From June 1950, 50c a week became payable for the first or only child in a family. From January 1964 the rate was increased to \$1.50 a week for the third and subsequent children under sixteen years in families and for each child in an institution, and that amount also became payable for full-time

students between sixteen and twenty-one years. Full-time student children are those receiving full-time education at a school, college or university and who are not in employment or engaged in work on their own account. From September 1967 the weekly rate for the fourth and each subsequent child under sixteen years in a family was increased by progressive amounts of 25c each, making \$1.75 payable for the fourth child, \$2.00 for the fifth, and so on.

Number of claims and endowed children—children under sixteen years. The number of families receiving child endowment at 30 June 1967 in respect of children under sixteen years was 1,640,390, an increase of 29,900 or 1.9 per cent during the year.

The following table shows, as at 30 June 1967, the number of claims in force and the number of endowed children under sixteen years in family groups, classified according to the number of endowed children in the family group. The families included in the table are not necessarily made up entirely of the children of one marriage, but may include step-children, foster children, adopted children, and any other children in the custody, care and control of the claimant.

(a) Claims by families with children under sixteen and student children are shown in both columns. Information on the number of families having such dual claims is not available. (b) A number of endowments are paid every twelve weeks. During two years out of every three there are four such payments but every third year there are five. Figures for annual liability, therefore, reflect trends in expenditure on child endowment more accurately than do figures for payments.

(c) Includes student children and reflects higher rates for third and subsequent children under sixteen years in families. (d) Expenditure for this year includes five twelve-weekly payments.

Commonwealth Rehabilitation Service

The Commonwealth Rehabilitation Service was set up to help persons who are unable to work because of physical handicap, or who have had to give up their employment because of sickness or injury. It helps disabled persons to reach their maximum physical fitness and to prepare for suitable employment. They are given suitable treatment and training, the cases selected being those in which the person's disability is remediable and there are reasonable prospects of his engaging in a suitable vocation within three years after the commencement of treatment or training.

The service is available to invalid and widow pensioners, persons receiving unemployment, sickness or special benefits, persons receiving tuberculosis allowances, and persons aged fourteen or fifteen who, without treatment and training, would be likely to qualify for an invalid pension on reaching the age of sixteen years. During treatment, payment of pension or benefit continues. When vocational training begins the pension or benefit is suspended and a rehabilitation allowance, together

with a training allowance of \$3.00 a week, is paid instead. With an invalid pensioner, or a sickness, unemployment, or special beneficiary, the rehabilitation allowance is equivalent to and calculated in the same manner as an invalid pension. In the case of a widow pensioner the rate is the same as that of the widow's pension.

Living-away-from-home allowances are paid where necessary. Fares and living expenses (including those of an attendant where required) incurred in connection with treatment, training or attendance for an interview or for medical examination may also be paid. Necessary artificial replacements, surgical aids and appliances may be provided, free of charge, to a person receiving treatment and training or who needs them to assist him to engage in a suitable vocation after the discontinuance of his treatment and training or who needs them otherwise to assist in his rehabilitation. He may also be provided with books, equipment and tools of trade costing up to \$80 in any period of twelve months. Where books, equipment and tools of trade provided to assist a person to engage in a suitable vocation are retained by him, he is liable to repay the cost but is not required to make repayment until after he has commenced employment. The repayment may be made by instalments. If the treatment or vocational training does not result in the trainee's being able to engage in employment, he receives the pension or benefit to which he is entitled. Disabled persons who cannot qualify for the free service may pay for rehabilitation themselves, or they may be sponsored by government or private organisations. Rehabilitation allowances, training allowances, living-away-from-home allowances and other allowances are not payable in these cases. Books, tools, etc., are available on a repayment basis.

Numbers dealt with by the service

COMMONWEALTH REHABILITATION SERVICE: AUSTRALIA, 1966-67

Type	Referred	Accepted	Completed training	Placed in employment	
				After training (a)	Without training
Invalid pensioners	8,318	342	93	85	111
Widow pensioners	12
Unemployment and sickness beneficiaries .	12,617	921	164	165	579
Special beneficiaries	3	1	..	1	..
Recipients of tuberculosis allowance .	178	16	4	5	14
Persons aged 14-15 years	136	51	15	17	24
Persons provided with rehabilitation on payment of the cost by themselves or by another authority	115	98	2	5	59
Total	21,379	1,429	278	278	787

(a) Includes persons who had received training prior to 1 July 1966.

Of the 1,429 persons accepted during 1966-67, 69 per cent were under forty years of age. The average number undergoing rehabilitation at the end of each month during the year was 975. Total cost of this service during 1966-67 was \$1,843,873.

Funeral benefits

A funeral benefit of up to \$20.00 is payable to the person who has paid, or is liable to pay, the cost of the funeral of an age or invalid pensioner or of a claimant who, but for his death, would have been granted an age or invalid pension, or of a person who at the time of his death was receiving, or was a claimant for, a tuberculosis allowance, if he would otherwise have been qualified to receive an age or invalid pension. Where the cost of the funeral has been met partly by payment from a contributory funeral benefit fund of an organisation other than a friendly society, funeral benefit is payable to the extent of the amount (not above \$20.00) by which the cost of the funeral exceeded the amount paid from the fund. The maximum amount payable is increased to \$40.00 where an age, invalid or widow pensioner is liable for the funeral expenses of a spouse, a child under sixteen years, or another age, invalid or widow pensioner.

Total cost of funeral benefits granted during 1966-67 was \$1,334,103.

Maternity allowances

Maternity allowances are paid to provide financial assistance towards the expenses associated with the birth of children and are additional to the benefits provided under the Commonwealth health scheme. They are not subject to a means test.

Subject to certain conditions, a maternity allowance is payable to a woman who gives birth to a child, either in Australia or on board a ship proceeding to Australia or from a port in Australia or an Australian Territory to another such port, and, on the date on which she lodges her claim, is residing in Australia or is in Australia and intends to remain permanently, provided she receives no benefit similar to a maternity allowance from the country from which she came. A woman who gives birth to a child during a temporary absence from Australia may also be eligible. An alien mother may receive the allowance if she or her husband resided in Australia for at least twelve months immediately prior to the birth of the child, or if she is likely to remain in Australia permanently.

Rates of allowance. The allowance is \$30.00 if the mother has no other children, \$32.00 if she has one or two children under sixteen, and \$35.00 if she has three or more other children under sixteen. The amount is increased by \$10.00 for each additional child born at a birth. An advance payment of \$20.00 may be made four weeks before the expected date of birth. The balance is payable immediately after the birth. Payment may be made in respect of the birth of a still-born child, or a child which lives for less than twelve hours, if the child had developed for at least five and a half months.

Unemployment, sickness, and special benefits

Unemployment and sickness benefits are paid to males over sixteen and under sixty-five years of age, and females over sixteen and under sixty years of age, who are unemployed or who are temporarily incapacitated for work and thereby suffer loss of income. They must have been living in Australia during the preceding twelve months or be likely to remain permanently in Australia. A person receiving an age, invalid or widow's pension, or a service pension (as distinct from a war pension) under the *Repatriation Act* 1920-1967 or a tuberculosis allowance, is ineligible to receive a benefit.

To qualify for an unemployment benefit a person must establish that he is unemployed and that his unemployment is not due to his being a direct participant in a strike, that he is capable and willing to undertake suitable work, and that he has taken reasonable steps to obtain such work. Registration with the local Commonwealth District Employment Office is necessary. To qualify for a sickness benefit, a person must establish that he is temporarily incapacitated for work because of sickness or accident and that he has thereby suffered a loss of salary, wages or other income. A married woman is not eligible to receive a sickness benefit if it is reasonably possible for her husband to maintain her. Where her husband is able to maintain her only partially, a benefit may be paid at such rate as is considered reasonable in the circumstances. In exceptional cases a married woman may qualify for unemployment benefit in her own right.

A special benefit may be granted to a person not qualified for unemployment or sickness benefit who is not receiving an age, invalid or widow's pension or a service pension, and who, because of age, physical or mental disability or domestic circumstances, or for any other reason, is unable to earn a sufficient livelihood for himself and his dependants. Recipients of special benefits include, among others, persons caring for invalid parents, also deserted wives and persons ineligible for age, invalid or widows' pensions because of lack of residence qualifications.

Special benefits are also paid to migrants who are in reception centres awaiting their first placement in employment in Australia. During this time they receive a short instruction in English and in Australian conditions to facilitate their assimilation into the community and employment.

Rates of benefit. The maximum weekly rates of benefit payable and permissible income in respect of benefit periods which commenced on or after 1 March 1962 are as follows.

	<i>Maximum weekly rate</i>	<i>Permissible weekly income</i>
	<i>\$</i>	<i>\$</i>
Unmarried person under 18 years of age	3.50	2.00
Unmarried person 18 to 20 years of age	4.75	2.00
All others	8.25	4.00

An additional benefit of \$6 a week may be paid for a dependent spouse and \$1.50 a week for each dependent child under sixteen years of age if resident in Australia. Additional benefit, at the same rate as that for a dependent spouse, may be paid where a woman is keeping house for a claimant who has one or more children under sixteen years of age in his care. It may be granted only if no such benefit is payable for his wife, and the housekeeper is substantially dependent on him but not employed by him.

The weekly rate of benefit is reduced by the amount by which a beneficiary's other income exceeds the amount shown in the relevant line of the final column in the preceding table. For unemployment benefit purposes the income of the spouse is also taken into account unless the claimant and his spouse are permanently separated. For sickness benefit purposes the income from an approved friendly society or other similar approved body in respect of the incapacity for which sickness benefit is payable is disregarded. 'Income' does not include child endowment or other payments for children, Commonwealth hospital and pharmaceutical benefits, a tuberculosis allowance, or an amount paid in reimbursement of medical, dental or similar expenses. There is no means test on property.

The amount of compensation, damages or similar payment, or war pension, if paid in respect of the same incapacity as that for which sickness benefit is claimed, is deducted from the sickness benefit. If not paid in respect of the same incapacity, compensation is regarded as income and war pension is ignored.

There is a waiting period of seven days for which unemployment or sickness benefit is not payable.

(a) Includes migrants in reception centres.

Widows' pensions

Rates and conditions. Widows' pensions are payable according to the following classes. The rates shown have been in operation since October 1966.

Class 'A'. A widow who has the custody, care and control of one or more children under the age of sixteen years—\$884 per annum (\$17 a week). This includes the standard rate pension of \$676 per annum (\$13 a week) and a mother's allowance of \$208 per annum (\$4 a week). In addition, a flat rate allowance of \$78 per annum (\$1.50 a week) for one child and, subject to the means test, extra pension of \$78 per annum (\$1.50 a week) for each other child under sixteen years are payable. Payment may be made for a child over sixteen years until he reaches twenty-one years, if he is wholly or substantially dependent on the widow and is receiving full-time education at a school, college, or university.

Class 'B'. A widow who has no children under sixteen years of age or eligible full-time student children in her custody, care and control, and who is not less than fifty years of age or who, after having attained the age of forty-five years, ceased to receive a Class 'A' widows' pension because she no longer had the custody, care and control of a child—\$611 per annum (\$11.75 a week).

Class 'C'. A widow who is under fifty years of age and has no children under the age of sixteen years, or eligible full-time student children, in her custody, care and control, but is in necessitous circumstances within the twenty-six weeks after the death of her husband—\$11.75 a week for not more than twenty-six weeks after the death of her husband. If the widow is pregnant this period may be extended until the child's birth. She may then become eligible for a Class 'A' widow's pension.

Widow pensioners may receive supplementary assistance of up to \$104 per annum (\$2 a week), subject to a means test, if they pay rent or pay for board and lodging or for lodging. From October 1958 to October 1965 the rate was \$1 a week and was payable to widows, otherwise qualified, who were considered to be entirely dependent on the pension.

For classes 'A' and 'B' the term 'widow' includes a wife who has been deserted by her husband without just cause for a period of at least six months, a divorcee, a woman whose husband has been imprisoned for at least six months, and a woman whose husband is in a mental hospital. Certain dependent females also may qualify for 'A', 'B' or 'C' Class pensions.

The residence qualification is five years' continuous residence in Australia immediately prior to the date of lodgment of the claim, but this period may be reduced to one year if the widow and her husband were living permanently in Australia when he died. Certain absences are ignored.

A widow's pension is not payable to a woman receiving an age or invalid pension, a sheltered employment allowance, a tuberculosis allowance, or a war widow's pension, or to a deserted wife or divorcee who has not taken reasonable action to obtain maintenance from her husband or former husband.

Means test. Widows' pensions are subject to a means test on income and property. The pension payable depends on the claimant's means as assessed. These consist of her annual rate of income together with a property component equal to \$2 for every complete \$20 by which the value of her property is in excess of a stipulated sum. In the case of a Class 'B' widow, \$400 of property is exempt.

A Class 'A' widow has a basic exemption of \$2,000 when the value of her property exceeds \$4,500, but no property component is calculated where she has property of no more than \$4,500 in value. A Class 'A' pension is not payable where a widow has property valued at \$16,040 or more; no Class 'B' pension is payable where property is \$11,720 or more. In each case the maximum rate of pension is reduced by the amount by which the widow's *means as assessed* exceed \$520. There is no specific means test for the Class 'C' pension, which is paid only where it is evident that a widow has insufficient means of support. The types of income and property disregarded for means test purposes are the same as for age and invalid pensions. Supplementary assistance is reduced by the amount by which *means as assessed* exceed \$52.

Reciprocal social services agreements with other countries

New Zealand. An agreement between the Governments of Australia and New Zealand for reciprocity in social services came into operation on 3 September 1943 and was amended from 1 July 1949. The reciprocal arrangements cover age and invalid pensions, widows' pensions, child endowment, and unemployment and sickness benefits, and apply to both permanent and temporary changes of residence. Residence in one country may be treated as residence in the other country in relation to entitlement to benefits in which a residential qualification applies. Persons from one country taking up a permanent residence in the other country become eligible for any of the specified benefits of the new country under the same conditions (with one or two exceptions) as apply to citizens of that country. Persons in receipt of any of the specified benefits in one country may continue to receive those benefits while temporarily absent in the other country.

Britain. A reciprocal agreement on social services between Britain and Australia came into operation on 7 January 1954. Amendments became effective from 1 April 1958 and 1 October 1962. Under the current agreement residence in one country may be treated as residence in the other country as the basis for entitlement to benefits in which a residential qualification applies. Australians going to Britain for permanent residence are treated in Britain as if they had been insured under the National Insurance Scheme while in Australia, so that they can qualify for various National Insurance benefits. There is also provision for the safeguard of social service rights for persons going from one country to the other for temporary residence.

Commonwealth assistance to aged persons homes and sheltered workshops and for accommodation for disabled persons employed in sheltered workshops

The Aged Persons Homes Act 1954-1967. This Act is designed to encourage the provision of homes in which aged persons may reside in conditions approaching normal domestic life.

To be eligible for assistance under the Act an organisation must be:

- (a) carried on otherwise than for the purposes of profit or gain to the individual members; and
- (b) a religious organisation, an organisation the principal objects or purposes of which are charitable or benevolent, an organisation of former members of the defence forces established in every State or a State branch of such an organisation, an organisation approved by the Governor-General for the purposes of the Act, or a local governing body.

An organisation conducted or controlled by, or by persons appointed by, the Government of the Commonwealth or of a State is not eligible for assistance under the Act.

The Director-General of Social Services may make a grant of money to an organisation as assistance towards meeting the cost of the construction or purchase of a home, including land, to be used permanently for the accommodation of aged persons. The grant is made on a basis of \$2 for each \$1 raised by the organisation (\$1 for each \$1 from 1954 to 1957), not counting money which the organisation receives from a governmental body (other than a local governing body) or borrowed. Before a grant is made the Director-General must be satisfied that the sum of the money expended and the money at present available for expenditure by the organisation towards the capital cost of the home, together with the amount of the grant, will be not less than the capital cost of the home.

The following table gives information regarding grants approved during 1966-67. The amounts granted include new grants approved in 1966-67 together with adjustments made during the year in respect of grants originally approved in earlier years.

The amounts granted in each year include new grants approved in that year together with adjustments made during the year in respect of grants originally approved in earlier years. In Year Books prior to No. 53, 1967, these subsequent adjustments were included in the amount shown for the respective year in which the original grant was approved.

AGED PERSONS HOMES: GRANTS APPROVED, AMOUNTS GRANTED, AND BEDS PROVIDED AUSTRALIA 1962-63 TO 1966-67

<i>Year</i>	<i>Grants approved</i>	<i>Amounts granted</i>	<i>Beds provided</i>
	No.	\$'000	No
1962-63 . . .	154	8,566	2,939
1963-64 . . .	134	7,281	2,466
1964-65 . . .	151	6,680	2,083
1965-66 .. .	149	9,576	2,807
1966-67 . . .	158	11,095	3,227

Since the commencement of the Act in December 1954, 1,488 grants amounting to \$69,499,000 have been approved, and accommodation has been provided for 26,444 aged persons.

The Disabled Persons Accommodation Act 1963. This Act came into operation on 25 November 1963 but was repealed from 30 June 1967, when its provisions were incorporated in the *Sheltered Employment Assistance Act 1967* (see below).

Three grants under this Act amounting to \$252,036 were approved during 1966-67 in respect of projects in New South Wales and the Australian Capital Territory. The total grants approved to 30 June 1967 amounted to \$372,118.

The Sheltered Employment (Assistance) Act 1967. This Act, which came into operation on 30 June 1967, provides for subsidies of \$2 for \$1 to eligible organisations towards the capital cost of sheltered workshops, the equipment for them, and accommodation for disabled people employed or likely to be employed in sheltered workshops. The Act covers the erection of buildings and the purchase of existing buildings. In both cases the cost of land is included in the capital cost as is the cost of any necessary conversion of an existing building. The subsidy may also be paid towards the rental, for up to three years, where rented premises are used to provide sheltered employment. Organisations eligible for grants under the Act are the same as those specified under the Aged Persons Homes Act. A substantial number of the people employed in the sheltered workshop must be medically qualified for an invalid pension, or be likely to become so qualified if not provided with sheltered employment, and must receive payment for their work before the organisation can qualify for a subsidy.

Telephone rental concessions

Effective from 1 October 1964 an amendment to the Telephone Regulations of the Post and Telegraph Act provides that a telephone service for qualified age, invalid and widow pensioners and blind people is available at an annual rental equal to two-thirds of the amount otherwise payable. The Department of Social Services re-imburses the Postmaster-General's Department for the cost of the scheme including administrative costs. Expenditure during 1966-67 was \$1,455,410, plus administrative costs amounting to \$42,742.

Selected non-government organisations

National Safety Council of Australia

The National Safety Council of Australia was founded in Victoria in 1927. In 1959 it was re-organised, and new Articles of Association were adopted in 1961, placing it on a more truly federal basis and reflecting the expanded character of the Council in the forty years since its formation. The objects of the Council are to devise and encourage the adoption of safety measures of all kinds, to promote discussion of all matters relating to safety measures, to conduct an educational campaign among the people of Australia to stimulate the adoption and observance of safety measures, and to consider, initiate and support improvements in the laws of the Commonwealth of Australia, the States and local governing bodies, calculated to prevent accidents.

The Council is now registered in Canberra, with Divisions established in all States. It is managed by a Federal Council responsible for those objectives which are of a national character. Each State Division controls its own affairs which are of State or local character.

Life saving

There are two life saving organisations in Australia, the Royal Life Saving Society—Australia and the Surf Life Saving Association of Australia. The objects of these organisations are the prevention of death from drowning and other forms of asphyxiation; the education of the general public in methods of life saving and resuscitation of the apparently drowned or asphyxiated; technical education in water safety; the encouragement of swimming and life saving in schools and other organisations; the encouragement of all aspects of swimming and aquatics which would assist in saving lives; and the initiation of research within the field of water safety and life saving.

The Royal Life Saving Society operates at lakes, rivers, and bay and harbour beaches, and gives instruction to school pupils and members of other bodies throughout Australia except on surf beaches.

The Surf Life Saving Association of Australia controls all life saving activities on the ocean beaches throughout Australia. In all, over 230 clubs are affiliated, comprising a membership of over 25,000. Volunteer patrols operate every week-end, and in recent years over 5,000 rescues have been recorded during each surfing season. The total number of recorded rescues during the past sixty years is 156,030.

Royal Humane Society

The Royal Humane Society of Australasia has as its main object the granting of awards to all who with bravery, skill and perserverance risk their own lives in saving or attempting to save those of their fellow creatures. The classes of awards are (a) Gold Medal, (b) Silver Medal, (c) Bronze Medal, and (d) Certificate of Merit. The Clarke Medal is awarded for the outstanding case of the year, and the Rupert Wilks Trophy is awarded for the most outstanding bravery by a child under thirteen years of age.

The Order of St John

The Priory in Australia of the Most Venerable Order of the Hospital of St John of Jerusalem is the governing body of the various activities of the Order, which comprises the St John Ambulance Association, the St John Ambulance Brigade and the Hospitallers' Clubs in all States and Commonwealth Territories.

Members of the St John Ambulance Association teach first aid, home nursing, hygiene, and child welfare, and members of the St John Ambulance Brigade provide first aid at public functions. The Hospitallers' Clubs in each State undertake the collection of funds for the St John Ophthalmic Hospital in Jerusalem and other duties which tend to bring together all persons interested in the work of the Order. The Order of St John maintains ambulance transport services in some States, acts as an auxiliary to such services in other States, and provides technical reserves for the medical services of the Crown.

CHAPTER 14

PUBLIC HEALTH

STATE GOVERNMENT ACTIVITIES

(Includes activities of the Commonwealth Government in the Northern Territory and the Australian Capital Territory)

Public health legislation and administration

For details of the administration of health services in each State, the Northern Territory, and the Australian Capital Territory, see pages 543–550 of Year Book No. 53. The following paragraphs refer briefly to administrative changes in 1967.

In *New South Wales* the Bureau of Maternal and Child Health has developed its services. It now has established pre-natal clinics (for expectant mothers living long distances from obstetric hospitals), baby health centres (where mothers are instructed in the care and management of babies), well baby clinics and paediatric referral clinics (for the routine medical examination and assessment of infants and pre-school children), and an advisory medical service for children attending day nurseries and pre-school kindergartens. Free urine tests for the detection of inborn errors of metabolism are carried out on babies aged six weeks and over.

In *South Australia* the former Poliomyelitis Branch of the Department of Public Health is now known as the Epidemiology Branch.

In *Tasmania* the *Division of Psychiatric Services*, formerly of the Department of Health Services, has been abolished, and its work has been taken over by the newly established and independent Mental Health Services Commission created under the *Mental Health Services Act* 1967. The new Act placed all employees of the Division of Psychiatric Services under the Commission as the employing authority and provided for their transfer from the Public Service. The Commission controls the major psychiatric rehabilitation hospitals and provides regional clinical psychiatric facilities. Some services operate at the general hospitals, while others, such as a child psychiatric unit and alcoholic rehabilitation service, are established separately. Day hospital facilities are available in Hobart, Launceston, and Wynyard.

The Canberra Community Hospital in the *Australian Capital Territory* is now administered, subject to the direction of the Minister for Health, by a management board of five members, three of whom are appointed by the Minister for Health, and two are elected by the Australian Capital Territory Advisory Council from the Council's members.

Supervision and care of infant life

Because the health of mothers and infants depends largely on pre-natal attention as well as after-care, government, local government and private organisations provide instruction and treatment for mothers before and after confinement. The health and well-being of mother and child are looked after by infant welfare centres, baby clinics, crèches, etc.

In all States, Acts have been passed with the object of supervising the conditions of infant life and reducing the rate of mortality. (Information regarding infant mortality will be found in Chapter 8, Vital Statistics—see pages 202–7.) Departments control the boarding out of the wards of the State to suitable persons. Wherever possible, the child is boarded out to its mother or to a near female relative. Stringent conditions regulate the adoption, nursing and maintenance of children placed in foster-homes by private persons, while special attention is devoted to the welfare of ex-nuptial children.

Under the provisions of the *Social Services Act* 1947–1967 maternity allowances are paid to provide financial assistance towards the expenses associated with the birth of children. A sum of \$30 is payable to the mother in respect of each confinement at which a living or viable child is born if the mother has no other children under sixteen years of age. Where there are one or two other

children under sixteen, the amount payable is \$32, and where there are three or more other children under sixteen, the amount payable is \$35. Where more than one child is born at a birth the amount of the allowance is increased by \$10 in respect of each additional child. More detailed information concerning maternity allowances is given in Chapter 13, Welfare Services.

Nursing activities

Several State Governments maintain institutions which provide treatment for mothers and children and, in addition, subsidies are granted to various associations engaged in welfare work.

Infant welfare centres. The following table gives particulars of the activities of infant welfare centres for the year 1967. The figures relate to all centres, whether permanently staffed or on a temporary or part-time basis. Centres may be located at accommodation specially provided for this purpose, or at halls, schools, etc.

INFANT WELFARE CENTRES: STATES AND TERRITORIES, 1967

	N.S.W.	Vic.	Qld (a)	S.A. (a)	W.A.	Tas.	N.T. (a)	A.C.T. (a)	Aust.
Number of centres	434	691	273	279	71	107	17	30	1,902
Attendances at centres	1,041,047	1,432,815	457,787	274,499	240,513	143,686	21,210	45,264	3,656,821
Visits by nurses to homes	n.a.	185,397	30,512	36,945	26,400	88,074	6,323	5,080	n.a.

(a) Year ended 30 June 1967.

Mobile units are used as centres in some States. The numbers of these in 1967 included in the above table were as follows: Victoria, 5; Queensland, 2; South Australia, 2; Western Australia, 4; and Tasmania, 12.

In the last thirty-five years the number of attendances at the infant welfare centres has increased almost four-fold. The numbers of attendances at five-year intervals since 1930 were as follows: 1930, 919,893; 1935, 1,355,306; 1940, 2,035,299; 1945, 2,927,764; 1950, 3,049,375; 1955, 3,099,233; 1960, 3,482,383; and 1965, 3,598,781.

Bush Nursing Associations. Treatment for mothers and children is also provided by the Bush Nursing Associations. The numbers of centres maintained by the Associations in 1967 were: New South Wales, 18; Victoria, 58; Queensland, 5; South Australia, 33; Western Australia, 18; and Tasmania, 23.

Medical and dental inspection of school children

Medical and dental inspection of school children is carried out in all States, in the Northern Territory and in the Australian Capital Territory. In some States travelling clinics have been established to deal with dental defects.

New South Wales

School medical and dental services in New South Wales are under the control of the State Department of Public Health. The staff of the Child Health and Special Services sections of the Bureau of Maternal and Child Health, which conduct the school medical services and provide diagnostic, evaluation and supervisory services for atypical children, included in January 1968, 74 medical officers, 5 full-time and 13 part-time psychiatrists, 9 part-time ear, nose and throat surgeons, an ophthalmologist, 23 clinical psychologists, 79 nurses, 19 social workers, and 23 speech therapists.

The aim of the school medical services is to examine all school children in the State in order to discover any departure from normal health, physical or mental, and to notify the parent or guardian of any need for further investigation or treatment. Annual visits are made to government schools, and also to private schools which have applied for this service, in the metropolitan, Newcastle, and Wollongong areas, and in some of the larger country towns. Children are fully examined at kindergarten or on entry into primary school. Review examinations, with particular emphasis on vision and hearing, are conducted on pupils in fourth grade in primary schools and second and fourth forms in secondary schools, and on others who appear to need additional examinations. Excluding 109,308 review examinations, medical officers of this service examined 110,945 children in 1967. In other country areas there is a scheme for school children to be examined by local medical practitioners under the supervision of local municipal and shire councils.

The Department conducts 9 child health centres (8 in the metropolis and 1 at Newcastle), 12 child guidance clinics (11 in the metropolis and 1 at Newcastle), 10 hearing clinics (9 in the metropolis and 1 at Newcastle) and 14 speech therapy clinics, 9 of which are established at child health centres. Children in need of treatment other than child guidance or speech therapy are referred to a medical practitioner or to the out-patient department of a public hospital.

The school dental service has a staff of 32 dental officers, 30 dental assistants, and 5 dental nurses. The service is provided by 7 dental clinics established in the grounds of 3 metropolitan and 4 country public schools, 18 mobile clinics in country and outer metropolitan areas, and 3 dental teams with the Royal Flying Doctor Service (based at Broken Hill). In 1967, 91,428 school children were examined by the school dental service, and 20,234 of these were treated, and 32,809 notified of dental defects.

Victoria

The School Medical Service is a division of the Maternal and Child Welfare Branch of the Department of Health. It has a full time staff of 40 doctors, 44 nurses and 21 administrative or office staff. As well, it has a part time staff of 3 medical officers, 3 nurses and the following consultants: 3 paediatricians, 2 psychiatrists and an ophthalmologist.

The present aim of the service is to examine fully all primary school children in their second year at school and to test their vision again in grade 4, and in form 2 of secondary schools. Children may also be examined at other times on the suggestion of teachers or parents, who suspect that ill health is interfering with school progress. Any disabilities found in children are brought to the notice of their parents who are advised to consult their family doctor for further advice or treatment. School nurses under medical direction visit homes and schools to follow up cases so referred. In co-operation with the Education Department and the Mental Health Authority, children with defects of vision and hearing and those who are mentally backward are assessed for special educational help.

School medical officers and nurses in all their activities seek to improve community and child health through health education to parents, teachers, teachers in training, and school children. Special programmes are conducted in teachers colleges where, through education and counselling, school medical officers seek to induce positive attitudes to health and healthy living, and to foster the ability of the teacher in training to impart this to children.

The School Medical Service advises the Education Department on medical problems and undertakes all medical assessments in connection with the teaching service, including medical assessment for temporary and permanent appointments, resumption of duty after sick leave, confinement leave, and medical eligibility of teachers for superannuation benefits.

The School Dental Service has an establishment of 43 dental officers and provides dental attention for children in the metropolitan area at 3 dental centres, and for a number of country districts by means of 15 mobile units, including 6 twin-surgery units. It also provides dental services for children's institutions in and around Melbourne and certain provincial centres. The service is now providing dental attention for some 80,000 primary school children.

Queensland

During 1966-67 medical officers and nurses examined 108,998 school children; 4,997 children had disabilities of which parents were notified and advised to seek attention. In western Queensland local doctors act as part-time ophthalmic surgeons. Advice is given on school sanitation, communicable diseases in schools and health education.

During 1967 school dentists gave treatment to 10,489 school children who resided in areas beyond easy reach of hospital dental clinics. The treatment was carried out at 4 rail dental clinics and with portable equipment at schools. In addition, school children are treated at hospital dental clinics in the larger towns.

South Australia

State schools within a radius of 60 miles from Adelaide and at 5 large country centres are visited annually, and the children are medically examined while in grades 1, 4, and 7 in the primary schools and in their second and fourth years in secondary schools. Efforts are made to visit the remaining country schools every 3 years, when all the children are examined. Students who wish to become teachers are examined on appointment as teaching scholars while still attending secondary schools and again immediately prior to entering a Teachers' College and finally when they leave the College to take up teaching. Courses of lectures in health education are given to all College students.

During 1967, 40,312 children were examined by medical officers in 129 country and 153 metropolitan schools. Of these, 4,813 required treatment for defective vision, 2,689 for defective hearing, and 9,988 for dental disorders. Dentists using mobile vans examined 3,785 school children in country

areas where a private dental service was not readily available; children offered treatment in 1967 numbered 3,886, including some who were examined in the previous year; 3,547 accepted and were treated free of charge. There were 2,914 children examined at the Deafness Guidance Clinic during 1967. Of the 1,423 new patients, 699 were referred to doctors or hospitals for treatment. Educational work was assisted by talks to mothers' clubs and interviews with parents by doctors and dentists, and by home visits and interviews by nurses.

Western Australia

The School Medical Service of the State Public Health Department employs 7 full-time medical officers. Details of this service during 1967 compared with 1966 figures, shown in parentheses, were as follows: number of children examined 56,088 (56,877) (metropolitan, 37,180 (41,388), country, 18,908 (15,489)). The 417 (376) schools visited comprised metropolitan, 262 (281), of which 200 (205) were government and 62 (76) were non-government schools, and country, 155 (95) of which 124 (76) were government and 31 (19) were non-government schools.

During 1967 the 12 (15 in 1966) full-time dentists employed by the School Dental Service visited 5 (4) metropolitan schools, 74 (87) country schools and 21 (27) orphanages and Aboriginal missions. The number of children examined was 10,208 (9,247). With the consent of the parents, 6,357 (5,256) children were treated. Eight dental vans were in operation.

Tasmania

During 1967, 3 full-time and 9 part-time medical officers examined school children in government and non-government schools. In addition 2 regional medical officers of health also examined school children. Twenty-three full-time and 6 part-time sisters visited homes and schools. Of the 32,386 children examined by medical officers, 7,502 were found to have defects.

The School Dental Health Service, available free to all school children, aims to examine and treat every child each six months. In 1966-67 fixed surgeries were in use or under construction in 19 districts and in clinics at Hobart and Launceston. Fifteen mobile caravans were also in use. An orthodontic service based in Hobart, using fixed and mobile clinics, supplements the therapeutic dental service. During the year ended 30 June 1967 operative dental treatment was given to 31,987 patients.

In 1966 a school of dental nursing was established in Hobart. Ten students were enrolled in 1966 and have now almost completed their training. A further 10 commenced training in 1967. The school treats 40 patients a day in its training surgeries. It is expected that approximately 30 nurses will work with dentists in the School Dental Health Service; a dental nursing certificate, or its equivalent, is required before a nurse can be appointed.

Northern Territory

The Schools Medical Officer makes routine physical examinations of all children attending pre-school centres and schools, 2,201 children being examined during 1966-67. The only children not so examined by him are those at the special Aboriginal schools, who are examined during Aboriginal health surveys. A special dental service for school and pre-school children is available in Darwin and Alice Springs. During 1966-67, 2,272 dental services were carried out at these two centres. School doctors and dentists travel throughout the Territory to carry out diagnosis and treatment.

Australian Capital Territory

The A.C.T. Health Services Branch of the Commonwealth Department of Health is responsible for health aspects of child welfare in the Australian Capital Territory. These include the School Medical Service carried out by 3 medical officers and 3 trained nurses, and the School Dental Service, staffed by 15 dentists, together with surgery and clinical assistants.

A Child Guidance Clinic assists children with psychiatric disorders. During 1967, 339 new cases were referred to it by private doctors, the School Medical Service, social workers, and the Australian Capital Territory Education Clinic. The Child Guidance Clinic is staffed by 3 part-time psychiatrists, a full-time psychologist, a social worker and a speech therapist.

Medical examinations are carried out at all public and private schools within the territory. The total number of school children examined during the year 1966-67 was 6,832. Examinations of children attending pre-school centres were made according to the time available, 183 pre-school children being examined.

Defects during the year were: 326 eyesight, 71 ear, nose and throat, 210 cases of hearing loss, 107 speech, and 268 miscellaneous. Triple antigen injections, totalling 10,311 in 1966-67, were given at regular sessions held throughout the year, and 2,223 anti-poliomyelitis injections were given at baby health clinics. In the same period, 25,056 doses of Sabin oral poliomyelitis vaccine were administered.

The School Dental Service provides free treatment for children attending infants and primary schools, both public and private, in the Australian Capital Territory. During 1967, 13,277 children were examined in Canberra and Jervis Bay schools. This service is also carrying out a detailed clinical assessment of the effects of fluoridation of Canberra's water supply.

Disposal of dead by cremation

The first crematorium in Australia was opened in South Australia in 1903. At 31 December 1967 there were twenty-two crematoria in Australia, situated as follows: New South Wales, 8; Victoria, 4; Queensland, 4; South Australia, 1; Western Australia, 2; Tasmania, 2; Australian Capital Territory, 1. There is no crematorium in the Northern Territory. The following table shows the number of cremations and total deaths in each State and Territory for each of the years 1963 to 1967.

CREMATIONS AND TOTAL DEATHS: STATES AND TERRITORIES, 1963 TO 1967

State or Territory	1963		1964		1965		1966		1967	
	Crema- tions	Total deaths	Crema- tions	Total deaths	Crema- tions	Total deaths	Crema- tions	Total deaths	Crema- tions	Total deaths (a)
New South Wales	15,664	37,226	16,321	39,487	16,651	38,949	17,733	40,546	17,486	39,613
Victoria	8,782	26,920	9,832	27,548	9,857	28,031	10,362	28,673	10,173	28,373
Queensland	4,432	13,275	4,745	14,523	4,905	14,114	5,097	14,861	5,156	14,736

Australia	32,868	94,894	35,271	100,594	35,973	99,715	38,485	103,929	38,538	102,703

(a) Includes Aborigines. (b) Commenced operation 8 July 1966. Cremations include 32 in respect of deaths registered in the States as follows: N.S.W., 31; S.A., 1. (c) Includes 68 in respect of deaths registered in N.S.W.

COMMONWEALTH GOVERNMENT ACTIVITIES

Commonwealth services outlined in the following pages are those provided under the National Health Service or otherwise administered by the Commonwealth Department of Health. For particulars of services administered by the Commonwealth Department of Social Services and of Commonwealth expenditure from the National Welfare Fund on all forms of social and health services see Chapter 13, Welfare Services.

At the time of federation the only health function given to the Commonwealth Government under the Constitution was the power to make laws with respect to quarantine. Following on the passing of the *Quarantine Act* 1908 a branch of the Department of Trade and Customs, under the control of a Director of Quarantine, was created on 1 July 1909. The Commonwealth Department of Health was formed in 1921 by the extension and development of the quarantine service, the Director of Quarantine becoming the Director-General of Health. An amendment to the Constitution in 1946 gave the Commonwealth power to make laws with respect to pharmaceutical, hospital and sickness benefits, and medical and dental services. In addition, the Commonwealth Government has used its powers under Section 96 of the Constitution to make grants to the States for health purposes.

National health benefits

Pharmaceutical benefits

A comprehensive range of drugs and medicines is made available to all persons receiving treatment from a medical practitioner registered in Australia. The benefits are supplied by an approved pharmacist upon presentation of a prescription, or by an approved hospital to patients receiving treatment at the hospital. The patient pays the first 50 cents of the cost of a prescription dispensed by an approved pharmacist, but pensioners who are eligible for treatment under the Pensioner Medical Service (see page 489) receive all benefits without any contribution being made. Special arrangements exist to cover prescriptions dispensed at locations outside the normal conditions of supply, e.g. in remote areas. Total Commonwealth expenditure on pharmaceutical benefits in the year 1966-67 was \$101,280,799.

Hospital and nursing home benefits

The *National Health Act* 1953-1967 provides for the payment of Commonwealth hospital and nursing home benefits. Commonwealth benefits are payable only in respect of treatment received in approved hospitals and approved nursing homes. For the purposes of the *National Health Act*, premises which provide medical treatment, care and accommodation for sick persons are approved either as hospitals or as nursing homes, depending mainly on their clinical standards and the type of patients accommodated. Usually premises are approved as hospitals if their general standards are substantially equivalent to those of a public hospital and if hospital treatment, as defined in the *National Health Act*, is provided. Premises are approved as nursing homes where their general standards are similar to those prevailing in benevolent homes, convalescent homes, rest homes, or homes for the aged, and if nursing home treatment as defined in the *Act* is provided.

Patients in approved hospitals. A basic principle of the provision of benefits for patients in approved hospitals is the Commonwealth support of voluntary insurance against the costs involved. Insured patients in approved hospitals receive a Commonwealth hospital benefit of \$2 a day which is paid through the contributors' registered hospital benefits organisations. Total payments by contributors to organisations range from 15 cents to 65 cents a week for single persons and from 30 cents to \$1.30 a week for families. Examples of contributions and benefits payable, including Commonwealth benefits of \$2 a day, are:

Weekly contributions		Total benefits	
Single person	Family	Daily	Weekly
\$	\$	\$	\$
0.15	0.30	5.60	39.20
0.25	0.50	8.00	56.00
0.30	0.60	9.20	64.40
0.40	0.80	11.60	81.20
0.55	1.10	15.20	106.40
0.65	1.30	17.60	123.20

A contribution of 80 cents a week covers a family for benefits in excess of the public ward charge in any State. Contributions are allowable deductions for income tax purposes.

During the waiting period of two months after joining an organisation the Commonwealth benefit is payable at the rate of 80 cents a day, unless the organisation pays fund benefits, in which case Commonwealth benefit is payable at the higher rate of \$2 a day. While a member is in arrears with his contributions and fund benefits are not payable, the Commonwealth benefit is payable at the rate of 80 cents a day unless the member was in receipt of unemployment or sickness benefits under the *Social Services Act* 1947-1967, when the normal rate of \$2 a day is payable.

Contributors who would have been excluded from fund benefits because of organisations' rules covering pre-existing ailments, chronic illnesses, or maximum benefits are assured of hospital fund benefits by the provisions of the special account plan. Since 1 January 1967 the hospital fund benefit usually payable in such cases is \$3 a day and is paid either from a special account, guaranteed by the Commonwealth, or from the ordinary account of the organisation. If the payments from the special account exceed contributions credited to the account, the amount of deficit is reimbursed by the Commonwealth.

A person who joins a registered hospital benefits organisation within eight weeks of being discharged from an approved nursing home is entitled to immediate Commonwealth benefit of \$2 a day and to fund benefits without having to serve a waiting period. If a qualified patient in an approved hospital is not insured (i.e. not a member of a hospital benefits organisation), a Commonwealth benefit of 80 cents a day is deducted from his account by the hospital. The Commonwealth subsequently reimburses the hospital. Under arrangements made under the *National Health Act* public hospitals generally provide free public ward treatment to pensioners enrolled in the Pensioner Medical Service who are classified as public ward patients. The Commonwealth pays the hospitals a benefit of \$5 a day for each pensioner patient.

Patients in approved nursing homes. The Commonwealth nursing home benefit of \$2 a day is payable in respect of all qualified patients in approved nursing homes, whether the patients are insured or not. This benefit is deducted from the patient's account and subsequently paid by the Commonwealth to the nursing home. If no charge is made by the nursing home, the Commonwealth nursing home benefit of \$2 a day is still payable to the nursing home in respect of qualified patients.

There is no need for patients in approved nursing homes to be insured with a registered hospital benefits organisation, fund benefits being generally not payable. However, the *National Health Act* provides that where an insured special account patient is treated in an approved nursing home for

an illness or injury requiring hospital treatment of the kind provided in an approved hospital and is given treatment equivalent to that which he would have received in an approved hospital, approval may be given to the payment of special account fund benefits.

Australians overseas. Australian residents who receive hospital treatment in recognised hospitals in overseas countries, while temporarily absent from Australia, are eligible to receive the Commonwealth and fund benefits to which they are entitled.

Expenditure on hospital and nursing home benefits. The following table shows the amount of Commonwealth hospital and nursing home benefits paid during 1966-67. This does not include expenditure on mental hospitals (*see* page 488).

**COMMONWEALTH HOSPITAL AND NURSING HOME BENEFITS PAID
STATES AND TERRITORIES, 1966-67**

(\$'000)

Type of patient	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Uninsured patients (80c)	654	424	894	111	148	46	86	12	2,376
Insured patients (\$2)(a)	8,322	4,921	2,225	1,939	1,685	649	(b)	(b)	19,740
Pensioner patients (\$3.60)	6,976	4,164	3,506	1,582	1,787	572	35	109	18,731
Nursing home patients (\$2)	9,531	4,884	3,548(c)	2,009	2,033	761	(c)	..	22,767
Total	25,483	14,393	10,173	5,641	5,653	2,029	121	121	63,614

(a) Excludes payments of \$3,784,000 towards special accounts deficits in 1966-67. (b) Members who live in the Northern Territory or the Australian Capital Territory, or who are abroad, receive their Commonwealth benefit and fund benefit through membership of an organisation registered in one of the States, and payments to them are included in the respective States. (c) South Australia includes Northern Territory.

Registered hospital benefits organisations. The following table shows the number of registered hospital benefits organisations, the membership at 30 June 1967, and fund benefits paid during 1966-67. As many persons contribute on behalf of both themselves and their dependants, the total number of persons covered by hospital benefit schemes is considerably higher than the number of members.

HOSPITAL BENEFITS: ORGANISATIONS AND FUND BENEFITS, STATES, 1966-67

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.(a)
Registered organisations at 30 June 1967(b)	32	43	3	13	9	9	109

Fund benefits paid(c)	\$'000 31,799	17,870	4,579	6,835	5,638	2,290	69,011

(a) Members who live in the Northern Territory or the Australian Capital Territory, or who are abroad, receive their Commonwealth benefit and fund benefit through membership of an organisation registered in one of the States, and payments to them are included in the respective States. (b) Excludes interstate branches. (c) Includes \$2,632,000 ancillary benefits.

Mental hospitals

In 1946, when Commonwealth hospital benefits were introduced for patients in public hospitals, no provision was made for patients in mental hospitals. To help meet the cost of maintaining patients in mental hospitals the Commonwealth Parliament passed the *Mental Institutions Benefits Act* 1948. This Act ratified agreements with the States, whereby it was provided that the States would cease making charges for the maintenance of mental patients and that the Commonwealth would pay the States a benefit based on the amount which had been collected by the States from the relatives of patients in mental hospitals by way of charges for maintenance.

These agreements operated for five years and terminated in the latter half of 1954. The amount contributed by the Commonwealth during the operation of the agreements was approximately one shilling (10 cents) a day for each patient. When the agreements terminated, Dr Alan Stoller, of the Victorian Mental Hygiene Authority, was commissioned to undertake a survey of mental health facilities and needs in Australia. His report, issued in May 1955, stated that serious overcrowding existed in the majority of mental hospitals in Australia. The provision of more beds was the most urgent need, but other accommodation and rehabilitation facilities were also required.

Following the report, the Commonwealth made an offer of \$20 million to the States as part of a capital expenditure programme of \$60 million on increasing and improving patient accommodation. All States accepted the Commonwealth offer. By 1963 more than three-quarters of the total grant under the *States Grants (Mental Institutions) Act 1955* had been distributed and the Commonwealth Government announced in November 1963 its intention of continuing assistance to the States towards capital costs on a similar basis, but without overall limit, for a period of three years. In May 1964 the *States Grants (Mental Health Institutions) Act 1964* was passed to implement that policy. This Act provided for the continuation of Commonwealth aid of \$1 for every \$2 of capital expenditure by the States on mental health facilities for the three-year period ending 30 June 1967. With the passing of the *States Grants (Mental Health Institutions) Act 1967*, this date has been extended to 30 June 1970. The following table sets out the amounts which have been paid to the State Governments by the Commonwealth Government from 1962-63 to 1966-67.

EXPENDITURE ON MENTAL HOSPITALS BY THE COMMONWEALTH
GOVERNMENT: STATES, 1962-63 TO 1966-67
(\$'000)

Year	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust.
1962-63	1,295	..	75	104	116	..	1,590
1963-64	982	..	108	173	332	..	1,595
1964-65(a)	659	711	225	265	447	197	2,504
1965-66	1,717	1,567	146	242	338	529	4,539
1966-67	2,217	1,192	288	193	260	823	4,973
Total, 1962-63 to 1966-67	6,870	3,470	842	977	1,493	1,549	15,201

(a) Expenditure for 1964-65 includes final grants, totalling \$406,454, made under the 1955 Act as follows: New South Wales, \$274,938; Queensland, \$21,210; and South Australia, \$110,306.

There are no mental hospitals in the Northern Territory or in the Australian Capital Territory.

Medical benefits

A medical benefits scheme has operated since July 1953, being authorised firstly by the National Health (Medical Benefits) Regulations and then by the *National Health Act 1953-1967*. The basic principle of the scheme is Commonwealth support of voluntary insurance towards meeting the costs of medical attention. The benefits provided by the Commonwealth are paid either on a fee-for-service basis in respect of the items set out in the schedule to the National Health Act or in the form of a subsidy not exceeding half of the payments made to doctors by registered organisations under contract arrangements.

Commonwealth fee-for-service benefits are paid in accordance with the list of benefits set out in the schedule to the *National Health Act 1953-1967*. The present schedule came into force on 1 March 1968.

In order to qualify for a Commonwealth benefit a person is required to be insured with a registered medical benefit organisation. The organisation pays the Commonwealth benefit to the contributor, usually at the time it pays its own benefit. Reimbursement of the Commonwealth benefit is subsequently made to the organisation by the Commonwealth.

Commonwealth benefits ranging from 80 cents for ordinary general practitioner visits to \$60 for major operations are payable to members of registered medical benefit organisations. The fund benefit payable varies according to the weekly contributions paid by the member and the particular medical service. Examples of the range of benefits are as follows.

Type of service	Combined Commonwealth and fund benefits (a) \$
Certain major operations	180.00
Appendix operation	45.00
Midwifery	33.75
Tonsils—	
Under 12 years	15.75
12 years and over	22.50
Surgery consultation—general practitioner	from \$1.60 to \$2.00

(a) The total benefit varies according to the weekly contribution rate. The most common contribution rates now range from 20 cents to 30 cents a week for single persons and from 40 cents to 60 cents a week for families.

Provision is made for the payment of fund benefit from special account for claims lodged by contributors who have reached maximum benefits or who make claims in respect of pre-existing ailments. The medical special accounts are operated along the same principles as the hospital special accounts (see pages 486-7) and the special account fund benefit paid usually matches the Commonwealth benefit for the particular service.

Australians overseas. Australian residents temporarily absent from Australia who receive medical attention by registered medical practitioners in the country they are visiting are entitled, if insured, to the Commonwealth benefit and the medical fund benefit to which they would be entitled if the service were rendered in Australia.

Expenditure on medical benefits. The following table shows the number of registered medical benefit organisations, their membership, the number of medical services rendered to members and their dependants, and payments of Commonwealth benefits and medical fund benefits to members of registered organisations. As many persons contribute on behalf of both themselves and their dependants, the total number of persons covered by medical benefit schemes is considerably higher than the number of contributors. At 30 June 1967 the estimated number of persons covered by contributory medical schemes was 8,846,000.

MEDICAL BENEFITS: SUMMARY, STATES, 1966-67

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	Aust. (a)

(a) Members who live in the Northern Territory or the Australian Capital Territory, or who are abroad, receive their Commonwealth benefit and fund benefit through membership of an organisation registered in one of the States. (b) Excludes interstate branches. (c) At end of period. (d) Excludes payments of \$956,000 towards special accounts deficits. (e) Includes \$2,042,000 ancillary fund benefits.

Pensioner Medical Service

The Pensioner Medical Service, which commenced on 21 February 1951, was introduced under the authority of the National Health (Medical Services to Pensioners) Regulations made under the provisions of the *National Health Services Act 1948-1949*. The service has been continued under the provisions of the *National Health Act 1953-1967*. The service provided to eligible pensioners consists of medicine provided free of charge and a medical service of a general practitioner nature such as that ordinarily rendered by a general medical practitioner in his surgery or at the patient's home. Specialist services are not provided. Patients may be charged a small fee by doctors for travelling and attendance outside normal surgery or visiting hours. Doctors participating in the scheme are paid on a fee-for-service basis by the Commonwealth Government.

Persons eligible to receive the benefits of the Pensioner Medical Service are those receiving a full or part age, invalid or widow's pension under the *Social Services Act 1947-1967*; a full or part service pension under the *Repatriation Act 1920-1967*; a sheltered employment allowance under the *Social Service Act 1947-1967*; or an allowance under the *Tuberculosis Act 1948*; and their dependants.

At 30 June 1967 the total number of pensioners and dependants enrolled in the Pensioner Medical Service was 1,043,337, while the number of doctors participating in the scheme at that date was 6,175. During 1966-67 doctors in the scheme provided 8,187,264 services—visits and surgery consultations—for persons enrolled in the scheme. For these services they were paid \$14,351,156. The average number of services rendered by doctors to each enrolled person was 8.0.

Anti-tuberculosis campaign

The main provisions of the *Tuberculosis Act 1948* are as follows: (a) Section 5 authorises the Commonwealth to enter into an arrangement with the States for a national campaign against tuberculosis; (b) Section 6 empowers the Commonwealth to take over or provide specified facilities for the diagnosis, treatment, and control of tuberculosis; (c) Section 8 provides for the setting up of an advisory council to advise the Commonwealth Minister for Health on matters relating to the national campaign; and (d) Section 9 authorises the Commonwealth to pay allowances to sufferers from tuberculosis and to their dependants.

Under an arrangement with the Commonwealth Government, each State conducts a campaign against tuberculosis. The Commonwealth Government reimburses the State for all approved capital expenditure in relation to tuberculosis, and for net maintenance expenditure to the extent that it exceeds net maintenance expenditure for the year 1947-48. Thus the States carry out the physical

or field work of the national campaign and the Commonwealth acts in an advisory, co-ordinating, and financial capacity. For this reason the Commonwealth has not found it necessary to make much use of its powers under Section 6 of the Tuberculosis Act. An advisory council, known as the National Tuberculosis Advisory Council, has been set up. There are twelve members, the chairman being the Commonwealth Director-General of Health.

To help reduce the spread of infection the Commonwealth Government pays allowances to persons suffering from infectious tuberculosis, so that they may give up work and undergo treatment. These allowances have been in operation since 13 July 1950. The rates now payable are: married sufferer with a dependent wife, \$26.75 a week; sufferer without a spouse but with a dependent child or children, \$17.00 a week; dependent child or children under sixteen years of age and full-time student children from sixteen to twenty-one years, \$1.50 a week for each dependent child (additional to child endowment); sufferer without dependants, \$16.25 a week (reducible to \$13.00 a week if a person is maintained free of charge in an institution).

There is a means test on income but not on property. The allowance is reduced by the amount by which a person's income from sources other than his allowance exceeds, in the case of a person receiving the married person rate, \$17.00 a week; a person who is without a spouse or dependent female and is entitled to a 'single person' rate, \$10.00 a week; and a person with a spouse but who is not entitled to a 'married person' rate, \$8.50 a week.

New tuberculosis cases notified. The following table gives particulars of the number of new cases of tuberculosis notified in Australia for 1967.

TUBERCULOSIS: NEW CASES NOTIFIED(a), STATES AND TERRITORIES, 1967

State or Territory	Age group (years)					Total
	0-14	15-34	35-54	55 and over	Not stated

1966-67	1,193	11,247	499	12,939

(a) Includes administrative costs.

Anti-poliomyelitis campaign

Information concerning the initial production by the Commonwealth Government in 1955 of anti-poliomyelitis vaccine in Australia, and of the testing procedures which were carried out, is contained in Year Book No. 49 and earlier issues. Information regarding the campaign against poliomyelitis, using Salk vaccine, is contained in Year Book No. 53 (page 560) and in earlier issues.

One million doses of each of the three types of monovalent Sabin vaccine were imported by the Commonwealth in October 1962 for use in a possible emergency. The decision whether to use the Sabin vaccine rests with the individual State health authorities.

Following the success of a pilot scheme in 1964, the Tasmanian Government conducted a full scale Sabin vaccination programme in the latter months of 1965. In this campaign the oral vaccine was made available to all, irrespective of previous vaccination status.

Following a recommendation of the National Health and Medical Research Council in May 1966, all States except Victoria indicated that Sabin oral vaccination campaigns would be commenced during 1967. The Commonwealth commenced Sabin vaccination in the Australian Capital Territory in September 1966 and implemented a campaign in the Northern Territory during the cooler months of 1967.

Sabin vaccine is taken by mouth. Three doses of vaccine are given at intervals of at least eight weeks.

New cases of poliomyelitis notified. The numbers of new cases of poliomyelitis notified, and confirmed by the Poliomyelitis Sub-committee of the National Health and Medical Research Council, are shown for each State for each year from 1963 to 1967 in the following table.

POLIOMYELITIS: NEW CASES NOTIFIED, STATES AND TERRITORIES, 1963 TO 1967

<i>Year</i>	<i>N.S.W.</i>	<i>Vic.</i>	<i>Qld</i>	<i>S.A.</i>	<i>W.A.</i>	<i>Tas.</i>	<i>N.T.</i>	<i>A.C.T.</i>	<i>Aust.</i>
1963	3	19	1	8	5	36

1967	..	1	1

Free milk for school children scheme

The *States Grants (Milk for School Children) Act* 1950 was passed with the object of improving the diet of school children by the addition of a small quantity of milk each day. All children under the age of thirteen years attending government or non-government primary schools, including nursery schools, kindergartens, crèches and missions for Aborigines, are eligible to receive free milk. The cost of the milk and half the capital or incidental costs, including administrative expenses of the scheme, are reimbursed by the Commonwealth to the States. All States now participate in the scheme. At 30 June 1967 approximately 1,774,000 children were entitled to receive free milk under this scheme. Expenditure by the Commonwealth Government during the years 1962-63 to 1966-67 was as follows.

**COMMONWEALTH EXPENDITURE ON MILK FOR SCHOOL CHILDREN SCHEME
STATES AND TERRITORIES, 1962-63 TO 1966-67**
(\$'000)

Year	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
1962-63	2,636	1,901	1,146	714	586	384	53	60	7,480
1963-64	2,663	2,186	1,120	708	618	399	50	55	7,799
1964-65	2,881	2,069	1,215	760	640	389	72	60	8,085
1965-66	2,916	2,386	1,259	801	622	408	56	74	8,521
1966-67	3,073	2,394	1,400	860	701	451	77	93	9,049

The figures in the foregoing table differ slightly from those in the table shown in Chapter 13, Welfare Services, as they include capital and administrative costs. Figures in the latter table represent only expenditure which is a charge on the National Welfare Fund, i.e. the cost of the milk.

Commonwealth organisations concerned with health

This section summarises the activities of various Commonwealth organisations concerned with public health. More detailed information on the function and operations of these organisations is given in Year Book No. 53, pages 561-6.

The National Health and Medical Research Council was established in 1936 to replace the National Health Council. Its main functions are to advise Commonwealth and State Governments on all matters of public health legislation and administration, on matters concerning the health of the public and on medical research. It also advises the Commonwealth and State Governments on the merits of reputed cures or methods of treatment which are from time to time brought forward for recognition. The Council advises the Commonwealth Minister for Health on the application of expenditure from the Medical Research Endowment Fund which was established under the *Medical Research Endowment Act* 1937 to provide assistance to Departments of the Commonwealth or of a State engaged in medical research; to universities for the purpose of medical research; to institutions and persons engaged in medical research; and in the training of persons in medical research. The Commonwealth makes an annual appropriation for the Fund, the 1966-67 appropriation being \$959,000 and that for 1967-68, \$1,231,000.

The National Biological Standards Laboratory was set up under the *Therapeutic Substances Act* 1953-1959 which empowers the Commonwealth to ensure that therapeutic substances used for the prevention, diagnosis, and treatment of disease in man and animals are safe, pure, and potent. The Commonwealth Director-General of Health is authorised under the Act to set up laboratories to test such substances. Of the 1,791 samples examined by the Laboratory during 1966-67, 421 failed to meet the required standards. In addition, 1,048 safety tests were performed, 19 were failed and 10 were deferred for further testing. Administrative costs for 1966-67 were \$475,982, and \$90,819 was expended on plant and equipment.

The Commonwealth Serum Laboratories are controlled by the Commonwealth Serum Laboratories Commission, which is a body corporate established under the *Commonwealth Serum Laboratories Act* 1961-1967. The main functions of the Commission are to produce and sell prescribed biological products used for therapeutic purposes and to ensure the supply of prescribed essential biological products in accordance with national health needs. These functions include research and development relating to prescribed biological products and allied fields, and the maintenance of potential production capacity for use in emergencies. The Commission is expected under the Act to generate sufficient revenue from the sale of its commercial products to finance its activities relating to prescribed biological products. Certain services, determined by the Minister for Health from time to time, are payable by the Commonwealth. Payments to the Commission for these services in respect of the year 1966-67, totalling \$1,198,842, were as follows: cost of processed blood products supplied throughout Australia free of charge for medical purposes, \$867,371; cost of research on products not prescribed in regulations, \$316,347; and for reserve stocks of biological products including vaccines, \$15,126.

Fifteen *Commonwealth Health Laboratories* have been established under the *National Health Act* 1953-1967, principally in country areas throughout Australia, to provide facilities for the investigations into public health and preventive medicine and to assist local medical practitioners in the investigation and diagnosis of disease. The laboratories are situated in the following towns:

Albury, Alice Springs, Bendigo, Cairns, Canberra, Darwin, Hobart, Kalgoorlie, Launceston, Lismore, Port Pirie, Rockhampton, Tamworth, Toowoomba, and Townsville. During 1966-67 these laboratories performed 3,338,842 examinations and tests (Nuffield points score system) in respect of 545,028 patients. Administrative costs were \$1,172,059 and expenditure on plant and equipment was \$121,718.

The *Commonwealth Acoustic Laboratories* were established under the *Acoustic Laboratories Act* 1948 to undertake scientific investigations into hearing and problems associated with noise as it affects individuals. The laboratories also provide assistance in the general aural rehabilitation of ex-service personnel and school and pre-school children. The provision and maintenance of hearing aids is available free of charge to persons under twenty-one years of age and, since 10 November 1967, this service has been extended to persons in receipt of a Social Service pension and their dependants for a nominal fee of \$10. The cost of these services is met from the National Welfare Fund. The laboratories' functions also include the provision and maintenance of hearing aids on behalf of the Repatriation and other Commonwealth Departments. During 1966-67 the number of new cases examined at the laboratories was 15,493, including 6,822 children, 4,361 repatriation cases, 920 members of the defence forces, and 1,942 civil aviation referrals; 3,773 Calaid hearing aids were fitted and 24,159 maintained. The cost of supply and maintenance of hearing aids to persons under twenty-one years of age was \$241,585. Administrative costs of the laboratories were \$390,927 and expenditure on plant and equipment \$84,607.

The *Commonwealth X-ray and Radium Laboratory* was originally established in 1929 as the Commonwealth Radium Laboratory, and has served from that time as the Commonwealth centre for radiological physics and as custodian of all Commonwealth-owned radium used for medical purposes. The laboratory's functions have expanded over the years to include the physical aspects of X-rays; the distribution of all radio-isotopes used in Australia for medical purposes; the maintenance of facilities for radio-chemical investigation; and the assay of radioactive substances in the Australian environment. The laboratory also provides assistance in matters relating to protection against ionising radiations and operates a film-badge service to monitor the radiation exposure of those who work with such radiation. In 1966-67 the laboratory's radon service issued 31,961 millicuries of radon in the form of implants, needles and tubes for use in Victoria, South Australia, Tasmania, and New Zealand. A further 19,031 millicuries were issued by the associated centres in Sydney and Brisbane. There were 2,401 deliveries of radio-isotopes, including 49 different isotopes procured for use in medicine and medical research. Of these, 226 deliveries (including 12 different isotopes) were obtained from the Australian Atomic Energy Commission. Of the 49 isotopes, 21 were for use in medical diagnosis or treatment as distinct from medical research. Free issues for medical diagnosis and therapy supplied for patients throughout Australia were 37,548, the cost of \$132,000 being met from the National Welfare Fund. Film badges, numbering 74,711, were processed, assessed, and reported on. During 1966-67 an arrangement was made whereby the laboratory supplies radon direct to New Zealand users, and it was decided to install a whole-body monitor for use in investigation on the radio activity of selected samples and patients. Administrative costs for 1966-67 were \$244,487 and \$70,125 was expended on plant and equipment.

The *School of Public Health and Tropical Medicine* was established in 1930 by the Commonwealth Government at the University of Sydney under an agreement with that University. It provides training for medical graduates and students in public health and tropical medicine in addition to research and consultative activities in these and allied fields. During 1966-67, 11 diplomas were awarded in Public Health and 5 in Tropical Medicine and Hygiene. Costs met by the Commonwealth during 1966-67 were \$464,491 for administration and \$32,333 for plant and equipment.

The *Institute of Child Health* is associated with the School of Public Health at the University of Sydney and with the Royal Alexandra Hospital for Children at Camperdown. Its activities include research into medical and social problems of childhood, undergraduate and post-graduate teaching at the University of Sydney and collaboration with other national and international organisations concerned with child health and disease. Costs of the Institute paid by the Commonwealth during 1966-67 were \$102,769 for administration and \$44,046 for plant and equipment.

The *Commonwealth Bureau of Dental Standards* operates under Section 9 of the *National Health Act* 1953-1967. It is part of the Commonwealth Department of Health and is concerned with research, standards and testing related to dental and allied materials and processes. Its functions include the provision of a consultative service and testing facilities for manufacturers and distributors of dental materials. The number of these products tested during 1966-67 was 214. Expenditure on plant and equipment was \$37,805.

The *Australian Institute of Anatomy* also is part of the Commonwealth Department of Health and a number of Health Department sections are located in the Institute building. The scientific research work of the Institute is mostly concentrated on problems of nutrition by field surveys of dietary status and laboratory investigation into the biochemistry of nutrition and metabolism.

During 1966-67 this work was mainly directed towards nutritional problems in the Territory of Papua and New Guinea. The Institute also contains a museum section which includes a display of anatomical specimens and models.

Control of infectious and contagious diseases

The provisions of the various Acts with regard to the compulsory notification of infectious diseases and the precautions to be taken against their spread are dealt with under the headings of quarantine and notifiable diseases.

Quarantine

The *Quarantine Act* 1908-1966 is administered by the Commonwealth Department of Health and has three sections of disease control, as follows: (i) human quarantine, which ensures that persons arriving from overseas are free of quarantinable disease; (ii) animal quarantine, which controls the importation of animals and animal products from overseas and the security of other animals present on vessels in Australian ports; and (iii) plant quarantine, which regulates the conditions of importation of all plants and plant products with the object of excluding plant diseases, insect pests and weeds.

In respect of interstate movements of animals and plants, the Act becomes operative only if the Governor-General considers that Commonwealth action is necessary for the protection of any State or States, and in general the administration of interstate movements of animals and plants is left in the hands of the States.

Human quarantine. All passengers and crews arriving in Australia from overseas, whether by air or sea, are subject to a medical inspection for the purpose of preventing the introduction of disease into Australia. At the major ports full-time quarantine officers carry out the work, but in the minor ports local doctors act as part-time quarantine officers. In each State, quarantine activities are controlled by the Commonwealth Director of Health, who is a senior medical officer of the Commonwealth Department of Health.

The main concern of the examining officers is to detect cases of the quarantinable diseases smallpox, cholera, yellow fever, plague, and typhus fever. These diseases are not endemic to Australia and it is of great importance to prevent their entry. Quarantine stations at the major ports and at Darwin and Townsville are kept ready for occupation at all times. In addition, persons arriving in Australia and suffering from infectious diseases such as chicken pox, mumps, scarlet fever, and measles are directed to appropriate care and placed in isolation where necessary.

Valid vaccination certificates are required of travellers to Australia as follows.

Cholera. All arrivals from locally infected areas and from India, Pakistan, Burma, Thailand, Vietnam, Philippines, Sabah, Sarawak, and Indonesia. No certificate is required in respect of children under one year of age.

Yellow fever. All arrivals from yellow fever endemic zones.

Smallpox. All arrivals from all countries except British Solomon Islands, Fiji, Nauru, New Zealand, Norfolk Island, Ocean Island, Territory of Papua and New Guinea, Gilbert and Ellice Islands, and Christmas (Indian Ocean), Cocos (Keeling), Heard, Kerguelen, Lord Howe, Macquarie, and Tonga Islands, provided travellers have not been outside these areas for at least fourteen days before arrival and that these areas are free from smallpox. Australia reserves the right, in respect of arrivals from other countries, to isolate any person who arrives by air without a smallpox vaccination certificate and refuses to be vaccinated. Children under one year of age are exempt. For passengers arriving in Australia by sea, exemption is granted to infants under twelve months of age and to persons who hold religious convictions against vaccination or who are suffering from a medical condition certified by a medical practitioner to contra-indicate smallpox vaccination.

All passengers, whether they arrive by sea or air, are required to give their intended place of residence in Australia, so that they may be traced if a case of disease occurs among the passengers on the aircraft or ship by which they travelled to Australia.

Isolation. Under the Quarantine Act, airline and shipping operators are responsible for the expenses of isolation of all travellers who disembark and (i) have come from a cholera infested area, or a cholera area specified above, within five days and do not possess a cholera vaccination certificate; or (ii) have come from an endemic zone within six days and do not possess a yellow fever vaccination certificate; or (iii) arrive by air without a smallpox vaccination certificate and refuse to be vaccinated on arrival.

The numbers of cases of infectious (non-quarantinable) diseases which were discovered among the passengers and crew of overseas vessels and aircraft calling at Australian ports during 1966-67 and during the preceding four years are shown in the following tables.

**HUMAN QUARANTINE: CASES OF INFECTIOUS
(NON-QUARANTINABLE) DISEASES ON OVERSEAS VESSELS AND
AIRCRAFT CALLING AT AUSTRALIAN PORTS, 1966-67**

<i>Disease</i>	<i>Number of overseas vessels and aircraft on which cases were found</i>	<i>Number of cases of infectious disease</i>	
		<i>Passengers</i>	<i>Crew</i>
Chicken pox	39	165	9
Dysentery	1	1	..
Infectious hepatitis	5	4	1
Measles	40	320	..
Mumps	26	30	2
Rubella	2	2	..
Scarlet fever	1	..	2
Tuberculosis	1	1	..
Venereal disease—			
Gonorrhoea	90	..	108
Syphilis	37	..	43
Other	4	..	7
Total (a)	246	523	172

(a) On some vessels there were cases of more than one disease.

**HUMAN QUARANTINE: OVERSEAS VESSELS AND AIRCRAFT ARRIVING IN AUSTRALIA
AND CASES OF INFECTIOUS (NON-QUARANTINABLE) DISEASES FOUND
1962-63 TO 1966-67**

<i>Year</i>	<i>Number of overseas vessels and aircraft cleared</i>		<i>Number of overseas vessels and aircraft on which cases were found</i>	<i>Number of cases of infectious disease</i>	
	<i>Ships</i>	<i>Aircraft</i>		<i>Passengers</i>	<i>Crew</i>
1962-63	2,943	2,423	91	438	35
1963-64	3,184	2,620	92	361	11
1964-65	3,359	2,936	107	333	19
1965-66	3,488	3,297	201	360	122
1966-67	4,040	3,918	246	523	172

Animal quarantine. Animal quarantine, authorised by the provisions of the *Quarantine Act 1908-1966*, aims at preventing the introduction or spread of animal diseases. It covers the importation of all animals, raw animal products and biological cultures associated with animal diseases, and goods associated with animals.

Of the domesticated animals, only horses, dogs, cats, and poultry are admitted from a limited number of countries depending on diseases being absent in the country of origin. All must be accompanied by health certificates which include prescribed tests. On arrival in Australia, they are subject to quarantine detention. Zoological specimens are imported into registered zoos, where they remain in permanent quarantine. Circuses are also registered if exotic species of animals are kept. In a similar manner, animals for scientific purposes are imported to approved laboratories. All these premises are kept under constant surveillance. Raw animal products such as hair, types of wool, skins, and hides are specially treated under quarantine control. Such items as raw meat, sausage casings and eggs, which cannot be sterilised, are admitted from very few countries. Other items, such as harness

fittings, fodder and ship's refuse, are treated to destroy any possible infection. Special attention is given to the importation of biological substances of animal origin. The Animal Quarantine Service is also responsible for the health certification of animals for export overseas in accordance with the requirements of the various countries.

The Division of Veterinary Hygiene was created in 1926 to deal with the administration of animal quarantine. The central administration is situated within the Health Department at Canberra, with a director, an assistant director and veterinary officers. The Principal Veterinary Officer of the Department of Agriculture in each State is appointed Chief Quarantine Officer (Animals) of that State, and members of his staff Quarantine Officers (Animals). These State officers carry out the quarantine policy formulated by the central administration. Quarantine accommodation is provided in permanent animal quarantine stations at each capital city.

The Division participates in world-wide international notifications of the more serious contagious diseases of animals and maintains a census of such diseases throughout the world. Information regarding animal diseases and parasites in Australia is also collected and disseminated by means of service publications. Consultation on technical matters is maintained with various scientific institutions, notably the Commonwealth Scientific and Industrial Research Organisation. In matters of policy and the quarantine control of imports there is a close liaison with the Department of Customs and Excise.

The Division collaborates with the General and Plant divisions of the quarantine service. Many diseases of animals are communicable to man, and for this reason animal and general quarantine administration are in some respects inseparable. Similarly the interests of animal and plant divisions overlap, many items such as insects, fodder and straw being the subject of combined control.

Plant quarantine. Since 1 July 1909 the importation into Australia of all plants or parts of plants, cuttings, seeds, and fruits, whether living or dead, has been subject to an increasingly stringent quarantine with the object of preventing the introduction of insect pests, plant diseases and weeds not yet established in this country. Under the *Quarantine Act* 1908-1966, quarantine inspectors are required to examine all plant material at the first port of entry and to release only material free from diseases and pests. Everyone entering Australia is required to declare if he or she has any plant material in luggage or personal effects. Heavy penalties are laid down for those found evading the regulations. All plant material entering as cargo must also be declared.

When the Commonwealth became responsible for all plant quarantine, the State Governments agreed to co-operate by providing and maintaining inspection facilities and personnel, for which they are reimbursed by the Commonwealth. In 1921 the administration of the regulations came under the newly-formed Department of Health, and in 1927 the Plant Quarantine Branch was created. It is controlled by a director who is responsible for policy and legislation and for co-ordinating the work of the State officers who carry out the detailed administration in their capacity as Commonwealth officers.

Any plant material found carrying diseases or pests, or suspected of doing so, may be ordered into quarantine for remedial treatment, or, if treatment is impracticable, may be destroyed. The cost of treatment is met by the importer. Regulations governing the different types of plants are based on the following broad principles. Importation of plants likely to be infected with plant diseases or pests, of noxious plants or fungi, and of poison plants is prohibited. Agricultural seed, not restricted under quarantine legislation, must conform to standards of purity and insect pest and disease freedom. Seed of commercial crops which could introduce diseases are prohibited imports except with special permission. All plant products not specifically restricted, such as timber, logs and crates, are subject to inspection upon arrival and treatment if necessary. Many commodities, including hops, cotton, peanuts in shell, potatoes, and certain crop seeds, may be imported only by approved importers under specified conditions. All nursery stock, including bulbs, must be grown in post-entry quarantine. Prior approval is necessary, and such material may be imported only by approved importers who are registered for this purpose. The number of plants which may be imported in any one year is limited. The importation of propagating material of commercial fruits, vines, and berries is permitted only after special prior approval and is subject to specific screening for virus by qualified authorities. Soil is a prohibited import, and any vehicles or goods contaminated with soil are required to be thoroughly cleaned, at the expense of the importer, before entry is permitted.

Notifiable diseases

Methods of prevention and control. Provision exists in the Health Acts of all States for the compulsory notification of certain infectious and other diseases and for the application of preventive measures. When any such disease occurs the local authority must be notified at once, and in some States notification must be made also to the Health Department.

As a rule, the local authorities are required to report from time to time to the Central Board of Health in each State on the health, cleanliness and general sanitary state of their several districts and on the appearance of certain diseases. Regulations provide for the disinfection and cleansing of premises and for the disinfection or destruction of bedding, clothing or other articles which have been exposed to infection. Regulations also provide that persons suspected to be suffering from, or to be carriers of, infectious disease must submit to clinical and laboratory examination. Persons suffering from certain diseases, for example, smallpox and leprosy, are detained in isolation.

Notifiable diseases and cases notified, 1967. The following table shows, by State and Territory, the number of cases notified in 1967 for those diseases notifiable in all States and Territories. In May 1965 the National Health and Medical Research Council at its Fifty-ninth Session proposed a basic list of diseases to be notifiable in each State and Territory, and this table is based upon that proposal. The table does not include all diseases which are notifiable in a State or Territory. Factors such as the following affect both the completeness of the figures and the comparability from State to State and from year to year: availability of medical and diagnostic services; varying degrees of attention to notification of diseases; and enforcement and follow-up of notifications by Health Departments.

NOTIFIABLE DISEASES(a): NUMBER OF CASES NOTIFIED
STATES AND TERRITORIES, 1967

Disease	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Anthrax	2	2
Brucellosis	11	34	11	3	2	61
Diphtheria	23	18	5	..	46
Gonorrhoea	4,231	1,832	1,410	399	795	212	478	31	9,388
Infectious hepatitis(b)	4,032	2,991	1,973	1,299	190	425	158	248	11,316
Leprosy	5	..	3	..	12	..	48	..	68
Leptospirosis	6	..	107	1	2	1	117
Paratyphoid fever	1	4	1	6
Poliomyelitis	1	1
Syphilis	610	95	143	21	43	8	30	5	955
Tetanus	7	10	11	1	29
Tuberculosis(c)	853	599	454	141	142	50	45	9	2,293
Typhoid	7	16	6	1	1	2	33
Typhus (all forms)	5	..	2	7

(a) No cases of cholera, plague, smallpox or yellow fever were notified.
(c) Queensland figure includes erythema nodosum and pleural effusion.

(b) Includes hepatitis, serum (homologous).

Tuberculosis and poliomyelitis. The number of new cases of tuberculosis notified in each State and Territory by age groups for the year 1967 is shown on page 490. Some data regarding deaths from tuberculosis are shown on page 212 of Chapter 8, Vital Statistics. Cases of poliomyelitis notified in each State and Territory for the years 1963 to 1967 are shown on page 491.

Infectious hepatitis. The following table shows the number of cases of infectious hepatitis notified in each State and Territory during the years 1963 to 1967.

INFECTIOUS HEPATITIS: CASES NOTIFIED, STATES AND TERRITORIES, 1963 TO 1967

State or Territory	1963	1964	1965	1966	1967
New South Wales	2,822	2,731	3,325	4,188	4,032
Victoria	3,840	2,697	1,987	2,137	2,991
Queensland(a)	1,433	1,163	556	843	1,973
South Australia	293	289	414	978	1,299
Western Australia	145	101	83	28	190
Tasmania	856	636	197	200	425
Northern Territory	104	57	128	78	158
Australian Capital Territory	20	12	51	125	248
Australia	9,513	7,686	6,741	8,577	11,316

(a) Includes hepatitis, serum (homologous).

Venereal diseases. The prevention and control of venereal diseases is the responsibility of State Health Departments. The necessary powers for the purpose are provided either by a special Venereal Diseases Act or by a special section of the Health Act. Venereal diseases were made notifiable in South Australia in November 1965 and the diseases are now notifiable in all States and Territories. While the provisions of the legislation differ from State to State, the Acts usually make it obligatory upon the patient to report for and continue under treatment until certified as cured. Treatment of venereal disease must be by a registered medical practitioner. Facilities for treatment of venereal disease free of charge may be arranged at subsidised hospitals or at special clinics. Penalties may be imposed on a patient who fails to continue under treatment. Clauses are inserted in the Acts which aim at preventing the marriage of any infected person, or the employment of an infected person in the manufacture or distribution of foodstuffs.

Commonwealth grants to organisations associated with public health

In addition to providing the services mentioned on pages 485-98, the Commonwealth Government gives financial assistance to certain organisations concerned with public health. Examples of organisations included in this category are given in the following text. More detailed information on their operations and functions is given in Year Book 53, pages 570-3.

The Commonwealth National Fitness Council operates under the *National Health Act 1941-1967*. Its main function is to advise the Minister for Health concerning the promotion of national fitness. The Act also provides for the establishment of a trust account, known as the National Fitness Fund, to assist in financing the movement. During 1966-67 the Commonwealth's contribution to the Fund was \$366,000, of which \$66,000 was for assistance towards capital expenditure. Expenditure from the Fund during 1966-67 was \$319,471, distributed as follows: State National Fitness Councils, \$225,684; State Education Departments, \$34,000; State Universities \$24,800; Australian Recreation Leadership Course, \$4,000; capital expenditure on national fitness projects, \$16,770; grants to Australian Capital Territory organisation, \$4,899; and administration, \$9,318.

The Royal Flying Doctor Service is a non-profit organisation providing medical services in the remote areas of Australia. It is distinct from, but co-ordinates with, the Aerial Medical Service operated by the Commonwealth Department of Health from Darwin and Alice Springs in the Northern Territory. The Royal Flying Doctor Service is financed mostly from donations and government contributions. During 1965-66 the Commonwealth Government contributed \$274,280, of which \$124,280 was for capital expenditure. The appropriation for 1966-67 was \$236,350, including \$86,350 for capital items. In the 2,590 flights during 1965-66 the Service flew 959,166 miles and transported 2,287 patients. In the same period its medical staff gave 18,510 consultations over the air and 319,856 telegrams were handled.

The Red Cross Blood Transfusion Service is conducted by the Australian Red Cross Society throughout Australia. The operating costs of the service in the States are met by the State Governments paying 60 per cent; the Commonwealth, 30 per cent; and the Society, 10 per cent. In the Northern Territory and Australian Capital Territory the Commonwealth pays 90 per cent and the Society 10 per cent. Commonwealth expenditure for each State and Territory during 1966-67 was as follows: New South Wales, \$230,756; Victoria, \$276,089; Queensland, \$214,990; South Australia, \$123,133; Western Australia, \$92,429; Tasmania, \$23,541; Northern Territory, \$2,321; and the Australian Capital Territory, \$10,566; making a total of \$973,825 compared with \$489,795 for 1965-66. The increase was due mainly to a variation in the method of re-imbursing the States for the Commonwealth proportion of the costs.

Lady Gowrie Child Centres were established in 1940 by the Commonwealth Government in each of the six State capitals. The functions of these centres include specialised demonstration and research relating to problems of physical growth and nutrition, physical and mental development, and also to test and demonstrate methods for the care and instruction of the young child. The centres are administered by local committees under supervision of the Australia Pre-school Association and are financed mainly by Commonwealth grants. The Commonwealth contribution for 1966-67 was \$120,000 for the Centres and \$14,800 for the Australian Pre-school Association.

The Home Nursing Subsidy Scheme, under the *Home Nursing Subsidy Act 1956*, provides for a Commonwealth subsidy to assist the States in the expansion of home nursing activities. Organisations eligible for the subsidy are those which are non-profit making, employ registered nurses, and receive assistance from a State Government, local government body or other authority established by or under State legislation. At 30 June 1967 there were 60 home nursing services in the States employing approximately 600 trained nurses. Commonwealth assistance to the States during 1966-67 was \$664,361. Home nursing services in the Northern Territory and Australian Capital Territory are provided by the Commonwealth Department of Health.

The *National Heart Foundation of Australia* is a national organisation established to promote research in cardiovascular disease, to rehabilitate heart sufferers and to foster the dissemination of information about heart diseases. Formed in 1960, as a result of a public appeal yielding \$5 million to which the Commonwealth Government contributed \$20,000, the Foundation has its headquarters in Canberra. From its inception to the end of 1967 the Foundation has allocated almost \$3 million for grants-in-aid towards research in university departments, hospitals and research institutes; research fellowships tenable in Australia and overseas; and overseas travel grants. Most of the annual expenditure of about \$700,000 is devoted to supporting research in cardiovascular disease.

The *World Health Organization* (WHO) is a specialised agency of the United Nations acting as a directing and co-ordinating authority on international health work. It also provides health services and facilities to people of trust territories and other groups if requested by the United Nations. Australia was represented at the Twentieth World Health Assembly held at Geneva in May 1967, and at the Eighteenth Western Pacific Regional Committee Meeting at Manila in September 1967. The Commonwealth contribution to WHO during 1966-67 was \$630,000, which included a grant of \$12,000 to the Commonwealth Serum Laboratories for WHO influenza research.

INSTITUTIONS

Institutions referred to under this heading are classified into the following groups: (i) public hospitals and nursing homes; (ii) mental hospitals; (iii) private hospitals and nursing homes; (iv) repatriation hospitals; (v) isolation hospitals.

Public hospitals and nursing homes

The statistics shown for public hospitals and nursing homes refer to the following institutions: *New South Wales*—all institutions which are under the authority of the New South Wales Hospital Commission, and which receive a government subsidy during the year, and the six State hospitals and nursing homes under the control of the Department of Public Health; *Victoria*—all subsidised hospitals and subsidised hospitals for the aged under the authority of the Victorian Hospitals and Charities Commission, two tuberculosis sanatoria, and the Peter McCallum Cancer Clinic; *Queensland*—all hospitals controlled by the State Government or by the State hospital boards, including some institutions for out-patients or first-aid treatment only and some other hospitals which provide public accommodation in the form of public wards or designated public beds; *South Australia*—all hospitals controlled or maintained by, or which receive a regular annual grant or subsidy for maintenance purposes from, the South Australian Government, and hospitals controlled and maintained by local government or semi-governmental authorities; *Western Australia*—all departmental and board hospitals, excluding the Perth Dental hospital, one subsidised leased hospital, and the Australian Inland Mission hospitals; *Tasmania*—all public hospitals designated as such by the Director-General of Health Services, together with three homes for the aged, two chest hospitals, and the Lady Clark convalescent home; *Northern Territory*—departmental hospitals at Darwin, Alice Springs, Tennant Creek, and Katherine; *Australian Capital Territory*—the Canberra Community Hospital.

PUBLIC HOSPITALS AND NURSING HOMES: NUMBER, STAFF AND ACCOMMODATION, STATES AND TERRITORIES, 1965-66

	N.S.W. (a)	Vic.	Qld	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Number of hospitals and nursing homes	269	156	143	68	97	27	4	1	765
Medical staff—

(a) Excludes all unsubsidised hospitals under the Public Hospitals Act. (b) Includes honorary and visiting medical officers. (c) Qualified and student nurses, assistant nurse trainees, nursing aides, and nursing aide trainees.

In-patients treated

The following table gives particulars of in-patients treated. The figures shown refer to cases, that is to say, a person who is admitted to hospital or nursing home twice during a year is counted twice. Newborn babies are excluded unless they remain in hospital or nursing home after their mothers' discharge.

**PUBLIC HOSPITALS AND NURSING HOMES: IN-PATIENTS TREATED

Males	9,850	5,330	3,876	1,566	1,753	956	197	151	23,679
Females	11,449	7,519	5,052	1,948	2,124	1,080	178	235	29,585
Persons	21,299	12,849	8,928	3,514	3,877	2,036	375	386	53,264
Average daily number resident	20,063	12,187	8,337	3,295	3,588	1,958	392	367	50,187

(a) Excludes all unsubsidised hospitals under the Public Hospitals Act.

In addition to those admitted to the hospitals and nursing homes, there are large numbers of out-patients treated. During 1965-66 there were 1,591,587 out-patients treated in New South Wales, 834,451 in Victoria, 776,315 in Queensland, 153,882 in South Australia, 196,000 (estimated) in Western Australia, 106,629 in Tasmania, 130,556 in the Northern Territory, and 21,082 in the Australian Capital Territory, making an estimated total for Australia of 3,810,000. The figures quoted refer to cases, as distinct from persons and attendances.

Revenue and expenditure

Details of the revenue and expenditure for the year 1965-66 are shown in the next table. The revenue includes the Commonwealth Hospital Benefits Scheme. For some States expenditure on capital items out of individual hospitals' own funds are not included in the figures shown. Comparison between the States should therefore be made with caution.

In previous Year Books, Commonwealth hospital benefits, which were paid direct to public hospitals and nursing homes in either full or part payment of fees incurred by pensioners and other uninsured patients, were shown for some States as a separate revenue item or included under 'Government aid'. In the following table this revenue has been treated on the same basis as Commonwealth hospital benefits paid for insured patients and included in the amounts shown for fees. Details of Commonwealth expenditure on each of the different categories of hospital benefits are shown on page 487.

Summary for Australia

A summary, for the years 1962-63 to 1965-66, of the number of public hospitals and nursing homes in Australia, medical and nursing staffs, beds, admissions, in-patients treated, out-patients, deaths, average daily number resident, revenue, and expenditure is given in the following table. This table has been revised to include particulars of the six State Hospitals and Homes in New South Wales and the hospitals for the aged in Victoria.

PUBLIC HOSPITALS AND NURSING HOMES: AUSTRALIA, 1962-63 TO 1965-66

	<i>1962-63</i>	<i>1963-64</i>	<i>1964-65</i>	<i>1965-66</i>
Hospitals and nursing homes	758	760	765	765
Medical staff(a)	11,191	11,459	12,090	12,774
Nursing staff(b)	41,555	43,740	45,212	47,640
Beds and cots	67,369	69,213	70,027	71,210
Admissions	1,275,588	1,325,800	1,363,890	1,395,179
Total in-patient (cases) treated	1,321,982	1,374,329	1,416,198	1,447,151
Deaths	39,120	42,461	42,603	43,345
Average daily number resident	47,250	49,041	49,724	50,187
Out-patients (cases)(c)	3,112,000	3,349,000	3,575,000	3,810,000
Revenue	\$'000 257,746	281,982	310,644	341,701
Expenditure	\$'000 262,686	284,751	309,897	340,960

(a) Honorary, visiting and salaried. (b) Qualified and student nurses, assistant nurses, assistant nurse trainees, nursing aides, and nursing trainees. (c) Partly estimated.

Mental health services

The presentation of meaningful statistics of mental health services has become increasingly difficult because of changes in recent years in the institutions and services for the care of mental patients. The emphasis has shifted from institutions for care of patients certified insane to a range of mental health services provided for in-patients and out-patients at psychiatric hospitals, admission and reception centres, day hospitals, out-patient clinics, training centres, homes for the mentally retarded and geriatric patients, psychiatric units in general hospitals, and the like.

To enable valid comparisons to be made of mental health statistics in each State the mental health authorities of all States have proposed standard statistical definitions. The statistical recording systems of a number of States are currently being reviewed for this purpose. Meanwhile certain limited information is available which is shown in the following paragraphs. Since a common measure has not yet been achieved, the figures for individual States should not be added to form Australian totals.

In-patient institutions

The following table shows the number of major in-patient institutions in each State in 1966, the accommodation they provide for patients, and their staff. In-patient care for voluntary patients is also provided at many general public and a number of private hospitals. There are also psychiatric units attached to gaols, juvenile corrective centres and similar institutions. Only the following institutions are included in this table: *New South Wales*—the fourteen State psychiatric centres (a psychiatric hospital and associated admission centre being regarded as one psychiatric centre) and the two authorised private psychiatric centres (several other institutions provide in-patient care for voluntary patients only, but are excluded from the scope of the statistics); *Victoria*—the four psychiatric hospitals, ten mental hospitals, four informal hospitals, and nine intellectual deficiency training centres and schools; *Queensland*—four mental hospitals and one epileptic home (alcoholic clinics and inebriates' homes are excluded); *South Australia*—two mental hospitals and two receiving houses; *Western Australia*—the four mental hospitals, one psychiatric hospital, and the mental deficiency home for children; and *Tasmania*—the mental hospital and the psychiatric hospital.

(c) Includes attendants.

(d) Full-time staff only.

There are no in-patient institutions for mental patients in the Northern Territory or the Australian Capital Territory.

State government expenditure on mental health services

The following figures show particulars of expenditure by States for the year 1965–66. Maintenance expenditure represents expenditure on wages and salaries, upkeep and repair of buildings and grounds, and other maintenance. The figure for New South Wales relates to the 14 State psychiatric centres and the Master in Protective Jurisdiction of the Supreme Court. Capital expenditure is expenditure under the *State Grants (Mental Health Institutions) Act 1964–1967* only. For details of Commonwealth financial assistance to the States for mental health services, see pages 487–8.

Patients

New South Wales. A new system of collecting particulars of admissions to and discharges from the sixteen psychiatric centres in the State was introduced from 1 July 1964 following a census of the in-patients at these centres in June 1964. Under this system, the sixteen psychiatric centres in the State are regarded as constituting a single Psychiatric Service, and 'admissions' and 'discharges' are identified in relation to the Service as a whole (and not to a particular centre). Patients are classified into three broad groups—voluntary, formally recommended, or forensic—according to the status under which they are admitted to the care (or remain under the care) of a psychiatric centre. The following table shows for the sixteen psychiatric centres the number of patients on the in-patient register and the admissions and discharges of in-patients in 1965–66.

PATIENTS ON THE IN-PATIENT REGISTER OF PSYCHIATRIC CENTRES
NEW SOUTH WALES, 1965-66

	<i>Males</i>	<i>Females</i>	<i>Persons</i>
Patients on the register at 1 July 1965	7,031	6,262	13,293

(a) Excludes transfers.

MENTAL PATIENTS: TASMANIA, 1965-66

	Males	Females	Persons
Patients on register at 1 July 1965	472	446	918
Admissions and re-admissions	599	551	1,150
Discharges	603	495	1,098
Deaths	32	33	65
Patients on the register at 30 June 1966	436	469	905

Private hospitals and nursing homes

In addition to the other hospitals and nursing homes referred to in previous sections, there are private hospitals and nursing homes in each State. The figures shown in the following table refer to those private hospitals and nursing homes which have been approved for the payment of hospital benefits under the Commonwealth *National Health Act* 1953-1966. Statistical information on patients, staff and finance of these institutions is not available on a uniform Australia-wide basis.

PRIVATE HOSPITALS AND NURSING HOMES: STATES, 1962 TO 1966

State	30 June—				
	1962	1963	1964	1965	1966
NUMBER OF PRIVATE HOSPITALS AND NURSING HOMES					
New South Wales	474	507	527	531	527
Victoria	260	272	288	306	309
Queensland	116	130	136	146	149
South Australia	156	173	165	179	180

Tasmania	34	39	41	42	45
Australia	1,125	1,206	1,242	1,295	1,305

PRIVATE HOSPITALS AND NURSING HOMES: STATES, 1962 TO 1966—*continued*

State	30 June—				
	1962	1963	1964	1965	1966
NUMBER OF BEDS FOR PATIENTS					
New South Wales	10,563	11,482	12,647	13,626	14,503
Victoria	5,556	5,896	6,371	6,797	7,117
Queensland	2,943	3,350	3,818	4,362	4,416
South Australia	3,440	3,755	3,983	4,280	4,419
Western Australia	2,381	2,549	2,627	2,846	2,898
Tasmania	763	870	925	982	1,033
Australia	25,646	27,902	30,371	32,893	34,386

There were no institutions of this nature in the Australian Capital Territory or the Northern Territory during 1965–66.

Repatriation hospitals

The medical care of eligible ex-servicemen and dependants of deceased ex-servicemen is a major function of the Commonwealth Repatriation Department (*see* the chapter Repatriation), which provides a comprehensive service.

In-patient treatment is provided at Repatriation General Hospitals in each capital city; in addition, there are auxilliary hospitals in all States except Tasmania. 'Anzac Hostels' are maintained in Queensland and Victoria for long-term patients. In-patient treatment may also be provided in country hospitals at the Department's expense in certain circumstances. Mental patients requiring custodial care are, by agreement with the State Governments, accommodated at the expense of the Department in mental hospitals administered by the State authorities.

The average daily number of patients resident in the six Repatriation General Hospitals and eight auxilliary hospitals during the year ended 30 June 1967 was 3,015. The number of medical, nursing and other staff employed at these institutions at 30 June 1967 was 6,153 and a further 541 were employed at Repatriation out-patient clinics and limb and appliance centres. Total expenditure on Repatriation institutions during 1966–67 was \$25,320,421 and \$30,576,677 on other medical services.

Hansenide hospitals

There are four isolation hospitals in Australia for the care and treatment of persons suffering from Hansen's disease (leprosy). The numbers of isolation patients at these hospitals on 31 December 1967 were: Little Bay (New South Wales), 7; Fantome Island (North Queensland), 7; Derby (Western Australia), 170; and East Arm Settlement (Northern Territory), 13. In addition, there were 68 voluntary patients resident in the East Arm Settlement, mostly for the purpose of reconstructive surgery. With the exception of the Little Bay lazaret, nursing services are provided mostly by sisters of religious orders under supervision of Government medical officers.

Special wards for the isolation and treatment of leprosy patients are also provided at other centres. The location of these wards and the numbers of isolation patients resident at 31 December 1967, were: Fairfield (Victoria), 4; and Princess Alexandria Hospital (Queensland), 6.

Of the total 207 cases in isolation, 169 were full-blood Aborigines, 19 were others of Aboriginal blood, 2 were Pacific Islanders, 2 were Asians, and 15 were Europeans.

CHAPTER 15

EDUCATION, CULTURAL ACTIVITIES, AND RESEARCH

For the most recent statistics available on subjects dealt with in this chapter reference should be made to the series of mimeographed bulletins *Social Statistics* issued by this Bureau. The *Quarterly Summary of Australian Statistics* contains summarised information on these subjects, and financial aspects are dealt with in the annual bulletins *Commonwealth Finance and State, Territory and Local Government Authorities' Finance and Government Securities*. The Annual Reports of the respective State Education Departments provide detailed statistical and other information concerning particular States.

EDUCATION

An account of the development of the Australian school system up to 1929 may be found in Year Books Nos 1, 2, 17 and 22. In Year Book No. 40 a review of changes which occurred up to 1951 and of the practices then current was presented from material furnished by the then Commonwealth Office of Education (now part of the Commonwealth Department of Education and Science). The Department has contributed much of the textual matter in the early part of this chapter.

Education in Australian schools

Administration and organisation

In Australia the provision of schools is mainly the responsibility of State Governments. During the nineteenth century all six Australian colonies had established systems of compulsory education, beginning with the *Education Act* 1872 in Victoria, and followed by similar Acts in Queensland (1875), South Australia (1875), New South Wales (1880), Tasmania (1893), and Western Australia (1893). These Acts, with subsequent amendments, constitute the legal basis of compulsory education in the Australian States to-day.

School attendance is compulsory throughout Australia between the ages of six and fifteen at least. The minimum leaving age is fifteen years in New South Wales, Victoria, Queensland, and South Australia, and sixteen years in Tasmania, while in Western Australia attendance is compulsory until the end of the year in which the child turns fifteen years. The Education Acts require that all children between the prescribed ages must attend either a government school or some other recognised educational institution. Children may be exempted from the requirement of compulsory attendance if they live too far from a school or suffer a physical disability. These children usually receive correspondence tuition.

The school year in Australia begins at the end of January or early in February; it ends in mid-December. The long vacation is taken over the summer months (December to February) and two short vacations divide the school year into three terms.

At government primary schools it is usual for both boys and girls to attend the same school; at the secondary level practices vary, but the trend is towards co-educational schools. Non-government secondary schools cater mainly for boys and girls separately.

Government school systems

Government schools, except in the Commonwealth Territories, are a responsibility of the six State Governments. Although the educational systems are not identical, they have many similar features. Responsibility for framing educational policy and having it put into effect rests with a Minister for Education, who is a member of the State Cabinet. The administrative authority in each State is an Education Department headed by a Director-General or Director of Education. Separate divisions of the Education Department in each State administer primary, secondary and technical education (in New South Wales there is a separate Department of Technical Education). Other divisions look after such matters as the recruitment and training of teachers, pupil guidance, research, and the education of atypical children. In New South Wales administration has been decentralised to a degree by the appointment of directors who are responsible for policy in the area which they control.

Tuition at government primary and secondary schools is free in all States. Parents are usually expected to bear the cost of text-books, uniforms and charges for such things as the use of sports materials. However, income tax concessions exist in respect of these expenditures for both government and non-government systems, and certain text-book costs are subsidised in the case of pupils attending government and non-government schools in some States.

Non-government schools systems

More than 80 per cent of the children at non-government primary and secondary schools attend Roman Catholic schools, which form a highly developed system. At the primary level these children normally attend mixed parish schools, but at the secondary level there are boys schools, approximately half taking boarders, and girls schools. Some of the small convent schools in country districts are co-educational up to the junior secondary level.

The majority of other non-government schools, sometimes known as 'private' or 'independent' schools, are conducted by, or are under the auspices of, various other religious denominations, particularly the Church of England, Presbyterian and Methodist Churches. A few non-government schools, including some of the foremost, are undenominational and conducted under the auspices of corporate bodies.

The methods adopted by the educational authorities to ensure an acceptable standard of education at non-government schools vary from State to State. In New South Wales, Victoria, Western Australia, and Tasmania these schools are regularly inspected. In Victoria and Tasmania, schools and teachers must be registered. Non-government schools in Queensland and also those in South Australia are not subject to inspection.

The principals of a number of the larger non-government schools have formed organisations with both State and Australia-wide coverage, namely the Headmasters' Conference of the Independent Schools of Australia and the Association of Headmistresses of Independent Schools of Australia.

Schools and courses

Primary education in government schools. Though school attendance is not compulsory until the age of six, most Australian children begin school when they are five, attending infants schools or infants classes attached to a primary school. In some States the first year in the infants department is known as 'kindergarten'. The emphasis in infants classes is on the development of skills in language and numbers. Creative expression through drawing, dancing, handiwork, dramatisation, and painting and similar activities is encouraged.

Primary schools are normally provided when and where there is sufficient population to justify them. Irrespective of the size or the location of the school, standards of tuition do not vary appreciably, because teachers within a State follow similar courses of training and transfer freely between metropolitan and country areas. The Education Departments prescribe syllabuses of instruction, which are drawn up with the assistance of expert committees. The primary syllabuses have an emphasis on basic subjects like reading, writing, arithmetic and social studies, but the teacher has some freedom to modify courses to suit local circumstances and the varying abilities of his students.

Children attend primary schools in their own districts, usually within walking distance of their homes, on five days each week. The school day is broken up into three or four sessions by a lunch break and by a morning and sometimes an afternoon recess. The total period of instruction is four and a half to five hours daily with individual subject lessons lasting twenty to thirty minutes. Periods are set aside for physical education and sport. One teacher generally has charge of a class and teaches it all the subjects set out in the curriculum for the particular grade.

Progression from primary to secondary school is usually automatic. Allocation to particular schools or particular courses is based on the district in which the child lives, the recommendations of the headmaster, general ability tests, tests of achievement in the basic subjects, and parents' wishes.

Secondary education in government schools. The age of transfer from a government primary to secondary school is usually between twelve and thirteen. Most secondary schools are co-educational, although separate schools for boys and girls are not uncommon in capital cities. In the cities and larger country centres secondary and primary courses are provided in separate schools, but in less populous areas secondary classes sometimes share buildings with primary classes.

The secondary student takes up new studies, such as foreign languages, technical or commercial subjects, and moves on to more specialised studies in natural and social sciences and mathematics. The study of basic subjects begun in primary school is continued. The actual subjects studied depend on the ability of the pupil and, in some States, the type of school. A school day is divided into 'periods' and the children are taught by a number of teachers, each specialising in a particular subject or group of subjects.

In the past, to meet the varying abilities and needs of students, various kinds of secondary schools were established in which different types of education were provided, although in country areas secondary schools tended of necessity to be comprehensive and offered a full range of secondary courses. But following the re-examination by expert committees of the problems associated with the provision of appropriate secondary education for all, significant changes in the structure and curricula of secondary schools are taking place. In New South Wales, for example, following a committee's recommendation that the secondary curriculum should offer a core of common basic education to all students, secondary schools have become comprehensive. Pupils of different aptitudes and interests in a given locality now attend the same secondary school, undertake this core of common basic studies, and in addition specialise according to their proven abilities and interests.

The most common type of secondary school is the comprehensive or multi-purpose high school, which offers a wide range of subjects. To cater for this diversity of subjects, most high schools now have modern facilities for the teaching of domestic science, commercial subjects, woodwork, and other technical subjects. In some States there are still, however, separate high schools specialising in technical, agricultural, commercial, or home science subjects. Some of the agricultural high schools are residential. The curriculum consists of general educational subjects and practical farm training. There are also 'area' and 'rural' schools offering up to three years of secondary study, and in some States courses in agriculture are also given at high schools.

Primary and secondary education in non-government schools. Non-government schools follow curricula similar to those laid down by Education Departments and prepare their students for examinations conducted by public examining authorities. Most non-government schools are comprehensive type schools, providing a range of subjects and courses at various levels. Although there are similarities between non-government and government schools in the courses they provide, more emphasis is given to the religious training of pupils in denominational schools. Non-government schools sometimes offer facilities additional to those normally found in government schools, such as personal tuition in music. A few are organised on 'experimental' lines.

Examinations

During the course of secondary education State-wide examinations are taken at two levels. The earlier examination qualifies pupils for entry to trade courses at technical colleges and agricultural colleges, to junior commercial positions in, for instance, insurance and banking, to nursing and secretarial courses, to lower grades of the public service, and to industry. The examination at the end of the secondary school course qualifies students for entry to teachers' colleges, and is also the qualification for entry to the university, certain subjects and combinations of subjects being set down as the matriculation requirements by the respective universities.

In most States the higher examination is controlled by a board consisting of representatives of the department of education, the universities, non-government schools, and sometimes of other bodies such as teachers' organisations. A brief description of the examinations in each State follows.

New South Wales. For pupils who commenced their secondary education in 1962 or later, the full secondary course is of six years' duration, with a School Certificate Examination at the end of the fourth year, age about sixteen, and a Higher School Certificate Examination (Matriculation) after a further two years. Pupils who leave school before gaining their School Certificate receive a signed statement of attainment from their school principal.

Victoria. The last Intermediate Examination taken at the end of the fourth secondary year was conducted in 1967. The School Leave Examination is taken at the end of fifth year, and the Matriculation Examination at the end of sixth year. Pupils at approved non-government schools and certain government schools may be accredited for the Leaving by passing examinations set by their own schools.

Queensland. The Junior Public Examination is taken at the end of third year, at about the age of fifteen and a half. The Senior Public Examination conducted by the University of Queensland is taken at the end of fifth year, at about the age of seventeen and a half, and matriculation is obtained on results in this examination.

South Australia. The Intermediate Examination taken at the end of the third year, at about the age of fifteen and a half, will be held for the last time in 1968. The Leaving Examination is taken at the end of the fourth year and a Matriculation Examination is held at the end of the fifth year.

Western Australia. The Junior Certificate Examination is taken at the end of third year, at about the age of fifteen and a half. Students who pursue a less academic course may take the High School Certificate Examination at this level. The Leaving Certificate Examination is taken at the end of fifth year, at an average age of seventeen and a half, and matriculation is gained on results in this examination.

Tasmania. The Schools Board Certificate Examination is taken at the end of fourth year, at about the age of sixteen and a half, and the Matriculation Examination conducted by the University of Tasmania at the end of the fifth or sixth year.

Numbers of schools, teachers and pupils

The statistics which follow relate generally to schools providing education according to the primary or secondary school curricula of the various State Education Departments, or both, whether provided in government or non-government schools. Junior technical schools, correspondence schools, and schools in institutional homes, hospitals and similar establishments are included. Institutions providing only pre-school education, senior technical and agricultural colleges, evening schools, continuation classes, and institutions such as business colleges and coaching establishments are, as a rule, excluded.

School censuses are conducted annually at or about the beginning of August throughout all States and Territories of Australia. The numbers of pupils in the tables which follow refer to enrolments at the school census date. The numbers of schools and teachers refer to the position at dates which vary from State to State and in some instances from year to year. While it has not been possible to present all figures on a uniform basis between States, continuity of the figures for any one State over the period of years shown has been maintained as far as possible. Particulars relating to senior technical colleges are given on pages 521-3.

Schools, teachers and pupils

The numbers of government and non-government schools, teachers and pupils for 1967 and earlier years are shown in the following tables.

(a) Excludes teachers-in-training generally. (b) The methods used for calculating equivalent full-time units of part-time teaching vary from State to State, between government and non-government schools, and between primary and secondary schools within States. For most schools the information is based on either the total hours worked or total number of class periods taken in a week by part-time teachers, in relation to the normal hours worked or periods taken by full-time teachers. (c) If a full-time teacher teaches both senior and junior technical school pupils, he is counted as part-time in these statistics, (which include junior technical, but not senior technical, schools), if his teaching load in the junior school is less than 75 per cent. (d) Excludes unqualified teachers and teaching assistants at mission schools. (e) Visiting teachers who attend more than one school are counted as part-time in each.

(a) Comprises Aboriginal children at special schools whose ages were not collected.

(b) Aboriginal children included in specified age groups.

Grades of pupils

The numbers of pupils enrolled in grades in each State and Territory are shown in the following table. The grading of pupils differs for the various school systems in Australia because of the differences in curricula set by education departments. In addition, the methods of allocating classes to

SCHOOL PUPILS, BY AGE GROUP: AUSTRALIA

1963 TO 1967

grades vary from State to State, and there are also differences in the administrative methods of aggregating grades of a more or less similar nature. The figures presented in the table represent essentially the system of grading adopted in each different State and are therefore not comparable between States. Pupils not allocated to grades (i.e. physically, mentally, or socially handicapped children) are shown as being in special grades or schools or as 'ungraded'. However, the numbers shown in special grades or ungraded should not be taken as the total number of handicapped pupils in a State because some handicapped children are included in normal grades.

(a) Relates to occupation centres, opportunity classes, speech and hearing classes, and children in schools at spastic centres. (b) Speech and hearing classes. (c) In comparison with previous years' statistics numbers in kindergarten grade show an increase and grade 1 a decrease because of re-allocations between these grades. (d) For physically and mentally handicapped or delinquent children.

(a) Relates to opportunity classes and occupation centres, and Aboriginal children at special schools at settlements, missions and on pastoral properties. (b) Pupils at special schools and in special classes at ordinary schools.

Other aspects of school education

Information relating to school medical and dental services is given in the chapter Public Health, and particulars of school savings banks in the chapter Private Finance.

Provisions for isolated areas

Although the task of bringing education to isolated areas in Australia presents problems, all education authorities have aimed at providing opportunities for country children comparable to those available to city children. Country children follow the same curricula (with local adaptation, if desirable) and are under the guidance of teachers who are trained for service in country and city schools alike.

In areas where there are sufficient children of school age a 'one-teacher' school may be formed with all primary grades in a single classroom under the control of the one teacher. Special training is given to teachers undertaking work of this kind. Children who complete a primary course in a one-teacher school and cannot attend a secondary school may do secondary correspondence lessons under the teacher's supervision.

In districts where a number of small centres are scattered around a larger centre or country town the tendency is to close the one-teacher schools and transport pupils each day by buses to a 'consolidated' school in the larger centre. Consolidated schools provide primary instruction and from two to four years of post-primary instruction. The post-primary curriculum adopted is usually directed towards practical activities and training in subjects bearing on the primary industries of the locality.

Where a group of children is too small to warrant the establishment of a one-teacher school at public expense, a 'subsidised' school may be opened. The Education Department pays part of the cost and in some States appoints a teacher. Some States also administer 'provisional' schools, which are completely financed by the Government but which are not large enough, or sufficiently assured of adequate continued attendance of pupils, to warrant classification as permanent schools.

Correspondence schools. These have been established in each State capital city to meet the needs of children whose daily attendance at school is prevented by distance between home and school, by illness or by physical disability. The correspondence schools also cater for inmates of penal institutions, Australian children overseas, pupils of other schools in which particular courses are not available, and, as well, for members of the Defence Forces and other adults completing their secondary education. Where children are involved, lessons are done with the help of a supervisor, usually a member of the child's family, and posted back to the correspondence school in the capital city, where they are corrected and returned with comments. Every endeavour is made to maintain a personal link between teacher and pupil. Correspondence schools began with primary grades only, but were soon extended to cater for secondary pupils, and it is now possible to do a complete secondary course to matriculation standard by correspondence. Each year more than 20,000 students receive all or part of their instruction by correspondence.

Schools of the air. These are intended to give the outback child of school age some of the benefits of school life and to supplement correspondence education. The schools of the air keep the various correspondence schools informed of the progress of their pupils. Using the two-way wireless equipment developed first by the Royal Flying Doctor Service, children hundred of miles apart participate in the same lesson, and teacher and pupils can talk directly with each other. The first school of the air was established in 1951 at Alice Springs in the Northern Territory; it has been followed by similar schools at Broken Hill in the far west of New South Wales; Ceduna and Port Augusta in South Australia; Charleville, Mount Isa and Charters Towers in Queensland; Meekatharra, Derby, Kalgoorlie, and Port Hedland in Western Australia; and Katherine in the Northern Territory. These twelve schools serve children in an area of a million square miles.

Handicapped children

Some provision is made for the education of physically and mentally handicapped children, both by the State authorities and by church and voluntary organisations, often working in conjunction. In some cases, where residential schools are necessary for particular groups, educational facilities and teaching staff are provided by a State education department, while a voluntary organisation provides accommodation and accepts responsibility for the general welfare of the children. Among the facilities available are: hospital schools for sick and crippled children; 'spastic centres' for cerebral palsied children; schools and classes for deaf children; schools for blind children; and special schools and classes for mentally retarded children. Special schools and classes have involved the appointment of departmental specialists, the provision of a special training course at Melbourne Teachers' College and close liaison with school health services. In some States, clinics attached to hospitals, or functioning as an independent child welfare service, handle cases of personality maladjustment and work in co-operation with the psychological services of the education departments.

Educational guidance

Each Australian State has a system of educational guidance administered by educational psychologists and backed by a system of pupil record cards. The functions of these services are to provide advice on suitability of various secondary studies for particular children, diagnosis and guidance of atypical children, preliminary guidance, and, in some States, research. The weight given to each of these functions varies from State to State, but the aim is to provide educational guidance for all children.

Throughout Australia branches of the Commonwealth Employment Service co-operate with State education departments by giving post-school vocational guidance, using the data obtained during the school careers of the children and made available by the education departments. In New South Wales a similar service is also provided by the Youth Welfare Section of the State Department of Labour and Industry.

Research

All State education departments have set up branches undertaking research directed towards departmental activities. The work of the research branches is concerned with such matters as curriculum content, new teaching methods, evaluation procedures, wastage rates and educational statistics.

School broadcasting and television

Over the years an extensive school broadcasting system has been developed in Australia by the co-operative efforts of the Australian Broadcasting Commission and education authorities. The

Australian Broadcasting Commission's Education Department is responsible for preparing and broadcasting programmes, but it draws on the advice and services of teachers and maintains permanent liaison with State education departments. In 1966, 95 per cent of Australian schools were equipped to receive radio broadcasts.

Most school broadcasts are presented as part of the regular Australian Broadcasting Commission programmes without separate stations or wave lengths. Special efforts are made to relate the broadcasts to school work by the extensive distribution of booklets, giving details of programmes in advance, and subject notes accompanied by picture sheets, work books, and teachers' notes. Broadcasting has proved to be a most effective way of reaching the outback children of Australia, and radio lessons have been designed to supplement correspondence lessons.

The year 1966 saw a further increase in the number of schools receiving television broadcasts and in the number of programmes produced. The Australian Broadcasting Commission has increased its output of school television programmes, especially instructional programmes in mathematics and science for secondary schools. Direct teaching lessons designed for the senior forms were presented. At the same time most education departments began to subsidise the purchase of television sets, and by the end of 1966, 37 per cent of schools in Australia were equipped to use educational television programmes.

Scholarships and bursaries

All States have limited schemes of financial assistance to school pupils, mostly at the secondary level, through scholarships or bursaries. As tuition in government schools is free, this assistance is usually in the form of maintenance allowances, both for children living with their parents and for those living away from home. These may be paid in a lump sum or in instalments throughout the year. Awards are usually made on the results of a competitive examination, and sometimes a means test is applied. Other government and private authorities, such as the Repatriation Department and the Legacy War Orphans Fund, assist special categories of pupils with their school education. Many non-government schools also award scholarships, on a competitive basis, which enable students to attend the particular schools without payment of fees.

In 1964 the Commonwealth Government, with the co-operation of the State Departments of Education, introduced a programme of secondary scholarships to encourage successful candidates to complete the final two years of secondary schooling. Ten thousand of these scholarships are awarded each year. Further details of the Commonwealth secondary scholarship scheme and the Commonwealth technical scholarship scheme are given on pages 549-50.

School transport

All States make some provision to cover the costs of transport for children travelling to and from school.

School buildings

The great increase in the school population in the last decade led to an expansion in school building. To cope with this growth in population, it has been necessary to make use of temporary and emergency structures. Quite large schools are being built in stages to match increases in local population in new and rapidly developing suburbs in metropolitan areas. Authorities are giving attention to the use of new materials and to the planning of sites. Gymnasiums which may also serve as assembly halls are sometimes included, and lighting, heating and ventilation to meet different climatic conditions are planned. For details of assistance provided by the Commonwealth for the building and equipping of science laboratories, *see* page 550.

Textbooks, materials and other equipment

The State education departments supply government schools, free of charge, with essential equipment, including scientific apparatus, maps, blackboards, chalk, and cleaning materials, and non-consumable equipment for commercial, home science and manual training. Garden tools and physical training equipment are also supplied in most States. Readers and writing equipment for individual pupils are sometimes supplied free in primary schools, and several education departments produce monthly school magazines which are supplied free or cheaply. In primary schools (except in one State where textbooks are made available free to children in both government and non-government primary schools) and in secondary schools, textbooks must, however, be purchased by students. In several States schools own stocks of textbooks which are hired to students, and in one State secondary textbooks are sold at reduced prices. In four States certain textbook costs are subsidised for pupils attending government and non-government schools. The parent and citizen

organisations, with the assistance of subsidies from the education departments, are usually responsible for providing equipment such as radios and television sets, film strip projectors, pianos, duplicators and, in particular, library books.

The design of school furniture is undergoing change following research on posture and the physical measurement of children. Dual desks are now being replaced in many schools by individual tables and chairs, provided in a range of sizes suitable to each class. In line with modern educational practice, the new type of furniture has been designed to allow more flexible arrangements of the classroom.

Visual aids

Visual aids are widely used in Australian education. Each of the State education departments has a visual education branch to handle the production and distribution of such materials. Film strips and posters are distributed free or at low cost. Films are held in central libraries and are requisitioned by schools as required for teaching purposes.

Pre-school education

Pre-school centres are maintained by voluntary organisations such as the Kindergarten Unions, churches, and committees of interested citizens. Over the years an increasing amount of financial assistance has been provided by State governments to approved pre-school centres so that the contributions made by parents remain at a realistic level. Grants are available for teachers' salaries and, in some areas, towards buildings and equipment.

The Australian Pre-school Association is a national body whose members are the organisations throughout Australia seeking to promote the health and welfare of young children. It aims to co-ordinate and strengthen pre-school education. It is responsible for the administration, on behalf of the Commonwealth Government, of six Lady Gowrie Child Centres for child-study and demonstration.

Pre-school centres are located in city and country areas, and programmes are adapted to meet the needs of the children attending. A typical pre-school centre provides half-day sessions for children. Crèches and day-nurseries provide full-day care in closely settled areas. In a few centres occasional or residential care is available. Pre-school centres are able to cater for only a small proportion of the children under six years of age, but radio and television have brought a form of education within the reach of practically every pre-school child in Australia. The Australian Broadcasting Commission pioneered the programme 'Kindergarten of the Air', a session of twenty-five minutes each week-day broadcast throughout the country and overseas through Radio Australia. This session was designed to reach children in isolated areas.

The half-hour television programme 'Play-school' is also available each week-day to children of kindergarten age in all State capital cities and in many country regions.

Technical education

The following description of technical education refers to training in technical fields given by institutions other than secondary schools and universities. Students may proceed to this kind of training after completing three to five years at secondary school. Each State has developed a system of technical education based on institutions set up in all the State capital cities and in some country areas. There are 3 diploma-granting institutions in New South Wales, 20 in Victoria, 7 in Queensland, 3 in South Australia, 3 in Western Australia, and 3 in Tasmania. These institutions are known variously as technical colleges, institutes of technology and schools of mines. The earliest began as local and even private ventures in the second half of the nineteenth century, but almost all of them have now come under the control of the State governments.

The technical colleges in Queensland, South Australia, Western Australia, and Tasmania are administered by branches of the State education departments. In Western Australia and South Australia the Institutes of Technology function as autonomous institutions. New South Wales has a separate State Department of Technical Education. In Victoria there is a dual system with a number of the older colleges controlled by their own 'councils' in addition to government-controlled colleges administered by the Technical Education Branch of the Education Department. The council-controlled colleges receive government grants-in-aid. Most of the diploma and other tertiary courses of technical institutions are now receiving Commonwealth financial assistance under the arrangements covering colleges of advanced education as outlined on page 546.

Australian technical colleges offer training in all the major industrial skills and in a wide variety of commercial, artistic and domestic occupations. The three main types of courses are described in the following paragraphs.

Trade courses

These offer part-time training for apprentices. In developing a system of technical education, the Australian authorities were influenced by the British tradition which regards practical experience on the job as the fundamental training procedure, to be supplemented by theoretical and practical training at an appropriate school. In each of the Australian States there is an apprenticeship authority which supervises the administration of apprenticeships, and an education authority which provides technical education through its technical colleges.

Most students who wish to become tradesmen leave school on the completion of three or four years of secondary schooling at about sixteen years of age. An increasing proportion, however, is entering at higher educational levels and receiving credit for this. On entering apprenticeship in one of the trades, the young apprentice is required to enrol in an appropriate trade course in one of the network of technical colleges in capital cities and large country towns.

The time spent on training varies from three to five years in different trades and States. Between four and eight hours' instruction a week is required. Most of this takes place in the employer's time, and it is unusual for more than two hours a week to be spent in attending classes outside working hours.

Certificate courses

These courses are designed to provide training in technical occupations and in some cases can be counted towards a diploma course. Certificate courses vary in length from State to State, but generally speaking they last from two to seven years. Attendance may be full-time for all or part of the course, or wholly part-time. Usually there are no occupational requirements for admission to a certificate course, and students who have completed a related trade course may be admitted together with other students to a certificate course. Educational requirements in most cases specify possession of an Intermediate level examination certificate, which may need to include passes at appropriate levels in certain specified subjects. In addition, in New South Wales the Department of Technical Education conducts the Certificate Entrance Examination, a pass in which qualifies a student for attendance at a technical college. Courses are offered in subjects such as accountancy, industrial electronics, wool classing and architectural drafting.

Diploma courses

Diploma courses are designed to provide professional training in fields such as architecture, art, building, commerce, management, public administration, manual arts, the various branches of engineering and metallurgy, and pure and applied science. They usually follow completion of a full secondary school course. The courses consist of complete progressive units of study in which the lecture room, laboratory and workshop are closely associated. They vary from three to five years' full-time and from three to seven years' part-time study. At least one full year of employment in an appropriate occupation is usually required. The aim of the courses is to develop highly trained technologists with the qualifications and experience required for membership of a professional institution.

The diploma schools or sections of the major institutions are being developed as colleges of advanced education, and these activities are gradually being separated from the trade and certificate sections of technical education.

Other technical courses

Most colleges provide short post-diploma and refresher courses to keep students in touch with new developments in their fields, as well as courses of general interest, such as handicrafts and motor mechanics. Training in certain technical aspects of agriculture such as farm mechanics and wool classing is often given in the technical colleges. Some also offer general secondary courses to enable adults to prepare for matriculation and other public examinations.

Technical correspondence teaching

Each State has a well developed system of technical education by correspondence to extend the facilities of a metropolitan college to rural students. Entrance qualifications are identical with those for the regular classes. A major problem of correspondence work is the linking of theory with practice. This is overcome to a certain extent by holding practical sessions at appropriate training centres once or twice a year at the technical college where the correspondence school is based, or at a mobile workshop stationed for the time at a focal point within the district. In New South Wales these mobile workshops are rail cars equipped with machinery and fittings to make them self-contained training schools for engineering and other trades. Among practical courses offered by correspondence are trade drawing, fitting and machinery, welding, diesel engine operation, automotive engineering and workshop practice, and farm mechanics.

Technical colleges, teachers and students

The numbers of colleges, teachers and enrolments during the years 1962 to 1966 are given in the following table.

**TECHNICAL EDUCATION: COLLEGES, TEACHERS AND ENROLMENTS

(a) Students enrolled represent gross enrolments, no allowance having been made for students enrolled in more than one course. (b) Includes Australian Capital Territory. Gross enrolments at Canberra Technical College were as follows: 1962, 2,431; 1963, 2,895; 1964, 3,551; 1965, 4,267; 1966, 4,855. (c) Figures include teachers and students at technical colleges and other centres, such as high school classrooms, in which technical classes are conducted. (d) Includes correspondence course teachers and students. (e) Teachers include those at both senior and junior technical colleges. (f) Student enrolment figures for 1965 and 1966 are not comparable with those shown for earlier years because as from 1965 students taking single subjects only were included and the census date was altered from 1 August to 31 May. (g) The figures for 1965 reflect the major reorganisation of technical education introduced at the beginning of the year. In addition to the establishment of the Institute of Technology, entry standards were raised, and the minimum number of students required to commence classes was also raised. (h) Excludes correspondence teachers and students. (i) Total students includes students enrolled in correspondence courses. Teacher figures include correspondence course teachers. (j) Teachers represent number of teaching positions.

Teacher education

The teacher shortage evident in past years has now been overcome to some extent. Some States have little difficulty in recruiting and training sufficient staff to meet the present needs of primary schools. Despite expanded training programmes the shortage of secondary school teachers has proved a greater problem, especially in mathematics and science.

State education departments recruit most prospective teachers for government service from students leaving schools after a secondary course. Each department offers training awards annually on the basis of academic merit and personal suitability. The traineeships cover the cost of a teacher training course (which may include university studies) and provide a living allowance. Students are usually required to enter into an agreement to serve for a specified number of years in the government schools of the State where they have trained. In some States intending teachers can obtain a scholarship at the first public secondary examination to enable them to complete teachers college entrance requirements. Such an award entails a bond of service for a longer period.

The State education departments conduct teachers colleges to train teachers for government schools. These colleges are co-educational and, in the larger States, have been established in country areas as well as in cities. The principal and staff of the colleges are responsible to the Director of Education in the State concerned. Teachers colleges are also conducted by other organisations.

The following table shows the number of teachers colleges, i.e. institutions set up to provide courses of professional teacher training for pre-schools and schools, including technical schools. The institutions covered are the government teachers colleges, denominational and independent teacher-training colleges, and kindergarten training colleges.

NUMBER OF TEACHERS COLLEGES, 1967(a)

	N.S.W.	Vic.	Qld	S.A.	W.A.	Tas.	A.C.T.	Aust.
Government . . .	8	13	2	4	3	2	..	32

Total . . .	21	20	4	5	4	2	1	57

(a) There are no teachers colleges in the Northern Territory.

Teachers for government schools

Training of primary school teachers. In most States teachers for government primary schools are trained in teachers colleges. Generally, the duration of courses for primary teachers is two years; but several States are introducing a minimum three-year course for primary teachers. The basic subjects taken in the various courses are history and principles of education, general and special methods of teaching in the primary school, school organisation, and educational psychology. In addition, students undertake courses in English (including speech training), mathematics, handicrafts, music, art, social studies, natural science, and physical and health education. Optional subjects may include dramatic art, visual aids, and so on. Supervised practice teaching in schools and the observation of demonstration lessons form part of all training courses. Since primary teachers in Australia may be called upon at some time to teach grouped classes in a small school or a 'one-teacher' school, special training for this kind of work is included in their course.

Training of secondary school teachers. Secondary teachers are normally specialists in a combination of subjects, such as English and history, modern languages, or mathematics and science. Intending secondary school teachers either obtain a university degree with additional professional teaching training such as a Diploma of Education, or are required to hold a diploma or certificate from a teachers college. Training also includes practice teaching under the supervision of teachers college and university staff, and the observation of demonstration lessons.

At several Australian universities, students wishing to take up teaching as a profession can receive their professional training along with the study of their teaching subjects as part of a first degree course in Education. The time taken to complete such a Bachelor of Education degree course is three or four years.

Training for specialist teaching. Teachers of specialist subjects, such as music, art, manual arts, domestic science, and commercial subjects, receive from two to five years' training which varies according to the institution concerned and the type of school in which the teacher is to serve. In several States the shorter courses are provided wholly by the teachers colleges. In five States teachers of music receive their specialist training at conservatoria of music. Where the specialist course is given at an institution other than the teachers college—e.g. at a university, technical college, or

conservatorium of music—as is usual for teachers of specialist subjects in high schools, students are required to attend teachers college or university lectures in education, and in some cases the specialist course is followed by a year of professional training. Courses designed to train physical education teachers are offered in universities in all States, and in four States at a teachers college as well.

Training for teachers of agricultural subjects in secondary schools is available in three States and consists of either an agricultural college diploma or a university degree course together with professional training. In Victoria there is a three-year agricultural college diploma course which follows on the normal two-year primary teachers course, whereas in Queensland students undertake a course at the Queensland Agricultural College, followed by two years of teacher education, one at university and one at a teachers college. In South Australia most students undertake a Bachelor of Science Degree concurrently with professional training and with special training in agricultural science. Teachers of technical subjects in secondary schools may be trained in manual or industrial arts courses of two to four years' duration, at teachers colleges, technical colleges, or, in one State, at a university. These courses include basic training in such subjects as wood and metal work, and geometrical drawing. In Victoria there is a separate Technical Teachers' College. Some teachers of trade subjects in technical schools are recruited from the ranks of qualified tradesmen engaged in industry or commerce. Upon appointment these teachers usually receive instruction in classroom teaching techniques and procedures.

The following table shows enrolments in government teachers colleges in 1967. The figures include departmental students (i.e. those awarded State education department scholarships or fellowships and who have executed an agreement for periods of teaching service after completion of their teacher education, whether they are required to attend a teachers college or receive instruction at a university or other educational institution), and private students at government colleges, including those sponsored by government departments other than State education departments. The figures exclude enrolments for refresher courses, summer schools, and courses designed for practising teachers. The figures include 910 departmental students at various universities who have not been enrolled at a teachers college.

(a) Includes courses for students training as technical college teachers. (b) Courses which are not classified as primary or secondary level courses until a later stage of the course. The students are mainly first year students in university courses in Western Australia and students in university courses in Tasmania. (c) Includes 122 students not classified by sex.

In-service training. As almost all teachers now enter the profession by way of teachers colleges or universities, where they receive basic professional training, in-service training in Australia is directed chiefly towards keeping teachers abreast of developments and adding to their basic training. In-service training usually takes the form of short courses held sometimes during vacations, sometimes during school-time or in the evening. In some States in-service courses for teachers in remote areas are provided by correspondence. Courses consist of discussions and lectures given by senior staff members of education departments and university and teachers college lecturers on such subjects as classroom techniques and supervision, librarianship, visual aids, music, arts and crafts, and physical education. In some States there are also in-service courses for special groups of teachers such as headmasters or teachers in one-teacher schools. In addition, district inspectors are responsible for organising short conferences of teachers, where professional topics are discussed. Education departments encourage teachers to pursue university courses and in some States pay the cost of courses undertaken by selected teachers.

In January 1968 groups of Australian teachers again attended refresher courses in New Caledonia for Australian and New Zealand teachers of French. These courses have been offered to the Australian Government by the French Government. Since 1963 official publications of the education departments contain articles dealing with educational theory and practice. Magazines of the teachers' organisations, which reach the majority of government teachers, also contain articles of this type.

Status of teachers. Most teachers in governmental schools are permanent public servants and have security of tenure, superannuation rights, and the right of appeal in matters of promotion. The centralised education systems and the general policy of providing fully trained teachers for both city and country areas mean that teachers are subject to transfer to any part of the State in which they serve. It is common for a teacher's first appointment to be to a country school.

In each State there are unions of State school teachers and these together form a federal body, the Australian Teachers' Federation. Teachers in non-government schools have formed similar organisations. Their aim is to advance the teachers' status and conditions and to stimulate community interest in educational problems.

Training of technical teachers

Prior to the 1939-45 War technical colleges were staffed chiefly by trained teachers in the employment of the education departments or technicians drawn from industry. Although some of the latter were highly qualified, the great majority had not been trained as teachers.

To preserve links with industry and trade practice, schemes have been developed which continue the recruitment of specialist tradesmen as teachers but provide also for their training in educational method and teaching techniques. In Victoria the Technical Teachers' College provides training for students with appropriate diploma or trade qualifications and suitable industrial experience. In New South Wales technical college lecturers and tradesmen-teachers receive an in-service course of teacher training in general educational theory and teaching method, while correspondence courses and visiting lecturers assist the newly appointed tradesman-teacher in country colleges. Variations of this scheme are in operation in other States. Many technical teachers, principally of academic, commercial and domestic science subjects, hold trained teachers' certificates from teachers colleges.

Training of non-government school teachers

Teachers for non-government schools receive their training in a number of ways. The Roman Catholic Church staffs both its primary and secondary schools largely with members of religious orders. In recent years there has been a growth in the number of lay teachers being employed in Catholic schools, and training of students to become lay primary teachers has been instituted. Secondary teachers receive their academic training mostly through courses provided by Australian universities.

Other non-government schools tend to recruit their staffs from teachers who have already obtained qualifications in Australia or overseas. In New South Wales and Victoria non-government school authorities offer courses designed specially for teachers in their schools. Non-government schools recruit also university graduates, who are then given professional guidance by senior members of the school staff. Private students may enrol at government teachers colleges on payment of a fee, but the number of places available is limited. Some teachers destined for non-government schools train in this way.

In 1967 there were 1,199 students enrolled in non-government teachers colleges, of whom 929 were enrolled in primary, and 270 in secondary, teacher education courses.

During vacations many non-government teachers attend in-service training courses organised by education departments. In recent years vacation courses have been provided by bodies other than education departments for teachers from both government and non-government schools. For example, an independent body, the Science Foundation for Physics within the University of Sydney, has provided such courses for teachers of science in secondary schools in New South Wales.

Kindergarten training colleges

The Kindergarten Unions, which are non-government organisations, have established colleges providing three-year courses in all States except Tasmania, where an infant and pre-school course is provided by the Hobart Teachers' College. The minimum entrance age is usually seventeen years and applicants with matriculation status are preferred. In New South Wales the Sydney Day Nursery and Nursery Schools' Association maintains a training college which provides a course for pre-school and kindergarten teachers. These colleges provide full-time diploma courses which are similar in content and standards. Teachers are trained for work with children between the ages of two and seven years, and the training courses include the study of general educational theory, the theory of pre-school education, general cultural subjects, and art and crafts (including music). In addition, training is given in practical pre-school teaching. The total number of students enrolled in 1967 in kindergarten teachers colleges was 668. This figure excludes students enrolled in kindergarten teacher education courses in Hobart Teachers' College.

Government expenditure on schools and technical education

The following tables show particulars of the total net expenditure (i.e. gross expenditure less receipts for services rendered) from certain funds on government schools, education departments and technical education. The data have been compiled on the same basis as far as differences in organisation and accounting methods between States and Territories will permit. The tables include only expenditure from the consolidated revenue funds and certain trust or special funds. They exclude loan fund expenditure; expenditure on debt charges, pay-roll tax and superannuation payments, in so far as it is possible to identify these items; and some items for which information cannot be obtained from the public accounts of all States. In particular, the following tables exclude specific purpose expenditure by the Commonwealth for schools and technical colleges in the States, such as science laboratory grants.

Government schools' and education departments' expenditure

The figures relate throughout to years ended 30 June. Net expenditure per pupil relates the total net expenditure to the mean of the numbers of pupils enrolled at government schools at two consecutive school censuses. Net expenditure per head of population relates the total net expenditure to the mean population.

GOVERNMENT SCHOOLS AND EDUCATION DEPARTMENTS: NET EXPENDITURE STATES AND TERRITORIES, 1962-63 TO 1966-67

1966-67	38.73	34.35	28.62	41.37	38.55	46.37	31.94	40.46	36.52

(a) Figures include expenditure on adult education which amounted to \$2,148 in 1962-63, \$916 in 1963-64, \$1,092 in 1964-65, \$887 in 1965-66, and \$2,372 in 1966-67. (b) Expenditure figures exclude expenditure on special education of Aboriginal children, while pupil and population figures include Aborigines.

The following table shows, for the six States, the net expenditure on government schools and education departments classified into the following headings: primary education, secondary education, administration, transportation of school children and students, and training of teachers. Expenditure on technical and agricultural education is excluded from the tables. It has been necessary

to estimate some items of expenditure, largely because the meanings of 'primary' and 'secondary' differ between States and because elementary and higher educations are sometimes given in the same school by the same teachers. Expenditure on government schools in the Northern Territory and Australian Capital Territory is not included in the following table because the detail is not available.

Non-government schools' finance

Most Roman Catholic parish schools charge fees, but payment is not insisted on in the case of families who cannot afford it. At the majority of non-government secondary schools, privately endowed scholarships are available in varying numbers, and reductions in fees are normally made for children of clergy or for two or more members of one family attending the same school. With these exceptions, pupils of non-government schools must pay fees.

Certain State scholarships and bursaries are tenable at approved non-government secondary schools. Since the establishment of educational systems by the State governments, official policy has been largely against the provision of direct financial assistance to non-government schools, but in 1967 several States initiated such systems. Most States, moreover, have come to assist non-government schools in approved building projects. For details of Commonwealth finance for the building and equipping of science laboratories *see* page 550.

Universities

Students qualify for entrance to Australian universities by passing a matriculation examination in one of the States after five or six years of secondary education. Each university has its own regulations for matriculation, specifying the number and combination of subjects to be passed for admission. Students entering the universities have the choice of undergraduate study in various faculties. All universities provide also postgraduate courses of study. The Australian universities, with their faculties or schools, are listed below in the order of their foundation.

University of Sydney, 1850, Sydney, New South Wales: Agriculture, Architecture, Arts, Dentistry, Economics, Engineering, Law, Medicine, Science, Veterinary Science.

University of Melbourne, 1853, Melbourne, Victoria: Agriculture, Applied Science, Architecture, Arts, Dental Science, Economics and Commerce, Education, Engineering, Law, Medicine, Music, Science, Veterinary Science.

University of Adelaide, 1874, Adelaide, South Australia: Agricultural Science, Architecture and Town Planning, Arts, Dentistry, Economics, Engineering, Law, Medicine, Music, Science, Technology and Applied Science.

University of Tasmania, 1890, Hobart, Tasmania: Agricultural Science, Arts, Commerce, Education, Engineering, Law, Medicine, Science.

University of Queensland, 1909, Brisbane, Queensland: Agriculture, Architecture, Arts, Commerce and Economics, Dentistry, Education, Engineering, Law, Medicine, Music, Science, Veterinary Science.

University of Western Australia, 1912, Perth, Western Australia: Agriculture, Architecture, Arts, Dental Science, Economics and Commerce, Education, Engineering, Law, Medicine, Science.

Australian National University, 1946, Canberra, Australian Capital Territory: Institute of Advanced Studies—John Curtin School of Medical Research, Research School of Physical Sciences, Research School of Social Sciences, Research School of Pacific Studies; School of General Studies (formerly Canberra University College, established in 1930)—Arts, Economics, Law, Oriental Studies, Science.

University of New England, 1954 (formerly New England University College, established in 1938), Armidale, New South Wales: Agricultural Economics, Arts, Economics, Rural Science, Science.

University of New South Wales, 1958 (formerly the New South Wales University of Technology, established in 1948), Sydney, New South Wales: Applied Science, Architecture, Arts, Commerce, Engineering, Medicine, Science.

Monash University, 1958, Melbourne, Victoria: Arts, Economics and Politics, Education, Engineering, Law, Medicine, Science.

University of Newcastle, 1965 (formerly Newcastle University College, established in 1951), Newcastle, New South Wales: Applied Science, Architecture, Arts, Economics, Engineering, Science.

Flinders University of South Australia, 1966, Bedford Park, South Australia: Language and Literature, Social Sciences, Physical Sciences, Biological Sciences.

La Trobe University, 1967, Bundoora, Victoria: Biological Sciences, Humanities, Physical Sciences, Social Sciences, Agriculture.

Macquarie University, 1967, Eastwood, New South Wales: Behavioural Sciences, Biological Sciences, Chemistry, Earth Sciences, Economic and Financial Studies, Education, English Studies, Historical, Philosophical and Political Studies, Mathematics and Physics, Modern Languages.

Each of the universities was established by a parliamentary Act as an autonomous institution, with its own Governing Council or Senate. Nevertheless, the Australian universities receive substantial government support from both State and Commonwealth sources, only part of their income being derived from students' fees, private donations and bequests.

There are also two university colleges. Townsville University College, founded in 1961, is a part of the University of Queensland. Full degree courses in Arts, Business Studies, Education, Science, and Civil Engineering are available. The first two years of all other branches of Engineering and of Applied Science may be taken and the first year is available in Agriculture, Forestry, Dentistry, Medicine, Pharmacy, Veterinary Science, and Law. Wollongong University College was opened in 1962 and is affiliated with the University of New South Wales. It offers some courses in the faculties of Arts, Commerce, Engineering, Science, and Medicine.

Organisation of courses

Bachelor degree courses are from three to six years in length, depending on the faculty, and for the majority full-time attendance is required. Certain courses, however, may also be undertaken by part-time or evening students. The university academic year begins in March and finishes in early December. At most universities two short vacation periods divide the year into three terms, but there are four terms in some universities.

Several universities make provision for external tuition, whereby students living away from university towns may take a restricted number of courses by correspondence. The University of Queensland has developed a system of correspondence tuition which now caters not only for students within the State but also for those in the Northern Territory, in the Territory of Papua and New Guinea, and for Colombo Plan Scholarship holders in south-east Asia. External students living in Queensland receive tutorial assistance at university centres in the principal country towns.

The University of New England's Department of External Studies offers a wide range of subjects for external study, leading to the degrees of Bachelor of Arts, Bachelor of Letters, Bachelor of Education, the Diploma in Education, and the Diploma in Educational Administration. External students must attend short annual residential schools of instruction in their subjects, usually held at the university.

Post-graduate courses leading either to a Master's degree or to a Doctorate are available at all universities. Facilities cover the humanities, social sciences and pure and applied sciences. Additional courses are constantly being introduced by the universities at both the undergraduate and the post-graduate level to cover new fields of knowledge and specialisation. Macquarie University has also commenced courses for part-time external students who reside in New South Wales or in the Australian Capital Territory. At present, there is an emphasis on science programmes in this university's external courses.

Research

A wide range of research work and training in research techniques is carried out by the universities as part of their normal functions. Post-graduate students and members of university staff are engaged in research, both as part of their work for post-graduate degrees and also as part of group and departmental research programmes. Support for research in universities is derived from public and private sources, including funds and foundations established to encourage research in a particular field.

University expansion and development

Since the 1939-45 War the Australian universities have had to face greatly increased demands on their facilities, firstly from large numbers of ex-service personnel in the immediate post-war years and later from greatly increased numbers of students leaving secondary schools each year. By 1967 the total enrolments in Australian universities had reached approximately 95,000 compared with an early post-war peak of 32,453 in 1948.

To assist the universities to cope with these demands, increasing co-operation between the Commonwealth Government and the State Governments in university finance became necessary. The Commonwealth Government set up a Committee on Australian Universities, whose 1957 report ('The Murray Report') led to more finance becoming available to universities and to the setting up of a permanent body, the Australian Universities Commission, to advise the Commonwealth Government on university development. In the years since the Murray Report the following major developments have taken place in the Australian university structure: the University of New South Wales was created from the earlier University of Technology in 1958; in the same year Monash University was established in Victoria; in 1960 the Australian National University was reconstituted, combining both undergraduate and post-graduate facilities, and now consists of the Institute of Advanced Studies and the School of General Studies created from the Canberra University College; the University of Queensland set up the University College of Townsville in 1961; the University of New South Wales established the Wollongong University College in 1962; in 1965 the University of Newcastle was created from the Newcastle University College; in 1966 the University of Adelaide at Bedford Park became The Flinders University of South Australia; and in 1967 Macquarie University and La Trobe University were established in New South Wales and Victoria respectively.

The Queensland Government is proceeding with plans for the construction of a third university institution at Mount Gravatt. It is expected that the campus will be established within the next three years as a satellite of the University of Queensland.

Despite their expansion, the Australian universities are still faced with a problem in providing tuition for all students who reach matriculation standard and wish to take up university courses. As a result, several universities have found it necessary to impose quotas on enrolments in their courses.

Assistance to university students

The Commonwealth Government, through the Commonwealth Scholarships Board, grants undergraduate and post-graduate scholarships to university students. (Details of the Commonwealth Scholarship Scheme are given on page 549.) Commonwealth, State and local governments also award cadetships and other assistance to their employees. Foreign students are assisted by the Commonwealth Government under arrangements such as the Colombo Plan. The universities themselves grant exhibitions and scholarships as well as special assistance to teachers, etc.

Resident university students

In 1967, 8,401 full-time and 238 part-time students were in residence at affiliated colleges, halls of residence and university hostels. The 8,639 students in residence were distributed as follows: Australian National University, 921; Sydney, 1,197; New South Wales, 441; New England, 1,031; Melbourne, 1,676; Monash, 514; La Trobe, 111; Queensland, 1,358; Adelaide, 396; Flinders, 17; Western Australia, 645; and Tasmania, 332. There were 6,193 male students and 2,446 female students in residence.

University finance

Australian universities are incorporated by statute. Since their establishment they have come to depend greatly on government grants for their income. In recent years large amounts have been required for new buildings, as well as for current expenditure to provide staff and equipment to cope with increased student enrolments. In 1966 income from other than State and Commonwealth grants, including student fees, amounted to just over one-fifth of the total income. Income from non-government sources includes grants, mainly for research purposes, from businesses, international foundations and private individuals. Some income is also received from endowments.

Financial assistance to universities from the Commonwealth Government

Prior to 1939 Commonwealth assistance was almost entirely concerned with research projects carried out by or in collaboration with the universities. During and since the 1939–45 War the Commonwealth extended assistance to university students, at first to increase the number of highly trained people required for the war effort, then with the object of rehabilitating ex-servicemen, and finally as a social service benefit to the community. For the purpose of reconstruction training the Commonwealth Government made available to the universities approximately \$2 million for buildings and \$1 million for equipment.

Following a report submitted by a committee of inquiry appointed to report on university finances and requirements, the Commonwealth, since 1951, has made matched grants to the States for recurrent expenditure on university purposes and unmatched grants for university halls of residence and affiliated residential colleges. Since 1958 the Commonwealth has also assisted with the capital needs of the universities for building projects and for equipment, and grants for the building programmes of residential colleges affiliated with universities, including university halls of residence. In the 1961–63 triennium the Commonwealth matched State grants for buildings at teaching hospitals and in 1960 instituted grants for research at universities. As well as making grants available for State universities, the Commonwealth has continued to support the university institutions for which it is responsible.

In 1959, following the Report of the Committee on Australian Universities, the Commonwealth Government established the Australian Universities Commission under the *Australian Universities Commission Act* 1949. The Commission's principal functions are to advise the Prime Minister on financial assistance to Commonwealth universities and to States in relation to their universities and also on the balanced development of Australian universities. The Commission commenced its work in July 1959. Since its establishment the Commission has produced three reports; the first, presented

UNIVERSITY DEGREES CONFERRED: AUSTRALIA

1958 TO 1967

in October 1960 and covering the years 1961 to 1963, recommended Commonwealth grants totalling \$86 million for State universities. The Commission later recommended a Commonwealth grant of \$4 million for teaching hospitals. *The States Grants (Universities) Act 1960-1964* gave effect to the financial recommendations contained in the Commission's first report and subsequent recommendations for 1961-63. The Commission's second report was presented in August 1963, and recommended Commonwealth grants totalling more than \$121 million for State universities, subsequently increased by \$3.4 million for teaching hospitals, for the period 1964 to 1966. The *Universities (Financial Assistance) Act 1963-1966* gave effect to the financial recommendations contained in the Commission's second report and subsequent recommendations for 1964-66. In August 1966 the third report was presented. It recommended Commonwealth grants to the State universities of almost \$200 million for the period 1967-69, including almost \$6 million for teaching hospitals. The Commonwealth Government's grant, including \$5.7 million for teaching hospitals, was fixed following discussion with State governments, at \$181 million (including its share of the cost of increases in academic salaries as from 1 July 1967). The Act giving effect to these grants is the *Universities (Financial Assistance) Act 1966-67*.

Commonwealth grants for recurrent expenditure in universities. This is a continuation of matched grants provided since 1951. The maximum amounts available in 1964 to 1969 are shown in the following table. These amounts have been adjusted to allow for the recommendations of the Report of the Inquiry into Academic Salaries by Mr Justice Eggleston in 1964.

Total	24,712	28,226	31,924	36,118	40,738	44,184

(a) Includes grants for the university colleges at Wollongong and Broken Hill and, for 1964, the University College of Newcastle which became the University of Newcastle as from 1 January 1965. (b) In 1967-69 Commonwealth grants are made through the Commonwealth Advisory Committee on Advanced Education.

Since 1961 matched grants have been made on a basis of \$1 by the Commonwealth for every \$1.85 of income received by a university from fees and State grants. From 1951 to 1960 the ratio was, in general, \$1 to \$3.

Commonwealth grants for the teaching and administrative costs of halls of residence and residential colleges. From 1964 the grants consist of unmatched Commonwealth payments each year of \$5,000 (previously \$4,000) to each college affiliated with or administered by a university, plus the sum of \$30 for each resident student, and a further \$10 for each non-resident student receiving tutorial assistance. The total Commonwealth grant paid in 1966 was \$512,390. In the period 1967 to 1969 the basic grant for affiliated residential colleges will be varied according to the size of the colleges. Colleges with fewer than 100 students will continue to receive \$5,000 per annum, while colleges enrolling 100, 120, 140, 160 and 180 students will receive extra grants in increments of \$500 up to a maximum grant of \$7,500 for a college of 180 or more students. For university halls of residence a Commonwealth grant of \$5,000 per annum is payable without variation for the number of students.

Commonwealth grants for recurrent expenditure in university teaching hospitals. Since 1965 the Commonwealth Government has supported recurrent expenditure at teaching hospitals affiliated

with universities. During 1966 the Commission held discussions concerning capital and recurrent grants for the 1967-69 triennium with the eight universities having medical schools. The Commonwealth Government's support for recurrent grants in 1967 to 1969 relates to three items of expenditure. These are maintenance and service costs incurred on behalf of clinical students, administrative costs involved in clinical teaching, and books for students at libraries of teaching hospitals. The table below sets out the Commonwealth recurrent grants for teaching hospitals for 1965 and 1966 and those approved for each year of the 1967-69 triennium.

**STATE UNIVERSITIES: MAXIMUM COMMONWEALTH GRANTS FOR

The basis of these grants is \$1 from the Commonwealth for every \$1.85 of income received by a university from fees and State grants for these purposes.

Commonwealth grants for building projects in universities. These grants, for the period 1967 to 1969, are shown in detail in the Second Schedule to the *Universities (Financial Assistance) Act 1966*. Payments are made up to a given maximum for each project, on the basis of \$1 from the Commonwealth for every \$1 of State grants. Since 1964 the grant, where appropriate, has included an allowance for furnishings and equipment. Previously, separate grants were provided for these items. Also, since 1964 the schedule showing grants for university building projects includes grants for university computing facilities, but grants for the erection and alteration of buildings for halls of residence administered by universities are shown elsewhere. The total Commonwealth grant under this heading for each university is shown in the following table.

**STATE UNIVERSITIES: MAXIMUM
COMMONWEALTH GRANTS FOR BUILDING
PROJECTS, ETC., 1964 TO 1969**

(\$'000)

Western Australia	1,921	2,000
Tasmania	936	1,008
Total	33,465	41,908

Commonwealth grants for buildings for halls of residence and affiliated residential colleges. The *States Grants (Universities) Act 1963* shows the grant available to each university for both types of student residence in the Fourth Schedule. Previously, grants for buildings for university-administered halls of residence were included in the Schedule showing university building projects. Payments were made up to a given maximum for each project. For halls of residence the grant comprised \$1 from the Commonwealth for every \$1 of State grants. For affiliated residential colleges Commonwealth grants were up to half of the cost of a project, the other half being met from college or State government sources. For the 1964-66 triennium, however, payments were made up to a given maximum for each project on the basis of \$1 from the Commonwealth for every \$1 of residential college funds and State grants. This basis is to be continued for the 1967-69 triennium. The maximum Commonwealth grants available for each State university in this triennium are shown in the following table.

**STATE UNIVERSITIES: MAXIMUM

Tasmania	262,500	401,000
Total	7,335,000	8,952,000

Commonwealth grants for building projects in teaching hospitals. Since 1961 the Commonwealth Government has supported building grants recommended by the Commission for teaching hospitals. The total Commonwealth grants under this heading for 1961-63, 1964-66 and those approved for 1967-69 are shown in the following table. Payments are made on the basis of \$1 from the Commonwealth for every \$1 of income received by universities from fees and State grants for this purpose. Where appropriate the grants include an allowance for furnishings and equipment.

**STATE UNIVERSITIES: MAXIMUM COMMONWEALTH
GRANTS FOR BUILDING PROJECTS, ETC. AT
TEACHING HOSPITALS, 1961 TO 1969**

(\$)

<i>University</i>	<i>1961-63</i>	<i>1964-66</i>	<i>1967-69</i>
Sydney	746,370	582,700	900,000

Tasmania	118,500	780,000
Total	3,699,886	3,111,700	4,927,100

Commonwealth grants for special research projects in universities. A Commonwealth grant of \$1 million was made in the 1961-63 triennium for research equipment on the basis of \$1 from the Commonwealth for every \$1 of State grants. For the 1964-66 triennium the Australian Universities

Commission recommended a Commonwealth grant for special research purposes of \$5 million for the State universities on the basis of \$1 from the Commonwealth for every \$1 of State grants. Of this amount a Commonwealth grant of \$3 million was allocated by the Commission in agreement with State governments. The remaining \$2 million was allocated by the Australian Research Grants Committee (*see* page 549) to individuals or research teams whether inside or outside universities. For the 1967-69 triennium the Commonwealth is providing \$9 million for allocation by the Committee. Grants to universities for general research purposes are being made by the States.

University income and expenditure

The following tables show particulars of the income and expenditure of each university in 1966 and the totals for 1962 to 1966.

(a) Includes funds expended by various government departments and other bodies in respect of universities but not controlled by the universities. (b) In the case of endowments, only income from property and other investment of these endowments is included. The treatment of donations depends on the terms of the gift, etc. When the capital sum is specified to be expended over several years, only the portion of the capital sum allocated to each year is shown as income in that year, but if the capital sum is available for spending without limitation as to time, the full amount is recorded as income in the year it is received, irrespective of whether it is spent in that year or not. The capital value of land and buildings donated to the universities is not recorded as income, unless these properties are sold, in which case the amounts realised are included. (c) Excludes fees collected on behalf of student unions. (d) Income received specifically for new buildings, major alterations and additions to buildings, installation of services, purchase of land and buildings and major equipment.

(a) Included with the University of Adelaide.

Other advanced level institutions

In addition to the degree-granting universities, various other institutions offer courses which may lead to a certificate, diploma, or similar qualification. Included among these institutions are technical colleges, which have been described on pages 521–3, and teachers colleges referred to on pages 524–6.

Colleges of advanced education

The Committee on the Future of Tertiary Education in Australia recommended that interim capital grants be made by both the States and the Commonwealth to twelve specified institutions in five States during 1965–66 preliminary to an arrangement for the expansion and development of tertiary education outside the universities.

This recommendation was accepted by all governments, and the colleges of advanced education are receiving substantial governmental financial support during the 1967-69 triennium. Commonwealth grants are conditional on the States providing \$1 for every \$1 of Commonwealth money for capital purposes and \$1.85 of State money and student fees combined for every \$1 of Commonwealth money for recurrent purposes. The Commonwealth has also established the Commonwealth Advisory Committee on Advanced Education to advise it on the development of the colleges. It is envisaged that the colleges will provide mainly tertiary education and training with a vocational emphasis, as distinct from the academic education provided by the universities. In some States, colleges of advanced education are being developed from existing technological institutions. In the Australian Capital Territory and Tasmania, separate colleges of advanced education are being established. The following table shows maximum Commonwealth grants for the triennium 1967 to 1969 and also maximum grants for capital purposes during the triennium 1964 to 1966.

COLLEGES OF ADVANCED EDUCATION: MAXIMUM COMMONWEALTH GRANTS, 1964 TO 1969

(\$'000)

State	1964-66	1967-69		
	Grants for capital purposes	Grants for capital purposes	Grants for recurrent purposes	Grants for libraries (a)
New South Wales	1,000	7,834	2,069	160
Victoria	1,600	6,312	8,981	180
Queensland	950	3,090	1,826	60
South Australia	250	2,721	1,809	50
Western Australia	1,000	2,743	2,577	40
Tasmania	1,300	554	10
Total	4,800	24,000	17,816	500

(a) A special unmatched grant for the improvement of library facilities in colleges.

The following colleges are to be supported with Commonwealth funds during the 1967-69 triennium. *New South Wales*—Hawkesbury Agricultural College, New South Wales College of Nursing, New South Wales College of Occupational Therapy, New South Wales State Conservatorium of Music, New South Wales Institute of Technology, New South Wales Institute of Business Studies, National Art School, School of Physiotherapy at the Royal Prince Alfred Hospital, Speech Therapy Training School at the Royal Alexandra Hospital for Children, Sydney Technical College, and Wagga Agricultural College; *Victoria*—Ballarat School of Mines and Industries, Bendigo Technical College, Burnley Horticultural College, Caulfield Technical College, College of Nursing, Dookie Agricultural College, Emily McPherson College of Domestic Economy, Footscray Technical College, Gordon Institute of Technology, Longerenong Agricultural College, Occupational Therapy School of Victoria, Physiotherapy School of Victoria, Preston Technical College, Royal Melbourne Institute of Technology, School of Forestry, Swinbourne Technical College, Victorian School of Speech Therapy, Victoria Institute of Colleges, Victorian College of Pharmacy, and Yallourn Technical College; *Queensland*—Queensland Agricultural College, Queensland Conservatorium of Music, Queensland Institute of Technology (Brisbane, Capricornia, and Darling Downs); *South Australia*—South Australian Institute of Technology, and South Australian School of Art; *Western Australia*—Royal Perth Hospital School of Occupational Therapy, School of Mines, School of Physiotherapy, and Western Australian Institute of Technology; and *Tasmania*—Burnie Technical College, Hobart Technical College, Launceston Technical College, and Tasmanian College of Advanced Education.

Agricultural colleges

There are seven State agricultural colleges—Hawkesbury and Wagga (New South Wales), Longerenong and Dookie (Victoria), Lawes (Queensland), Roseworthy (South Australia), and Muresk (Western Australia), offering a comprehensive course of two or three years leading to the award of a Diploma in Agriculture or in a specialised field such as animal husbandry, dairy manufactures or horticulture. The School of Horticulture, Burnley, Victoria, offers a three-year diploma course. Diploma courses are also offered by two independent institutions, the C. B. Alexander Presbyterian Agricultural College in New South Wales and the Marcus Oldham Farm Agricultural College in Victoria.

Most agricultural colleges are government institutions. The government institutions are administered by the State Departments of Agriculture in New South Wales, Victoria, South Australia, and Western Australia, and by the State Department of Education in Queensland. Their purpose is to teach the principles and practices of agriculture and its specialised branches to those intending to take up farming as a career and to those who propose to enter such occupations as agricultural field officer or technical officer in food processing industries.

The minimum entrance standard is usually the penultimate major secondary examination of the State concerned, except in Western Australia where it is the sub-leaving examination. As entry is competitive, there is a tendency for students to hold better than the minimum qualifications. All the colleges are fully residential and the minimum age at which students may enter them varies from fifteen to seventeen years, depending on the college and the type of course.

In addition to their formal courses of training, agricultural colleges offer short courses of from three days to one month to farmers and teachers in country districts.

State expenditure on agricultural education from Consolidated Revenue and certain special funds is shown in the following table. The figures exclude expenditure on pay-roll tax and superannuation and expenditure out of Commonwealth grants to the States for this purpose.

EXPENDITURE ON AGRICULTURAL EDUCATION: STATES, 1962-63 TO 1966-67
(\$'000)

<i>State</i>	<i>1962-63</i>	<i>1963-64</i>	<i>1964-65</i>	<i>1965-66</i>	<i>1966-67</i>

Queensland	626	618	641	655	799
South Australia	234	236	232	232	261
Western Australia	152	176	208	213	258
Tasmania	2	2	3	3	2
Total	2,496	2,576	2,722	2,825	3,646

Schools of forestry

Since 1965, tertiary training in forestry, previously carried out by the Australian Forestry School, Canberra, has been provided by a Department of Forestry in the Faculty of Science within the Australian National University's School of General Studies. A four-year degree course is offered. At the Creswick School of Forestry in Victoria a diploma course can be taken.

Conservatoria of music

There are conservatoria of music in five States. Those in Victoria and South Australia are attached to the Universities of Melbourne and Adelaide respectively. The New South Wales State Conservatorium, the Queensland State Conservatorium and the Tasmanian Conservatorium are controlled by the respective Departments of Education. All five conservatoria offer diploma courses for entry to which matriculation status is not required; at the universities of Sydney, Melbourne, Adelaide, and Western Australia degree courses are also available.

The Canberra School of Music, established in July 1965, is administered by the Department of Education and Science. A three-year full-time diploma course, consisting of both practical and theoretical studies, is available.

Educational training in the defence services

Each of the three defence services maintains institutions for the training of officers. The Royal Military College, Duntroon, Australian Capital Territory, became a college of the University of New South Wales in 1968. The Royal Australian Air Force Academy, Point Cook, Victoria, has evolved from the Royal Australian Air Force College, which was established in 1948 as a tertiary training centre to provide a professional education for permanent officers of the Air Force. It is affiliated with the University of Melbourne and has adopted that University's Bachelor of Science course. The Academy is also permitted to present students for higher degrees in science and the degree of Doctor of Philosophy. Students may also proceed to the University of Sydney to take a degree in

aeronautical engineering. In 1967 the total enrolments in the several officer training Service establishments, which provide academic as well as service training, were as follows: Royal Australian Naval College, Jervis Bay, New South Wales, 115; Royal Military College, Duntroon, Australian Capital Territory, 238; Royal Australian Air Force Academy, Point Cook, Victoria, 67; Royal Australian Air Force Diploma Cadet Squadron, 105. Educational training is also provided in the apprentice training schools conducted by each of the defence Services. The total enrolments in 1967 were: Royal Australian Navy, 763; Royal Australian Army, 472; Royal Australian Air Force, 475. In addition, there were 624 junior recruits in training at H.M.A.S. *Leeuwin*, Western Australia. The Royal Australian Air Force School of Languages, Point Cook, Victoria, conducts courses in French and Asian languages. In 1967 there were 70 students enrolled, of whom 9 were Royal Australian Air Force personnel.

The Australian School of Pacific Administration

The Australian School of Pacific Administration, controlled by the Department of Territories, trains students in the various aspects of service and administration in Commonwealth Territories, including teaching.

Australian Administrative Staff College

Opened in 1957, the Australian Administrative Staff College is a private organisation working in close co-operation with government and other public bodies, the armed services and the trade union movement. It was founded, and is owned, by a large group of leading Australian companies and has its permanent premises at Mount Eliza, near Melbourne. The College conducts residential courses for administrators to further the study of the problems which arise in managerial work.

Commonwealth activities in education

Fields of activity

Although education is primarily the responsibility of the States, the Commonwealth, has instituted a number of measures of direct assistance to educational institutions and to students. It is responsible for public education in its own Territories and is engaged in educational activities incidental to its responsibilities in such areas as defence, external relations, immigration and social services. Education in Commonwealth Territories is described in the chapter *The Territories of Australia*; various schools and colleges for the defence Services are referred to in the chapter *Defence* and on pages 547-8 and other activities which may be considered broadly as educational are referred to in the section on Broadcasting and Television in the chapter *Transport, Communication and Travel*.

Department of Education and Science

A new Commonwealth Department known as the Department of Education and Science was created in December 1966. The new Department, which has absorbed the former Education Division of the Prime Minister's Department including the Commonwealth Office of Education, is concerned with direct grants for educational purposes, e.g. for universities, colleges of advanced education, technical schools, and science buildings, as well as with the new grants for building teachers colleges. It is responsible for assistance to students for the scheme of Queen Elizabeth II Fellowship and for special scholarships offered by overseas countries for Australians. Among the Department's responsibilities are matters in the field of international relations in education, including Unesco and Commonwealth Co-operation in Education, and liaison with State and other education bodies throughout Australia. The Department provides professional advice on education to other Commonwealth departments and authorities. It administers grants to such bodies as the Academy of Science, the Humanities Research Council, the Social Sciences Research Council, and the Institute of Aboriginal Studies, and is responsible for grants for scientific research such as those recommended by the Australian Research Grants Committee. It administers educational services in the Australian Capital Territory.

The *Australian Universities Commission* and the *Commonwealth Advisory Committee on Advanced Education* are responsible to the Minister for Education and Science. The Minister is also responsible for the *Commonwealth Scientific and Industrial Research Organization*, the *National Standards Commission*, the *Australian National University*, the *Institute of Aboriginal Studies*, and the *College of Advanced Education* to be established in Canberra. The Prime Minister's Department continues to be responsible for the National Library and for art, literature and other cultural activities in which the Commonwealth is interested.

Commonwealth Scholarships Board

This Board, under its former title of the Universities Commission, was established by the *Education Act* 1945. Prior to 1945 the Commission had functioned under wartime National Security Regulations. The Board consists of a chairman and three other members. The main responsibilities of the Board at present are advising the Government on the policy and administration of Commonwealth university and advanced education scholarships and Commonwealth post-graduate awards. The Board is responsible for arranging and supervising the training of ex-service personnel and war widows at university and university type institutions under the Korea and Malaya Training Scheme and the Disabled Members' and Widows' Training Scheme.

Advisory bodies

The Commonwealth Government has established various advisory bodies whose fields of concern relate to matters of education. Already mentioned (pages 538-40) is the Australian Universities Commission, which advises the Commonwealth Government on university development. The Commonwealth Advisory Committee on Advanced Education advises the Minister on the balanced development of tertiary education outside universities. Within financial limits nominated by the Minister, the Committee recommends grants to the States for colleges of advanced education and directs grants to any such colleges established by the Commonwealth. The Australian Research Grants Committee advises the Minister on the merit of applications for research grants from individuals and research teams, and suggests the allocation of funds. The Queen Elizabeth II Fellowships Committee advises the Minister on the merit of applicants for these Fellowships, which are awarded for post-doctoral study in the physical and biological sciences, and advises generally on the administration of this scheme of Fellowships.

The Commonwealth Government appointed in 1965 a committee of inquiry into the need for a college of advanced education in the Australian Capital Territory. The committee's report was presented to Parliament in October 1966 and the Government accepted its recommendation that a college, to be known as the Canberra College of Advanced Education, should be established. The construction of the college was commenced in December 1967.

The report of the Advisory Committee on Educational Television appointed in 1964 by the Australian Broadcasting Commission was tabled in Parliament in May 1966.

Assistance to students

The Commonwealth Government provides financial assistance to students through five major scholarship schemes. A total of 22,000 new awards are made available annually under these schemes.

The Commonwealth University Scholarship Scheme makes provision for 8,000 scholarships annually. Of these, 6,000 are open entrance scholarships which are allocated amongst the States in proportion to population and are awarded on the basis of results achieved in Australian matriculation examinations. A small quota of open entrance awards is set aside as Mature Age Scholarships for students who have reached the age of twenty-five years. The remaining 2,000 scholarships are Later Year Awards for students who have already completed one or more years of a university course. Scholarship holders have their fees paid and may receive a living allowance subject to a means test. As from 1 January 1968 the maximum rates of living allowance were \$904.80 per annum in the case of scholars living away from their parents and \$559 for scholars living with parents.

The Commonwealth Advanced Education Scholarship Scheme provides 1,000 scholarships each year for students taking approved courses of advanced education at institutions other than universities. Conditions for selection and benefits are similar to those for university scholarships.

Under the Commonwealth Post-graduate Awards Scheme 500 new awards are made available annually for students taking courses leading to higher degrees at Australian universities. The awards are for full-time study and may be renewed annually up to a maximum period of four years. The Commonwealth contributes an amount of \$2,300 per annum towards the cost of each award. Rates of stipend are fixed by each university and may vary from one university to another. Allowances are not subject to any means test.

Under the Commonwealth Secondary Scholarship Scheme students compete each year for 10,000 scholarships to assist them during the final two years at secondary school. Secondary scholarship benefits are free of means test and comprise a yearly living allowance of \$200, a textbook and equipment allowance of \$50 per annum and reimbursement of compulsory fees up to a maximum of \$150 per annum.

In 1964 the Commonwealth Government also introduced the Commonwealth Technical Scholarship Scheme under which it makes available 2,500 new awards annually to assist students to take approved technical courses. Most of these courses are at certificate level in technical colleges (*see*

page 522). Full-time Technical Scholarship holders receive the same benefits as Commonwealth Secondary scholars. The benefits paid each year to part-time technical scholars are an allowance of \$100, free of means test, and reimbursement of compulsory fees up to a maximum of \$100.

International relations

The Commonwealth has been involved in the considerable extension which has taken place in relations and exchanges with other countries in the field of education. A significant encouragement to this growth has been membership of Unesco, to which Australia has belonged since 1946, when the organisation was founded.

Twelve specialist Unesco committees in Australia are responsible for a wide programme of activities. The Committees' projects include the organisation of Australian and regional seminars, information programmes, and the preparation and circulation of travelling exhibitions which deal with subjects forming part of Unesco's programme. The Australian National Advisory Committee for Unesco co-ordinates the work of the specialist committees and advises the Commonwealth Government on Australian participation in Unesco.

With the co-operation of educational institutions, State Education Departments and other bodies, the Commonwealth has accepted increasing commitments in schemes of international assistance and co-operation. The Colombo Plan Technical Co-operation Scheme, the United Nations Expanded Programme of Technical Assistance, the Australian International Awards Scheme, the Australian South Pacific Technical Assistance Programme, and the Special Commonwealth African Assistance Plan are some of the programmes through which the Commonwealth Government is providing training for overseas students in Australia and is sending Australian experts and equipment to many of the newly developing countries, especially in Asia and Africa. Australia is also actively sharing with other Commonwealth countries in the scheme of Commonwealth Co-operation in Education, which includes the Commonwealth Scholarship and Fellowship Plan. There were some 1,850 sponsored foreign students in Australian educational institutions at 30 June 1967, compared with about 800 in 1956. Over three-quarters of these were Colombo Plan trainees, most of whom were studying in various fields of engineering, science, medicine, education, and economics.

In 1964, by agreement between the United States and Australian Governments, the Australian-American Educational Foundation, financed jointly by the two Governments, was established to operate a scheme of educational exchanges between the United States and Australia. This new scheme has similar aims and purposes to the Fulbright Scheme which it replaces and which had operated wholly on American funds.

Support is given to Australian participation in many international governmental and non-governmental organisations. For example, Australian educationists have attended yearly meetings of the International Bureau of Education, and regular contributions are made to the Bureau's international surveys into various aspects of education. Assistance has been given to bodies such as the Australian Teachers' Federation in sending delegates to meetings of the World Confederation of Organisations of the Teaching Profession.

Grants for science laboratories in schools

During the period 1 July 1964 to 30 June 1968 a total of \$39,623,200 was provided by the Commonwealth Government for the building and equipping of science laboratories in both government and non-government schools. Non-government schools in the Australian Capital Territory and the Northern Territory no longer receive this assistance. In these areas the Commonwealth Government now meets interest charges on loans raised for approved building projects and also repays the amounts of capital borrowed in equal annual instalments over periods of twenty years.

Grants for technical education

The present series of Commonwealth technical training grants will provide \$40,000,000 to the States over the four years 1964-65 to 1967-68. The technical training grants are designed to assist trade and technician training, outside the normal secondary school system and below the tertiary level, conducted in State institutions. Agricultural colleges have been assisted as well as technical colleges. The grants, which do not have to be matched by the States, were made available at a rate of \$10 million a year. They are apportioned between the States on a population basis. In October 1967 an announcement was made that the technical training grants would be continued for a further three years, i.e. to 1970-71, making in all a Commonwealth provision of \$70 million for this sector of education. The new grants will be made under the same general arrangements as for present grants, i.e. at a rate of \$10 million a year and with no matching expenditure required by the States.

The following table shows the provision of the Commonwealth grants for technical education for each State.

COMMONWEALTH GRANTS FOR TECHNICAL EDUCATION
(£)

<i>State</i>	<i>Commonwealth funds available under existing legislation (1964-65 to 1967-68)</i>	<i>Commonwealth funds available over the next three years (1968-69 to 1970-71)</i>
New South Wales	14,976,000	11,127,000
Victoria	11,303,200	8,462,400
Queensland	5,793,600	4,368,600
South Australia	3,732,800	2,868,300
Western Australia	2,857,600	2,197,500
Tasmania	1,336,800	976,200
Total	40,000,000	30,000,000

Grants for other educational purposes

The Commonwealth gives assistance to various educational schemes and institutions. Grants are made each year by the Commonwealth to the Australian Pre-school Association for the development of kindergarten education, to the Commonwealth National Fitness Council, to the Australian Council for Educational Research, to the Department of Adult Education at the University of Sydney for the publication of the *Current Affairs Bulletin*, and to assist in the provision of training in occupational therapy, physiotherapy and nursing.

Migrant education

The Commonwealth Government's post-war immigration policy has brought to Australia a large number of immigrants with little or no knowledge of English. To assist the assimilation of these newcomers into the Australian community, a system of migrant education has been developed to teach them English and to give them information about Australia. This service is provided free of charge to immigrants above school leaving age.

Before arriving in Australia settlers who do not speak English are given some instruction in English by shipboard education officers. Some may have attended classes in Europe organised by the Inter-governmental Committee for European Migration, with which the Australian Government co-operates. In Australia, evening classes are arranged by State Education Departments wherever nine or more migrants in country areas, or twelve or more migrants in city areas, wish to learn English. There is also available through State Education Departments a free correspondence course in English. In addition, English lessons are broadcast regularly by the Australian Broadcasting Commission. The Commonwealth Office of Education provides technical advice on all aspects of migrant education and is responsible for the preparation of teaching materials, while responsibility for the overall supervision of the programme rests with the Department of Immigration, which also meets the costs.

In November 1967, 12,840 migrants were enrolled in classes, and 6,761 were enrolled in radio and correspondence courses. From the inception of the programme in 1948 until June 1968, 647,862 migrants have been enrolled for English tuition.

Technical training by government departments

Although most needs of departments for trained staff are met by apprenticeship schemes and other technical college courses and by the universities, some departments provide training which is not available elsewhere. The most important field for which such training is provided is the training of telephone, telegraph, radio, and television technicians by the Postmaster-General's Department.

Commonwealth expenditure on education

An analysis of Commonwealth expenditure is provided in the following table. Under the heading of 'Direct expenditure on goods and services' current expenditure includes the cost of the Department of Education and Science, the Australian Universities Commission and other administrative expenditure, expenditure by the Australian National University, and the provision of educational

services in the Australian Capital Territory and the Northern Territory (including re-imbursements to States for educational services in these Territories, such amounts being excluded from State expenditure). This expenditure is net of receipts in the form of fees, etc. 'Capital' expenditure, i.e., Commonwealth gross fixed capital expenditure, relates mainly to expenditure on new buildings and equipment by the Australian National University and for schools, etc. in the Northern Territory and the Australian Capital Territory.

(a) Specifically for education.

The foregoing table excludes expenditure on certain items which are related to education, such as payments for the Australian Broadcasting Commission education series, Australian Agricultural Council scholarships and the education of Aborigines. In the Australian National Accounts these items are classified to other appropriate headings. If such expenditure were added to the grand total in the table above the amounts would be: 1962-63, \$59,098,000; 1963-64, \$67,522,000; 1964-65, \$106,461,000; 1965-66, \$118,551,000; 1966-67, \$143,185,000.

Commonwealth figures shown in the table on page 555 differ from those shown here because: education grants to the States by the Commonwealth (mainly for universities, science facilities in State schools, technical schools and colleges of advanced education) are included here, while expenditure by the States from these education grants is included in the State education expenditure figures on page 555; grants by the Commonwealth Government to the Australian National University are shown here, while only the actual net expenditure by that university is included in Commonwealth direct expenditure on page 555.

Adult education

The term 'adult education' as used in Australia refers mainly to non-vocational educational and cultural activities for adults. While the nature of the recognised adult education authorities varies from State to State, their major activities have many common features. Regular courses of lectures are organised on such topics as literature, music, drama, international affairs, languages, and crafts. Some authorities also organise discussion groups, festivals and summer schools, and provide special services for groups in remote areas. In 1960 an Australian Association of Adult Education was formed, and its first annual conference was held in Adelaide in 1961. The Association handles matters pertaining to adult education at a national level and arranges liaison with similar bodies in other countries.

One of the first bodies active in the field of adult education in Australia was the Workers' Educational Association, which formed associations in all States in 1913. Its aims are to bring the universities into closer relationship with the community in general and to provide for higher education in civic and cultural subjects. These associations have been superseded by Adult Education Boards or Councils set up by the State Governments in Victoria, Queensland and Tasmania, and by the University in Western Australia. In the other two States, New South Wales and South Australia, the associations continue to co-operate with the universities in their extension work and are given direct grants by the Governments concerned.

There are throughout Australia various other organisations which are active in the field of adult education. The World Education Fellowship, for example (*see* page 554) has since its inception in Australia been interested in adult education.

The organisation of adult education and some of the activities in each State are described in Year Book No. 53, pages 625 to 627.

Overseas students in Australian educational institutions

The development of closer ties in education between Australia and other countries and the demand for education in many countries in Asia, Africa and the Pacific have brought about a remarkable growth in the number of overseas students who come to Australia to further their education. Part of the growth and much of the awareness of the facilities available may be attributed directly to the schemes mentioned on page 550. Since 1955, when there were about 3,500 overseas students in Australia, the number has increased to more than 13,000 in 1967. More than half attend institutions of higher education such as universities and technical colleges. Between 1955 and 1967 the numbers of overseas students in institutions of higher education had risen from about 1,800 to 7,300, most of whom came from Asian countries. Australian institutions have shown a readiness to accept overseas students, and in many cases special provisions have been made to suit their needs. Nevertheless, population growth and the demand for education, especially for higher education, within Australia have forced many institutions to restrict the admission of overseas students in common with Australian students.

Organisations associated with education

Australian Council for Educational Research

The Australian Council for Educational Research, a non-governmental body, is engaged on educational research in a wide variety of fields, ranging from tertiary to pre-school education. It conducts surveys and inquiries, makes grants to approved educational investigators, serves as a centre for disseminating educational information, provides training for research workers, and standardises and distributes educational and psychological tests for use in Australia. Although this council is an autonomous body, the Commonwealth and State Governments give substantial financial support.

World Education Fellowship

The World Education Fellowship, formerly known as the New Education Fellowship, is a world organisation of parents, educators and other citizens interested in the development of new educational practices. It was founded in London in 1915 and spread to Australia at the time of a regional conference held here in 1937. There are now sections in each State. Its Australia-wide journal *New Horizons in Education* is published twice a year.

Australian College of Education

The Australian College of Education was formed in 1959. Its aim is to bring together leading teachers and administrators in every field of education, to raise the standard of the profession of education in Australia, to establish and proclaim fundamental educational values, and to recognise outstanding contributions to educational practice. Chapters of the College have been set up in all States, and several of the addresses and papers delivered at meetings of the College have been issued in published form.

Parent and citizen organisations

In Australia, where all government schools are administered by central departments, there is limited opportunity for local participation in education. Public interest is expressed through parents committees or organisations of parents and other citizens interested in supporting their local school. The Education Acts of all States provide for the formation of groups of this type, whose aims are to promote an interest in the school by bringing parents and teaching staff together, to help provide supplementary teaching aids and recreation materials, to foster the regular attendance of children at school, and to help find accommodation for teachers. In several States the general maintenance of school buildings, equipment and grounds is a statutory responsibility of the parent groups, costs being covered by government grants. Lunch canteen services at local schools are maintained by groups in some States. Parent groups have established school children's insurance schemes, operated through State Government insurance offices or private insurance companies. These schemes cover accidents to children which occur between the time of leaving home for school and returning home by the usual direct route.

State-wide councils or federations of parents groups are associated in a federal body, the Australian Council of School Organisations.

Expenditure on education

The presentation in the following tables is based on the Australian National Accounts. The figures *exclude* expenditure on goods and services which do not enter the market, such as education provided in the home, or for which it is not practical to impute a value, such as the unpaid services of some teachers, or certain educational services which cannot be separated readily from other services, such as instruction on the job. Most of the education services provided by public authorities are included. Some education services are provided by trading enterprises, such as business colleges, but it is not possible to provide separate figures of their transactions. Nor is it possible to provide separate figures for the expenditure of non-profit organisations, such as non-government schools. Information for these organisations is insufficient to make direct estimates of the cost value of their services. Their contribution is included as part of personal consumption expenditure on education.

Current and capital transactions are shown separately. Current expenditure by public authorities on goods and services classified to education is measured net of receipts, such as fees. These fees are included in private consumption expenditure. Gross fixed capital expenditure represents the value of new capital assets, such as new buildings and additions to buildings, equipment, etc. While it is possible to show to some extent details of education expenditure incurred by the various public authorities, it is not possible to provide consistent figures in total of expenditure on various types of education. Generally, expenditure on libraries, cultural activities, and the like is excluded from 'education', as are most education services provided in the armed forces, at health and welfare institutions, prisons, and the like. Identifiable expenditure on education administration and educational research is, however, included. In many cases strict definitions cannot be applied. Thus it is not possible to differentiate between the components of scholarships which are intended for education fees, textbooks, etc. (clearly education expenditure) and those intended as living allowances. University research cannot be separated from universities' expenditure on teaching. With the exception of expenditure on fees, private expenditure on education (such as for books, equipment provided by parents' associations, and the like) cannot be identified and is therefore excluded.

ESTIMATES OF EXPENDITURE ON EDUCATION: AUSTRALIA
1962-63 TO 1966-67
(\$ million)

	1962-63	1963-64	1964-65	1965-66	1966-67p
PUBLIC AUTHORITY SECTOR					
Direct expenditure on goods and services classified to education(a)—					
Net current expenditure—					
Commonwealth authorities	12	13	18	20	24
State and local government authorities	355	399	458	503	556
Total net current expenditure	367	412	476	523	580
Gross fixed capital expenditure—					
Commonwealth authorities	7	8	8	8	12
State and local government authorities	106	114	127	151	157

Total direct expenditure—					
Commonwealth authorities	19	21	26	28	36
State and local government authorities	461	513	585	654	713
Total, public authority sector	479	533	611	682	749
PRIVATE SECTOR(a)					
Personal consumption expenditure on education	83	91	101	111	124
Gross private fixed capital expenditure on education	19	25	26	32	38
Total, private sector	102	116	127	143	162

TOTAL EXPENDITURE ON EDUCATION

Grand total	581	649	738	825	911
------------------------------	------------	------------	------------	------------	------------

(a) Transfer payments from the public authority to the private sector are included in personal consumption expenditure and therefore excluded from the public authority sector.

Direct expenditure of public authorities excludes government payments to persons and non-profit organisations. Such transfer payments from the public authority to the private sector consist mainly of scholarships to persons and grants to non-government schools. They include all scholarship payments, whether or not they are intended towards the payment of fees or towards living expenses. Total government expenditure on education, including such transfer payments, is set out in the following table.

ESTIMATES OF PUBLIC AUTHORITY EXPENDITURE ON EDUCATION: AUSTRALIA
1962-63 TO 1966-67
(\$ million)

	1962-63	1963-64	1964-65	1965-66	1966-67p
Direct expenditure of public authorities	479	533	611	682	749
Transfer payments to the private sector—					
Cash benefits—					
From Commonwealth authorities	9	10	16	21	27
From State and local government authorities	5	7	8	13	14
Grants towards private capital expenditure—					
From Commonwealth authorities
From State and local government authorities	3	3	3
Total transfer payments	14	17	27	37	44
Total expenditure on education by public authority sector	493	550	638	719	793

Because of conceptual and accounting differences the figures above are not strictly comparable with figures of State expenditure on schools, technical education, etc., Commonwealth expenditure on education, and university expenditure shown in other sections of this chapter.

CULTURAL ACTIVITIES

Libraries

The Munn-Pitt report of 1935 greatly stimulated interest in libraries and librarianship throughout Australia. This is seen in the rapid development of libraries, the passing of legislation in all States to increase library services, and the establishment in 1937 of the Australian Institute of Librarians to improve the standard of librarianship. This body was reconstituted in 1949 as the Library Association of Australia and incorporated by Royal Charter in 1963, and its functions now include the promotion and improvement of libraries and library services. The Association conducts annual examinations in all States, for which students are prepared by courses of instruction. Formal library schools are conducted by the National Library of Australia, Canberra, the Library Board of New South Wales (held at Newcastle Public Library), and the State Library of Victoria, Melbourne. In 1960 the first library school to be attached to an Australian University was opened in the University of New South Wales, and the Royal Melbourne Institute of Technology set up a library school in 1963.

Commonwealth libraries

National Library of Australia. This Library grew directly from the Library of the Commonwealth Parliament established in Melbourne in 1901, the Committee of which soon afterwards announced its intention of developing a library patterned on the Library of Congress at Washington, U.S.A., capable of serving purposes beyond those essential to the Parliament itself, appropriate to a national library and on a national scale. This policy was steadily pursued, so that, in addition to its primary function of serving Parliament, it gradually became a central source of information for the Government and its departments and other agencies, and assumed increasing reference and bibliographical responsibilities in relation to scholarship and research in Australia and abroad. It was also influenced by the basic elements of the national library concept of the older countries of Europe: namely, that a national library is the proper place to collect the national literature systematically and to make it known and available for use, and that it is a place to which scholars may turn for what is most significant in the literature of other countries. For these growing extra-Parliamentary activities the Parliamentary Library Committee, in 1923, adopted the title of Commonwealth National Library.

In 1957 a committee appointed to examine the future control and functions of the Commonwealth National Library recommended its establishment as the National Library of Australia separate from the Parliamentary Library, with wide functions and controlled by a board subject to a Minister; the transfer, as a separate agency to an appropriate department, of its Archives Division, which constituted the Commonwealth's agency for the custody and organisation of departmental records of permanent value which need no longer be held within departmental offices; and that the Parliamentary Library be a separate library under separate Parliamentary control. Continuing co-operation, where possible, between the two libraries was also proposed.

Effect was given to these recommendations by the *National Library Act 1960*, which created the National Library of Australia as a body corporate under the control of a Council of nine members, of whom one is a Senator elected by the Senate, one a member of the House of Representatives elected by that House, and seven appointed by the Governor-General. Its functions are: to maintain and develop a national collection of library material, including a comprehensive collection relating to Australia and the Australian people; to make the national collection available to such persons and institutions in such manner and subject to such conditions as the Council determines with a view to its most advantageous use in the national interest; to make available such other services in relation to library matters and material, including bibliographical services, as the Council thinks fit, particularly for the purposes of the library of the Parliament, the departments and authorities of the Commonwealth, and the Territories of the Commonwealth; and to co-operate in library matters (including the advancement of library science) with authorities or persons, whether in Australia or elsewhere.

The National Library comprehensively collects and preserves Australian books, periodicals, newspapers, government publications, pictures, prints, manuscripts, maps, moving picture films, and sound recordings. It is assisted in this by the deposit provisions of the *Copyright Act 1912-1966* and has also been enriched by the acquisition of such notable collections as the Petherick collection of 16,500 items in 1911, the Cook manuscripts in 1923, the Cumpston collection on Public Health in Australia in 1936, the Mathews Ornithological collection in 1940, the Nan Kivell collection of 16,000 items of Australian and Pacific interest including original paintings, prints, manuscripts, and printed material in 1959, and the Ferguson collection which is still under transfer. A feature of the Library's Australian work is the copying on microfilm, in association with the Public Library of New South Wales, of all important unique material overseas relating to Australia, including over three million pages in the Public Record Office in London. Compilation of a Guide to

Collections of Manuscripts Relating to Australia began in 1964. The Library maintains a permanent exhibition of selected paintings, prints and other historical material from its collections. This exhibition is displayed in Parliament House, Canberra.

The Library publicises Australian publications, both at home and abroad, through select lists, the *Australian Books* (annual), the *Australian Public Affairs Information Service*, which is a subject index to current literature (monthly with an annual cumulation), and by collections of Australian books maintained by it at all posts at which Australia is officially represented abroad. In London and New York the National Library maintains and staffs Australian reference libraries supervised by its own Liaison Officers in those centres. In the discharge of its wider bibliographic responsibilities, the Library publishes the *Australian National Bibliography* (weekly with monthly and annual cumulations), which lists books, pamphlets, sheet music, government publications and the first issue of each new periodical or newspaper. Commonwealth and State official documents, both monographic and serial, are listed in *Australian Government Publications* (annual). The Library is also building up union catalogues of serials in the social sciences and humanities, and of monographs in Australian libraries. A three volume loose-leaf edition of *Serials in Australian Libraries: Social Sciences and Humanities; a Union List* was completed in 1967 and will be continuously revised. A second, single volume edition of *Newspapers in Australian Libraries: a Union List* was also issued in 1967.

In 1956 the Australian Bibliographical Centre was established within the National Library to serve as the secretariat of the Australian Advisory Council on Bibliographical Services. The Council, made up of representatives of the National Library, State Libraries and library boards, Parliamentary libraries, public libraries, college libraries, school libraries, special libraries, the Commonwealth Scientific and Industrial Research Organization, each of the universities, the Library Association of Australia and archivists, plans the further development and co-ordination of bibliographical services and co-operates with Unesco and its committees. In recent years the Council has also concerned itself with the adequacy of the book resources within Australia as a whole. The Centre organises bibliographical projects recommended by the Council and operates as a centre for bibliographical information in Australia and overseas. It has published *Resources of Australian Libraries*, a summary report of a survey conducted for the Council in 1961 by Maurice F. Tauber (1963), and *The Development of National Book Resources* (1965), which examines the problems in dealing with the deficiencies revealed by the Tauber Survey. The first edition of *Current Projects in Library Automation: an Australian Directory* appeared in 1967.

The Library acts as a central library of documentary and educational films, its film collection containing approximately 8,000 titles, together with Australian historical films and a great number of film strips. It published *Australian films: a Catalogue of Scientific, Educational and Cultural Films, 1940-58* in 1959 and annual supplements in succeeding years. A revised edition of the *Catalogue of 16-mm. Films*, which lists all films available for loan, was published in 1960. It was supplemented in 1964 and annual accession lists are issued. Special efforts are made to discover and preserve samples of early Australian film production.

Through its Extension Services Section the Library conducts the Canberra Public Library Service for residents of the Australian Capital Territory, to whom 873,492 books were lent during 1966-67. It also assists in the provision of similar services in the Northern Territory, the Territory of Papua and New Guinea, and Norfolk Island.

The National Library's collections contain approximately 1,000,000 volumes, 26,500 paintings, pictures and prints, 23,500 reels of microfilm, 1,860 running feet of manuscripts, 25,000 motion picture stills, 16,000 reels of moving picture films, 160,000 maps, and 450,000 aerial photographs. Special features of the book collection are its strong holdings of Australiana, materials relating to the Pacific area and east and south-east Asia, the publications of foreign governments and international organisations, and works in the social sciences, particularly in political theory and economics.

Patent Office Library. The Library of the Commonwealth Patent Office, Canberra, contains approximately 11,250 books and a wide variety of periodicals and other literature relating to pure and applied science, industrial technology and the industrial property (patent, trade mark, design and copyright) laws and practice of most countries. Patent specifications of inventions are received from the principal countries of the world; present holdings are more than 9,989,500. Indexes include a microfilm of a classified index to 3,000,000 U.S.A. patents and translations of abstracts of U.S.S.R. patents.

Commonwealth Scientific and Industrial Research Organization. The library holdings of the Organization cover the pure and applied sciences. In addition to the Central Library in East Melbourne, each of the Divisions and Sections has a specialised collection covering such subjects as food preservation, forest products, chemistry, physics, animal health, and fisheries. The collections are particularly strong in the publications of overseas scientific and technical research institutions, with many of which extensive exchange arrangements have been made.

The Central Library maintains a union catalogue of the holdings of all C.S.I.R.O. libraries and is responsible for the following publications: *Scientific Serials in Australian Libraries*; *Australian Science Index*, an index of articles published in Australian scientific and technical periodicals; a *Directory of Scientific and Technical Research Centres in Australia*; and *C.S.I.R.O. Abstracts*, which include abstracts of papers published by C.S.I.R.O. officers, C.S.I.R.O. translations, translations available from other Australian organisations, and additions to the British Commonwealth Index of Scientific Translations. The larger libraries in the Organisation have photocopying facilities which, while normally for internal use, provide a service for the public when a publication is not held elsewhere in Australia.

The Australian War Memorial Library. In the War Memorial library are housed the documentary and pictorial records of Australia's fighting services in the 1914-18 and 1939-45 Wars, together with collections covering the war in Korea, 1950-53, and earlier wars in which Australian troops participated—Sudan, 1885; South Africa, 1899-1902; and the Boxer Rebellion in China, 1900-01. Books, periodicals and other records covering contemporary trends and events in the fields of military history and military science are constantly being added, including a coverage of operations in South Vietnam.

The printed records section contains approximately 70,000 volumes, a large collection of military maps, newscuttings and newspapers, sound recordings of war leaders, personalities and events, war posters, and postage stamps. Many personal collections by distinguished soldiers and historical documents relating to the wars have also been placed in the Memorial's custody for preservation. Written records comprise correspondence files of headquarters and units of both World Wars, and the original war diaries compiled from day to day by each unit during its service. The collection of official war photographs covering the 1914-18, 1939-45 and Korean Wars numbers over 250,000, and a collection of official motion picture film depicts Australia at war. Facilities for public research are not yet fully developed, but requests for information are met where practicable.

Other Commonwealth Government libraries. Most Commonwealth authorities have specialised collections in their own fields and in addition draw largely on the National Library.

Northern Territory Library Service. The Northern Territory Library Service maintains five centres in the Territory. At 30 June 1967 stocks totalled 55,792 volumes which were held at the following centres: Darwin, 25,234; Nightcliff, 5,015; Alice Springs, 16,431; Tennant Creek, 4,892; Katherine, 4,220.

State libraries

State Public Libraries. In each of the capital cities there is a well-equipped public library, the libraries in Melbourne and Sydney especially comparing very favourably with similar institutions elsewhere in the world. The following paragraphs describe these libraries and other library services in each State.

New South Wales. The Free Library Movement in New South Wales, founded for the establishment of a system of public libraries on the basis suggested in the Munn-Pitt Report of 1935, helped to pave the way for the Library Act, 1939-1959, which was fully proclaimed as from 1 January 1944. At 30 June 1967, 178 councils had established libraries in terms of the Library Act. During 1967 they spent on their libraries \$4,559,411 including \$1,079,722 received in subsidy. There are 239 libraries, of which 72 are in the metropolitan area and 167 in the country. There are also 23 bookmobiles, of which 2 are in Sydney, 7 in the suburbs of Sydney, and 14 in country municipalities and shires. These libraries contain 3,490,349 volumes.

New South Wales departmental libraries are staffed by officers attached for duty from the State Library, which also provides a central cataloguing service for municipal and shire libraries constituted under the 1939-1959 Act. The State Library maintains an adult education section servicing adult education activities for the universities of Sydney and New England and the Workers' Educational Association.

The Circulation Department lends books to municipal and shire libraries and to individual borrowers. The total stock of the Department is 65,098 volumes, and 44,663 books were lent to public libraries and individual borrowers during 1966-67.

The State Library, known as the Public Library of New South Wales, includes a general reference department of 537,574 volumes, together with the Shakespeare Tercentenary Memorial Library, and the Mitchell and Dixon Libraries and Galleries which are mainly devoted to Australian and Pacific material. The Mitchell Library, with more than 60,000 volumes and pamphlets and 300 paintings, was bequeathed to the trustees of the Public Library in 1907 by Mr D. S. Mitchell, together with an endowment of \$140,000. In 1967 there were 226,904 volumes in the library, in addition to valuable manuscripts, maps and other material. In 1929 Sir William Dixon gave a collection of historical pictures then valued at \$50,000. These were subsequently added to and at his death in 1952 Sir William bequeathed the whole of his collection of books, manuscripts, pictures and other material,

together with an endowment of more than \$226,000, mainly for the printing or reprinting of historical documents relating to Australia and the Pacific. The total number of volumes in the State Library now exceeds 880,000 apart from manuscripts, historical pictures and other material. The maintenance and control of the ordinary lending branch of the Public Library were transferred in 1908 to the Sydney Municipal Council to become the City of Sydney Public Library. The State Library, which had previously been the repository for State archives, transferred this responsibility to an Archives Authority in June 1961. The Authority consists of nine members, of whom the Trustees of the Public Library have a right to nominate one.

Other important libraries in New South Wales are: Teachers' Colleges, 308,853 volumes; the City of Sydney Public Library, 279,682; Railway Institute 169,657; Technical Education Branch, 217,688; Australian Museum, 35,207; Government Transport Institute, 27,204; New South Wales Teachers' Federation Library, 21,000; Workers' Educational Association, 14,920; and the Library at the National Herbarium, 10,969 volumes. At 30 June 1966 the Parliamentary Library contained 157,821 volumes.

Victoria. The modern movement in municipal library service dates from the inception of the Free Library Service Board in 1947. The Free Library Service Board was a State Government instrumentality which planned, encouraged and subsidised the development of municipal library services. Under the *Library Council of Victoria Act* 1965 the control of the Board passed to the Library Council of Victoria and in 1966 its office was redesignated the Library Services Division of the Library Council.

In 1968, 143 Councils, representing 2,624,000 Victorians, shared Government library grants amounting to \$1,199,000. Of this amount, \$1,121,483 was direct municipal library subsidy. With the addition of expenditure from these Councils' own funds the total expenditure on municipal library services for 1967-68 will be nearly \$3,000,000, representing an average expenditure of approximately \$1.11 cents per head of the population served. In 1967, 600,000 borrowers used their free library services, now totalling 2,033,000 books, to the extent of almost 12 million issues.

Particularly in the country, service has been developed by means of regional libraries. These services, of which there are 20 at present, comprising a total of 86 councils, consist of groups of councils which pool their resources, book-stocks and trained staff. A development since 1962 has been the formation of three Metropolitan Regional Library Services. The Victorian Government provides an Establishment and Regional Library Development Grant of \$50,000 per annum. In 1967 this was increased by \$10,000.

There are 9 bookmobile services operating in Victoria, 6 in country regions and 3 in the metropolitan area.

The State Library of Victoria was established in 1856. It is controlled by the Library Council of Victoria and receives its finance from the State Government. The reference collections now total about 850,000 items, and the lending and travelling libraries have another 185,000 volumes. In addition, the library files 4,500 current periodicals, about 2,000 government publications from Australia and overseas, and 500 newspapers, in all about 50,000 volumes. Special collections include the J. K. Moir Collection of Australiana, the M. V. Anderson Chess Collection, and the Green and Brodie Shipping Collections. The Victorian Historical Collection contains pictures, drawings, prints, and objects of historical interest. The Archives Division is responsible for the preservation of government records.

Queensland. The Library Board of Queensland was established in 1945 under the provisions of 'The Libraries Act of 1943'. Its duty is to attain the fullest co-operation and improvement of the library facilities of the State, with the object of placing such facilities on a sound basis for the benefit and educational improvement of the citizens generally. The Board consists of six members including the State Librarian as *ex officio* member and secretary. A general function of the Board is to ensure that the fullest co-operation exists with the Department of Education, the University of Queensland, local bodies, and other bodies having for their object the encouragement of education, literature and the arts and sciences. A specific function of the Board is the control and management of the Public Library of Queensland. Its policy is to build up the main collection of the Library as the State's reference centre.

The Country Extension Service, which is administered as a department of the Public Library, lends books of non-fiction to adults and children residing outside the metropolitan area and to municipal libraries in areas of low population.

The Oxley Memorial Library, established in 1923, has been administered as a department of the Public Library since 1946, but the collection has been kept separate. It contains books, manuscripts, pamphlets, and other graphic material relating to the history and literature of Australia, and of Queensland in particular, and provides facilities for research students in Queensland literature and history.

In 1958 the section of the Libraries Act dealing with the preservation of public records was proclaimed, and in 1959 an Archives Section of the Public Library was instituted and an archivist appointed.

The Library Board staffs the libraries of the Teachers' Colleges and the Queensland Institute of Technology as well as the libraries of eleven government departments, of which the largest is the Department of Primary Industries. The work is co-ordinated by an officer-in-charge, who also gives assistance and advice to independently staffed departmental libraries.

Since 1948 a course in librarianship has been held annually at the Public Library for the purpose of preparing trainees for the examinations of the Library Association of Australia, up to 1961 for its Preliminary Examination, and from 1962 for subjects 1 to 3 of its re-organised Registration Examination. In 1959 a course covering some subjects of the Association's Registration Examination was inaugurated at the Central Technical College, Brisbane.

The holdings of the Public Library of Queensland and its extension services in 1966-67 were: main reference collection, 188,428 volumes and 11,032 maps and pamphlets; Country Extension Service, 89,700 volumes; Oxley Memorial Library, 25,049 volumes and 28,230 maps, pamphlets and miscellaneous items.

Local authorities are empowered by the Libraries Act to establish and conduct library services as a function of local government. The Board encourages local authorities to use these powers. In 1966-67, 79 local authorities were conducting 137 library services. The Brisbane City Council has established 18 of these libraries. There were 112 libraries in Queensland free to adults. To help overcome the problems of a large area and sparse population, various local authorities provide library services on a regional basis. By 30 June 1967, 4 regional library services had been established; the South Western (7 shires), the Central Western (8 shires), the North Western (10 shires), and the Central Highlands (5 shires), with headquarters at Charleville, Barcaldine, Mount Isa, and Emerald respectively. During 1966-67 the Board received a grant of \$561,397 from consolidated revenue to finance the activities of the Public Library and to pay subsidies to local bodies conducting free library services of 50 per cent of endowable expenditure on books and the acquisition or improvement of library buildings and equipment with an upper limit of \$8,000 in respect of new library buildings, and 50 per cent of endowable expenditure on books, equipment and maintenance to local bodies conducting subscription libraries. Subsidies were paid to 4 regional library service boards, 52 local authorities and 39 other bodies.

The Queensland Parliamentary Library was established by the first Parliament in 1860. At 30 June 1967 it contained 96,309 volumes and pamphlets. Included in its valuable collection are long sets of periodicals, newspapers, statutes and government publications, which are currently maintained. The books are devoted largely to the social sciences, although history, geography and biography are well represented. Among the features of its service to Members of Parliament are its newspaper clippings file and copying facilities.

'The Libraries Act Amendment Act of 1949' provides for the Public Library and the Parliamentary Library each to receive a copy of all books, pamphlets, maps, and other printed material published in Queensland.

South Australia. In the reference department of the State Library of South Australia there are about 247,416 volumes, most of which may be borrowed. Approximately 5,000 periodical titles are filed and the collection of newspapers includes every newspaper printed in South Australia. There are 49,020 volumes in the Adelaide Lending Service; these books are available to persons living in the metropolitan area. The Country Lending Service has 345,351 volumes, of which more than one-third are suitable for children. The Adelaide Lending Service lent 283,563 books in 1966-67, and the Country Lending Service, 219,133. The Library has an active programme for the publishing of facsimile editions of early Australian texts.

The Research Service specialises in scientific and technical inquiries and supplements the resources of the State Library by borrowing from other libraries and by obtaining microfilm copies of material not available locally. It has an extensive collection of trade catalogues and standards.

The library of the Parliament of South Australia held approximately 60,000 volumes at 31 December 1967.

There are 28 local public libraries in South Australia provided by 22 local government and other authorities. The libraries are subsidised on a \$1 for \$1 basis by the State Government. The Libraries Board of South Australia, through the State Library of South Australia, provides various central services. Book-stocks are pooled in the State Library of South Australia and are interchanged between the libraries.

At the end of June 1967 these local public libraries contained 195,684 books. There were 111,205 registered borrowers. During 1966-67, 1,808,768 books were lent.

Western Australia. In 1955 the Library Board of Western Australia was made responsible for all public library services throughout the State to which the State Government contributes funds. The Board has the following major functions: to encourage local authorities throughout the State to establish public libraries and to provide as a State subsidy all books and bibliographical services necessary for such libraries when established; to administer the State Reference Library; to advise the Government on all matters relating to libraries; and to provide for the training of librarians.

Local public libraries are subsidised on a \$1 for \$1 basis, the local authority providing accommodation and staffing and the Board all books and related services. The Board provides at least one volume per head of the population. All non-fiction books may be made available at any public library throughout the State on request to the Board. All cataloguing is done by the Board. The first library under this scheme was opened in August 1954. By 31 December 1967, 106 libraries had been established.

The State Reference Library, established in 1887, is the reference division of the Library and Information Service of Western Australia. In addition to providing the normal facilities of a reference library for the metropolitan area, it extends its service throughout the State through local public libraries. It is divided into three divisions responsible for service in the subject fields of Western Australian history, science and technology, and the humanities.

The State Bibliographical Centre and the Central Music Library are housed in the State Reference Library Building, and there is also a commercial information centre. The State archives are maintained by the State Reference Library and managed by the staff of the Battye Library. The State Reference Library is fully equipped with microfilm and photocopy apparatus.

The book-stock of the Board at 30 June 1967 was: 780,932 volumes, comprising circulation stock (including books in public libraries), 536,757 volumes; State Reference Library, 229,943 bound volumes; Central Music Library, 3,200 books on music and 11,032 scores.

The University of Western Australia, through its Adult Education Board, manages the Adult Education Library of some 18,500 volumes of general reading and fiction. Books are sent to country readers each month.

There are over 130 special libraries in government departments and industrial firms. Union catalogues of periodicals and books received in the libraries in Western Australia are maintained by the Library Board of Western Australia in the Bibliographical Centre in the State Reference Library building.

Tasmania. The Tasmanian Library Board administers the State Library in Hobart, the extension of library services throughout the State and State aid to libraries, and controls the State Archives. State Government expenditure on library services in 1966-67 was \$497,344.

Through the State Library, the Board provides reference and information services, documentary film and recorded music libraries, and arranges recorded music recitals, film screenings, displays, and exhibitions, etc. Two bookmobiles, based in Hobart, provide a library service to the rural areas of thirteen southern municipalities. All municipalities receive loans of childrens books, the number of books being dependent on the child population of each municipality.

To qualify for State aid for an adults library, a municipal council is required to spend on library services an amount equal to a rate of 0.25 cents in the dollar of the assessed annual value of all rateable property in the municipality. In 1967 all municipalities except Glamorgan received assistance. The Board's aid consists of the loan of collections of books at least equal in value to municipal expenditure from rates. Most of the books supplied this way are exchanged by the Board each year.

A regional library, formed by the Board to give a more efficient and comprehensive service, operates in the north-western municipalities of Penguin, Burnie, Circular Head, Wynyard, and Waratah, with headquarters in Burnie. The regional scheme has a reference library in Burnie, small libraries in the larger towns and a bookmobile for rural areas.

The Hobart City Council library service is amalgamated with the State Library in Hobart and is run by the Board. In addition, a bookmobile serves schools in the metropolitan area. The libraries of the cities of Glenorchy and Launceston are administered by the Board; a bookmobile serves municipalities close to Launceston. At 30 June 1967 the State Library in Hobart held 109,512 reference volumes and 103,412 lending volumes. Municipal libraries (which include Launceston and Glenorchy) had 368,396 books, of which 156,507 were children's books. The State Library works closely with the Parliamentary Library and provides a reference officer to help with Member's queries when Parliament is in session.

University libraries

These libraries provide material not only for the education of graduates and undergraduates, but also for research workers and practical investigators all over the continent. Much of the material

they contain is not available elsewhere, for although in most cases smaller, they are in many directions more highly specialised than the public libraries. They lend to one another and to State and private institutions as well as to individual investigators. Each of them is governed by a librarian, who is responsible as a rule to an executive sub-committee and a committee which is practically co-extensive with the professorial staff.

The following table shows the volumes held, accessions during the year, and expenditure of the Australian university libraries.

UNIVERSITY LIBRARIES

<i>University</i>	<i>Volumes (a)</i>	<i>Accessions during year (b)</i>	<i>Expenditure (c)</i>
	'000	'000	\$'000
Australian National . . .	435	37	649

Australian National University. This library comprises three main sections attached to the Institute of Advanced Studies, the School of General Studies, and the Centre of Oriental Studies. The Advanced Studies collection of some 236,000 volumes is closely related to the special interests of the six Research Schools in the Institute. It has a wide range of periodical literature and is strong in the fields of anthropology and linguistics, mathematics, mathematical statistics, physics, chemistry, and the non-clinical medical sciences, and has sought to acquire a good working collection of secondary material of high standard in the social sciences. The General Studies collection (approximately 143,000 volumes) is designed to further teaching at all levels in the Faculties of Arts, Economics, Law, and Science, and to provide research facilities in the humanities. The Oriental collection (mainly Chinese, Japanese, and Indonesian) is primarily a research collection and at present contains approximately 79,000 volumes. The resources of the National Library of Australia are available to members of the University, who also have access to many specialised collections of material held by government instrumentalities in Canberra.

University of Sydney. The library consists of the central collection which is known as the Fisher Library, the Law Library, the Medical Branch Library, the Burkitt Library for pre-clinical medicine, and some 49 departmental libraries. The University Library holds a total of more than one million volumes.

The first books were acquired in 1851, and shortly afterwards the library of Sydney College was added. The collection of Nichol D. Stenhouse was acquired in 1878 as the gift of Thomas Walker. In 1885 Thomas Fisher bequeathed the sum of \$60,000, the income from which is used as a book fund. The Fisher Fund was matched in 1961 by establishment of the W. H. and Elizabeth M. Deane Library Fund. Perhaps the finest collection in extent and importance which has been given to the University is that of Sir Charles Nicholson. There have been numerous other benefactions, among which may be mentioned the library of Sir Francis Anderson, the W. H. Deane collection of books and manuscripts and the Dalley-Scarlett music library. In 1961 the University acquired the English literature collection of the late Hugh Macdonald, and the late Professor J. Stewart's library, an outstanding collection on archaeology and numismatics, was acquired in 1963. The Sydney University Library has an extensive collection of mediaeval manuscripts and early printed books.

University of New South Wales. The libraries in this university consist of the Central Library and a Bio-medical Library at Kensington. There is also a library at Wollongong University College and the Broken Hill Division. In December 1967 the university had 491,119 volumes in its libraries.

University of New England. The library was founded in 1938, when the New England University College was established. Sir William Dixon was its first benefactor. The library, which contains 200,000 bound volumes, is adding to its collection at the rate of approximately 20,000 volumes a year. It receives approximately 5,000 current periodicals annually. It is housed in a three-storied, air-conditioned building, which also makes provision for a bindery and photographic and archives division. A post-graduate and research library is planned as an extension of the present building. The library has its own lecturer in bibliography and library service and conducts formal courses in librarianship. A multi-copy collection of 36,000 volumes for external teaching is housed in the Public Library of New South Wales in Sydney.

University of Newcastle. Beginning in 1951 with science-technology materials and associated, through common staffing and housing, with Newcastle Technical College Library until 1961, the library now has a collection of 121,000 volumes and is increasing at the rate of about 12,000 volumes per year. More than 3,000 periodicals are received regularly by subscription and donation. The resources of the library are used extensively on inter-library loan both within the Newcastle district, particularly by local industries, and increasingly, as the library's resources grow, by the other research libraries of the country.

In January 1968 a major part of the library's collections was transferred to temporary premises at the new site of the University at Shortland. The first stage of the permanent library building was completed in January 1968. To it will be brought, as the departments move to Shortland, the one-sixth of the collection still at Tighes Hill. There are no departmental libraries.

Macquarie University. The library began in 1965 to acquire books and to plan for its opening in 1967. It occupied temporary quarters in North Sydney until mid-1967, when it moved into the first stage of a new air-conditioned building, which is centrally situated on the university site at Eastwood and planned to house eventually 800,000 volumes. The library subscribes to 1,700 serials and has an audio-visual area. When the library opened in March 1967, approximately half of its total collection of 70,000 volumes had been donated by private individuals, firms and other libraries. In March 1968 its stock stood at 143,618 and its acquisition programme was still being heavily supported by donors. The library staff conducts an extensive programme of lectures and tutorials in bibliography and library use for both undergraduate and post-graduate students.

University of Melbourne. Early in 1854 the first allocation for books was made, but the library was housed in temporary quarters until 1959. The W. L. Baillieu Trust made available the first instalments of a \$200,000 gift for building purposes, which have been followed by subsequent gifts and substantial grants from the Commonwealth and State Governments, and a new building was occupied at the beginning of 1959, the first in the university to be designed specifically for library purposes. Since 1959 the use of the library has increased fourfold, and during the academic year admissions of readers to the building averaged 8,000 a day. The building has become inadequate for all purposes and a doubling of its present floor area is required urgently. The resources of the library are also used extensively on inter-library loan by government instrumentalities, industries and other organisations throughout Australia. The University Library, including 13 branch libraries in various departments, is administered from the centrally situated Baillieu Library. The large medical branch library is specially rich in periodicals.

Monash University. The library contains about 273,500 volumes and subscribes to some 6,400 journals. It has been decided that the library organisation will develop into four large units—the main library, a bio-medical library, a law library, and a library for the physical sciences and technology. The physical sciences and technology library has been named the Hargrave Library and was opened in December 1962. The main library, catering mainly for the humanities, was occupied in November 1963. The bio-medical library was occupied in 1966, and the law library in February 1968.

La Trobe University. The university was founded in December 1964 and the first books were acquired in 1965. Library activities began at 474 St Kilda Road, the temporary headquarters of the university itself. The move to the new building at the university site at Bundoora was completed in the first week of February 1967. The library is housed in a three-storey air-conditioned building which is designed to be extended horizontally in two stages by 1977. The first stage has accommodation for about 130,000 volumes and 420 readers. By the end of 1967 the library had acquired about 70,000 volumes and received about 1,400 periodicals and serials, catering for the Schools of Agriculture, Biological Sciences, Humanities, Physical Sciences and Social Sciences.

University of Queensland. The library was founded in 1911. There is a main library and a number of departmental libraries at St Lucia, and medical libraries at the Medical School and at teaching

hospitals. The library receives more than 14,000 current periodicals. It has notable collections in geology, the history, development and culture of the Pacific region, and tropical aspects of agriculture, veterinary sciences and biological sciences. The total collection numbers some 480,000 volumes.

University of Adelaide. The main library is the Barr Smith Library which commemorates its first benefactor, Robert Barr Smith, who, with members of his family in and after 1892, gave the university over \$100,000 for the library. Seats are provided for 1,000 readers, including 270 in the main reading room. There are branch libraries for medicine, law and music, with seats for 450 readers. The South Australian branches of the Australian Medical Association, the Australian Physiotherapy Association, and the Australian Dental Association make annual contributions towards the maintenance of the medical library in return for borrowing privileges for their members. The Waite Agricultural Research Institute has a separately administered library of about 22,500 volumes in agricultural science. Total holdings of the university libraries at the end of 1967 were 459,000 volumes. Some 15,375 serial titles are received.

The Flinders University of South Australia. The acquisition of books for the library commenced in 1963 when the first library staff were appointed. By the time teaching began in March 1966 a collection of some 60,000 volumes had been assembled. At the end of 1967 the collection contained over 100,000 volumes. Approximately 20,000 volumes are being added each year, and the library receives currently about 3,000 periodical titles. During the early development of the library emphasis is being placed on material to support the current teaching and research programmes of the university. Special attention is being paid to fields where little material is available elsewhere in Australia, for example Spanish literature. The first stage of the library building was occupied at the end of 1965, and the second stage extension which completed the building was finished late in 1967.

University of Western Australia. The first full-time library staff was appointed in 1927. Provision for a permanent library building was not possible when the university moved to its present site, and space and facilities were inadequate for many years. A new four-storey building was completed at the end of 1963. The building provides facilities for microfilm readers, typewriting booths and photo-copying facilities. The University Library developed very slowly in the early years, but recently has been adding about 20,000 volumes a year to its stock. In addition to the main library there are a number of departmental libraries of which the more important are engineering, agriculture, pre-clinical, and law. There is also a medical library, in accommodation provided by the Royal Perth Hospital, for the use of the medical school.

University of Tasmania. To cater for an anticipated enrolment during 1968 of 2,600 students, the library currently has a collection of 171,788 volumes, and files 4,786 serial titles. The 1968 vote for all purposes is \$109,000, of which \$40,500 is allocated for books and \$59,500 for serial publications and back sets. The university library collects private and business archives and has a small rare book collection.

Children's libraries and school libraries

New South Wales. Children's libraries are being developed as departments of municipal and shire libraries. The Education Department maintains a school library service for the fostering of State school libraries, which are maintained partly by parents and citizens associations and partly by departmental subsidy. Secondary and central schools, and an increasing number of primary schools, have teacher librarians.

Victoria. Throughout Victoria an essential feature of libraries is the service for children; 129 municipal libraries share in a special children's library grant of \$10,000, and on the staff of the Library Services Division is a professional children's librarian who supervises and advises on work with children.

The Education Department is making provision for the building of library rooms in new schools. Where accommodation is available in existing schools, library furniture is provided free of costs to the schools, and the Government subsidises the purchase of books. In June 1967, 619 schools had central libraries. The Education Department has a library service officer with a small staff to advise and assist schools in the establishment and organisation of libraries. A one-year course for the training of teacher-librarians was established at Melbourne Teachers' College in 1955. Approximately 30 teachers are trained each year.

Queensland. The Library Board of Queensland stresses to local bodies the importance of providing adequate library services for children. There are in Queensland 135 libraries free to children, of which 18 are conducted by the Brisbane City Council. The children's libraries at Rockhampton, Toowoomba and Townsville are particularly active. Country children who are not catered for locally may borrow from the Country Extension Service which possesses a separate children's collection. The purchase of books for State school libraries in Queensland is financed by school

committees and parents associations, with a subsidy from the Department of Education on a \$1 for \$1 basis. Trainees at the teachers colleges are instructed in school library organisation and management.

South Australia. A children's library of 38,965 volumes is used by school classes and individual children living in the metropolitan area. In 1966–67, 209,245 books were lent. There is a large collection of historical children's books assembled for the use of research workers. In August 1957 a youth lending service was opened for young people from thirteen to eighteen years of age. It has a stock of 15,374 volumes, and in 1966–67, 99,304 loans were recorded.

Western Australia. The Education Department provides library services, issues of books and subsidies on library books to schools. School libraries are supplied with shelving, furniture, stationery, and library supplies. The Library Services Branch of the department provides advisory services to assist schools in all aspects of library organisation and service. It also relieves schools of the professional and routine tasks of book preparation by providing a central cataloguing service for both new books and those previously uncatalogued in school libraries, a central processing service to cover books in plastic and prepare them for use, and a library book repair and binding service. Book selection in schools is assisted by a model library and by lists of recommended books.

The teachers colleges provide courses in school library organisation and service and have developed college libraries directed by qualified librarians. At the Perth Technical College part-time courses are provided on the syllabus for the examinations of the Library Association of Australia and are attended by many school librarians. The Perth Technical College and technical schools are equipped with libraries, and an allocation of funds is provided annually to each school and college department for the purchase of books and periodicals. Books for technical schools other than Perth Technical College are centrally ordered, catalogued and processed by the Library Services Branch.

All high schools are provided with library accommodation and furniture. New high schools have been provided with a main library, reading room, study room and librarian's office. High school libraries are staffed by one or two trained school librarians according to the size of the school. New high schools are issued with books to a value of \$1,000 in each of their first three years. All high schools receive annually an issue of books, as well as being entitled to a subsidy for the purchase of library books. A number of primary schools have organised school libraries in rooms which have become available, or in premises provided by the parents and citizens associations. Annual issues of books are made to all primary schools, varying according to the size of the school, and a subsidy is provided for the purchase of library books. The Charles Hadley Travelling Library provides 400 boxes of books which are circulated to all small schools, mission schools and special classes. Children who are unable to attend school, mainly those in isolated areas, are provided with books from the Correspondence School's library.

Tasmania. All the State's municipal libraries have Lady Clark Memorial Children's Libraries. The Lady Clark Memorial Children's Library in Hobart has 27,000 books and serves schools in the Hobart metropolitan area by bookmobile. More than 150 schools which are not close to a municipal library have collections of books on loan from the Lady Clark Memorial Children's Library.

Special libraries

Before the 1939–45 War the number of special libraries, apart from those maintained by government departments, was small, but during recent years many manufacturing, commercial, research and other firms, as well as statutory bodies, have found it necessary to establish special libraries to serve their staff. These libraries, which are most numerous in Sydney and Melbourne, are being increasingly administered by trained librarians.

Archives

General interest in archives in Australia was aroused in 1888, when the Colony of New South Wales celebrated its centenary, the occasion being marked by official publication in 1889–1894 of the *History of New South Wales from the Records* by G. B. Barton and A. Britton, and in 1893–1898 of the series of *Historical Records of New South Wales*, edited by A. Britton and F. M. Bladen. Both publications were based on transcripts of documents in London which had been made by Mr James Bonwick, appointed Archivist by the Government of New South Wales in 1884.

In 1902 Mr F. M. Bladen presented to the Commonwealth Government a report on European Archives (see *Parliamentary Papers*, 1903, Vol. II, p. 993), in which he recommended the establishment of a Commonwealth Archives Office and the copying of further official records in London. The copying project continued and some of its results were embodied in the volumes of *Historical Records of Australia*, published by the Commonwealth in 1914–1925, under the editorship of Dr J. F. Watson.

Measures for the preservation and storage of original documents were not taken until later years. In the absence of duly constituted archives offices, the various major libraries throughout Australia undertook the collection of historical records, both from official and private sources. An Archives Department of the Public Library of South Australia was established in 1920, and other institutions formed archives branches in 1944 (Commonwealth National Library), 1945 (Public Library of Western Australia), 1948 (State Library of Victoria), 1949 (State Library of Tasmania), 1953 (Public Library of New South Wales), and 1959 (State Library of Queensland). Legislation to govern arrangements for official records was passed in South Australia in 1936 and in 1943 in Tasmania and Queensland. Since 1961, separate authorities for official archives have been established: Commonwealth Archives Office, 1961; Archives Office of New South Wales, 1961; Archives Office of Tasmania, 1965. A Business Archives Council was established in 1954 to co-ordinate activities in the field of company records.

Commonwealth Archives Office

In 1943, following a report by an inter-departmental committee, the Prime Minister directed the formation of a War Archives Committee to arrange for the preservation of war records. This Committee recognised that war archives could not be separated from peace-time archives, and in 1946 the name was changed to the Commonwealth Archives Committee. In 1952 the National Library became the sole archival authority for the Commonwealth and the Chief Archives Officer became the Executive Officer for the Committee. In March 1961, in accordance with a recommendation of the National Library Inquiry Committee, the Archives Division of the National Library was reconstituted as the Commonwealth Archives Office within the Prime Minister's Department. The Archives Office functions, in part, as a central agency for the control of those records created by the Commonwealth Government which are no longer required for frequent use in the day-to-day business of government and which, in many cases, contribute towards the development of a unique record of the heritage of the Australian nation. As a complementary function the Office also provides services for members of the public. These functions are carried out through the following basic activities.

Registration of record series. The Office maintains the Commonwealth Register of Record Series, in which details of all Commonwealth records are entered, including those in government departments as well as archival holdings. The records of the Commonwealth are particularly varied, ranging from early Customs, Post Office, Defence, and other material transferred from the Australian Colonies and States, to records of territories now under Australian administration, in addition to those of the Commonwealth Government proper from 1901. Some papers from non-official sources are also held, such as the records of enemy firms expropriated during the two World Wars, records of the Chaplain of Norfolk Island, and papers of former Commonwealth ministers and officials.

Control of destruction. No Commonwealth records may be destroyed without the concurrence of the Chief Archivist, whose responsibility it is to safeguard broader national interests as distinct from those of the department which compiled the records. This concurrence is given as far as practicable through continuing disposal authorities which enable Commonwealth departments to destroy certain routine classes of records automatically, but records not covered by such continuing authorities are checked before destruction is authorised. Records selected for permanent preservation are assessed as having evidential or informational value to the nation. In the first category are all records documenting the democratic, constitutional, and legal basis of the Commonwealth Government; the origin, development, organisation, functions, policies, and substantive activities of Commonwealth departments; and the rights and entitlements of Australian citizens. These range from the signed copies of Acts of Parliament to duplicate certificates of naturalisation. The second category, while including many records from the first, also covers source material considered of value to researchers in social, economic, and scientific affairs (such as migrant documentation preserved for demographic purposes) and the nation's cultural and technological heritage (represented, for example, in records of copyrights and patents).

Provision of accommodation. Any records which are no longer in active use but which are considered by the originating department or by the Archives Office to warrant preservation, either permanently as national archives or temporarily for a further specified period, may be transferred to an archives repository. While in archival custody they are analysed, arranged, and described, as resources permit, by a wide variety of processes, so that the broadest range of research interests may be served by a comprehensive system of information retrieval. At 30 June 1967 the total holdings of the Archives Office throughout Australia amounted to 300,000 shelf feet of records, including 120,000 feet of permanent material, such as files, manuscripts, registers, cards, books, maps, plans, models, paintings, films, photographs, microfilms, recordings, and tapes, conservatively estimated to be more than 5,000,000 items.

Provision of information. Records in the custody of the Archives Office are available for use by depositing and other departments of the Commonwealth Public Service. During 1966-67 some 248,000 items were lent to departments. The Office also provides departments with special searches and information from the records in its custody (12,500 requests in 1966-67). In accordance with the Commonwealth Government's access rules, the Office also supplies information to members of the public engaged in academic or other forms of research. Records may be consulted by holders of a search ticket in the public search rooms provided. During 1966-67 enquiries were received from 164 researchers. There were 3,500 daily visits to archives search rooms by officials and the public, and 24,500 items were produced for consultation.

Museums and art galleries

In 1964 an annual collection of statistics on a uniform basis was commenced from Australian museums and art galleries. The following paragraphs provide summarised results of the collection and refer individually to the more important museums and art galleries.

A museum or art gallery is considered to be a building, group of buildings or parts of buildings, managed as a unit and intended predominantly for the permanent display of objects of interest (museum) or objects of art (art galleries) to the general public. Institutions displaying live exhibits are excluded (the more important of these are mentioned on pages 571-2), as are buildings used for temporary displays (exhibitions, commercial galleries exhibiting only for sale) without a permanent stock of exhibits; permanent exhibitions which are ancillary to other activities such as exhibits at council chambers, libraries, hotels, and other commercial enterprises providing services to tourists and sightseers; collections which are not readily accessible to the general public, such as university collections for the use of students and research workers; and historic homes, etc. not specifically intended for the permanent display of objects of interest (i.e. where the building itself and its normal fittings are essentially on display).

Museums and art galleries, 1967

The following table classifies by States and Territories and by ownership the institutions in Australia which have been identified in 1967 as museums and art galleries (branches of museums and art galleries are not shown separately).

MUSEUMS AND ART GALLERIES: STATES AND A.C.T., AND OWNERSHIP, 1967

(a) Estimated.

Some descriptive detail follows in respect of the seventeen major institutions listed in the foregoing table.

Australian Capital Territory

The Australian War Memorial, Canberra. The memorial comprises the national collection of war relics and the building in which these are preserved. The building was opened in 1941. The memorial is administered by a director responsible to a board of twelve trustees. There is a collection of 4,000 art works and a museum collection of more than 40,000 war relics, the gathering of which began on the battlefields of the 1914–18 War and was continued during the subsequent campaigns in which Australian forces have participated. The collection has been enhanced by gifts of relics from the governments of Great Britain, the sister dominions and allied countries, and also by presentations made by ex-servicemen and relatives of those who died. The collection consists of items such as tanks, aeroplanes, submarines, field-guns, boats, and the widest possible range of war trophies down to the smallest items, each relic dependent for its value on its historical background. The works of art, all by Australian artists, depict battle scenes, individual officers and men, etc., and include oil and water colour paintings, drawings, statuary, bronzes, dioramas, and mosaics. There is also a library, which is described on page 558.

The Australian Institute of Anatomy, Canberra. The Institute is described in the chapter Public Health, pages 493–4. It contains displays of biological and anatomical aspects of man and the anatomy of Australian animals. A display of Aboriginal and Melanesian artefacts from the National Ethnographic Collections is temporarily housed in the Institute.

New South Wales

The Australian Museum, Sydney. Founded in 1836, this is the oldest museum in Australia. It is administered by a director and a board of twenty-five trustees as a Government Department attached to the New South Wales Department of Education. It has fine collections of all groups of animal, including insect, fossils as well as mineral and ethnological collections, particularly in relation to Australia and the Pacific.

Museum of Applied Arts and Sciences, Sydney. This museum, with branches at Bathurst, Goulburn, Broken Hill, and Albury, is administered by a director and a board of seven trustees appointed by the Governor of New South Wales. The museum specialises in applied arts (ceramics, glass, oriental arts, costumes, musical instruments, furniture, etc.), applied science and technology (engineering, transport, textiles, electronics, etc.), and among its special features are a Watt beam engine of 1785, No. 1 New South Wales locomotive, Lawrence Hargrave models, colour television, and a planetarium.

Geological and Mining Museum, Sydney. This museum is administered as a branch of the Department of Mines by a curator under the control of the Government Geologist. It is the only one in Australia devoted solely to geology and mining. The display contains a unique collection of ores and economic minerals from New South Wales with material from the other States and from overseas for comparison. Its most important functions are the identification of mineral and rock specimens, several thousands of which are received annually, and the supply of some 20,000 to 30,000 specimens free of charge to schools.

Art Gallery of New South Wales, Sydney. The Gallery originated in the Academy of Art founded in 1871. It is administered by a director and secretary under a board of thirteen trustees responsible to the New South Wales Minister for Education. The gallery has 7,957 exhibits, including 1,664 oils and 161 pieces of sculpture. Australian art in all aspects (except early colonial and native) and modern European painting and sculpture are featured. An Aboriginal art collection includes a unique set of large Melville Island graveposts. Assistance is provided to governments and private organisations in the design of books, coins, notes, etc., the preparation and judging of exhibitions, and the supply of research material and information.

Victoria

National Museum of Victoria, Melbourne. The museum was founded in 1854. It is administered by a director and board of seven trustees. It houses substantial collections in the fields of zoology, geology and anthropology. There is a small branch at Tidal River, Victoria.

Institute of Applied Science of Victoria, Melbourne. The Institute was founded in 1870. It is administered by a director and board of seven trustees. Its collections are concerned with aspects of application of all science subjects, but with special emphasis on transport, astronomy, public health, arms, agriculture, and electronics. A planetarium was opened in December 1965.

National Gallery of Victoria, Melbourne. The gallery is administered by a director and board of seven trustees. Its large collections of over 20,000 items feature paintings by Rembrandt, Tiepolo and the Flemish primitives, Dürer engravings, Blake drawings, and English 18th century furniture.

Queensland

Queensland Museum, Brisbane. The museum, founded in 1855, is the State Museum of Natural Science. It is administered by a director as a sub-department of the Queensland Department of Education. The collections are in the fields of the natural sciences, ethnology and history, and include extensive collections of fossil vertebrates.

Queensland Art Gallery, Brisbane. This gallery was established in 1895. It is administered by a director and board of thirteen trustees. The gallery especially features Australian art of all periods, British modern art, French sculpture, and French paintings from the Rubin collection. The Art Gallery has 1,790 display items, including 559 oils.

South Australia

The South Australian Museum, Adelaide. The museum is a department of the South Australian Public Service and is administered by a director and board of five trustees. It features natural science and anthropological collections. The latter refer to the Australasian and Pacific regions and include an outstanding collection of Aboriginal artefacts.

National Gallery of South Australia, Adelaide. The gallery originated in 1881. It is administered by a director and board of seven trustees. Apart from the usual art gallery collections, devoted chiefly to British and Australian works, it features a large collection of prints containing examples from European, British, Oriental, and Australian schools, and a numismatic collection which is widely regarded as the finest in Australia. It also contains the South Australian Historical Collection and a small collection of weapons. It has 56,626 exhibits, including 2,084 oils and watercolours, and 12,029 engravings and prints.

Western Australia

Western Australian Museum, Perth. The museum was established in 1895. It is administered by a director and board of five trustees appointed by the Western Australian Government. The zoological collections cover all vertebrate and most invertebrate fields, particularly marine. There are collections relating to vertebrate palaeontology and meteorites, fossil invertebrates, and some fossil plants. There are extensive collections of Aboriginal artefacts and European arms and armour.

The Western Australian Art Gallery, Perth. The gallery was established in 1895 and is administered by a director and government-appointed board of five trustees. It features especially collections of Australian paintings, drawings, ceramics and sculpture, a fine collection of Australian contemporary art, and a major Henry Moore sculpture. It has collections of coins and of Western Australian stamps. Altogether there are 3,444 items, including 444 oils and 43 pieces of sculpture.

Tasmania

Tasmanian Museum and Art Gallery, Hobart. Opened in 1887, the Tasmanian Museum and Art Gallery is administered by a board of trustees. It has a branch at Zeehan, namely the West Coast Pioneers' Memorial Museum. The museum part contains zoological, anthropological and geological displays relating to Tasmania. The art displays contain an excellent holding of Tasmanian historical works.

Queen Victoria Museum and Art Gallery, Launceston. This institution, opened in 1891, is owned and administered by the Launceston City Council through a director and a sub-committee of aldermen. It has a branch at Cradle Mountain. Attention is concentrated on collections relating to the natural, biological and historical environment of Tasmania, featuring Tasmanian fauna, Aboriginal relics and historical material. The arts associated with Tasmania are represented by an excellent collection of early colonial period painting and also by a fine collection of costumes, lace and ceramics.

Other museums and art galleries
